ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, JUNE 16, 1883.

NOTES OF THE WEEK.

The great rise in the stock market predicted for the 15th inst. by Mr. Gould did not come off on time, as yesterday there was a decided reaction in prices, and something of the advance which had been made during the previous days of the week was lost. The market had been buoyant after the usual drop of Monday had been recovered from, and the bull cliques, who have been working so hard to keep the market on the rise since the day when the news came from Pittsburgh that there would be no strike in the iron trade, have probably availed themselves of the opportunity to realize profits. They still profess, however, their ability to keep the bull movement in progress; and there is much curiosity felt to see what assistance Mr. Gould will render to that end in the way of advancing the prices of his own stocks.

The trial of the star-routers is a forcible illustration of the fact that the existence of a conspiracy is a difficult matter to prove, and also of the other fact that in a city like Washington there are numerous obstacles in the way of the conviction of a successful and influential contractor for a violation of the law. The public at large are likely to pay very little attention to the verdict just rendered. It will be viewed by them as a failure of justice. In one way the history of the prosecution in this case may be of great service to the people and to those who are entrusted with the people's interests everywhere. It should convince them of the importance of substituting improved methods of administration instead of the loose and careless systems which obtain in so many public offices, and which render possible such frauds as that which the government has made an unsuccessful endeavor to punish. Prevention, in a word, should be substituted for the laborious, expensive and, as the event generally proves, successless process of cure. The inutility of the latter method is seen in the fact that in a city where the Tweed ring was broken on the wheel of public execration it is still possible for a defaulter to dissipate the public funds under the nose of the controller.

In regard to matters such as these, which so nearly concern the public, the newspapers of the country have a duty to perform which they cannot neglect save at the risk of forfeiting a confidence which they assume to believe they now enjoy. Instead of ringing the changes on the epithets and invectives which the language supplies in abundance—a vain and purposeless operation at best—they should be alert to discover and swift to indicate the avenues by which harm may come to the public interests. In this way they might become, in a much truer sense than now, the vigilant servants of the people. The age of vague and rhetorical declamation has, or should have, become a thing of the past; the office of the newspaper of to-day should be to discover, to analyize and to inform. The view which most of the journals of the country take of their duty in this respect is seen in the comments which have been so widely made upon the failure of the government prosecution. They are full freighted with unmeasured denunciations of the star-routers; but have very little to offer in the way of suggestion for the better conduct of affairs in the future. The tone of the press in this respect must be changed if it would retain its influence.

While such journals as the *Evening Post* continue to frown upon the retention of the Board of Aldermen or city council as a distinguishing feature of New York city's government, the city council of Philadelphia have been awarded the power of subpœna to the end that future investigations by that body into the conduct of Philadelphia's business may be of some avail. We have repeatedly argued that the councils of the large cities of the country should be given the power to send for persons and papers. Time and again committees of the Philadelphia councils have vainly attempted to investigate abuses. Witnesses refused to testify, as the "subpœna" of the committee was no more than a polite request. We believe that the local legislature of every city having an annual budget of $5,000,000 or over should be authorized to send for persons and papers, and to send to jail for refusal to testify. To the point that the possession of such a power by city councils would be very liable to abuse, the sufficient answer is that all power is liable to abuse, and that beyond this a remedy is at hand in the courts for unwarranted imprisonments.

When writing in BRADSTREET'S on the supposed rise in the purchasing power of gold we said: "The fall in the price of commodities, so far as any general fall can be proved, is just now to be traced to the fact that all over the world production, through the development of machinery, the quicker transmission of intelligence, etc., has been carried to a very high point. So much so, indeed, that, taken with the increased competition and reduced profits, prices have to an extent been generally forced downward." This on March 17, in reference to Mr. Goschen's statement in the House of Commons of his belief that "a considerable appreciation had taken place in the value of gold, and that this had had a general effect on the prices of almost all commodities, unless there were very special counteracting circumstances."

The position taken by BRADSTREET'S in March is now supported by M. Leroy-Beaulieu in the *Economiste Français*. Mr. Goschen's belief of an appreciation in the value of gold is entirely dissented from, and it is argued that the cause of the fall of prices, where there has been a fall, is simply due to improvements in the mode of production or a better organization in the system of distribution. If steel is lower, the principal, if not the sole, cause is improvements in the process of manufacture, and the fall in lead is due to the discovery of richer mines and less costly modes of extraction. The cost of transport has become reduced from the progress of steam navigation; shorter and safer routes have been opened, as by the Suez canal, and the rates of insurance have consequently diminished. The telegraph has permitted agents and intermediaries to be dispensed with, and the same capital can now perform three or four times as many operations as fifteen or twenty years ago. There has consequently been a tendency in wholesale prices to drop. That phenomena, says M. Leroy-Beaulieu, independently of the mystical or mysterious cause called an appreciation in gold.

Beyond this, we are now of the opinion, after examining about all that has appeared apropos of Mr. Goschen's position, that there is more reason to believe that less gold is now needed through the effect of better means of transportation and the development of the clearing-house principle than the contrary. It is clear that Mr. Goschen and those who believe with him have been unable to sustain their assumed position. The *Economist*, through a striking mastery of facts, has shown that Mr. Goschen is wofully out of the way in his statistics. Altogether, the bimetallists (so-called) are not getting on well. The remedy, so far as any exists, for the embarrassments following upon the fall in silver, due to its partial disuse, is to further its use as subsidiary coin in every proper way, and by adhering to the one standard measure of values, gold, to give greater steadiness to the credit system, which becomes more sensitive just in proportion as the clearing-house principle has further development.

At the Chamber of Commerce, on the 13th inst., a conference was held between the New York State Railroad Commissioners and a committee of merchants representing the dry goods trade; the latter presented a paper submitting definitely their views in writing regarding the classification of domestic cotton and other low-grade fabrics on the west-bound traffic. With but few exceptions all plain manufactured goods of cotton, jute and hemp are requested to be classified under the fourth class. The New York State Commissioners have been requested to report their answer to the committee by the 26th inst.

In an address which he delivered before a large audience in Birmingham on Wednesday, Mr. John Bright reviewed the events of the last fifty years, laying stress on the enormous advantages conferred upon England by the repeal of the corn laws. Referring to America, Mr. Bright said that he was no enemy of the United States, but, on the contrary, had fought her battles in England. He expressed the belief that the issue in the United States between a protective and simply a revenue tariff was nearing its solution. Irresistible economic facts, he said, were offering themselves for the consideration of statesmen, and in fact of every intelligent man in the great republic. The extraordinary condition of things existing in the United States—the possession of a hitherto undreamed of surplus revenue—would, he thought, be fatal to the high protection party. The speaker said he believed that the next election in the United States would be fought on free-trade lines, and that the people of the United States would declare it one of the "inalienable rights" of every American citizen to spend his money in the world's cheapest markets. Many people on this side of the water will regard Mr. Bright's prophecy as rather premature. His speech is interesting, however, as recognizing the growth of the inherent strength of the country, which must eventually compel a profound modification of its present policy. There are, doubtless, many persons in this country who regard an Englishman as in no way entitled to speak in relation to the commercial policy of the United States. The narrowness of such a view is sufficiently apparent when one recollects the extent to which England is a purchaser of our wheat and corn and cotton.

WHY STAR ROUTE FRAUDS ARE POSSIBLE.

The government has just commenced suit against the star route contractors known as the Parker-Saulsbury combination for $300,000. Civil suits against other contractors for like amounts are in contemplation. The government claims that it has been defrauded by dishonest star route contractors in the course of years of millions of money. Yet it is well known that the checks upon the payment of money from the Treasury are very numerous, and that it is almost impossible to fraudulently obtain money in the ordinary payments by warrant. The question has been often asked how then it is possible, under these circumstances, that the star route contractors could, with such apparent ease, have obtained such vast sums of money for service which was not rendered or for expedition which was illegally secured. The question has never been satisfactorily answered.

One answer, possibly, may be, because men have been dishonest. But that does not answer the question, as the checks upon the payment of money from the Treasury have been specially devised to guard against dishonesty. The answer, aside from the dishonesty of men, is simple to one familiar with the system of accounting of the Post Office Department, and it is a matter of surprise that in all the inquiries which have been made in Congress no one has as yet suggested the change of system which, more than anything else that has been proposed, would make it impossible for such fraudulent payments to be made. The Post Office accounts are kept in a very different manner from those of any other branch of the public service. The department is not under the system of accountability which applies to every other department. The revenues of the Post Office Department are not, like the revenues of every other department, deposited to the credit of the Treasurer of the United States in his general account, but are carried to his credit simply in a special fund, over which the Treasury Department has no control whatever. The accounts of all other departments are paid out on warrants of the Secretary of the Treasury, which have to be countersigned by a controller, and these warrants do not receive the countersignature of a controller until they have undergone the closest scrutiny in that office. The Commissioner of Customs of the Treasury, who is simply an accounting officer, ranks in this category as a controller. His counter-signature is necessary to all customs expenditures.

The funds of the Post Office Department are drawn out of the Treasury, however, simply on the warrant of the Postmaster-General, countersigned by the Sixth Auditor, popularly known as "the Auditor of the Treasury for the Post Office Department." The Sixth Auditor of the Treasury is only nominally an officer of the Treasury Department, and he has no practical relations with that department. His office even is not in the Treasury Department building, but is in the Post Office Department building, where his large force is employed. The clerks of the Sixth Auditor are nominally appointed by the Secretary of the Treasury. Beyond that there are no business relations between the Sixth Auditor and the Treasury Department. In case a contractor is aggrieved there is, within a year, an appeal from the decision of the Sixth Auditor to the Secretary of the Treasury, but there is no one representing the government to appeal from any decision which the Sixth Auditor may make against the government. His rulings, in point of fact, are final. A dishonest contractor, who, by such combinations as are said to have existed in the past, has secured the approval of the Sixth Auditor to his warrant will not, of course, appeal to the Secretary of the Treasury, and, as the law requires no other check above the Sixth Auditor, the mere approval of that officer passes the money from the Treasury. All warrants paid on account of any other department not only have to be passed upon by the Auditor of the Treasury charged with the supervision of the accounts of that department but also by the First Controller. There are, therefore, two important checks. In the Post Office Department accounts there is no check over the Sixth Auditor. If, therefore, as was charged, the Sixth Auditor should be in collusion with the Second Assistant Postmaster-General, who has charge of the contracts, it is very easy to see how warrants which passed the vast sums of money improperly were approved.

The system is an old one. It originated before the era of railroads, when it was much easier for postmasters to strike their balances in their own offices than to send their accounts to Washington and have them audited there. The law of March 3, 1849, provided that the gross amount of money, received from whatever source for the use of the United States, shall be paid by the officer receiving it into the Treasury at the earliest practical day, without any abatement for any cause. From this law the revenues of the Post Office Department were excepted, and by reason of this exception the greater part of the postal revenues is received and disbursed by postmasters without actually going into the Treasury. It is carried into and out of the Treasurer's accounts by warrants for the gross amounts involved, which are issued at the end of every quarter. During a recent fiscal year, for instance, out of the $40,000,000 of revenue from the Post Office Department only $15,000,000 were actually deposited in the Treasury. It cannot be questioned that disbursements made from funds in the possession of the postmaster cannot be so well controlled as disbursements which can only be made upon a warrant issued by the head of a department.

The Treasurer of the United States has repeatedly called the attention of Congress to this defect in the system of accounting. As early as 1877, in transmitting his report to Congress, General Spinner said:

"All other accounts, civil or military, or of whatever branch of the public service, are finally passed upon, adjusted and settled by either the first or second controller of the Treasury. Neither of the controllers has any legal authority to review, decide upon, or in any manner control in the two kinds of accounts above named. The final settlement and the correct payment of these accounts should be under the supervision of a controller or other proper officer designated for that purpose. As matters now stand in regard to the two classes of accounts named, this office is not only inconvenienced and imperiled, but it has great responsibilities thrown upon it that do not attach in other cases, and ought not in those named.

"It is feared that, through the loose, irregular and anomalous manner in which these accounts are settled and paid, sooner or later the government will suffer serious losses. A loss to the Post Office Department some years since, supposed to have been caused by the collusion of the then postmaster in the city of New York and an officer of the Treasury Department, and the recent loss to the government through an agency account, would probably have been avoided had there been a proper officer of the Treasury Department to review the adjustment and the settlement of these classes of accounts and decide upon the sufficiency of the receipts given in payment therefor. It is suggested that the office of a Third Controller be created to take all these accounts and their final settlement in charge, or that they be given, like all other accounts, for adjustment, settlement and evidence of correct payment of the draft or check issued thereon in charge of one of the present controllers of the treasury."

But Congress has not chosen to act upon this suggestion. This system of accounting could be changed by repealing the law which exempts the post office revenues from the general provision of the law of 1849, and possibly by repealing that portion of the statutes which allows postmasters to pay their expenses directly out of their receipts. But whatever means may be considered wise, the experience of the government in the expenditures of post office funds for the last five years would indicate that the payment of moneys from this department should at least be subjected to as efficient checks as those which surround the expenditures of money from all other branches of the government.

AN ABUSE OF CORPORATE POWER.

In the column devoted to railroad news in one of our contemporaries the following item appeared on Wednesday last:

> The net earnings of the New York Central for the first seven months of the current fiscal year, from October 1 last, show an increase of about $3,253,000. The net earnings for May increased about $127,000.

The source of this information is perfectly well understood in Wall street, and was intended to be when published. It came from one of the Vanderbilt brokers—possibly Kissam, Whitney & Co. We have no doubt whatever of the correctness of the figures given or of the correctness of other items of a similar kind which at certain times find their way into print from the same sources. Nevertheless, we have no hesitation in saying that they deserve to be stigmatized as scandalous. The information given in the form it appears above is given purely for speculative purposes, and while pretending to state what the earnings of the New York Central are, really conceals them. The New York Central, and the other companies embraced in what is known as the Vanderbilt system, are dishonorably distinguished by their persistent refusal to publish their earnings. They publish nothing but what the state law wrings out of them once a year. A yearly report to the State Engineer they must make, but except for this their books are sealed to all but a few "insiders," from whom emanate such misleading statements as the above. It will be noted that the statement there made is of a certain increase over the earnings of a similar period in the previous year. What was the amount of these earnings upon which the increase was made? No one can tell except the favored few who have access to the company's books. Whenever there is a bull movement in the stock market in which the Vanderbilt interests are concerned such items mysteriously appear in the newspapers, their intent being to bull the Vanderbilt stocks. Meanwhile, the publication of the company's gross earnings, monthly or weekly, which would really give some idea of what business it was doing, is studiously withheld. The Pennsylvania Central publishes a monthly report both of gross and net earnings, as closely as the latter can be made up. Other large corporations publish weekly and monthly returns. The New York Central and its allied companies publish nothing. There is no excuse for this. It is done admittedly for speculative purposes solely. Mr. Vanderbilt has virtually said that it was because it might sometimes have a bad effect on the stock that no publication of earnings was made. This might be excused for a young and small concern just struggling into life; but when vast corporations, with millions of bonds and stock out in the hands of investors, and whose system of roads constitute one of the main arteries of commerce of the country, are handled avowedly for speculative purposes, it is nothing less than a public scandal. These companies should be compelled by law to make a monthly return of their gross earnings, and the railroad commissioners would do a great service to the investing classes if they should enforce this healthy requirement. As if to emphasize the grosser features of this reprehensible speculation, the companies referred to did publish their weekly earnings when they were swollen by the traffic coming from the large crops of 1880. The earnings then were very large, and the price of the stocks rose to correspondingly high figures in the stock market. The "insiders" sold out their "speculative lines" at those prices, and as soon as the earnings began to decline their further publication was stopped, and none have been published since. In place of them, such items as the above are given out from time to time from the offices of the Vanderbilt brokers.

THE ANTHRACITE COAL COMBINATION.

Considering the depressed condition of general industries and the disinclination of manufacturers to purchase large stocks of anything, the anthracite coal trade is in a very healthful state. Its outlook is as favorable as was expected even under improved commercial conditions. As pointed out in these columns, the late impending strike among the employés of the western Pennsylvania iron mills would not, had it taken place, have had much if any effect on the anthracite market, as said mills burn bituminous coal. On the other hand, a stoppage of the Pittsburgh district mills would have thrown extra work into the Pennsylvania mills east of the mountains. This would have reacted to the direct benefit of the anthracite mine owners, yet, strange to say, there was an advance on coal-road stocks upon receipt of the news that the strike would not take place. Finding the identity of the anthracite transportation and mining companies unquestionably suggested the attacks made during the past year or so upon the so called "anthracite coal ring."

But the anthracite coal combination is a far more fragile affair than the trunk-line pool, which is bound by contract and forfeitures. Whether its workings have always been for the public's best good or not—so far as was consistent with the com-

pany's pockets—it is unnecessary now to discuss. The coal business, no less than other successful enterprises, is not conducted on a sympathetic or emotional basis. The original cause for concerted action by the leading anthracite producers appears to have been sufficient. The capacity of the coal lands is, of course, far in excess of the demand to-day or for years to come. The stimulus existing to underbid for contracts, or to throw stocks into the market to the serious injury of neighboring producers, was, therefore, a great one. Something like fifteen years ago a meeting of leading producers was held, and a general understanding arrived at, in order to prevent the accumulation of large stocks at the mines, to arrange uniform circular prices, and kindred matters. That the consumer probably regards this arrangement less favorably than that of independent action and free competition by the various companies goes without saying, but the criticism can hardly reach far enough to include charges of extortionate prices for coal. Assertions of this sort have been made by well-known men several times within the past two years. They claim, roughly speaking, that coal ought to be laid down here $2 per ton cheaper, and that the profits of the mining companies and the carriers—the same people in each case—are responsible for this overcharge. The coal-rate war of five or six years ago tells a different story. When the Lehigh Valley Coal Company decided to throw vast quantities of coal into the market at auction, coal dropped to something like $2.50 per ton, about $2 less per ton than the price now. But one coal road became bankrupt trying to compete, and there were two others which lost an enormous amount of money in the same way. This was a golden opportunity for the consumer, doubtless, but as a matter of business it can hardly be regarded as a wise policy to follow or encourage. In price coal has steadily cheapened, and is to-day relatively cheaper than many other staple products, comparing quotations for twenty years. In regard to the restriction of work at the mines certain days in the earlier months of the year, and which has been sharply commented on, it will be recalled, while the question remains open, that any tendency to produce in excess of requirements can only be met by stopping production. The iron furnaces in Pennsylvania to-day illustrate this. There are 337 furnaces now idle, out of a total of 688 in the country. These furnaces might have gone on making pig iron and piling it up in yard, and in the same way it must be admitted that the anthracite companies might dig coal six days a week right through the year.

On Saturday last a cock-and-bull story came from Philadelphia that the coal companies were completing arrangements to sign a formidable contract which would make the mutual agreement combination of to-day sink into insignificance by comparison. The Reading, Jersey Central and Lackawanna were to control the new organization, but this was softened by Mr. Gowen being quoted as saying that "the combination was not intended to be arbitrary, but merely to protect the interests of those who were in its membership, to hold the trade in good shape and strengthen weak points." There is every reason to believe that such an arrangement is at present impossible. All of the parties to the present mutual agreement as to interests cannot be induced to go into such a project. There are some whom it is not desired to push one side and who will not "pool their issues" in the way described. But, beyond all this, leading coal company officials in New York say that they know absolutely nothing of the new scheme. To one gentleman in New York Mr. Gowen has denied that he ever made the statement quoted above. The facts seem to be that the so-called "coal monopoly" is regarded as such because a comparatively few companies have acquired most of the known anthracite tracts in Pennsylvania, and because they have also had the means and the business sagacity to go into the transportation of coal as well. These would be powerful factors in an attempt to grind the public, but coal has been growing cheaper. The burden of complaint, therefore, will have to rest upon the charges made for bringing the coal to tide-water. This is a weakness common to most railway companies. As railway owners the coal producers are said to charge good round carrying rates. But the fact still pursues the investigator that coal has been getting steadily cheaper.

THE FRANCO-CHINESE COMPLICATIONS.

France appears to be definitely committed to an aggressive policy in regard to affairs in Tonquin. Whatever might have been the possibility of avoiding dangerous entanglements before the death of Captain Rivière, it is certain that since that event the matter has assumed a most unpromising aspect. Recent cable dispatches are conflicting in regard to the preparations being made by China to enforce her claims as against the pretensions of France, but it is hardly to be doubted that the Celestial Empire will adhere to its traditional policy of maintaining a neutral zone of states about it as a defense against foreign aggression. This policy would be seriously endangered by the unhindered advances of the French, so that, taking all the circumstances into consideration, the probability of a conflict between China and France is becoming more and more likely. That the enterprise begun by France is attended with difficulties will be readily understood by every one who recalls the history of the relations between the eastern and the western peoples; the attitude of China suggests a distinct and easily appreciable danger. The tone of feeling in France is another element that must not be omitted from consideration. Smarting under her loss of prestige in Europe and ashamed of the role she was made to play in the Egyptian matter she feels that something must be done to redeem her traditions, and accordingly much is said within her borders of the necessity of acting "with vigor and promptitude."

That France has committed herself to a course of action full of hazard seems to be generally recognized in Europe. The independent German press addresses a note of warning to the French, but the semi-official journals on the other hand are not wanting in notes of encouragement, which, it is suggested, are not entirely unprompted by malice. The English press in general discuss the situation with judiciousness, though perhaps with a certain sharpness of temper arising from the recollection of the important British interests at stake in the East. The extent of these interests will be seen from the fact that about three-quarters of the foreign trade of China is carried on with the United Kingdom and India or with other British dependencies. A large part of the revenue of India is derived from the exports of Indian opium to China. British shipping also is largely engaged not only in the foreign but also in the coasting trade of China. It is easy to see that, in the event of a war between France and China, this important trade is likely to be very seriously disturbed. Especially would this be the case if an attempt were made to blockade the extended coast line of China. Thus, it will be perceived, the outbreak of hostilities might lead to grave complications between France and England, especially as the latter will not be likely to view with complacency the establishment of a French Asiatic empire to rival her own.

Such difficulties as those referred to are almost certain to arise in the course of hostilities, whatever may be the result. If France should be successful the close of the nineteenth century might witness a renewal of the old colonial rivalry of which the East was the scene in the last century. In case France should be unsuccessful European influence in the East would be seriously shaken, and the old conflict between the East and the West might be reopened. That a sufficient body of prejudice exists among Asiatic peoples to render a struggle between the native and foreigner a bitter one, there is ample reason to believe. Here again France is treading on dangerous ground, and from this point of view she is by no means solely concerned with the results of her enterprise. But whatever the outcome of events in the East may be, they are likely to be the sources of grave embarrassments to France at home. The state of her finances has of late engaged the serious attention of her statesmen and economists. The expense of a war with China, which would be likely to be a protracted one, would put a severe strain upon the resources of the country, and in the present state of opinion those financial troubles might lead to far-reaching consequences. On the whole the situation is one to be regarded with concern, both because of the commercial interests involved and the general results likely to follow the apparently impending struggle.

THE LUMBER TRADE.

The lumber interest of the country, second only in importance to that of iron, represents an annual output exceeding eight billion feet, of which amount Chicago, the leading market for the vast pineries that crowd the northern slopes of Michigan and Wisconsin, distributes one-fourth. The consumption of lumber tends to increase in the eastern, middle, western and southwestern states, and following on this progressive demand and the augmenting cost of securing supplies is a general advance in price. The Chicago dealers testified before the Tariff Commission that the average has risen from $9.63 per thousand feet for the three years 1877, 1878 and 1879 to $11.63 in 1880, $13.92 in 1881, and over $14 in 1882. It is difficult to imagine a great industry like that of lumber suddenly arrested for want of supplies, but the most reliable authorities place the period of comparative exhaustion at fifteen years. The estimate of ten years formerly entertained was based on the amount of timber which would yield not less than 20 per cent. in grades common to fine, when government selections were neglected even at prices of $1.25 to $2.50 per acre; and no pine timber was considered worth cutting which measured less than sixteen to eighteen inches diameter at the butt; when the logging district of Michigan and Northern Wisconsin was almost unknown, and the merchantable timber of the south, now extensively made available by railway connection, was underrated. The encroachments, however, on the pineries of the west and southwest cannot be made good, the land being too serviceable for agriculture, while in the south crops of cotton, sugar, tobacco, corn and oats prove far more profitable than timber-growing. Each year timber has to be sought further back. After damming up every available creek by which logs could reach the rivers, logging railroads have been constructed to the water. The process of denuding lumber lands is hastened by the "butchering" going on to supply the quantity demanded by the voracious mills. Did lumber command a far higher price much of the timber brought to market would be reserved for further growth. It is a common saying that not one tree in four, owing to inherent defects, is suitable for logs. Anticipatory of future requirements, and with the prospect of heavy advances in price, large sections of land containing choice descriptions of white and yellow pine are, with a limited extent of hardwoods, being bought up to hold by eastern and New York capitalists. Of the profitableness of such investments there can, of course, be no question. The forthcoming failure of supplies exercises no immediate effect on the market; the probable and actual supply of each successive lumber season is the main concern of the trade, the future being left to take care of itself. The general policy of the lumber trade is to buy for the present demand, based on a large supply and in this it is pursuing the same course as last year. As to outside resources, Canada offers immense supplies. Nova Scotia and New Brunswick will long continue their exports of spruce; Mexico, with her rich timber lands of qualities of wood suited to this market, including walnut, ebony, mahogany, oak, hard cedar, hickory and sycamore, promises in no long time to be an important source of supply, as railroads, cutting through her forest reserves, are now being rapidly built under the influence of state and government concessions.

Among the influences operating on the course of trade, and slightly affecting prices, are the rates of freight between competitive points. The opening of navigation on the lakes is always the signal for material reduction by the trunk lines between the west and east. Freights on the lakes this season are somewhat lower, while canal transportation has risen, owing to the successful demands of the boatmen for higher wages. Railroads are getting more into the lumber trade than formerly through trunk lines reaching wooded belts previously untouched, the building of new lines depending as a source of revenue on timber traffic both for neighboring consumption and distant shipment, and the extension of tributary lines to the ever receding sources of supply.

Trade organization among lumbermen, for the establishment and maintenance of schedule rates, encounters special difficulties, owing to the many sources of supply and the wide area of operations. Walnut is under more complete control than any other wood, owing to limited supply of the best timber, and this being held in comparatively few hands. The spruce market is effectually controlled by an association formed by prominent lumber men of Maine, New Hampshire, Vermont and Rhode Island, who represent an annual product of 250,000,000 feet, about one-half the whole amount obtained. Dealings in pitch pine have been better organized than formerly, the main point being to prevent a serious break. Organization always fails in New York, this being a market for consumption, not distribution. The general tendency of New York dealers is to buy direct from the primary sources of supply and overlook intermediate markets. Many of them have agents constantly in the woods buying up desirable lots or making arrangements for prompt deliveries. The New York lumbermen may be credited with enlarging by sheer enterprise the sources of supply, one instance of which is their bringing into extensive use the white pine and hemlock of Pennsylvania, against which a decided prejudice existed, the supplies being formerly taken extensively by Philadelphia and Baltimore. There are no manufacturing centers in this state except for spruce lumber at Glen's Falls. Albany, Tonawanda and Buffalo are the great distributing centers. Wholesale dealers in lumber in all parts of the country have a standing complaint against agents of manufacturers who ship direct to consumers, and, in many cases, at prices irrespective of quantity, thus seriously handicapping them; but there is a tendency to this in all trades, and the practice must be accepted as a necessary feature of the trade consequent on the widening of the area of transactions, the increase of competition, and the narrowing of the margin of profit.

The special qualities of timber of different localities exercise an important influence on distribution as they become better known, leading to more distant sales. A good market is found here for the redwood of California, being valued for the fine polish it is capable of receiving. The great length of the pitch pine of the south renders it specially suitable for railway bridge work and large struc-

tures, causing it to be extensively used for the first purpose in the northwestern states, while here we have numerous important buildings in which it finds exclusive use for flooring. Many cargoes of it go to Maine for shipbuilding. In the hardwood trade many qualities which formerly were valueless, or had little mercantile value in the localities where they abounded, are coming to the front, including woods which serve for veneering purposes, as substitutes for the more valuable. The redwood of California has lately made an important advance owing to the demand here. Black birch now largely takes the place of cherry, which is scarce and dear, for furniture, it being also stained as a substitute for walnut. The substitutes, indeed, for valuable woods, either stained or polished to give them the same appearance, materially swell the aggregate of trade in fine woods. Thus the red gum is coming into favor as a substitute for walnut, taking as fine a finish and its color being as attractive, and so finding use for cars and furniture.

We export lumber to nearly all the markets of the world. Our pine goes to Central America, the West Indies, South America, Australia, and even Africa, as well as to Europe, where not only the United Kingdom and northern Europe are consumers, but where Italy and Spain buy largely, supplies being also distributed over the Mediterranean islands. Here we may note that New Orleans is rapidly gaining ascendency in the gulf ports in the exporting trade. A good proportion of the pitch-pine that goes to Europe is shipped direct from Florida and Georgia.

The present development of the lumber trade would be impossible but for the number and enormous capacity of the mills, one of these in Williamsport, Pa., turning out 125,000 feet per day. At Muskegon, between Detroit and Chicago, within which and its suburbs there are forty mills, one has lately been erected with a capacity of supplying 700,000 shingles per day and 50,000 feet of board. In the west and southwest mills of inferior construction are largely giving way to more substantial concerns. Account must also be taken of the great advance—an advance, by the way, quite modern—in wood-working machinery, as in mortising and boring machines. The speed and power of these machines enables various industries to cope with other competing materials than lumber, and particularly serve the important car railway interest. We may remark in conclusion that by the time timber ceases to be obtainable substitutes will no doubt be found, even if in such substances as straw lumber, the ingenuity of man being boundless, and always proving equal to coping with any great exigencies.

LOCAL GOVERNMENT IN LONDON.

A correspondent at London writes as follows under date of May 28: The report of the Metropolitan Board of Works was issued last week for the year 1882, and, as usual, has formed the subject of a number of articles in the press. Some of these might lead strangers to suppose that this board formed a powerful representative body, whose work it was to carry out the wishes of the people of London. But that would be a very great mistake. In reality the Metropolitan Board of Works is one of the most curious emanations from the compromise-loving English legislature that it would be possible to find. This great city, with its four millions of inhabitants, has, in the true sense of the word, no self-government whatever. A small space of about a square mile, situated in the heart of it, is called the "city" proper, and over that space a Lord Mayor and corporation of aldermen and common councilmen preside; but these owe their position to an antiquated suffrage resting upon privileges bestowed in former generations upon trading and working guilds or companies. Hence, within the city proper there is no popular control, and the mayor and corporation administer large revenues, mainly according to their own will and pleasure, subject at best only to such checks as the houses of Parliament may see fit to impose. Hitherto these checks have been comparatively few, and the city companies and corporation together are allowed to waste in one way or another about half a million sterling of public and trust money every year without let or hindrance.

Outside the city the unit of self-government is the old parish vestry or meeting of parishioners. The rural parishes that have gradually become part and parcel of a densely populated city retain their old means of regulating local affairs. The London parish vestrymen are elected nobody knows how; certainly not by the popular vote, because the class of men who usually put themselves forward for the position are too far down in the social scale to attract any votes except those of people whose ends their return may serve. The small shopkeeper, local builders of what we call the "Jerry" order, the "sweating" tailor, needy journalist, ready to do odd jobs in the way of smoothing the press over for a consideration, small jobbing printers, petty manufacturers, whose works may threaten to become, or may actually be, a public nuisance—these are the people who form London vestries, and who, as vestrymen, have the comfort of millions of their fellow-countrymen in their hands. And from these bodies it is that the London taxing organization has sprung, as well as the Metropolitan Board of Works. The vestries have the control of all local road-making, street-paving, small draining works, and of all nuisances. They also appoint the parish "overseers," and these overseers, together with the guardians of the poor, often, though not necessarily the same men as the vestrymen, assess the local taxation each year and fix the valuation of the property to be assessed at least once in five years. This latter power was given to them by an act of Parliament passed about fourteen years ago, the working of which has proved to be extremely vexatious and oppressive. By its means these taxing bodies, who are practically quite irresponsible, except in a feeble way to a government department called the Local Government Board, can disguise the speed at which taxation is increasing by the simple process of "valueing" a man's rental or property at a higher sum than it previously stood at. They add the "unearned increment," in short, and then proceed to place the tax upon that. Popularly the supposition is that the taxing bodies charge the rates upon the gross rental, less one-sixth allowed for repairs, etc., but in actual fact a man is often assessed upon more than his rental, and if he has the misfortune to own the house in which he lives the rates may be screwed up upon him almost without limit.

The Metropolitan Board of Works itself is a kind of glorified vestry, and was created in 1855, principally for the purpose of superintending the construction of a complete sewerage system for the metropolis outside the old city boundaries. Within the city there is a separate board for this purpose called the Commissioners of Sewers. The Metropolitan Board is composed of 46 members, delegated by each vestry or group of vestries within the metropolitan police area, and of a chairman who receives a salary of £2,000 a year, the rest being unpaid. As time has passed the powers and duties of this queer organization have been enlarged until it now overlaps that of the local vestry or district board at nearly every point. It controls all main drainage works, and the vestries control the lesser drains; all parks and public spaces within the metropolis are kept in order by it, and the vestries clean, water and light all streets; it governs and keeps in repair the freed bridges over the Thames, and latterly it has received power to deal with spaces cleared for the erection of workmen's dwellings. The vestries, however, control local nuisances. The Metropolitan Board has power to contract debts, and so has the vestries through it; but the latter are limited, whereas the former can borrow as much as Parliament chooses to sanction. To cover the interest and amortization of this debt it can make a charge upon the rate-payers as well as for the expenses of all its public undertakings—embankments, bridges, etc.—but the actual assessment of this rate falls to be done by the overseers and guardians of the poor as above described. Upon this old-world institution, in fact, claims pour in from every side. The local government board, a branch of the imperial government, fixes the proportion of the common poor fund payable by each parish, the Metropolitan Board sends in its precept or demand, the London School Board (an entirely distinct body, elected by household suffrage) does the same. There are charges for lighting, for police—the metropolitan police beyond the city bounds being under the direct control of the Home Secretary—for highways, for the fire brigade, and so on. When all these come in to the overseers and guardians they are added up, together with the vestry's own local charges, and the rate of tax per pound is then fixed, and notice of it sent by the vestry clerk to each rate-payer in his parish or district. The rates thus constituted have risen at a great pace of late years in spite of the quinquennial increment put upon the values of property, and now range, all included, at from 5s. to 6s. in the pound upon the net rental charged. For example, suppose that the overseers and guardians fixed the annual value of my house at £100. They would deduct one-sixth from this in the usual way, making the ratable value roughly £83. If the rate were 5s. 6d. per pound, which it actually is in the next parish to mine, that would imply an annual charge upon me for local or municipal taxes amounting to £22 16s. 6d. This will suffice to show how extremely onerous the burden of local taxes has now become in London, and there can be no question that at a moderate estimate one-fourth of this burden is due to waste. The overlapping of authorities does not end with vestries, and boards, and commissioners of this and that. The gas and water supply of London is in the hands of private companies, and these possess extensive powers over roads and public highways. It consequently often happens that the gas corporation or the water corporation takes up a newly-paved street, for which the rate-payers have been charged, and, as they are not bound to make the roadway as good as they found it, half the work has to be done and paid for over again. That is but one instance among many, and it is simply because the imperial Parliament occupies a great deal of its time with the affairs of London, and also to a small extent because the Home Secretary is, through his control of the police, in a manner prefect of the lower Thames valley, that the waste and chaos are not very much greater than they have hitherto been. But the population of London is becoming very restive under its load, and an angry feeling is gathering against the government for having failed this year to pass a law endowing the metropolis with a proper form of control over its own affairs. It did prepare a bill for the purpose, but it was a very bad bill, and no attempt has been made to force it through Parliament. Without forcing in some way the present House of Commons will not pass any valuable measure.

It may be well as a conclusion to this article to give the approximate figures of the main expenditure and debt of the whole of London, except the "city," as set forth in last year's reports of the Local Government Board and Metropolitan Board of Works. The figures are partly for 1880, complete later returns not having been yet issued, and they are as follows:

INCOME.

Poor rate	£1,738,000
Local management	1,797,000
Board of Water rate	554,000
Metropolitan Police rate	510,000
School Board rate	542,000
Burial Board rate	7,000
Total	£5,148,000

For the city of London the increase is more difficult to state, but a recent authority puts it at £1,500,000, of which, however, a considerable portion is mortgaged to pay old debts contracted in buying up bridges, etc. The city police rate was £62,000 in 1880. As I have already said, the amount wasted by the city corporation and the old guild or "livery companies" that surround it is about £500,000 per annum. The value of their property grows at a great rate. They have valuable freeholds within the city, which in some parts are worth twenty shillings the square inch. They have estates in Ireland, as well as here and there throughout England, and not one of these companies exists in its old form or for its true object. Few or no goldsmiths are in the wealthy Goldsmiths' Company. A recent "prime warden" of it was a civil engineer. Mercers have long ceased to be members of the Mercers' Company, and there are no wood-workers in the Carpenters' Company. Everything, in short, has disappeared, except the great estates, and these are held by obsolete charters, and by men who have no right to them whatever.

The expenditure of the Metropolitan Board and the vestries is practically the same as the income. They never over-assess the people so much as to have a large balance left over at the year's end. Indeed, they are always borrowing, and the amount which the Metropolitan Board of Works was authorized to raise by loan last year was £4,475,000. All that was not spent within the year, but £1,500,000 of it was, and the rest soon will be. For 1883 another £1,619,000 was added to the "borrowing powers" of the board for its own and for vestry purposes by the votes of Parliament last session. At the end of 1882 the total outstanding debt of the board, including its advances to vestries and to the London School Board and other bodies, was £21,587,000. Against this it has "surplus land and property" of the estimated value of £2,830,000, but that of course does not, until sold, reduce the burden on the rate-payers, and long before it is sold the debt will have swollen to more than £30,000,000 if we go on at our present pace. The School Board for London alone owes the board £1,340,000, and is adding to the debt as fast as it can every year. The debt, however, has been created at a low rate of interest. Last July the Metropolitan Board was able to sell £1,650,000 of its 3 per cent. stock at the average price of £97 2s. 7d. The city corporation is owing for public works, sanctioned by Parliament, £5,500,000 in round figures, all of which might have been met out of current revenue had the city property been well administered. A royal commission is now examining into the livery company abuses, but it may be long before they are remedied.

A. J. W.

OCCASIONAL NOTES.

We have before remarked upon the difficulties which prevented a satisfactory settlement of the much-discussed tariff question by the last Congress or by the Tariff Commission. Prominent among these obstacles were the energetically pressed claims of this, that and the other manufacturing "interest" for recognition and satisfaction. To such an extent did these claims influence and even embarrass the consideration of the general subject, both by the Commission and by Congress, that during last winter the manufacturers might almost be said to have controlled legislation at Washington. That these circumstances tended rather to injure than to promote the cause of protection was plain to most sincere adherents of that policy. This point is noticed by the Chicago *Inter-Ocean*, which in a recent article says: "If the protectionist cause shall die of anything, it will die of having too many manufacturers in its councils and giving them too much influence. It will be suffocated under the burden of appearing to be controlled by private interests. If the manufacturers had a primary and preëminent pecuniary interest in the tariff, which we deny, not mere delicacy but sound policy would require that they as well as the importers, the foreign manufacturers, and the Cobden club of England retire from the field, and leave this question to be fought over by the voters, whose interests are simply those of average American producers and consumers." The attitude of the *Inter-Ocean* upon this subject is one to be commended. No good can come of the constant intrusion of appeals for the security of particular private interests into the discussion of measures of public policy. The journal quoted does well to point this moral for its indiscreet protectionist friends.

The science of municipal administration is apparently very little understood at present, at least by those who happen to be charged with the practical conduct of the affairs of cities. Instances of the truth of this statement are to be found on every hand and in great numbers. There is none, perhaps, which offers a more inviting field for the study of the political pathologist than the neighboring town of Long Island City, which appears to be in a very bad way at present. Thus we learn that the scarcity of water which has afflicted the city for some time still continues. The mayor a few days ago urged the greatest care on the part of the consumers in order to prevent waste. This at the beginning of a hot summer is not likely to be particularly cheering advice to the inhabitants. Although the accounts of the city are not very large, and should not be very complicated, yet it seems to be impossible to keep them in proper order. At a meeting of the Water Commissioners on the same day one of the commissioners secured the adoption of a resolution providing for the employment of an expert accountant to examine the accounts of the Water Department and the City Treasury Department. The commissioner declared that the City Treasurer was in debt several thousand dollars to the Water Board. In addition to all this there is a deadlock in the Board of Aldermen. The two factions into which the board is divided have of late devoted all their energies to the work of electing a successor to a lately deceased alderman. As a result, of course, whatever public interests are entrusted to the paternal care of the aldermen have to suffer. Our schools of political science would do well to devote some attention to the much-confused problem of city government.

The history of coöperative trading institutions has not been very encouraging to friends of the system, and it is not improbable that the want of success of these ventures has contributed in some degree to render the conservative public chary of embarking in enterprises bearing that name. The trading institutions referred to, however, were not founded on the true coöperative principle, as commonly understood, being originated merely in order to avoid the payment of what were considered excessive profits to retail tradesmen. Coöperative production, on the other hand, is based on the principle of admitting the workmen to a share in the profits derived from the work produced by them. It is needless to say that this system of coöperation has not as yet been sufficiently tried in England or America to afford data for deductions as to its practicability. Nevertheless the believers in the system are as confident as ever of its success. A meeting of some friends of coöperative industry was recently held in London, at which the means of promoting coöperative production among the working classes was discussed in a hopeful strain. Lord Carnarvon, who occupied the chair, referred to the success which had attended the trial of the experiment by M. Leclaire, in Paris. What M.

Leclaire had done in France, he said, Englishmen should not despair of doing in their own country. He believed that by admitting workmen to a share in the profits the old antagonism of master and servant—of capital and labor—would be largely done away with, and work would be done quickly and well, instead of slowly and badly, because the credit of a house became a matter of interest to every workman. By this means economy would be introduced instead of waste, and little or no superintendence would be needed, because each man would become a superintendent, and would feel that bad or careless or wasteful work would represent so much taken from himself. Everybody interested in the industrial progress of the race will watch with deep interest the efforts made to bring about the condition of things hinted at in Lord Carnarvon's address.

The St. Paul (Minn.) *Pioneer Press* not only takes issue with Mr. Joseph Nimmo, Jr., in the latter's contention that "water routes are out of date, both as actual avenues of commerce and as regulators of freight charges," but to us seemingly goes out of its way to pronounce him unfit to generalize from the data in his possession. The St. Paul journal admits Mr. Nimmo's fitness for the high position which he holds, and as an aggregate of facts and figures awards him high praise. But it appears that the Chief of the Bureau of Statistics is engaged upon a work a special feature of which is to be a study of the commerce of the Mississippi valley by rail and river. The proposition to be proved has been given above. Naturally the *Pioneer Press*, representing St. Paul, one of the half-dozen larger cities on the Mississippi, should rush to the defense of any present or prospective attack upon the commercial value of this great waterway. Yet it is difficult to understand why, in differing so radically from another in tracing causes to probable effects, it is necessary to publicly characterize him as unfit to generalize.

The announcement has been made that the executive council of the American Bankers' Association has decided to hold the next annual convention at Louisville, Ky., on October 9 and 10. This is something like a new departure. The convention has been held in the state of New York for several years, and this was proper enough as long as the center of wealth was found nearer the east than it now is. The decision to hold the next meeting at Louisville is a recognition of the rapid growth of the banking and industrial interests of the south and west. In this sense the change of the place of meeting is symbolic of the greater changes which have been taking place in the country as regards the growth and distribution of its active wealth. It is to be hoped that the papers to be read before the convention will be of a practical character, and such as to throw light upon the actual operations of banking, to the end that existing defects may be remedied, and tried and approved methods more generally adopted. There are details which will be best developed by an interchange of points and suggestions such as a discussion appropriate to the subject should consist of. There is still room for as wide circulation of judicious and temperate views regarding the true office of the banks as facilitating the complicated exchanges of the day and as supporting the existing credit system. Views of this character it should be the duty of the convention to bring clearly into relief and to disseminate as widely as possible.

It would seem that, notwithstanding the view generally prevalent on this side of the water, England also is likely to have a civil service question. An order was recently made by the Inland Revenue Board regarding the political or electoral action of subordinate officials in their department, and Lord Randolph Churchill has bestirred himself in behalf of the officials. Civil servants are allowed to address Parliament collectively about their own interests, and now ask why they should be forbidden to importune members individually. This question, says the *Pall Mall Gazette*, raises issues which are not confined to the officers of the inland revenue. There is a great standing army of civil servants whose members are increasing every year. The relations of this host of state-paid officials to the House of Commons is one which has not attracted sufficient attention. Discipline must be maintained in the civil as well as in the military service, and the heads of departments can hardly view with complacency the attempts of discontented subordinates to use their political influence for the protection of their personal interests. The journal referred to is of the opinion that much more drastic measures than orders such as that of the Inland Revenue Board will be required before Parliament will be freed from the pressure of the civil service. It significantly adds that "a time may come when men will begin to ask why, when policemen are disfranchised and soldiers are banished from the polling-booth, the other salaried servants of the state should be allowed to enjoy political privileges which they can hardly fail to employ for the furtherance of private gain at public expense."

The London *Pall Mall Gazette* "Fisheries Exhibition Supplement," published June 2, in addition to a double-page diagram of the exhibition showing the location of the various exhibits, etc., contains a lengthy description of the display from the United States. Of the exhibition as a whole it is said that it is very popular, and is constantly crowded. The United States section is said to grow in importance with every inspection, and with fisherman and angler it holds the supreme position. It is noted that this exhibit forms a flattering manifestation of international courtesy, as the largest part of the contributions are from the National Museum at Washington and from the storehouses of the United States Fish Commission, private or trading exhibitors being very few. The account published of the various classes of exhibits in the American section are sufficiently detailed to give a fair notion of what has been sent abroad, and how the list of models, pictures and specimens constitute, with proper explanation, an illustrated history of the fishing industry in the new world. All the varieties of American fishing boats from the earliest times are to be seen, with dates of use, sectional views, and particular properties possessed. In conclusion are furnished some facts in reference to evolution in shipbuilding in the United States. Models of American types of fishermen are described, photographic views of their homes, and specimens of their handiwork are noted, which soon satisfy the visitor that the New England fisherman is much better off than the fishermen of the British Isles. Whale-ship models, models of American whalemen engaged upon a whale, and other scenes from the palmy days of this industry, are found of exceeding interest. A model of the United States steamship Albatross, launched last autumn, and specially designed for deep-sea research, together with the deep-sea electric light and other parapharnalia of this department of investigation, in which the United States has already made so important a record, serve only to whet the appetite of the visitors to the exhibition to see the Albatross itself, which is expected in the Thames in July as an exhibit of the United States section of the Fisheries Exhibition. The remaining features claiming special mention are shells, ornaments and sealskins, an angler's camp, and fish hatching. Last, but not least, are specified the entertaining exhibits of the Signal Service, the Lighthouse Board and the Life-saving Corps of the United States. The display of dried and canned fish is a large one. Fifteen American firms exhibit in addition to the United States Museum and departmental exhibits. In the centre is a huge tin containing an 86 pound salmon.

The revenue of the Dominion of Canada for the month of May last shows a considerable increase over that for the same month of 1882, being $3,106,572 in May, 1883, as against $2,855,778 in May, 1882. Since the month of March the receipts from the customs revenue have exhibited a constant increase, and at present it appears that a larger quantity of goods than ever before is being brought into Canada. This circumstance, in the opinion of the Montreal *Gazette*, goes to prove that the consuming power of the country has outgrown the bounds within which many people have been disposed to limit it. This conclusion it regards as reasonable in view of the fact that ample warning of the danger of excessive importation has been given, and that the banks are pursuing a cautious policy. From the returns at its command the journal referred to deduces an approximate estimate of the condition of the public revenue and expenditure for the fiscal year which closes on the 30th inst. This estimate places the revenue for 1883 at $36,542,237, as against $33,383,455 in 1882. The expenditure for 1883 is estimated at $29,074,545, as against $27,067,103 in 1882. According to these figures, the surplus of $6,316,352 in 1882 will be increased to $7,467,742 in 1883.

The Kansas Board of Agriculture is successfully competing with other state boards of agriculture in exerting itself to become of practical value to the state which it represents. It is probably doing more to present to prospective immigrants the advantages of a settlement in Kansas than any of its competitors in other comparatively new states, and, notwithstanding various circumstances which have been regarded as drawbacks to the rapid development of Kansas within the past two years, the efforts of the board, of which Mr. William Sims is secretary, have been responsible for much of the progress made in enticing immigrants across the fertile lands of Missouri and away from the verdant prairies of the northwest. The latest effort in this direction is an intelligently prepared little pamphlet of sixty pages, entitled "Kansas: Its Resources and Capabilities, its Position, Dimensions and Topography." The publication is especially valuable in that it contains a map of Kansas brought down to date. The character of the map is vouched for by the imprint of Rand, McNally & Co., of Chicago. One of the most difficult things to obtain is a map giving a reliable representation of a western state. New railroads and new towns are creations of so short a time there that such a map of the age of a year or two becomes practically worthless. This map, we are pleased to be able to state, gives the towns which exist to-day and the new railway lines and extensions and in other ways fulfils its mission as no so-called authentic atlas of recent publication has done.

Southeastern Kansas of late years has grown so rapidly, railroads have been so largely extended, and new ones have been so frequently built that a work of this kind becomes an absolute necessity to an adequate conception of the degree of development attained in that region. This pamphlet is being printed in the German, Swedish and Danish languages; it is for gratuitous distribution, and will be sent to any one, at home or abroad, upon application. As may be inferred, it contains data respecting the crop yields of the state since it was admitted to the Union, as well as information respecting vacant lands, agriculture, horticulture and live stock. In addition, there are statements and statistics concerning schools, churches, manufactures, mines and mining. There are few states in the Union which offer equal advantages to the prospective citizen or the follower of the advice of Horace Greeley, and upon this fact rests the already marked progress made by those contributing to the advancement of the welfare of that commonwealth.

SPECIAL CORRESPONDENCE.

FINANCIAL MATTERS IN LONDON.

London, May 24.—For the past week the Stock Exchange has done nothing but discuss the failure of Messrs. Turtons & Hadow, who were jobbers in a very large way of business. There can be no doubt about the fall in prices produced by that extensive defalcation, and still less that the loss, which falls entirely upon members of the Stock Exchange, has hit some of them severely. It now appears that the first wild estimates were in excess of the actual losses, but even if those losses are represented by only £100,000 on "differences," and £30,000 upon I. O. U.'s, it must not be supposed that this covers the entire losses of members of the House by that failure. It is a rule of the Stock Exchange that in the case of a failure the official assignee "shall publicly fix the prices current in the market immediately before the declaration, at which prices all persons having accounts open with the defaulter shall close their transactions with him." But the fall in prices was much more serious after the declaration of Turtons & Hadow than it was before, because people who had sold to that firm found themselves again saddled with their stock, and they had again to find purchasers for it. Consequently, there would be not merely the loss entailed by receiving back the stock at the price fixed by the official assignee, but the further loss resulting from reselling those securities upon a demoralized market. It will be interesting to note what the fall has actually amounted to in some of the leading stocks:

Railways—	End of April.	May 10.	May 22.	Fall in May.
Caledonian	106	104½	102	4
Great Eastern	77	75½	73	4
London & Brighton def'd.	108½	107	100	8½
London & North Western.	177	175½	173	4
North Staffordshire	91½	92	85½	6
North British	101½	99½	97¾	3¾
South Eastern deferred	114½	113	109	5½
Foreign and colonial—				
Mexican Railway	141	139	123	18
Grand Trunk	20½	18¾	18	2½
Grand Trunk, 3d pref.	50	44½	42	8

Among these railroads, therefore, a very distinct depreciation is observable, and although in other and less speculative channels the drop is less striking, there has nevertheless been a sympathetic movement over the entire range of public securities controlled mainly by the London market. The Stock Exchange had already at the close of April become depressed, owing to fears that the supplies of money would be curtailed by the action of the Bank of England in refusing to make short advances. But it was not until the failures, first of Lewin Moseley and then of Turtons & Hadow, were announced that prices broke away in the manner we have seen. The Stock Exchange always appears to feel such internal losses very acutely, tending as they do to shake confidence in itself. It is said that so large a failure in the House has not occurred for twenty years, and though this is perhaps an exaggeration, there can be little doubt that it has not been paralleled for a considerable time past.

In spite of this check upon the Stock Exchange the British public do not appear to be indisposed to make investments. Supplies of stock offering are not large, and investors are not disinclined to embark in new securities.

The securities which they want, however, and which have come forward in fair abundance during the current year, are those of the more solid kind, such as railway guarantees, colonial and other government and city loans, as well as land and land mortgage companies, and these have met with a fair response, and will do so still in spite of the temporary weakness of the Stock Exchange. It is remarkable how strongly the land and land mortgage companies keep in favor in this country. They are certainly found to pay our investors on an average very fairly, and fewer instances of loss have occurred therein than in any novel description of enterprise introduced into this market for many years past. It is worth remembering that the London market is open to increase its investments in this direction.

Whether, however, London will be found willing to launch out into Mexican railways, and to carry on the development of that country initiated in the United States, is more doubtful. The proposals of the Mexican government in respect to the settlement of the Mexican debt were duly ratified last Friday. Indeed those proposals were more than the public had anticipated, and they would probably have been prepared to take less than their full interest for some years at starting. But the desire thus manifested on the part of Mexico to produce a favorable impression in this country will probably be required to stand the test of some experience before London can be expected to embark fresh capital in Mexican ventures. Mexico has in times past so often played us false that we may be pardoned for some little time to come doubting her sincerity.

Last week the *Economist* published its half-yearly statement of the balance-sheets, capital, dividends and market prices of all the joint-stock banks possessing offices in this country, and the figures are of interest as showing the progress made by these important institutions from year to year. The capital now embarked in banks doing business in England is £51,851,374, paid up to the end of 1882, as compared with £50,890,722 to the close of 1881, thus showing an increase of £960,652 during the twelve months. But at the same time the market price of these bank shares has grown in much larger proportions, standing as it now does at an aggegate of £143,146,000, as against £137,402,000 twelve months ago. The main increase, however, in this market value is to be found among the metropolitan banks, for in various provincial districts, of which Yorkshire is perhaps the most conspicuous, there has not been an upward movement in prices. It is worthy of remark that out of the entire list of 118 banks comprised in this total, there are but 16 as yet remaining unlimited, and out of these 6 have notified that they will re-register shortly under the Limited Liability acts. Four years ago there were as many as 65 of these banks possessed of unlimited liability, and if to this we add the fact that all the then unlimited Scotch and Irish banks have now re-registered, it will be seen how extensively the failure of the City of Glasgow Bank operated to abolish unlimited liability from joint-stock enterprise in this country. It may safely be predicted that another two or three years will find it abolished altogether. The figures of the Scotch and Irish banks, published in the banking supplement referred to, also showed progress as far as market values are concerned, though only to a very trifling extent as regards paid-up capital. The totals are as follows:

Companies	*Subscribed capital.*	*Paid-up capital.*	*Aggregate market value.*	*Deposits.*
English	£170,577,440	£51,851,374	£143,146,000	£301,142,082
Scotch	28,585,000	9,052,000	24,019,000	80,230,244
Irish	23,710,896	7,024,230	20,064,000	say 40,000,000
Totals	£223,173,336	£67,927,604	£187,229,000	£421,378,326

These figures show us the combined capital and resources of banks doing business in the United Kingdom as at the close of last year. It will be noticed that the market value amounts to just about three times the amount paid up. With regard, however, to the £421,000,000 of deposits, it is to be remarked that only the Scotch figures are absolutely correct. Five per cent. of the English banks do not publish their balance-sheets, and allowance

has in the above figures been made for this by an addition to the published total. With respect to the Irish banks it may be observed that the figures relating to the deposits are greatly invalidated by the fact that the Bank of Ireland does not publish a balance-sheet at all, that being the most important bank in the country. The figures as regards the eight other Irish banks are duly recorded, but the one omission prevents any very accurate estimate of what Irish banking deposits are at the present time. Roughly, however, the above figures appear to be near the mark. Four hundred and twenty-one millions of deposits certainly appears to be a large figure, but at the same time there can be very little doubt that in the hands of the private bankers there is deposited considerably more than one hundred millions additional, making possibly £550,000,000 sterling as the nearest attainable estimate of the banking deposits in the banks of the United Kingdom at the present time. This figure would not include such deposits as find their way here into the hands of colonial banks, upon which comparatively high rates are allowed, which are usually fixed for periods ranging from six to twelve months. Such deposits partake more of the nature of investments. Besides the foregoing banks, it is to be observed that there are 28 colonial banks with London offices with a combined capital of £22,334,464, and a market value of £40,390,000, while there are 20 foreign banks with London offices, the capital embarked in which is £17,985,330, and the aggregate market value £27,117,000, a considerable proportion of such capital being held in England. It may further be remarked that the deposits of the colonial banks amount to £111,037,079, as compared with £104,375,497 at the close of 1881—a substantial improvement upon the twelve months' working.

LETTERS TO THE EDITOR.

THE PRICE OF WHEAT AND ITS REGULATION.

To the Editor of BRADSTREET'S.

SIR—In the following statement I have undertaken to demonstrate that the wheat crop of this country regulates the world's prices of that commodity. In the first place I shall note the export to all parts from this country of wheat and wheat flour, computed in bushels, for twenty-three years ending 1883, and the effect of these shipments on the world's prices of wheat, taking the prices of wheat in the largest import country, that of the United Kingdom, as the test of the value of wheat in the world's market for the above period. The following shows the exports of wheat from the United States and the price in England for the period indicated:

Years, ending June 30.	*Exports of wheat and wheat flour in bushels.*	*Price of wheat in United Kingdom per bushel.*
Five years, annual average, end'g 1865	40,601,314	5s. 11d.
Five years, annual average, end'g 1870	27,860,388	6 9¾
Five years, annual average, end'g 1875	61,401,567	6 9¾
One year, ending 1876	74,759,682	5 9¼
One year, ending 1877	57,043,936	7 1⅛
One year, ending 1878	93,139,296	5 9¼
One year, ending 1879	148,329,890	5 4½
One year, ending 1880	183,000,000	5 6¼
One year, ending 1881	181,000,000	5 8
One year, ending 1882	118,000,000*	5 11
One year, ending 1883	160,000,000*	5 3

* Estimated.

It will be observed that the average price of British wheat was 6s. 6d. per bushel, equivalent in our money to $1.57, for the fifteen years ending 1875, and that for the five years ending 1883 the price was 5s. 7d., equal to $1.35, per bushel. So much for the effect of our heavy exports upon average prices and crops.

Now let us compare prices in England after a bad wheat crop there, and light exports from the United States, with those after an equally bad crop, and heavy exports from the United States during bad crops in England in 1868:

	Wheat and wheat flour in bushels.	*Price in United Kingdom per bushel.*
Exports for year ending June 30, 1868, from United States	26,323,000	7s. 11½d.
Exports for year ending June 30, 1880, from United States	183,309,000	5s. 6½d.

It will be at once seen how different the effect of a bad crop in England, when we were only able to make a light export as in 1868 of 26,323,000 bushels to all countries, the price in England being 7s. 11½d. per bushel, compared with 1880, when with an equally bad crop, or worse, in England, we shipped 183,309,000 bushels, the price being only 5s. 6½d. per bushel in England in the latter year.

To conclude upon this point, the heavy exports of late years from this country have reduced European prices for wheat on average crops 14 per cent., and during bad crops, such as those of the season 1879-80, over 30 per cent.

It will be well just here to consider whether this great increase of production and export of wheat is normal, having increased from an average annual export of wheat and wheat flour, for the fifteen years ending 1875, of 43,317,753 bushels to 158,600,000 bushels for the average annual export of the five years ending June 30, 1883, estimated. Although believing that great as our exports of wheat have been during these last few years, they are likely be in the near future greatly exceeded in quantity, yet I think it not improbable that we may have a reaction, and that our farmers will cultivate, especially in our older states, a little less wheat and go more into the cultivation of Indian corn and cattle and hog raising, when we reflect that during these last few years on the seaboard No. 2 red wheat has ranged from $1.00 to $1.70 per bushel, say about an average of $1.25 per bushel, while during the same period Indian corn has ranged from 44 cents to $1.00 per bushel, and mess pork from $8.00 to $20.00 per barrel. The following comparison of the increase of the production in the twenty years ending 1879, may throw some light on the subject:

	Indian corn crop, bushels.
Indian corn, census of 1860, crop 1859	838,000,000
Indian corn, census of 1880, crop 1879	1,754,000,000
Increase, 109 3-10 per cent	916,000,000
	Wheat crop, bushels.
Wheat, census of 1860, crop 1859	173,000,000
Wheat, census of 1880, crop 1879	448,000,000
Increase, 159 per cent	275,000,000

We know that the reduction of prices in England has reduced the breadth of wheat in cultivation, which was, in 1869, 3,951,018 acres; crop 125,000,000, a fine crop; in 1881 it was only 2,967,000 acres; crop 72,000,000 bushels, a poor crop—a reduction of 43 per cent., 53,000,000 bushels. If the weather is good in England the yield may be better per acre in the crop of 1883, yet the breadth of wheat in the United Kingdom I do not think is over 2,500,000 acres, which, if it should be 28 bushels per acre, would only be 70,000,000 bushels, about the same as the crop 1881.

Although a reduction of our exports in the year ending June 30, 1882, of 66,000,000 bushels, as compared with the previous year, did not advance prices materially either at home or abroad, this is easily explained. It was the large surplus from the four previous bountiful crops that made up the shipment of wheat to amount to 118,000,000 bushels for the year ending June 30, 1882, as the crop of 1881 was 116,000,000 bushels short of the previous year. Without such a great surplus, as explained above, the exports of the season 1881–82 would only have been about half of the previous year, say only 88,000,000 bushels.

The following table will show the acreage under wheat, yield per acre, and wheat crop from 1874 to 1882:

	Number acres of wheat.	*Yield per acre, bushels.*	*Crop of wheat, bushels.*
Crop 1874	26,967,927	12.3	309,102,700
" 1875	26,381,512	11.6	292,106,000
" 1876	27,627,021	10.4	289,256,500
" 1877	27,217,546	13.9	361,191,147
" 1878	32,108,560	13.1	420,122,400
" 1879	35,546,950	13.8	448,756,630
" 1880	36,037,050	13.8	480,849,728
" 1881	36,003,000	9.8	364,000,000
" 1882	37,000,000	13.6	504,000,000

Looking at the above table, and noting that the area of wheat cultivation in the six years ending 1880 had been increased over 9,000,000 of acres, and that four crops of wheat in succession were abundant crops, the reason of our large exports at the above period is very clear, especially when it is noted that the farmer at the same time could hire cheap labor, for, taking the state of New York as a criterion, the wages of a laborer were:

	Day's wages in gold.
For an average of seven years ending 1875	$1 03
For an average of four years ending 1879	0.97
For an average of two years ending 1881	1.10
For one year ending June, 1883	1.50

Whether the rise in the wages of laborers of 50 per cent. within two years will lessen the production of wheat time alone can tell. There is one thing certain, that the rise in wages generally has increased the home consumption of wheat, say one-half bushel per capita during the last two years, as compared with the five years previous to resumption of specie payment.

To show how much the wheat trade of the world has increased let us compare 1870 with the year 1880.

In 1870 the estimated export of wheat from countries that had a net surplus to those countries that required to import was 120,000,000 bushels of wheat and wheat flour, of which, in 1870, the United States furnished in net exports 54,000,000 bushels.

In 1880 the net surplus shipped by the export countries was estimated at 300,000,000 bushels, of which, in 1880, the United States exported about 184,000,000 bushels.

It appears clear, then, that the wheat crop of the United States regulates the price of that cereal on the world's market. In conclusion I would state that although the normal position of this country is that of the largest exporter of wheat in the world, yet we must not forget that we may have temporary sets back in our power of export. We have seen, owing to a bad crop in 1881, our export diminished one-third on the year ending June 30, 1882.

It will be lucky for the people of Europe if, after the bad sowing and short breadth of wheat, the summer should be fine and make a good yield and fine quality of their short area of wheat. India cannot be depended upon, although I believe last season she exported to the world about 38,000,000 bushels of wheat, but some years lately she has shipped not a third of this quantity. Within ten years England has lessened her area in wheat cultivation fully one-third, and if she is any guide as to what has happened elsewhere, it is not unlikely that in other parts of Europe the cultivation of wheat has been lessened, especially in the poorer soils. We may get as much money from the export of 100,000,000 bushels of wheat from our next crop as we got from the export of 184,000,000 bushels from the crop of 1880, and should our spring wheat crop be deficient, and should there be a wet summer in Europe, I am certain the price of wheat would be very high; but even if the summer should be fine in Europe, and our spring crop be good, we will realize a good price for our surplus. I shall conclude by the following remarks: The average price of a bushel of wheat in England for five years ending June, 1883, has been 5s. 6d., equivalent in our money to $1.34, per bushel. Except for the period of five years ending 1852, when it was lower in price, wheat has not been lower for an average of five years for over one hundred years. I therefore think that for some years wheat has been too low, and should not be surprised if values should average somewhat higher for a few years. I think also animal produce has ruled too high, and will soon be lower.

41 South William street. HENRY KEMP.

REVIEWS.

*ST. LOUIS CITY AND COUNTY.**

The "History of Saint Louis City and County," by J. Thomas Scharf, in two volumes, proves the equal of any and the superior of many works of local history yet published in the United States. Mr. Scharf, who by the way is the author of "Chronicles of Baltimore," "History of Maryland," the "History of Baltimore City and County," and is a member of several historical and philosophical societies, has succeeded in so treating this subject of St. Louis and vicinity that the work becomes at once one of national as well as of local interest. As may be inferred, the chronicles given include those from the earliest periods, when Laclede prospected up the Mississippi and blazed a site near the junction of the two great rivers, down to the present time. Within this period, satisfactorily comprehensive treatment is accorded to the era of exploration, the founding of St. Louis, and the climatology, geology and archæology of the locality. In the same way are considered in fascinating detail the Indian local history, the topography of the country, the earlier settlers, and other sociological topics which bring the history down to the period of the Louisiana cession. From that time onward the work considers *in extenso* St. Louis land titles, the territorial government, the periods of the Mexican and civil wars, together with the various municipal departments, their inception and growths, the commercial and industrial development of the city, its prominent citizens, its public and private institutions and organizations, and other subjects which go together to make up a complete picture of the growth of a great city. The two volumes, of 1,000 pages each, are richly embellished with engraved portraits of the men who have helped to make St. Louis what she is to-day, and the work, finely bound as it is, remains an enduring monument to the long and patient labor of its author and to the rapid rise and conspicuous position already attained by a great American city.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

The Supreme Court of Indiana, in the case of Buck et al. vs. Vorhies, decided on the 5th inst., held that a conveyance, however made, is void if the intent and purpose of the grantor and grantee is to defraud creditors, and this even though full consideration is paid.

In the case of Bowerson's Appeal, the Supreme Court of Pennsylvania clears up some current misapprehension in regard to the legal meaning of the word "insolvency." The mere absence of property liable to seizure on execution does not of itself constitute insolvency. It consists in the owing of debts in excess of the value of the debtor's tangible property. Poverty and insolvency, said the court, are not synonymous terms; without debts there can be no insolvency.

Personal property found in transit through, or temporarily within, a state other than the one in which the owner resides cannot be taxed in the state in which it is so found, according to the opinion of the Supreme Court of Indiana in the case of the Standard Oil Company vs. Bachelor, decided on the 1st inst. This is on the principle that for the purposes of taxation property belongs to the state in which the owner has his residence. The action was brought by the Standard Oil Company, a corporation doing business at Cleveland, Ohio, to enjoin the collection of taxes assessed upon a lot of staves purchased by it in Indiana while waiting for shipment to Cleveland.

In a bond given to the Missouri State Lunatic Asylum for the board of a patient there was a blank left as to the amount of the board. In an action on the bond parol evidence was sought to be excluded as incompetent to supply the omission. The Supreme Court of Missouri, however, in the case of The Treasurer of the State Lunatic Asylum vs. Douglass, held that such evidence was admissible. The bond, the court said, showed an incompleteness on its face in regard to the compensation to be paid for the board of the patient. The obligor's bond having bound them to pay for the rate the law would imply a reasonable one.

The Supreme Court of Vermont recently held, in the case of Quinn vs. Hulbert, that the plaintiff was a competent witness, although he was dumb, uneducated in the use of signs, and only able to assent or dissent in answer to a direct question by a nod or shake of the head. While so deciding upon the question of the admission of the testimony, however, the court expressed the opinion that the attention of the jury should be called to the plaintiff's peculiar disability as affecting the weight of his testimony. The rules of the old common law in regard to the exclusion of witnesses on the ground of incompetency seem to be in a fair way of becoming as things that were.

In Hertzberg vs. The Houston & Texas Central Railway it appeared that the appellant purchased a ticket from Fort Worth to Mineola, on the Texas & Pacific Railway. Being desirous of going to Houston, appellant, on reaching Dallas, exchanged conductor's checks and tickets with another traveler, who had an emigrant ticket, good for one continuous passage to Houston, the only limitation to the ticket being that it be used within three days. The conductor refused to allow the appellant to travel on the ticket because he was not the person who commenced the journey on it. Appellant insisted on traveling on the ticket and was thereupon ejected from the train. The Supreme Court of Texas, reversing the judgment of an inferior court, held that under the state of facts set forth above the appellant could recover.

An insurance policy contained a provision that it could be terminated by the company at any time upon notice, etc. It was the custom of the insurance agent to collect the premium on the first of the month succeeding the issuance of the policy. The premium was not paid on the first of July, and on the 18th the agent, upon instruction from the company, notified the insured of the termination of the policy. Upon a request from the insured, the agent agreed to let the policy stand until July 22. On that day he terminated the policy on his books, and sought to inform the insured, but failed to do so. The property was destroyed on July 31. Suit was brought upon the policy, and the plaintiff had a recovery. Upon appeal to the Texas Supreme Court—Springfield Fire Insurance Company vs. McKinnon et al.—the judgment of the court below was reversed, the appellate court holding that the policy had been legally terminated, and that there could be no recovery.

In the case of Reilly vs. Reilly, decided by the St. Louis Court of Appeals on the 30th ult., it appeared that the defendant had agreed to pay the plaintiff, for services, one-half of defendant's one-half part of the net profits realized by a firm of which defendant was a member, upon work done under a certain contract. The court held that in

* History of Saint Louis City and County, from the Earliest Period to the Present Day: including Biographical Sketches of Representative Men. By J. Thomas Scharf. In 2 volumes, illustrated. Philadelphia: Louis H. Everts & Co., 1883.

order to recover against the defendant the plaintiff was not bound to aver or prove that there had been a settlement between the defendant and his co-partner, but that it was sufficient for him to show the amount of net profits on the contract and the interest of defendant therein as a partner.

A municipal corporation having statute authority to issue bonds for a specified amount, issued and sold bonds in excess of that amount, and used the money received for them for corporate purposes. The legislature thereafter passed an act declaring such bonds valid obligations of the corporation. In the case of Read vs. The City of Plattsmouth the Supreme Court of the United States held that the act of the legislature referred to was not in violation of a constitutional provision forbidding an ex post facto law nor of one declaring that the legislature "shall pass no special act conferring corporate powers." The court reiterated the ruling of Judge Field in an earlier case, to the effect that "a law requiring a municipal corporation to pay a demand which is without legal obligation, but which is equitable and just in itself, being founded upon a val able consideration received by the corporation, is not a retroactive law, no more so than an appropriation act providing for the payment of a pre-existing claim," and that "the constitutional inhibition does not apply to legislation recognizing or affirming the binding obligation of the state, or of any of its subordinate agencies, with respect to past transactions."

In the case of Blackham vs. Gresham et al., an application was recently made to the United States Circuit Court, at New York, for an injunction to restrain the Postmaster General, the postmaster of the city and others from interfering with the business of the plaintiff, carried on under the name of Boyd's City Dispatch. The motion for an injunction was based upon the ground that the routes on which the company carried letters were not post-routes, and that certain seizures of mail matter given to the dispatch company for delivery were illegal. Judge Wallace, on the 4th inst., decided that the streets of the city were clearly post-routes under acts of Congress authorizing the Postmaster-General to establish post-routes in cities, and that the seizure of the letters was not illegal. He therefore denied the motion for an injunction. Subsequently, in a suit brought by the government against the dispatch company to recover a penalty for violation of the law, Judge Brown, in the United States District Court, directed the jury to find a verdict for the government.

An act of the legislature of South Carolina empowered the Board of Harbor Commissioners "to levy and collect from all vessels entering into and trading with the port of Charleston such fees and harbor or port charges, not inconsistent with law, as in their discretion 'might be' necessary to pay the harbor-master and port-wardens for the services required of them." The amount of such fees or charges was to be determined by "the length over all" of the vessel, according to a certain classification fixed by the board. The recent case of The Board of Harbor Commissioners vs. Pashley et al, was an action to recover the amount of certain port charges imposed upon the schooner Marcus Edwards by the plaintiff under the authority of the act above referred to. The vessel was an American vessel, owned by citizens of states of the United States other than the state of South Carolina, duly licensed for the coasting trade and engaged in commerce and navigation between the several states of the United States. The Supreme Court of South Carolina decided on April 19th that the charge referred to was a violation of the United States Constitution, and that it was wholly immaterial whether the amount of the tax was to be ascertained by reference to the tonnage of the vessel or in some other way.

A provision of the United States Revised Statutes requires steamboats and barges carrying passengers to be provided with life-preservers, axes, buckets, etc. In the case of The United States vs. Powers, decided in the United States District Court at Cincinnati on the 2d inst., the complaint alleged that a steamboat called the Gretna Green, owned by the defendant, and having in tow two barges carrying a large number of passengers from Maysville, Ky., to Fair Grounds, Ky., was not provided with life-saving apparatus as required by law. The defendant demurred on the ground that the navigation laws of the United States were not applicable to these barges, inasmuch as they were not employed in interstate commerce. The court referred to decisions of the Supreme Court establishing the doctrine that the power of Congress comprehends navigation within the limits of every state in the Union, so far as that navigation may be connected with commerce with foreign nations, among the several states, etc., but said that Congress had no power to make navigation laws for or to control the commerce which is entirely within the limits of a state. The court then declared itself of the opinion that the navigation laws of the United States had no application to the case before it, since it appeared that the barges in question were being towed from one point in Kentucky to another point within the same state, and that their trips had no connection whatever with any point outside of Kentucky. Although the Gretna Green was subject to the laws of the United States, yet the mere fact that she took in tow these barges had nothing to do with any interference with the proper navigation of the Ohio.

BUSINESS NOTES.

The commerce of New Orleans, says the *Times-Democrat*, continues to show large gains as against last year, although the summer season there is exerting its full influence against an active business. The total value for five months of 1883 is given at $46,935,218, against $35,835,908 in 1882, a gain of $11,099,310.

In discussing the prospects for a crop of hops in England, the Sussex *Advertiser* says a powerful stimulus has been received by the growing vine in the warm sunny days, warm nights and occasional showers. The vine grows faster than the tiers can follow it. It is a long time since so bountiful a hop harvest in England was promised at a corresponding date.

Recent advices from southern California are to the effect that considerable interest, not to say excitement, exists over the alleged discoveries of petroleum in that region. The Los Angeles *Express* declares that the petroleum sources in southern California have shown far greater productivity during the past few years than had been expected. The Sespe, Newhall and Puente regions are yielding a considerable quantity of oil. A new well was struck in the Pico canon the other day, and new claims to oil lands are frequently filed for record.

The London *Labour News* of May 22 states that strikes in the United Kingdom had not entirely disappeared, the North Staffordshire colliers being determined to hold out. At Sheffield many houses were very busy "completing American orders" for delivery before July 1, when the new tariff comes into operation. Emigration continued active, especially to Canada. On May 29 business throughout the Kingdom had resumed the wonted activity which the Whitsuntide holidays had broken into. No change was reported in the localities where laborers were disaffected. Emigration was still brisk.

A prominent business man of New Mexico has been telling the St. Louis newspapers of the large investments being made by citizens of the United States and by foreigners in Mexico as well as in New Mexico. He predicts that in half a century Americans (those from the United States), will practically own nine of Mexico's northern states. He says a Scottish syndicate paid $4,000,000 for 6,000,000 acres of land near Durango, a few days since, and that a German syndicate bought up several million dollars' worth of land in New Mexico not long ago. In old Mexico, ranch after ranch is owned by foreign capitalists.

There were 173 failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* during the week ended May 19, against 232 in a like week in 1882, and 240 in the corresponding week in 1881. England and Wales had 147 against 215 and 231 respectively in the like weeks in 1882 and 1881, Scotland 23 against 14 and 13, and Ireland 3 against 3 and 6 in corresponding weeks in 1882 and 1881. In the succeeding week that ended May 26, the grand total was 214 against 248 and 247 respectively in 1882 and 1881. England and Wales had 191 against 221 and 231, Scotland 19 against 22 and 11, and Ireland 4 against 5 and 5.

The Secretary of the Treasury has issued a circular to customs officers containing newly prepared regulations respecting the importation of cattle into the United States. They provide that all cattle arriving from Europe, Asia, Africa, Australia or New Zealand shall be subjected to a quarantine of ninety days, counting from the date of shipment. Imported cattle found to be infected with lung plague, rinderpest, aphthous eezematous (fever) will not be admitted to the established quarantine, but will be quarantined elsewhere, at the expense of the importer, or be dealt with in such other manner as the government, or government and local authorities, may determine.

As noticed in BRADSTREET'S at the time, the Pennsylvania tin-plate manufacturers met at Pittsburgh to consider the practicability of taking steps toward securing a favoring tariff for their particular industry. The Philadelphia *Press*, in commenting on the situation, regrets that while "free-traders are showing increasing activity in spreading their views," protectionists are "doing little or nothing to affect public opinion" in their favor. As for the tin-plate makers, the opinion is expressed that they have no possible chance of securing an increase of duty for several years, if ever; but they can do valuable work, meanwhile, in agitating and drawing public attention to an inequality in the tariff which has killed tin-plate manufacture and put the making of sheet iron at a serious disadvantage.

The following national banks have been organized: The First National Bank of Du Bois City, at Du Bois, Pa.; capital $50,000; Frederick K. Arnold president; James E. Long cashier. The National Bank of St. Joseph, Mo.; capital $100,000; Calvin F. Burnes president; George C. Hull cashier. The Commercial National Bank of Marshalltown, Iowa; capital $100,000; Elijah L. Lyon president; Andrew A. McFaden cashier. The First National Bank of Lewiston, Idaho; capital $50,000; John P. Vollmer president; John H. Evans cashier. The First National Bank of Garnett, Kan.; capital $50,000; John R. Foster cashier. The First National Bank of Waxahachie, Tex.; capital $66,000; M. T. Patrick, president; N. A. McMillan cashier. The Iron National Bank of Gunnison, Col.; capital $50,000; Samuel G. Gill president; John H. Fesler cashier.

Anniston, Ala., 100 miles west of Atlanta, Ga., the nearest large city, is cited by the *Constitution* of the latter place as a more conspicuous instance of rapid, permanent and healthful industrial and municipal growth than the little city of Pullman, Ill., whose praises Chicago is wont to sing. Anniston was not started by a wealthy corporation, but was begun in a wild country by the efforts of two men. It already has manufactures, streets, water, parks, and drainage, and is building fifty miles of railway to an incidental market. Ninety-five per cent. of its population are producers, and it is added that there is "not a loafer within a radius of three miles." Further, with 2,000 professional men and members of the leisure class added, the little city would still have a larger per cent. of actual workers than any recorded in the last census. So the phrase "the new South" comes to us with added meaning.

The high price of beef in Denver, the chief city of a state which is rapidly becoming a great cattle-raising region, has excited the surprise of the editor of the *Republican*. He argued that Colorado, being a primary market, beef ought to be cheap. Yet the fact stared him in the face that Denver butchers are receiving dressed Missouri beef, in refrigerator cars, from Kansas City in large quantities, which trade is rapidly growing. Upon investigation it is declared that the fault lies with the Colorado cattle men. Less than a dozen men control the Colorado ranches. Prices are, therefore, held up to the demands of the cattle-owners. Spring cattle, on the hoof, in Denver, three years ago, was sold at 5c. per pound; 6c. and 6½c. is asked for the same to-day, and holders are not anxious to sell. If they do not dispose of their stock at that figure they can afford to let the cattle run. Hence four-fifths of the beef sold in Denver comes from the east, as mentioned. The introduction of beef from Missouri does not appear, as yet, to have affected the Colorado ranchmen.

An electric light litigation appears to be already begun in New York. With all the conflicting claims between Edison, Brush, the Faure storage battery people and the Swan element of the Brush Company, it has been a matter of comment that proceedings have not been started long before. But the wind is blowing from an entirely different quarter. Bills in equity were filed several days ago in the United States Circuit Court in suits begun by the Consolidated Electric Light Company against the Edison Electric Light Company, the Edison Company for Isolated Lighting, the Edison Illuminating Company, Mark Mayer and Delia Jacobs. The complaints are alike in substance in all cases. It is claimed by the plaintiffs that patents were granted June 25, 1878, to William E. Sawyer and Albon Man for a system of electric lighting. At subsequent dates in 1879 and 1880 patents were granted to the same persons for improvements in regulators for electric lighting in electric lamps, in the treating of carbons for electric lights, and for improved carbons and regulators. These patents were assigned several times, and in this manner came into the hands of the plaintiffs in this suit. A reissue of patent on amended specifications was obtained June 6, 1882. It is charged that the defendants have used a system of electric lighting substantially the same in principle and construction as that covered by the patents belonging to the plaintiff. It is also charged that regulators and carbons have been used that infringe upon the patents. Writs of injunction are asked for to restrain the defendants from making, using or selling such inventions.

The last annual report of the St. Paul (Minn.) Chamber of Commerce, just issued, as synopsized by the associated press, contains figures relative to the growth of that city which quite corroborate the extravagant tales told in the east of astonishing municipal development in the far west. The general volume of business of all kinds, and the number of persons employed, is said to be more than twice what was revealed by the census of 1880—and this in a city which to-day claims a population of between 90,000 and 100,000. The increase in the wholesale trade is over $20,000,000 per annum, and in the lumber business over $2,000,000. The whole number employed in manufactories and wholesale houses has grown from 8,000 in 1880 to 17,000 to-day. In 1882 St. Paul's national banks had an aggregate capital amounting to $2,200,000; it is now $4,700,000, with $800,000 surplus, or $1,402,979 in excess of the capital and surplus of all the other national banks in Minnesota. In 1881 the capital of the state banks in St. Paul was $300,000; it is now $700,000—making the aggregate banking capital over $6,270,000, barely $500,000 more than all the other bank capital in the state combined.

Cincinnati's cotton trade, according to an article in the *Commercial Gazette*, is rapidly dwindling. There was a time when that city handled 100,000 bales of spot per annum. The importance of this trade to the Ohio river metropolis may be learned from the fact that the $5,000,000 which it brought was nearly all spent in that market. This trade was comparatively well held up until the past year. But the late announcement that a prominent Cincinnati firm is about to retire from the cotton portion of their business, coupled with the report that other firms are considering the advisability of removing to St. Louis, are found to be a result of the decline of Cincinnati as a cotton market. Dealers in that city handled 70,000 bales of spot and in transit from September 1, 1880, to May 1, 1881, out of a crop of 5,500,000 bales. In the corresponding portion of 1882–83 they handled but 25,000 bales out of the prospective crop of over 7,000,000 bales. The paper named concludes that the causes of this marked falling away are largely geographical. So far as railroads are to blame, the fault is said to be with the trunk-line pool from Cincinnati to the east, and not with the roads reaching Cincinnati from the south, whose manifest interest would be to get the longest haul on the cotton, and, therefore, bring it to Cincinnati.

The Baltimore *Sun* states that a committee, appointed by the Canned Goods Exchange of that city, is engaged in investigating the best means for protecting the oyster interests of Chesapeake bay. They have sent circulars to well-informed and influential persons in the tide-water counties, asking, first, whether the industry in that locality is increasing or diminishing; second, if the latter, from what cause; third, what can be suggested to remedy the evil; and fourth, are existing laws adequate to reach the subject? The *Sun* thinks it unnecessary to ask if the Chesapeake beds are declining. The fact that they are is notorious. The situation, as has been repeatedly pointed out, calls for the enactment of more stringent laws to protect the beds from the reckless and ruinous dredging to which for years past, and with yearly increasing recklessness, they have been subjected. The last Maryland legislature appointed a commission to investigate this subject. They will survey the area and thickness of existing beds, and report upon what in their judgment ought to be done to maintain an equilibrium between production and supply. In this way then will the canned goods trade find a share of their inquiries answered. Nevertheless, the views of those living in the tide-water counties, and having a personal knowledge of the men engaged in the business of oystering, "ought also to be valuable, and may throw light on a phase of the subject which would scarcely be so well known to the members of the commission."

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

Last Monday and Tuesday there was enough of a reaction in the stock market to make many people seriously fear that the bull movement had come to an untimely end. It is not uncommon, when the market is on the advance, to have a dropping back the first days of the week, because if the close on the previous Saturday has been strong it generally brings in many out-of-town orders to buy on Monday and Tuesday, and the operators take advantage of this to sell such stocks as show them a profit; and the selling generally is large enough to give the market a temporary set-back. In the present case there was nothing different from past experience; but the truth is, the present bull movement is one which inspires more anxiety than confidence—at least it did in its earlier stages. There is so little good news on which to put up prices, and the desire of the large operators and cliques who have long been loaded up with unsalable goods to get out of them is so well known, that, when the market began to drop back and act as if the strength had gone out of it, the greatest trepidation was felt among the traders generally. There was certainly a remarkable unanimity in the wish that the bull movement should continue. Wall street was thoroughly tired with the constant bear aspect of the market; there was, or seemed to be, a general desire for improvement. Those of the operators who have stocks of course desired it, and the leaders on the bear side seemed willing to see prices get up to a higher level, from which it would be safer to sell them. At the same time there was a dreadful dearth of material upon which the market could be advanced. The public was not buying, and it was feared that the cliques had exhausted their power to further bid up the quotations and another long and weary recession of prices would follow. Happily, these fears proved to be unfounded. There was a perceptible recovery on Tuesday afternoon in the later dealings, and since then the market has gone on advancing with such vigor that the street now thinks the bull movement is so thoroughly well started that it is bound to go on to the end. Where the end may be is some unknown point in the future, but it is not expected to be reached until prices have gone much higher than they are now.

The coal stocks, which originally started the advance, have kept well to the front throughout, Lackawanna being, as usual, in the lead in point of activity. It has scored an advance of about 5 per cent. since the movement began, which is certainly doing well. The amount of stock of this company is comparatively small, and therefore easily handled; while the property itself being first class, operators are not afraid to hold the stock in large blocks. Jersey Central and Reading have followed close behind, when the one flagged a little the other taking up the running. The first named has made even a larger advance than Lackawanna in the same time, having risen over 8 per cent. Reading has gone up something over 6 per cent. How much the Reading company's brokers have been able to sell is another matter. It is well known that the movement in these stocks is made to sell out upon. The rise in these stocks caught some of the small brokers in Philadelphia short to an extent that they could not cover and they had to fail. One small firm was also caught in the same way and went under, with liabilities on the Exchange of about $60,000, it was said. Next to the coal stocks the Vanderbilt properties have been active and strong, the principal work being done in Lake Shore, this being the leading speculative stock of that group. A determined effort is being made to put the price to a high figure, and various rumors are afloat to the effect that new traffic arrangements have been made for the road which will bring it increased business, while a large block of the stock is to be taken abroad. This means nothing more than that the price will be advanced in proportion as a general buying movement in the stock can be worked up. Michigan Central and Canada Southern have followed Lake Shore rather slowly, but the turn of these stocks will come when the Lake Shore business is finished. New York Central has risen somewhat, evidently on the covering of shorts, but it acts as if there was either a large short interest in it still which was trying to depress it to cover, or that some leading operator with a heavy hand was keeping it down. It is said that Mr. Gould is a determined bear on the stock, and if this be true no further explanation of its movement is necessary. Northwest common and preferred have been quite buoyant. These stocks are Vanderbilt properties.

Plentiful dispatches have been received from the northwest section of the fine outlook for the growing crops there, and the expected increased yield of spring-sown wheat in that country is looked for to compensate the loss of winter wheat, as compared with last year, which will certainly occur in the more southerly section where that cereal is grown. These dispatches have accompanied a brisk rise in the price of St. Paul. Indeed, the connection between the two is more than suspicious. The experienced in the ways of Wall street are apt to suspect that the rise in the price of the stock is the cause of the dispatches, rather than the other way. However, everybody in the street is a bull now, and therefore disposed to believe the best of everything which comes up, and the St. Paul clique have certainly handled the stock bravely, putting the price up above 106. For the stock of a company which made such a poor showing in its last report as the St. Paul did, which only a few days ago made a new issue of $3,000,000, and which is confidently expected to make another issue as soon as the state of the stock market seems to make it safe, this price must be regarded as a pretty high one, and yet it may be put higher. The story of a foreign syndicate, formed by Mr. Milbank, a leading director who recently went abroad, is also made to do duty at this time. The various Villard stocks, as Northern Pacific common and preferred, and Oregon Transcontinental, have not been left behind in the general advance; but it is asserted that the boom in these will come later in the year, when the road will be completed to the Pacific coast. On the other hand, Union Pacific and Central Pacific have been laggards in the race, and this must be attributed to the position of the stocks of these companies. They are said to be held in large blocks by a few operators, and to this cause their depression is attributed; but the story may safely be put down as nonsensical. If they were so closely held, it would be an easy matter for the holders to mark up the price. The facts would seem to be either that some large holders are selling out their stock as the market gets strong enough to take it, or some one or more of the leading operators is keeping down the price by persistent short sales. Possibly both causes are at work. In the various specialties some good advances have been made, as Louisville & Nashville, Alton & Terre Haute, and St. Louis & Texas—a road which the Vanderbilt people have taken under their protecting care as a feeder to their St. Louis line. Denver remains very quiet. Yesterday was the day appointed by Mr. Gould for a great rise in the market. Like Wiggins' storm it did not come. There was a general reaction in prices instead. Mr. Gould however came forward as a supporter of his Wabash stocks, which was held to give promise that he had started for a bull campaign.

The loan market is now in its full state of summer ease, the banks being full, and money lending on call in quantities as wanted at 2@2½ per cent., and time loans 4@4½ per cent. Foreign exchange still keeps up to a point uncomfortably near the gold-exporting level, the posted rates remaining at 4.86 and 4.88½. The movement of securities, the exchange brokers say, is still from London to this market, and it is pretty good evidence that the great operators here are well loaded with stocks when such a continuous supply could have been poured in from abroad and prices not go down more than they have. Our own cable advices show that the buying of "Americans" in that market is done from New York, and it is surprising that any kind of a bull movement can be maintained when the foreign markets will take nothing, but, on the contrary, sell us our own stocks. London appears to have recovered from its recent disturbances and quieted down to inactivity again. The bank rate of discount remains at 4 per cent.

The government bond market is quiet and firm. The following were the closing quotations yesterday:

	June 8, bid.	June 15, bid.	June 15, asked.
U. S. 5s extended (3½ p. c.)	103⅜	103⅜	—
U. S. 4½s 1891, registered	112⅞	112¾	113
U. S. coupon	112⅞	112¾	113
U. S. 4s 1907, registered	118¾	118⅞	119
U. S. 4s 1907, coupon	119¾	119¾	120

The bank statement of Saturday showed little change from the statement of the previous week, except an expansion of the loan item of over three millions, which seems to have been due solely to the business on the Stock Exchange. The surplus reserve varied only by a decrease of $2,475 from the figures of the week before. The following are the comparative totals of the statements of June 2 and June 9:

	June 2.	June 9.	Differences.
Loans	$317,575,800	$320,136,600	Inc. $3,560,800
Specie	62,251,500	61,550,900	Dec. 700,600
Legal-tenders	24,552,500	26,341,000	Inc. 1,788,500
Deposits	310,929,400	315,290,900	Inc. 4,361,500
Circulation	15,971,300	15,941,800	Dec. 79,500

The proportion of total reserve to liabilities is now 27.91 per cent., against 26.71 per cent. at the corresponding date last year.

THE BRITISH STOCK MARKET.

[By Cable to BRADSTREET'S.]

From London: The stock markets are recovering. Americans are higher on purchases for New York account. There is some investment demand for home securities.

From Baltimore, Md.: Business at the Stock Exchange has been more generally distributed, and most dealings have been in local securities. Virginia state issues are quiet. Marietta Railroad seconds were easier and thirds stronger. Money is in good supply.

From San Francisco, Cal.: Heavy purchases of silver have been made on government account for coinage. Chinese orders for silver are partly unfilled, although 250,000 ounces were shipped there during June. Mexican dollars command a ready sale at an advance on London quotations, the supply being exhausted.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

SUMMARY.

The general business situation throughout the United States fully maintains the improvement noted last week. Special telegrams from leading business centers to BRADSTREET'S point conclusively to this, while revealing as well a number of reports of a lack of commercial strength. The Pacific coast is enjoying an unwonted degree of business prosperity, and in the northwestern states the movement of general merchandise is quite active. Wheat is lower, owing to larger stocks, small home and practically no foreign demand, in connection with better weather. Corn is less affected, owing to a fair demand. Provisions are weak and lower. This is caused by heavy arrivals of hogs at the west, and a general distrust of prevailing prices, and the absence of any noticeable demand for legitimate uses. Pig iron is unchanged in price, but a better feeling pervades the trade here. Sales are slightly larger at the recently reduced prices. There are no new features in the steel rail market. Bar iron is dull and weaker, mill owners being anxious to sell. Petroleum is well sustained at about the average rate for certificates of crude noticed last week. Refined is uncertain, and to holders probably unsatisfactory, being disproportionately low; a result of recent heavy selling for future delivery through a disbelief in the probability of the now existing advance in crude, and in the face of unusually heavy stocks abroad. Ocean freights markets are dull. Petroleum charters were the only feature of the week. The quantity of grain exported per steam in the berth has been small. Anthracite coal is moving off at a healthful rate, but without marked activity. Full time from July 15 to December 1 will probably be observed at the mines. This points to an output for the year of 30,500,000 tons. The wool trade situation has not improved. Manufacturers have been buying only for current wants, but in the absence of large stocks the seaboard markets have generally ruled steady. There were 165 failures in the United States reported during the past week, 17 more than the preceding week, 61 more than the corresponding week of 1882, and 105 more than the same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Grocery trade good; larger than ever at this season. The fine crop prospects give a cheerful tone to all branches.

From Boston, Mass.: There has been no material change in the general business situation since last week. In some branches the warm weather caused more activity for a few days, but the volume of trade for the week shows no important increase. A cautious tone, developing into indifference in some instances, runs through all departments. If we except boots and shoes, which are moving satisfactorily, all kinds of manufactured wares are quiet. There is no animation in raw materials, and wool continues depressed, the sales for the week being the smallest for any previous week since January 1, and not half as large as the corresponding week in 1882. Chemicals, metals and other kinds of general merchandise show light sales. Money is in full supply, and rates at the banks are easy at 5@6 per cent., with prime factory paper ruling at 4@4½.

From Rochester, N. Y.: Jobbers in groceries report trade excellent, and collections unusually good.

From Cincinnati, Ohio: Demand for money light. Rates of interest unchanged. Demand for exchange strong.

From Evansville, Ind.: Only fair.

From Chicago, Ill.: Money is easy at 5@6 per cent. Collections better than this time last year. The feeling in business circles is more confident.

From Peoria, Ill.: Notwithstanding the unfavorable weather there is apparently a better feeling in trade and country orders.

From Detroit, Mich.: In general lines quite brisk. Collections only fair.

From St. Louis, Mo.: Slower than for weeks past on account of chilly and very stormy weather. Collections from some regions are backward. Money remains easy with only moderate demand.

From Kansas City, Mo.: Quiet, but now improving under the influence of favorable weather.

From Burlington, Iowa: Quite satisfactory for the season. Staples in some have sold well. Jobbers report a light demand, with fair collections.

From Davenport, Iowa: Good, particularly in wholesale groceries.

From Des Moines, Iowa: Retail trade in all lines dull; wholesale slightly better.

From Minneapolis, Minn.: In dry goods and hardware the trade is firm—twenty to thirty per cent. larger than last year. There is but slight increase in the grocery trade, but it is more satisfactory, and payments are more prompt as a rule. Country merchants are in better condition than last year. Trade will be of a sorting-up character until the result of the wheat harvest is definitely known. Jobbers are not pressing their goods on the market, and only place them where they are sure of prompt payment. The money market is active for the season, with demand full up to supply.

From St. Paul, Minn.: Moderate. Country merchants are still buying small bills and often. The summer business is below expectations—hardware and lumber the only lines showing great activity.

From Lincoln, Neb.: Better with retailers than during April, and wholesale dealers also report an increase in sales. There is a more active demand for groceries.

From Omaha, Neb.: Since last week the weather has continued pleasant, quite warm, and business is said slowly on the increase in all lines, dry goods and general.

From Lawrence, Kan.: Slightly improved, owing to better weather, but will not be brisk until after the wheat crop is gathered and money becomes abundant. Collections good.

From Topeka, Kan.: General trade in healthy condition. Collections are good. Money market full. Considerable decline in the number of mortgages loans made.

From Denver, Col.: All branches of trade except dry goods feel the depression caused by late heavy snows in the mountains, which retard mining operations. Collections becoming slow.

From San Francisco, Cal.: The jobbing trade is dull for the season, but collections are good. Exports are heavy. Late arrivals of shipping have largely increased stocks, merchandise and produce. Over 30,500 pounds of opium arrived during the week, escaping the increased duty of $4 per pound, which takes effect the 1st of July.

From Baltimore, Md.: Quiet and unchanged.

From Richmond, Va.: Slightly improved.

From Norfolk, Va.: As good as usual. Collectiont only moderate.

From Savannah, Ga.: The weather warm with refreshing rains, which have improved crops and forwarded movements of truck produce. General trade quiet and more backward than last season.

From Selma, Ala.: Dull since last report. The grocery trade has improved but little if any.

From Galveston, Tex.: Moderate.

From Memphis, Tenn.: Quiet.

INDUSTRIAL.

The board of arbitration appointed to consider the differences between the Pittsburgh district railroad pit miners and their employers is reported as having failed to accomplish anything. The operators demanded a reduction of wages amounting to ½c. (from 3½c. to 3c.) per bushel, from which the men dissented. They agreed to go to work pending arbitration and did so. It is reported that the failure of the board to agree is due to the fact that the mine owners prefer to have the men strike, and propose ordering a reduction to 2½c. The southern Illinois coal miners have had another disturbance within a week, and the Troy, N. Y., molders, where the question of the right of employers to hire non-union molders is in dispute, have indulged in another of the attempts at gaining their point by resorting to violent methods, as in times past. Other features of the situation are contained in the following special dispatches:

INDUSTRIAL FEATURES.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: There is no change in the situation at this point. The building trades are well employed. Textile mills running slowly and in many cases on part time. Other manufacturing branches moderately busy, but no great rush reported in any department.

From Cincinnati, Ohio: The various industries exhibit little vitality.

From Milwaukee, Wis.: Builders' material is in good demand and a fair trade is being done. There is a large amount of building going on.

From Savannah, Ga.: Industrial pursuits are steady, and a large amount of money is being invested in building, which keeps contractors and mechanics fully employed.

BREADSTUFFS ABROAD.

The reports received from the British and continental grain markets during the past week have continued the story which has been told from week to week for some time past. Breadstuffs abroad have been weaker, the weather on the whole has continued in favor of a good harvest, and grain-exporting countries other than the United States have been enabled to find a market for their surplus wheat owing to the relatively high price of that cereal here. A review of the previous week's grain trade in London, received by cable, states that for foreign wheat there was only a retail demand, and that little business had been done in American, while the supply was very large. The sales in English wheat during the week amounted to 55,186 quarters at 43s. 4d., against 23,509 quarters at 47s. 9d. in the corresponding week last year. Late in the present week the London market became weaker and more inactive. The views held abroad about the crop situation here are by some authorities as wide apart as they are here. While one, in commenting on a supposed deficiency of 10,000,000 quarters, says, "it is, however, easy work for June to add a bushel and July to add another bushel per acre to the outturn now estimated, and it may be said of the United States that its eggs are counted as rotten before they are addled," the other commentor, in mentioning that our summer wheat options command a premium over spot values, concludes that this fact shows the general faith of American speculators in short crops here and increased domestic consumption.

The weather in France is against holders, having greatly improved. Still the inquiry there is more noticeable so that the position of the staple is well maintained. German crops, under cold and wet weather, are still said to be healthy but backward. Good weather is reported from the Netherlands, and India cables increasing shipments. The tone of wheat at the ports in the latter country is weaker, owing to heavy arrivals.

The quantity of grain on passage to the continent and the United Kingdom June 9, as per Beerbohm's cable, was as follows:

	Wheat, qrs.	*Maize, qrs.*
To the United Kingdom	2,225,000	290,000
To continent	480,000	50,000
Total quarters	2,705,000	340,000
Equal bushels	21,640,000	2,720,000
Compared with the week ended June 2:		
To the United Kingdom	2,150,000	390,000
To continent	460,000	65,000
Total quarters	2,610,000	455,000
Equal bushels	20,880,000	3,640,000
Increase bushels	760,000	.....
Decrease bushels	.....	920,000

The *Mark Lane Express* of June 4 says: Baltic wheats are now beginning to arrive. In Liverpool the trade has been very slow, and against sellers. American flour in London has been almost unsalable, and much of it is not sound; values for foreign flour, however, remain nominally unchanged, and the finer grades are firm in value. The supply to the port of London has been very small during the past week, namely, 5,325 sacks, 502 barrels foreign and 17,515 sacks English. The arrivals of American maize in London have been mostly of inferior quality and in bad condition, making sound flat maize worth rather more money on Friday, as compared with Monday's rates, say, 28s., or 3d. dearer out of the ship. Barleys have remained firm at unaltered rates.

AMERICAN WHEAT MARKETS.

There has been the usual budget of crop reports and rumors during the week, headed by one from the government Agricultural Department, published on Sunday morning. The general average condition of the winter wheat crop was reported to be but 75, against 83 for May and 99 in June, 1882. The spring wheat summary states that the acreage planted to that cereal has been increased 5 per cent., or about 500,000 acres, thus indicating a total area to spring wheat of 10,000,000 acres. The condition of spring wheat is given very high, 98, the same as last year. The increases in area planted are: Dakota 40 per cent., Montana 35, Nebraska 7 and Minnesota 5 per cent., while Iowa loses 2 and Wisconsin 1 per cent. This report, so far as it relates to winter wheat, if anything was a bull argument, but did not have the slightest effect of that kind. In fact, the various wheat options on Monday closed from ⅜c. to 1c. per bushel lower than on Saturday. Some talk has been heard about rust and damage from the hot wind in California, but it resulted in little if any effect on prices. The week, then, has witnessed comparatively dull markets and a gradual decline in prices. Exporters are not buying as holders would like to have them, and stocks are piling up in the face of liberal receipts at the west.

The receipts of wheat at tide-water for the week ending June 9 decreased from 1,420,284 bushels on June 2 to 1,252,078, or 168,206 bushels. The exports from the Atlantic ports for the week ended June 9 amounted to 724,509 bushels, against 802,848 bushels, a gain of 78,339 bushels only. From September 1, 1882, to June 9 the exports of wheat from the Atlantic ports amounted to 57,804,873 bushels, against 37,063,049 bushels in a corresponding portion of the preceding year, a gain of 20,741,824 bushels.

The course of the wheat market during the past week is indicated by the following prices in the New York and Chicago markets, for July wheat on the dates mentioned: New York, Saturday last, $1.22¾; Monday, $1.21⅞; Tuesday, $1.22⅜; Wednesday, $1.21¾; Thursday, $1.21½; Friday, $1.20¾. At Chicago, Saturday, $1.12¾; Monday, $1.11½; Tuesday, $1.12⅝; Wednesday, $1.10⅞; Thursday, $1.11⅞; Friday, $1.10⅜. A decline on the week of 2c. at New York, and 2⅜c. at Chicago.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended June 9 amounted to 1,061,678 bushels, against 778,973 bushels in the preceding week, and the shipments to 606,316 bushels, against 505,233 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) June 9, as against the preceding week, showed an increase of 297,651 bushels.

CORN.

A better demand and less favoring weather for corn have conspired to prevent its showing the weakness that has been remarked in wheat. On Saturday, however, a decline of ¼c. in options was noted, and at the close the market was weak. More firmness was displayed on Monday, owing to a fair export request, although June corn went down ¼c. Tuesday was featureless and prices unchanged. Later in the week considerable steadiness was shown in corn, the demand was better, crop rumors fell away and fluctuations continued to a very narrow range. The receipts of corn at the Atlantic ports for the week ended June 9 were 1,915,954 bushels, against 1,712,393 in the preceding week, while the exports from the same points amounted to 1,374,291, against 1,164,646 bushels. From September 1 last to June 9 the exports of Indian corn were 34,328,901 bushels, against 24,671,434 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, June 9, had increased 823,886 bushels as compared with June 2. The course of the corn market during the past week is indicated by the course of prices at New York 3 p.m. and Chicago 1 p.m. on the dates given, as follows: At New York, on Saturday, 65⅞c.; Monday, 65¾c.; Tuesday, 65¾c.; Wednesday, 65½c.; Thursday, 65⅜c.; Friday, 65c. At Chicago, Saturday, 56⅜c.; Monday, 56c.; Tuesday, 57½c.; Wednesday, 56⅝c.; Thursday, 56¾c.; Friday, 55⅝c., or a decline of ¾c. on the week at New York and at Chicago.

The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending June 9, were 3,096,365 bushels, against 2,522,820 the week preceding, and the shipments were 2,231,892 bushels, against 2,519,442 in the preceding week.

The closing prices of breadstuffs in New York last evening, as against those of the Friday preceding and the corresponding date last year, were as follows:

CLOSING PRICES OF BREADSTUFFS IN NEW YORK.

	June 8.	*June 15.*
No. 2 flour	$2.60 @3.60	$2.50 @3.50
Superfine flour	3.50 @4.00	3.45 @4.10

AMERICAN GRAIN REPORTS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Winter flours are in light stock and strong. Springs are not in large supply but quiet, the warm weather promoting caution on the part of buyers. Speculation in grain has been very tame, and the general drift of values has been downward, although there has been no marked de-

cline. Shippers indifferent, but demand for wheat rather better at the close, while the inquiry for corn is falling off. Stocks are light.

From Cincinnati, Ohio: Flour manifests less animation under an improved prospect for wheat crop; prices are easier, but offerings are light. Wheat has fluctuated during the earlier part of the week under firm prices, but the week closes with a decline. Receipts about one-half those of last week. Corn dull and plenty.

From Evansville, Ind.: Weather good. Corn is doing well. Wheat is beginning to ripen and farmers say will be ready to cut in ten days.

From Chicago, Ill.: Corn is steadily supported by a large shipping demand which balances the improved crop prospects. Oats are weak and dull. Wheat is depressed by an absence of any shipping demand, accumulating stocks and want of outside orders. Prices are the lowest for thirty days.

From Louisville, Ky.: Flour fairly active and firm. Wool irregular; demand light, and prices rather easy. Wheat crop reports generally indicate a light yield for the northern and eastern counties in Kentucky, and nearly an average yield in the southern and western counties. Corn is backward, owing to the cold spring and recent heavy rains preventing cultivation, but the outlook is favorable.

From St. Louis, Mo.: Flour continues lifeless. The grain markets are depressed and unsettled all around. Corn is receiving the most attention.

From Kansas City, Mo.: The crop prospects have improved and the outlook is now fair.

From Milwaukee, Wis.: June opened with a little more seasonable weather, but at present it is rather unsettled again. It is probable that the cereals will from now out improve more rapidly and turn out better than the early promise.

From Minneapolis, Minn.: The weather for the week has been an improvement on the former, somewhat higher temperature with moderate rain fall. It is still cool for the season, but in the main favorable for the wheat plant. In Dakota the wheat is reported in splendid condition. In Minnesota good, but ten days to two weeks late. The corn prospects are improved, but the plant is backward, and to make a crop warmer weather is required. Oats, barley, flax and grass are in good condition. Deliveries of wheat by farmers are small, and but little more will come forward. Receipts at Minneapolis for the week were 271,000 bushels. The market quiet and steady. Flour market quiet but not lower to buyer. Production light. Weeks output at mills 58,000 barrels.

From Lawrence, Kan.: All crops are promising finely. Wheat is nearly ready to harvest.

From Topeka, Kan: The prospects are that there will be a two-thirds crop of wheat this year, it being considerably damaged during the winter and late spring by frosts. From present appearances there will be a very large crop of oats and a fair corn crop.

From San Francisco, Cal.: Harvesting is progresstng. California samples are now barely in the market. The hot winds did not materially injure the wheat crop. The barley is uninjured.

From Baltimore, Md.: Speculation in grain has been fair, and both corn and wheat quite steady and firm. The demand for flour is improving and holders appear more encouraged.

From Wilmington, N. C.: Grain is firm; the demand fair. Breadstuffs steady.

From Savannah, Ga.: Growing grain is looking well and the prospects are good, but the oat crop has not had the attention of the last season.

From New Orleans, La.: Bulk corn market very dull, owing to unfavorable European advices. Receipts, exports and sales are small. Price 59½c. Nothing doing in wheat.

From Galveston, Tex.: Corn crop prospects reported good.

From Memphis, Tenn.: Cornmeal is weak, flour steady, and corn dull.

PROVISIONS.

On Saturday and Monday provisions manifested much weakness. Prices of pork and of lard almost uniformly declined on these days, and, as might have been inferred, speculators observing this took advantage of it. On Tuesday the short interest stepped forward to buy in their pork and lard and close out their deals to such an extent that a very noticeable advance in price was caused. A repetition of this movement in prices was the feature of Wednesday's trading. A few orders for export were received during the week, but they were insignificant. London cables report a lower market abroad for bacon, and a disinclination to buy from this side while the present range of prices is maintained. The home trade is also at a low ebb.

The export of hog product from the following places for the week ending June 9, 1883, was:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds.*
New York	2,223	2,883,515	2,588,139
Boston	836	755,043	792,311
Portland	..	....	....
Montreal	201	877,000	47,190
Philadelphia	6	600,000	5,050
Baltimore	56	1,801	40,124
New Orleans	82	2,126	630
Totals	3,404	5,119,485	3,573,444
Previous week	2,517	3,411,729	3,147,298

The total export of hog product from the above-mentioned places from November 1, 1882, to June 9, 1883, was as follows:

	1882-83, pounds.	*1881-82, pounds.*
Pork	29,623,200	35,892,600
Bacon	270,018,104	282,238,343
Lard	148,464,275	161,696,957
Totals	449,005,579	479,827,900

PROVISIONS AND LIVE STOCK REPORTS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: There has been only a moderate jobbing trade in provisions. Butter has ruled firmer under good speculative buying, but the consumptive demand has not improved. Production is large and receipts liberal. Cheese is lower under larger supplies.

From Cincinnati, Ohio: Provisions are heavy under a slight decline. There is a steady outgo under consumptive demand. Stocks on hand light.

From Chicago, Ill.: Provisions weak; all lines show heavy decline for the week, largely due to increased receipts of hogs and rapidly accumulating stocks. Cattle are declining under large receipts.

From Louisville, Ky.: Provisions are quiet and easy.

From St. Louis, Mo.: Provisions stagnant and declining. Cattle active, though irregular. Prices are slightly upward. Hogs were dull until a decline set in, and the market has since been lively, but not firm.

From Kansas City, Mo.: Steady. There is an active demand for packing-house products. The market for shipping cattle is strong and active, prices tending upward. Hogs are rather unsteady and prices are weakening.

From Des Moines, Iowa: The market is weak and slow, depending on the weather.

From Lincoln, Neb.: Provisions market moderately active.

From Baltimore, Md.: In the provisions market speculation is easier and prices lower.

From Wilmington, N. C.: Provisions are easier.

From New Orleans, La.: Flour and provisions are dull, with stocks small.

From Memphis, Tenn.: Meats and lard dull, and the tendency downward.

THE NEW YORK DRY GOODS MARKET.

The general tone of the market during the past week has been quiet. Jobbers are buying as little as possible at present on account of it being near their stock-taking time, and their purchases are only for actual requirement. Summer dress goods, as lawns, foulards, grenadines, etc., are the only fabrics that there is any demand for. Cottons, especially low grades, prints, jeans, etc., were all very quiet and in poor request.

The auction sale of woolens on Wednesday resulted very satisfactory, the attendance was good, bidding spirited, and prices better than expected. The woolen trade generally has shown a slight improvement during the past week. It is much needed, and we hope to see it still improve.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

From London: Manchester cottons continue to be shipped in moderate quantities, but the production is beyond sales. Prices are flat. The eastern markets are depressed. Yarns are cheaper.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Subsiding to the usual quietude customary at this season.

From Boston, Mass.: Both cotton and woolen fabrics move slowly. Jobbers show no disposition to stock up for the fall trade, and sales from agents' hands continue to be confined to small lots. Retailers have had a little spurt on light goods, but it has not affected the wholesale trade. The auction sale of heavy woolens in New York on Wednesday attracted a good deal of attention.

From Providence, R. I.: The print cloth market is steady and quiet, the amount of sales being light; 64s are quoted at 3⅝c., and 56x60s at 3⅛c. There are about 135,000 pieces on hand.

From Rochester, N. Y.: Dry goods jobbers report a good demand, sales being fully 15 per cent. in excess of the corresponding week last year. Collections are reported satisfactory. The retail trade in this line is brisk, the weather being favorable.

From Philadelphia, Pa.: Retail trade has been quickened by the warm weather and jobbers have had more orders for reassortment, but the market has not been active. Business in package lines is slow.

From Pittsburgh, Pa.: Dry goods continue in good demand and collections are reported satisfactory.

From Cincinnati, Ohio: Clothing and dry goods are without note.

From Chicago, Ill.: Dry goods, millinery, notions and fancy goods are fairly active for the season. Sales exceed the first half of June for two previous years.

From Peoria, Ill.: There is some improvement in dry goods. Collections are reported good. There is no speculative feeling, and this is taken for indications of a healthy summer and early fall trade.

From Detroit, Mich.: In dry goods business for week has been quite active.

From Louisville, Ky.: Dry goods quiet and featureless.

From St. Louis, Mo.: Dry goods are duller than for some time past and values are a little downward in several lines.

From Kansas City, Mo.: Quiet with no notable features. Collections fair.

From Davenport, Iowa: In wholesale lines improvement is reported. But money is scarce and collections hard to make.

From Burlington, Iowa: Dry goods sales are satisfactory for season. The weather is favorable for the trade.

From Milwaukee, Wis.: In dry goods the market is quiet and unchanged. The volume of business, notwithstanding, will probably reach proportions quite equal to same time last year.

From St. Paul, Minn.: Dry goods are in fair demand for assortments. Mosquito netting is very active and prices have advanced 15 per cent. with the upward tendency, because of curtailed production. There is good inquiry for choice styles of fancy prints and prices are firm. Cheap goods, especially prints, are not selling so well as heretofore. General sales have slightly increased.

From Lincoln, Neb.: Very little change in dry goods.

From Omaha, Neb.: Dry goods and general merchandise trade in summer goods is picking up, and the Fourth of July trade is brisk. Collections are still poor and not expected to change much until after the 1st prox.

From Topeka, Kan.: Dry goods are firm and steady. Most of the merchants claim that their sales exceed those of corresponding months last year; a few say their sales are not so large.

From Denver, Col.: The dry goods trade light.

From San Francisco, Cal.: The trade during June exceeded expectations. Prices are shaded in some lines and advanced in others.

From Baltimore, Md.: The dry goods trade is only fair, and sales are said to be behind the average at the same period of 1882. Collections are a little slow.

From Richmond, Va.: Jobbing moderate.

From Norfolk, Va.: In jobbing and retail trade is very quiet.

From Wilmington, N. C.: The dry goods trade is fair for the season.

From Savannah, Ga.: The dry goods market has kept up fairly well the whole season. Wholesale and retail dealers have full stocks, and show disposition to force sales of heavy fabrics. Prices irregular except for salable and leading articles.

From Selma, Ala.: The dry goods trade has not been so good this month.

From Memphis, Tenn.: For dry goods the past week has been quiet, but the trade has not yet reached summer dullness.

THE CLOTHING MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The demand for thin clothing has increased under the influence of the warm weather, but in other respects the market is quiet, the regular season's trade being about over.

From Savannah, Ga.: Clothing is backward, with little activity. Stocks of winter were carried over.

COTTON.

At New York the market for spot cotton for the week past has not changed materially from that of last week. Dealings have been very light, and almost entirely on account of room traders, there being no outside speculation worth mentioning. The sales have been entirely for home consumption, and foot up 1,500 bales, against 3,553 bales last week. The deliveries on contract amount to 2,500 bales. The price for spot middling uplands remained unchanged at 10⅝c., the closing price of one week ago, until Friday, when it dropped a point to 10 9-16c., and closed at that figure.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week.*	*Last year.*
Ordinary	7⅝c.	7 11-16c.	9½c.
Strict ordinary	8 1-16	8⅛	10 1 16
Good ordinary	8⅞	8 15-16	10⅞
Strict good ordinary	9 9-16	9⅝	11 5-16
Low middling	10 1-16	10⅛	11¾
Strict low middling	10⅜	10 7-16	12
Middling	10 9-16	10⅝	12 3-16
Good middling	10 15-16	11	12 9-16
Strict good middling	11 3-16	11¼	12 13-16
Middling fair	11 11-16	11¾	13 5-16
Fair	12 7-16	12½	14 1-16

STAINED.

	This week.	*Last week.*	*Last year.*
Good ordinary	7 1-16	7⅛	9 1 16
Strictly good ordinary	7⅞	7 15-16	10 1 16
Low middling	8 9-16	8⅝	10¾
Middling	9 11-16	9¾	11¾

The market for spot cotton closed quiet.

The future market for the past week has furnished no new incidents worthy of mention, business has been slow, and there has been a general disinclination amongst buyers to touch near months, except for quick sales, owing to the uncertainty respecting the movements of large operators. The price on Monday advanced from 4 to 6 points for near months, and from 1 to 3 points for later months, but has fallen away every day since and closed last night about 3 points lower for near months and 2 for later ones than the closing quotations last Friday evening. The total sales for the week foot up 283,100 bales, against 338,100 for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
June	10.45	10.57	12 16
July	10.53	10.58	12.19
August	10.59	10.62	12.28
September	10.33	10.34	11.99
October	10.02	10.04	11 58
November	9 92	9.94	11 43
December	9.94	9.95	11.44
January	10.01	10.03	11.58
February	10.12	10 13	11.70
March	10.22	10.23	11 82

The market for futures closed quiet and steady.

The southern markets have been dull and steady. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales	*To-day.*	*Last year.*
Galveston	3,289	10	11⅞
New Orleans	8,250	10	12⅛
Mobile	1,100	10	11¾
Savannah	400	9⅞	11¾
Charleston	375	10	12
Norfolk	1,293	10⅛	11¾
Baltimore	218	10½	12⅛

The total receipts of cotton at the ports since September 1 are 5,850,380 bales, an increase of 1,297,479 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	819,844	421,236
New Orleans	1,642,502	1,165,299
Mobile	310,201	262,866
Savannah	866,273	718,768
Charleston	504,222	490,534
Wilmington	128,502	133,048
Norfolk	790,931	599,431
Baltimore	76,018	35,582
New York	150,889	167,926
Boston	187,929	222,951
Philadelphia	93,121	76,558

Below will be found the receipts for each day of the week ending Friday, June 8, at eleven leading ports, as compared with last week and the same week one year ago:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	215	254	1,197	678	374	82
New Orleans	1,360	964	1,730	1,032	181	1,174
Mobile	55	129	....	48	4	199
Savannah	334	578	437	330	152	36
Charleston	27	46	398	300	94	221
Wilmington	....	2	13	....	6	4
Norfolk	840	197	510	102	463	359
Baltimore	984	797	260	520	320	....
New York	....	40	....	....	5	....
Boston	402	184	687	337	359	276
Philadelphia	3	95	591	81	4	134
Totals	4,130	3,286	5,823	3,428	2,022	2,485
This day last week	3,669	4,127	5,693	4,108	3,589	3,813
This day last year	1,874	3,105	2,191	1,880	1,865	1,784

The total receipts at the ports for the week were 21,455 bales, against 25,238 last week and 12,951 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 5,659 bales, against 5,830 bales last week and 2,162 bales for the corresponding week last year. The shipments for the week were 9,773 bales, against 14,064 bales last week and 13,382 bales for the corresponding week last year. The stocks for the week were 90,060 bales, against 95,119 last week and 65,505 for the same week last year.

At Liverpool the market for prompt delivery uplands has been dull and easier with only a moderate inquiry, which was freely supplied. The price fell off one point on Saturday, from 5¾d., and has since remained unchanged, closing at 5 11/16d. last evening.

The Liverpool future market has been quiet and firm. Prices during the week have not raised more than two points from the closing prices on Friday last week, and closed last evening from one to two points lower.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week	*Last week.*	*Last year.*
June	5 44-64d.	5 44-64d.	6 46-64d.
June-July	5 44-64	5 44-64	6 46-64
July-August	5 47-64	5 49-64	6 47-64
August-September	5 52-64	5 53-64	6 50-64
September-October	5 50-64	5 49-64	6 46-64
October-November	5 42-64	5 43-64	6 32-64
November-December	5 40-64	5 41-64	6 28-64

The sales for the week at Liverpool were 41,000 bales (of which 29,500 were American), against 78,000 (of which 42,000 were American) last year. The sales for export were 1,640 bales, against 9,800 bales last year. The sales for speculation were 1,840 bales, against 10,000 bales last year. The amount forwarded was 13,000 bales, against 12,000 bales last year. The stock in port is 988,000 bales (of which 742,000 are American), against 967,000 bales (of which 586,000 were American) last year. The total imports for the week were 59,000 bales (of which 39,500 were American), against 54,000 bales (of which 52,000 were American) last year, and the amount afloat 260,000 bales (of which 107,000 are American), against 298,000 bales (of which 71,000 were American) last year.

The Manchester market closed quiet at unchanged quotations.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The cotton market is quiet and steady, sales being reported small. Middling uplands are worth 10⅞c. and middling gulfs 11⅛c. There are 10,000 to 12,000 bales on hand.

From Philadelphia, Pa.: Spinners are working cautiously and buying only to meet actual wants. Prices have declined ⅛ for spot sales, but the market closes steady.

From Cincinnati, Ohio: Cotton is in moderate demand. Offerings are light and prices are one-eighth lower. Receipts to date 10,000 bales less than last year.

From Louisville, Ky.: Cotton dull and inactive.

From St. Louis, Mo.: Cotton very languid and none but local dealers are in this market.

From Baltimore, Md.: No business of consequence is doing with cotton, and the market rules a little unsettled.

From Norfolk, Va.: Receipts of cotton are falling off. The farming interest now progressing favorably.

From Savannah, Ga.: Cotton steady for the week, but no extensive sales have been made. Planters in the middle and lower counties have been despondent about the growing crop, but the rains have made the prospects more favorable.

From New Orleans, La.: Cotton dull and the movement is small. The position seems to hang on the crop developments. Spots are unchanged. Futures have dropped 4 to 11 points.

From Memphis, Tenn.: The cotton market is dull, and sales light and principally to spinners.

COTTON CROP REPORTS.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Continued rain injures the growing crops. Cotton is dull and inactive.

From Helena, Ark.: The crops have improved very much, but there is too much rain.

From Galveston, Tex.: Weather hot during past week with occasional rain. Cotton crop prospects are reported good.

WOOL.

A moderate trade and continued caution on the part of all classes of operators have been the noticeable features of the wool markets during the past week. Speculation is virtually dead. Consumers, dealers and commission merchants are moving cautiously pending the development of events during the next twenty or thirty days. Prices hold fairly steady in the eastern markets, as old stocks are about exhausted and new wools have not accumulated in excess of the near requirements of manufacturers. There is not much change in the position of values in the interior. The future of the market is an unsolved problem. The weight of opinion is bearish on account of the tariff changes, the depression in the goods trade, and the prospect of an early accumulation of stocks of new domestic wool, as well as the expected large withdrawals of foreign now in bond in eastern markets. On the other hand belief is gaining ground that the market has seen its worst period for the more desirable wools. In support of this theory it is pointed out that surplus stocks of woolen goods are being widely distributed by forced sales at low prices, and the market is being prepared for a favorable reaction by a partial curtailment of production. Besides this it is contended that the effect of the new tariff has been exaggerated and its practical workings fully discounted in advance. They who hold this opinion look for a gradual improvement in trade and prices in the early fall. Between these extremes of opinion as to the outlook trade halts or drags slowly along at all points. Shearing is now under way in the fine-wool states, and buyers are canvassing the country markets, but as yet few clips of washed fleeces have changed hands. Buyers' ideas of value vary from 30c. to 33c. for Ohio clips, while, so far as heard from, growers are indisposed to sell below 35c.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The wool trade is in the same dull state as noticed last week. There is no improvement and no indication of improvement. The sales of the week have been 1,000,500 pounds of all kinds. Manufacturers are buying sparingly and only for the supply of immediate wants. Our advices from San Francisco, Texas and other points also report a quiet state of things, and it is evident that the clip of the country will move slowly into the hands of manufacturers and dealers. In Ohio prices have not opened as yet, and there is a difference of at least 5c. per pound between the views of buyers and sellers. The sales of Ohio and Pennsylvania fleeces have been at 37@38c. for X and 39@40c. for XX. Michigan and Wisconsin fleeces range from 35@37c. for X. Combing and delaine fleeces are scarce and selling at 40@45c. per pound, as to quality. Unwashed wools have been in moderate demand, with sales mostly in the range of 24@28c. for fine and 25@30c. for medium grades. Pulled wools are in moderate demand at 43@45c. for choice eastern and Maine supers and 25@40c. for common and good. Foreign wool is quiet and no movement of any importance. Carpet wools are very dull and unsalable at a satisfactory price.

From Philadelphia, Pa.: Demand has been sufficient to take up the moderate arrivals of desirable lots, but consumers are operating with caution and are indisposed to accumulate stocks in advance of need.

From Cincinnati, Ohio: Wool is easy and quiet.

From Savannah, Ga.: Sales of hides and wool continue dull. Receipts fallen off.

IRON.

A better feeling has been manifested in the pig iron trade during the past week, though no real improvement beyond this can be claimed. Sales of American pig iron have been moderate and in small lots. Various members of the trade express the opinion that $20@$19 now look like bottom figures, though, of course it is not impossible that a lower basis may be arranged. Stocks of 160,000 tons of pig at the furnaces are too heavy a weight to carry in the face of a production in excess of existing demands. Since January 1, Mr. Swank reports that 66 furnaces have blown out, there having been 417 in operation on that date against 351 on June 1 last. With respect to kind of fuel used, there have blown out in the past six months 24 anthracite furnaces, 18 bituminous furnaces and 24 charcoal furnaces. Of the 66 blown out, 22 were in Pennsylvania (6 of which were in the Lehigh and 8 in the Schuylkill valleys) and 21 in Ohio, these accounting for over two-thirds of the whole number. Others are reported as likely "to blow out soon"—27 in all—of which 13 are in Pennsylvania and 5 in Ohio. Scotch pig iron drags itself along heavily. Prices are unchanged and sales very light. Arrivals during the week will aggregate about 800 tons, most of which will go into consumption. Sales are said not to have been over 400 tons. The market is very dull. Bar is dull and the demand light. There are no new features in steel rails or scrap.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

From London—Pig iron is steadier in Cleveland and the Midland districts. Manufactured is weak. Steel sales are very cheap, equal to $9.50 free on board Yorkshire.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Pig is hard to move. One thousand ton lots of forge are selling at $17. Standard brands slightly firmer. Bessemer dull and nominal. Merchant bar is weak in anticipation of excessive supply, but best makes hold steady in price. Nails are strong and active. Construction iron is quiet. Steel rails are active in small lots, but bids for large lots are below the views of sellers. The tone of the general market is good and a better trade is hoped for in July and August.

From Pittsburgh, Pa.: The pig iron market has an improved tone this week, there being considerable inquiry for future delivery. No change in price since last quotations. Forge iron $18@$19, four months, and foundry $20@$22. The demand for bar iron has somewhat abated; but there is a large inquiry for immediate delivery, and, where manufacturers are willing to make concessions in price, orders are placed. The present indications are that trade would be good if there was an insurance as to the extent of the growing crops, and a settlement of prices on some basis would induce large purchases. The nail trade is very large for the season of the year. There is no stock here or west, and it looks as if the trade would take all the nails made until the usual fall business commences.

From Cincinnati, Ohio: Iron has assumed a more healthy tone. Supplies are ample, and there has been no perceptible improvement in prices. Manufactured is steady.

From Chicago, Ill.: Pig iron is in moderate jobbing demand. Stocks are slightly reduced. Fair orders are received for steel rails at steady but low prices. Iron and nails are active on orders; the latter scarce. Jobbers says sales exceed expectations.

From Detroit, Mich.: In iron the situation practically unchanged. The mills here have closed for repairs and will not resume until prospects are brighter. Iron ore is off in price from last season $1 to $1.50 per ton, and it is estimated that the output for the season will be fully 40 per cent. less than last year.

From Louisville, Ky.: Pig iron is in better inquiry, but trade is dull, buyers' views being below sellers' limit.

From St. Louis, Mo.: Merchant iron market is quiet at unchanged rates. Pig iron is in light request at weak prices, and the situation is unsatisfactory.

From Milwaukee, Wis.: The hardware trade has settled down to a natural volume and steady prices. Nails are in very light stock, and since the termination of eastern strike troubles a perceptive falling off is noted in the demand.

From Baltimore, Md.: The pig iron market is still depressed and prices have a lowering tendency. New steel rails are quiet, but steady. Orders are coming in rather slowly.

COAL.

The anthracite coal trade, while not active in any sense, may be regarded as in a quite healthful condition. The western demand holds good and the heavy surplus production of about 1,500,000 tons thus far during the year, as compared with last year, has caused no stagnation or clogging of trade. The consumption of this surplus in the first half year, or the practical removal of it, has been due in large part to the prolonged cold winter and late spring. Still the manufacturing industries west and elsewhere have called for more than might have been expected considering the disturbances in various lines of industry. The total number of week days on which there was no work at the anthracite mines in 1882 was, we believe, 42. A slight increase has been made in the total this year; yet the production has reached the excess noted above. The coming week is to be one of full time at the mines. The following week will furnish half time only. The opinion has been expressed, by those in the trade who are well informed, that after July 15 mining will probably be carried on continuously. With an output equal to that in the latter half of 1882, therefore, the season promises a total production of Pennsylvania anthracite of 30,500,000 tons, against 29,120,000 last year. The question of an advance of about 20c. in July has not been decided yet. There is some unwillingness to the change by certain operators, who believe that the present depressed state of some of the industries advise to the contrary.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The coal trade is quiet. Prices are low, and there is nothing more than a light summer demand. Dealers do not look for an advance in rates till fall. Receipts at this point last week 34,045 tons, against 67,503 tons the corresponding week in 1882. Total receipts since January, 799,631 tons, against 752,836 tons same time last year.

From Providence, R. I.: The coal market is quiet. Collections are reported fair. The stock on hand is comparatively small, and prices are generally low.

From Cincinnati, Ohio: The coal market is quiet. Prices and stocks liberal.

PETROLEUM.

The speculative market has showed the excellent staying powers of the current prices of petroleum, for despite persistent efforts to break down the holders of oil the general upper level has been maintained. Last Saturday prices opened at $1.15½, and after touching $1.19⅜ fell back to $1.18¼. Monday and Tuesday witnessed a reaction, and prices closed from ¾c. to 2c. lower per barrel. But on Wednesday again an advance was scored, the gain being from $1.16⅞ at the opening to $1.17½ at the close. Thursday saw these figures bettered with opening sales at $1.18⅞, and bids at the close of $1.18¼.

The price of certificates of crude on Friday opened at $1.19, and closed at noon, after varying within narrow limits, at $1.18¼. The afternoon session opened with sales made at $1.18, but prices speedily mounted to $1.18½ within the first half hour. The news from the oil regions yesterday was meagre but bullish. Anchor Company's well No. 119, which had been drilled deeper, came in on Thursday night and was reported as doing 200 barrels the first hour. Early yesterday morning it was said to flow but twenty-four barrels per hour, and a little later this rate had declined to sixteen barrels per hour. At the close last evening the price of certificates of crude was $1.19½ against $1.15¾ on Friday night last week, an increase of 3¾c. on the week. The market closed strong.

The following shows the fluctuations in prices of certificates of crude during the week ended last evening:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday	1.15½	1.19⅜	1.15½	1.18¼
Monday	1.18¾	1.18⅞	1.16	1.16½
Tuesday	1.16½	1.17⅛	1.15¾	1.16⅜
Wednesday	1.16⅞	1.18⅜	1.16¾	1.17½
Thursday	1.18⅞	1.20⅜	1.17⅞	1.18¼
Friday	1.19	1.19¾	1.17⅞	1.19½

Prices of refined have remained unchanged as given last week. The market is dull and unsatisfactory. This situation, in connection with the advance in and sustained position of crude more than ever confirms the intimation heretofore made in these columns that the Standard Oil Company did not expect the present advance in crude. European stocks of refined are heavy. The visible supply of barrels of refined for the seven continental ports, May 25, has been given at 1,842,199, against 1,451,292 on the same date last year. At London the stocks, quantity afloat and amount loading (here) for that market aggregated 420,104 barrels, against 391,803 on May 25, 1882. This makes the future of refined uncertain to say the least, for the large sales for future delivery by the company named at prices which, compared with present quotations for crude, are low, will prevent any immediate sales at an advance. In view of the stock mentioned foreign buyers can afford to wait.

The quotations for certificates of crude petroleum and of petroleum products last evening, as against those of June 9, June 1 and May 25, are as follows:

	May 25.	*June 1.*	*June 9.*	*June 15.*
Certificates, crude	1.03¼	1.19¾	1.15¾	1.19½
Refined, 110°	7⅜	8	7¾	7¾
Refined, 700	7¾	8⅛	7⅞	7⅞
Crude, in barrels	6⅞@7½	7⅜@8	7¼@7⅞	7¼@7⅞
Case, plain	9½	9½	9½	9½
Naphtha	5¾	5¾	5¾	5¾

The United Pipe Line report for May shows an increase of 242,744 barrels of net stocks, against only 11,715 barrels in April. The increase in gross stocks in May amounted to 487,194 barrels, while the sediment and surplus account (the pipe line companies own oil in the tanks) was increased 244,455 barrels. The gain in outstanding certificates (those on the market) in May was 1,691,692. Receipts of oil at the tanks in May gained 38,400 barrels, and deliveries therefrom gained 53,156 barrels. The excess of receipts over deliveries was 258,080 barrels in May, 272,746 barrels in April and 404,571 barrels in March. The May statement compared with that of May, 1882, shows the following changes:

	May, 1882.	*May, 1883.*		
Net stocks	26,357,830	33,366,471	Inc.	7,009,641
Certificates issued	20,622,520	27,084,934	Inc	6,462,414
Credit balances	5,734,310	6,281,537	Inc.	547,227
Receipts	2,339,170	1,895,283	Dec.	443,887
Deliveries	1,496,566	1,637,203	Inc.	140,637
Excess receipts	842,004	258,080	Dec.	584,524

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to June 9 was 266,567,329 gallons, against 260,944,587 gallons in a like period of 1882, an increased exportation of 5,625,745 gallons. For the week ending June 9, the foreign shipments were 16,429,676 gallons, against 17,640,201 gallons in the previous week. New York city's export of petroleum from January 1 to June 9 amounted to 223,155,820 gallons, against 213,004,337 gallons in a like period in 1882, an increase of 10,091,483 gallons this year.

OCEAN FREIGHTS.

The ocean freights market here has been slower during the week than for several weeks past. There has been some business done in vessels to load with petroleum, but in grain it has been mostly in a small way for steam on the berth. In a like manner have several of the out ports contracted to ship some grain, but the movement has been small. Produce has gone abroad in very limited quantities, and the market therefore remains quite dull. Other ocean freights markets report leading features as follows:

OTHER OCEAN FREIGHTS MARKETS.

[By Telegraph to BRADSTREET'S.)

From Boston, Mass.: Ocean freights continue dull and rates are nominal as previously reported.

From Philadelphia, Pa.: Grain freights have ruled very quiet both by sail and steam. The supply of tonnage is light but ample for requirements. A moderate inquiry has prevailed for oil vessels at steady rates.

From Savannah, Ga.: Northern freights are fair and coastwise in full supply. Foreign charters offering at full figures.

From Baltimore, Md.: The demand in freights is only moderate.

From Wilmington, N. C.: Freights are quie and steady.

From New Orleans, La.: Cotton, steam, 5 1/16d. to Havre; to arrive, ¾c.; do., sail, ¾c. Grain, to continent, per quarter, steam, 5s. to 5s. 3d. Grain, to Liverpool, 5d. Oilcake to United Kingdom and continent, sail, 28s to 30s. Oilcake to Liverpool 24s.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: All lines of boots and shoes are in fair request, and the sales so far this season are fully up to the average of former seasons. The demand for some of the higher grades has improved, and prices are steady. Shipments of fall goods have begun, and will probably steadily increase during the next month or two. Since the 1st of January shipments foot some 80,000 cases more than during the same period last year.

From Rochester, N. Y.: Shoe manufacturers are still in doubt as to the prospects for fall trade; the general opinion is, however, that trade will not be so heavy as last year.

From Chicago, Ill.: Boots and shoes are dull.

LEATHER.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: The leather trade continues good at firm prices, particularly for rough grades.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Milwaukee, Wis.: Lumber is active.

From Minneapolis, Minn.: A fairly active lumber market has ruled and prices are unchanged. The late rains have caused a rise in upper rivers and logs are coming out of the small streams. Jobbers report good business and improved collections.

From Baltimore, Md.: Receipts of lumber are heavy, and a suspension of shipments is advised for the present.

From Wilmington, N. C.: Timber receipts are increasing. The market is quiet for lumber; for shingles, the demand is good and the market firm.

NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Spirits of turpentine and rosins are quiet. Tar is easier and crude turpentine firm.

HEMP.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Hemp is more active and a little higher.

COFFEE.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: A firmer feeling prevails in the coffee market and some improvement is looked for in the near future.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: The movement in Maryland leaf tobacco is fair and prices firm.

From St. Louis, Mo.: Tobacco has sold actively and at strong prices most of the week, and is very firm.

From Cincinnati, Ohio: Tobacco shows activity under a liberal offering of high grades. Offerings of old are small; lugs and trash bring good prices.

From Louisville, Ky.: Tobacco planting is nearly completed, and the acreage will somewhat exceed that of previous years. The white burley acreage is increased, while the dark type planting is reduced. Leaf tobacco shows a decline, as compared with two weeks ago, of 1½c. on fine fillers and 2@3c. on good and medium fillers. General manufacturing grades are easy, owing to large planting and good receipts. Export grades very active and firm. Common lugs are not as plentiful as anticipated, and have advanced slightly. Deliveries and sales are large; sales this year to date are 52,000 hogsheads, being 15,000 hogsheads more than for same period last year.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Whisky is nominally unchanged, and transactions in both Kentuckies and highwines are reported satisfactory.

From Louisville, Ky.: In Kentucky whiskies there is but little doing in first hands. The jobbing demand is quiet and regular. Prices steady.

ATLANTIC COAST FISHERIES.

[By Telegraph to BRADSTREET'S]

From Boston, Mass.: The supply of shore mackerel is still light, and although more than usual at this season are coming from Nova Scotia, prices are quite firm. Orders are coming in quite freely. All kinds of dry fish are in small supply and command full prices.

NEWS VIA PACIFIC MAIL, FROM THE EAST.

[By Telegraph to BRADSTREET'S.]

From San Francisco, Cal.: Commercial news from the Australian colonies and Hawaii is favorable. Advices from China and Japan unchanged in tone.

THE CALIFORNIA FRUIT CROP.

[By Telegraph to BRADSTREET'S.]

From San Francisco, Cal.: The fruit suffered most from the late hot winds, but the crop generally is about an average. Shipments east of new fruit have begun. Home canneries busy on fruit.

THE FAR NORTHWEST.

[By Telegraph to BRADSTREET'S.]

From San Francisco, Cal.: The hops everywhere look well. Oregon and Washington Territory send favorable crop reports. Encouraging news is received of the spring trade in the northwest.

SPECIAL LOUISIANA CROP REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: There is but little oil cake offering. Meal $23.50. Crude cottonseed oil $36 to $50, and very dull. The stock here is estimated at 25,000 barrels. The stock of cane products is considerably reduced. Sugar is firm, and molasses dull. The better weather has improved feeling in crop circles. Rice is in good request and strong; fair to prime 5½@6⅛c.

THE BUSINESS SITUATION AT CHICAGO.

[Special Correspondence of BRADSTREET'S.]

Chicago, June 13.—Although business of nearly every description has been adversely affected by the heavy rains of the past three days, the aggregate volume of trade for the second week in June promises to show a marked gain on the corresponding period last year. The banks report a better demand for money than at that time last year, but their deposits are also larger, and the loan market easy at 5@6 per cent. to gilt-edged borrowers. The movement of grain to eastern markets is free, and the amount of exchange made is large, but the demand is heavy from the fact that the entire west, north and southwest depends on Chicago for a supply, and the market is firm at 75c. premium per $1,000. The jobbing trade in dry goods keeps up well for the season, and, although the sales of light goods during the first half of the current week were less liberal than during the closing days of the one immediately preceding, they were on a fairly satisfactory scale. Staple fabrics have also moved freely on orders, and the millinery and notion houses are doing more than an average June business, although it is generally conceded that sales would be larger were it not for the unfavorable weather. Clothing is dull, but not more so than is customary at this season, June invariably being a dull month for such goods. An average summer trade is reported in boots and shoes. Leather is quiet, under an average demand from manufacturers. The order trade in building and miscellaneous hardware is far in advance of this period in former years, and stocks are reported in excellent shape. Bar and all classes of structural iron is meeting an active demand, and stocks are well under control. Nails are selling fairly, and prices are well supported. Pig iron is dull, and sales, as usual, confined to job lots; yet the impression seems to prevail that prices are on hard pan, and that the next change must be for the better, hence there is less disposition to force sales. Coal is without material change; dealers in hard report a fairly firm feeling, but the demand only moderate. Lumber is selling more freely than at this date last year, but the margins for profits are less. The wheat market has not exhibited any marked features, and prices show a slight reduction from last week. The receipts, however, are slightly on the increase. Stocks show a small accumulation, and the prospect for an early activity, based on a legitimate demand for consumption, is the reverse of flattering, as shippers refuse to take any considerable quantities at current prices. On the other hand the bears are cautious about selling for future delivery while there is so much uncertainty regarding the growing crop. Corn is arriving with unlooked-for freedom, but the shipments responded close to the receipts, and prices have been sustained without showing any special strength. Oats are coming forward freely, but the speculative and shipping demand is active, and prices are well supported. The provisions trade is in a state of utter demoralization, due to the increasing receipts of hogs and the exposures made regarding the manufacture of lard, which, strange as it may seem, has caused all classes of hog products to be regarded with distrust, although there is really no connection between the meats and lard, as there is no means by which the meats could be adulterated. Speculative manipulations are also driving legitimate trade from here, and the outlook is gloomy for an early return of a healthy trade, and the indications are strongly in favor of lower prices as stocks promise to increase. Other points are also in the same position so far as increasing supplies of hogs are concerned.

WAS PHILADELPHIA HONESTLY TREATED?

The Philadelphia *Evening Bulletin* has the following:

"Ever since the census of 1880 was published lively discussion has been kept up as to whether or not Philadelphia's returns were properly given therein. It was hinted that strong influence had been brought to bear by New Yorkers and by free traders in New England to have the statistics of Philadelphia, the great manufacturing and protection city, made as small as possible. It was said that not only was the census here conducted in a slovenly matter, and not only was its work incomplete, but there were many cases in which figures have intentionally been suppressed. Instances were cited where, when a firm had its headquarters here and a branch office in New York, the returns for the whole were credited in New York. These and similar assertions have naturally led to heated arguments, and they have caused many Philadelphians to look upon the census reports with suspicion and even with distrust. Already in these columns the matter has been thoroughly sifted. Several months ago the *Evening Bulletin* published some preliminary statements from Mr. Lorin Blodgett, and also a long and exhaustive letter from General Francis A. Walker, the ex-Superintendent of the Census Bureau, in reply.

"Mr. Blodgett undertook to make another census of Philadelphia's industries, in order to prove conclusively that our city was unfairly dealt with in the official count. Mayor King lent him his assistance, deputing policemen in each district to assist in the work. The statistics were taken in February, and they have now been compiled, tabulated and submitted to the mayor. From this second census we gather some startling facts. Large discrepancies are to be met with at every turn and in every trade.

"According to the official figures of 1880 the number of establishments in Philadelphia amounted to 8,377. The most important industries, ranked according to the number of establishments, were blacksmithing 258; boots and shoes 581; bread and other bakery products 849; carpentering 326; carpets 170; carriages and wagons 110; men's and women's clothing 475; confectionery 173; cotton goods 157; furniture 218; machinery 218; marble and stone work 110; painting and paper hanging 349; plumbing 241; printing 181; roofing 405; saddlery 116; tin 272, and tobacco and cigars 477. According to the report for 1882, now at the mayor's office, the city has 11,752 establishments.

"The total number of hands employed is set down by the former as 173,862, of whom 107,894 were men, 51,618 women and 14,350 children and youths. According to the latter authority there were in all 236,443 persons employed, of whom 142,513 were men, 66,113 women and 27,817 boys and girls.

"A still more marked contrast between the two statements appears when we compare the valuation of the industries. According to the latter municipal census this valuation amounted in 1882 to $545,195,500. In the official census for 1880 the products are given as reaching $304,591,725. The most important of our industries, ranked according to their products, were: Boots and shoes $9,034,496; bread and bakery products $5,735,533; carpentering $5,131,862; carpets $14,263,510; carriages $2,057,119; street cars $3,174,145; clothing $20,973,158; confectionery $2,653,074; cotton goods $16,349,238; drugs $11,804,793; furniture $4,839,853; hats $2,300,786; hosiery and knit goods $7,683,415; iron and steel $4,257,179; iron castings $3,770,311; leather $6,741,796; machinery $9,684,927; marble and stone work $2,104,721; millinery and lace $7,869,114; mixed textiles $2,707,323; painting $2,097,052; paints $2,068,503; printing and publishing $6,834,964; shipbuilding $2,981,381; silks $3,162,340; soap $2,033,403; sugar $21,294,929; tin $2,660,969; cigars $2,617,725; umbrellas $2,804,874; woolen goods $21,349,810, and worsted goods $8,327,282.

"It must be noted in this connection that Mr. Blodgett's report includes among the industries of our city the United States Mint, the value of the gold and silver coined there being $70,746,826. This item was not entered on the census return for 1880. The same is claimed for many other industries. The deductions to be made from a comparison of the two reports are obvious, but it must be shown that the second is free from bias and error before the first can be set aside. It must also be remembered that there was a difference of two and one-half years in the taking of the censuses, during which period the city naturally grew very rapidly. It is pleasant to know that, without exaggeration, Philadelphia's importance as an industrial city was never so great as to-day."

WHENCE ITALY GOT HER GOLD SUPPLY.

The following table, according to the Manchester *Guardian*, shows the precise form in which the £19,631,000 of gold accumulated by Italy for the purpose of resuming specie payments was received:

	Lire.		£
Bullion	23,353,369	=	934,135
German reichmarks	5,259,993	=	210,400
Russian imperials	59,755,528	=	2,390,221
English sovereigns	10,058,742	=	402,350
Spanish pesetas	998,123	=	39,925
American dollars	53,505,824	=	2,140,233
100 franc or lire pieces	93,300		
80 franc or lire pieces	6,960		
50 franc or lire pieces	14,200		
40 franc or lire pieces	14,040		
20 franc or lire pieces	328,035,660		
10 franc or lire pieces	9,659,810		
5 franc or lire pieces	244,145		
Total of Latin coins	338,068,415	=	13,522,737
Total			£19,631,001

It is thus evident that of the whole amount collected about 69 per cent. consisted of the coinage of the Latin Union, and this must have been derived mainly from Italy herself and from France. In the published tables showing the countries from which the gold is drawn, Russia is credited with only £1,008,998, but the figures we have quoted prove that much more than double this amount was Russian coin. Germany, on the other hand, stands credited with £2,621,573 of gold, while only £210,400 of German coin was collected. It is probable, therefore, that the large amount of Russian gold absorbed by Italy came through German hands. It has all along been supposed that the increased supply yielded by the Russian mines of late has provided much of the foreign gold taken up by Italy for the resumption operations, and the figures we have given afford a substantial confirmation of the theory.

TRADE EMBARRASSMENTS.

There were 165 failures in the United States reported during the past week, 17 more than the preceding week, 61 more than the corresponding week of 1882, and 105 more than the same week of 1881. Compared with the previous week the middle states had 39, an increase of 2; New England states 31, an increase of 3; southern states 28, an increase of 1; western states 46, an increase of 6; Pacific coast states and territories 21, an increase of 5; Canada and the Provinces 23, a decrease of 9. The important failures were: Vanderhoof, Morrison & Co., stock brokers, New York city; The Alpha Improved Leather Company, Newark; Rhoades, Hubbs & Co., wholesale notions, Kansas City. In the principal trades they were as follows: Grocers 23; general traders 21; liquors 15; manufacturers 14; clothing 9; shoes 7; drugs 7; dry goods 7; hardware 5; fancy goods 4; millinery 4; jewelry 4; hotels and restaurants 4; furniture 3; produce and provisions 2; books and stationery 2.

CALIFORNIA.

BAKERSFIELD.—Alonzo Coons, books, stationery, etc., whose store was burned May 26, has been attached.

BERKELEY.—R. R. Reed & Co., grocers, have been attached.

FRESNO.—J. D. Hicks & Son, tinware, have failed.

LITTLE RUN.—J. S. Corrigan, general store, has been attached.

MAXWELL.—Max Schusselblum, general store, is reported to have failed.

NOYO.—Carrigan & Eadie, general store, have been attached.

NOYO.—F. Mortier, saloon, has applied for relief in insolvency.

RED BLUFF.—A. O. Quimby, restaurant, has been attached.

SACRAMENTO.—Martin Wetzel, grocer, has been attached.

SAN FRANCISCO.—S. B. Chalomer, hotel, etc., has been attached.

SAN FRANCISCO.—R. De Chairmont, merchant, has applied for relief in insolvency.

SAN FRANCISCO.—J. H. Gilbert, salmon packer, who was reported attached for $150 on May 28, has been reported attached again.

SAN FRANCISCO.—C. F. Halling, cigar manufacturer, who was reported assigned March 14, has applied for relief in insolvency.

SAN FRANCISCO —Adolph Koneke has applied for relief in insolvency.

SAN FRANCISCO.—F. Lafrentz, brewer, has filed a petition in insolvency.

SAN FRANCISCO.—Linforth, Rice & Co., agricultural implements, have been attached. They made a statement about the middle of May, showing $43,000 liabilities, and assets about $32,000. No action has since been reported on the part of creditors until the above attachment was levied.

SAN FRANCISCO.—John Orth, grocer, has been attached.

SAN FRANCISCO.—Daniel Staidohair, hatter, has been attached.

SOUTH MARIA.—David Hecht, varieties, is reported to have failed.

UKIAH CITY.—M. V. Cleveland, harness, has applied for relief in insolvency.

COLORADO.

DENVER.—Bierbrauer & Co., candy factory, have been closed on an attachment for $900.

FORT COLLINS.—Lyon & Battey, groceries, clothing, etc., have assigned.

SALIDA.—Attachment papers have been taken out against Myers & Byers.

SILVER CLIFF.—The Combination Mutual Gold & Silver Mining Company has been attached.

CONNECTICUT.

WILTON.—C. H. Betts & Co., general store, have assigned.

DELAWARE.

WILMINGTON.—Edward Darrah, carriage manufacturer, has failed, with liabilities reported at $28,000; assets about $10,000; about $4,500 of debts are preferred.

DISTRICT OF COLUMBIA.

WASHINGTON.—W. S. Mitchell, carpets, etc., who has been in the trade for many years, has assigned.

GEORGIA.

CAINS.—J. E. Cannon is reported to have failed with $2,500 liabilities, and preferred claims amounting to $1,365, secured by mortgage. Nominal assets $3,000; actual assets $2,000.

SAVANNAH.—J. O. De Castro, cigars and tobacco, has gone out of business. The stock realized about $700, not enough to pay the preferences, which were $3,187. He has turned over a claim against the government, on which there is a balance of $7,000, to one of the preferred creditors.

ILLINOIS.

CHICAGO.—Levy & Bowers, grocers, have been closed by the sheriff. They were working on quite limited capital.

CHICAGO.—Maurice Goodman, tailor, has been closed by the sheriff.

CHICAGO.—C. E. Hace & Co., manufacturers of uppers, have been closed by the sheriff on a claim of $5,000.

CHICAGO.—William M. Madden, music publisher, has been closed by the sheriff.

MOLINE.—E. A. Okerberg, jeweler, has failed. He confessed judgment to his father for $4,000, and the latter took possession of the stock. Liabilities about $9,000; assets $3,500.

MOUNT CARROLL.—Vandergrift & Williams, grocers, are reported to have failed. Liabilities about $800; nominal assets $1,000; preferred claims $400.

PARIS.—J. B. Dains & Son, clothing, have assigned.

ROCKFORD.—Eli Brainard, drugs and saloon, has been closed by the sheriff.

ROCKFORD.—R. G. Smith, hats, has failed and sold out to his father.

SYRACUSE.—David Purwin, clothing, has been closed by the sheriff.

WELDON.—Humphreys, Walters & Co., general store, have not failed. A receiver was appointed at the instance of surviving partners to settle up the business. The receiver, L. B. Chenoweth, says the firm is perfectly solvent, and that the liabilities will be paid in full.

INDIANA.

FORT WAYNE.—T. R. Pickard & Sons, manufacturers of stoves, have assigned to George Wilson. They began business in 1876. Liabilities have been reported at $18,000 and assets at $10,000.

INDIANAPOLIS.—William Schaub, grocer, has failed and creditors are in possession.

NEW ALBANY.—Thomas J. Cannon & Co., saloon, have failed and been closed out by the sheriff.

TERRE HAUTE.—Theodore Jumper, harness, has assigned.

IOWA.

HAMBURG.—Miss B. Chillberg, millinery, has failed.

JEFFERSON.—I. Nash & Co., clothing, have been sold out by the sheriff.

WOODWARD.—Wiltse & Son, hardware, were attached May 28 for $1,600, previous to which they assigned to S. O. Conger, which was a voluntary action. Liabilities are reported $2,150 and assets $2,450.

KANSAS.

ELLSWORTH.—John Devine, confectioner, has failed. Liabilities $300; assets $150.

KENTUCKY.

TROUT'S CROSS ROADS.—Harris & Heltsley, general store, are reported to have failed.

MAINE.

BOOTHBAY.—D. W. Hodgdon, grocer, has gone into insolvency.

HALLOWELL.—James Atkins, Jr., hardware, has been attached.

LEWISTON.—Patrick Maney, contractor, is in insolvency. Liabilities $10,000; no assets.

LISBON.—J. M. Corbett & Son, general store, are reported failed, and offer 20 cents. Liabilities $9,000.

SKOWHEGAN.—Robert Harris, hotel, is reported financially embarrassed.

SPRINGVALE.—Samuel Vallire, general store, has liabilities reported at about $1,000. He has settled with his creditors at 50 cents on the dollar.

TOPSFIELD.—James A. Crofts, builder, has failed.

MARYLAND.

BALTIMORE.—An insolvent petition has been filed against S. E. Arnold & Co., liquors.

BALTIMORE.—T. W. Boyer, grocer, has assigned for the benefit of his creditors to Rufus Woods and Oliver F. Lauts, trustees. Liabilities $5,000; nominal assets $1,750.

BALTIMORE.—John Meagher, feed, has filed a petition in insolvency. Liabilities about $4,000; assets about $100.

MASSACHUSETTS.

ARLINGTON.—Charles A. Higgins, grocer, has failed.

ATHOL.—W. R. Safford, painter, has failed and offers 25 cents. Liabilities $4,000.

BOSTON.—Allison & Seaverns, curriers, have failed. Liabilities reported at $15,000.

BOSTON.—C. B. Barrett & Co., wholesale wines and liquors, have been attached.

BOSTON.—The liabilities of C. Batchelder, leather, are about $15,000. The only visible asset is stock in the Batchelder Machine Company of uncertain value.

BOSTON.—B. F. Cobb & Co., lumber, have failed. Liabilities reported at $26,000.

BOSTON.—Frederick Mahoney & Co., proprietors of the *Saturday Evening Express*, have failed and will settle in insolvency.

BOSTON.—Timothy H. Harrington, saloon, has failed, and is in insolvency. Liabilities $2,200, of which $1,750 is unsecured.

BOSTON.—Reilly & Flynn, liquors, have been attached. Liabilities about $3,000. It is thought the assets can pay about 20 cents.

BOSTON.—J. A. Rothschild, laces, etc., has failed. He says he owes $9,000, of which $1,600 is borrowed money and balance for merchandise; says his stock has not met ready sale, and awaits action of creditors.

DEERFIELD.—E. J. & G. F. Everett, of the Everett House, have been attached for $7,000 on a note. They were burnt out May 23, and lost $22,000; insured for $18,562. They failed last year.

DENNISPORT.—A. K. Nixon, grocer, has failed.

EAST HAMPTON.—The proposition of Mr. Knight, of The Williston & Knight Company, buttons, has been accepted, and the insolvency proceedings were withdrawn.

LOWELL.—Creditors of Sargent & Son, clothing, have filed a petition in insolvency against the firm.

LOWELL.—J. H. Stackpole, fruits, is reported in insolvency.

NEW BEDFORD.—W. H. H. Allen, grocer, has failed and been attached. His stock and book accounts are mortgaged for $1,003.

NEWTON.—Ezra B. Blackwell, shirt manufacturer, is a petitioner in insolvency.

SOUTH BOSTON.—The South Boston Ice Company, ice dealers, have been attached for $15,000 on an action of contract.

SOUTHWICK.—Thayer & Reese, general store, are offering to compromise at 60 cents.

STONEHAM.—B. G. Barker, jeweler, is reported to have settled with his creditors at 25 cents on the dollar.

WALTHAM.—William A. Hunnewell, coal, is in insolvency.

WESTFIELD.—E. S. Jones, formerly whip maker, has filed a petition in insolvency.

WEST MEDFORD.—J. E. Collins, provisions, has liabilities of about $2,000 and no assets.

MICHIGAN.

LOWELL.—F. D. Eddy, stationer, has been closed up under chattel mortgage. Liabilities estimated $2,500; nominal assets $1,000.

ST. IGNACE.—Huff & Johnson, grocers, have been closed out by Detroit creditors on a chattel mortgage.

WEST BAY CITY.—H. G. Hawkins, grocer, has assigned to Maltby Brothers & Co. Liabilities are said to amount to $3,200; preferred claims to $3,000, secured by chattel mortgage. They will not continue.

MINNESOTA.

ALBERT LEA.—H. D. Brazer, jeweler, has assigned.

KASSON.—John Young, elevator, is reported to have assigned. His elevator in October last was estimated worth $5,000.

MINNEAPOLIS.—Knowlton & Walke, plumbers, have assigned.

MINNEAPOLIS.—N. P. Liljengren, furniture manufacturer, has assigned. He began in 1877. Liabilities about $12,000 and assets nominal.

WADENA.—The Clayton Manufacturing Company has been attached for $300. E. E. Luce, the vice-president, recently failed.

WALNUT GROVE.—William H. Owens, general store, has assigned to Daniel H. Thompson. He succeeded Fitch & Anderson in 1875.

MISSISSIPPI.

MERIDIAN.—N. W. Hopper & Co., general store, have sold out and been attached.

MISSOURI.

KANSAS CITY.—Helen L. Osborn & Co., millinery, have been attached for $752.

KANSAS CITY.—Rhoades, Hubbs & Co., wholesale notion dealers, have failed and their stock is in possession of preferred creditors. They began under this style in February, 1883, succeeding Horner, Rhoades & Hubbs at the death of Mr. Horner. The complications of the Horner estate involved the firm so extensively that the concern was obliged to obtain an extension on sums due. They also owed friends in Kansas City $15,000 and the bank there $12,000. Their New York creditors and those in Kentucky agreed to the extension. Mr. Hubbs stated that on January 1 last the firm's assets amounted to $129,503, and liabilities to $97,375, leaving net assets $42,132. They are indebted to several leading New York houses.

KANSAS CITY.—F. H. Russ, undertaker, has been attached for $400.

SLATER.—J. B. Fletcher, grocer, has assigned.

SOUTH GREENFIELD.—J. W. Binney, dry goods, etc., are reported to have failed and sold out.

ST. JOSEPH.—Mrs. C. H. Bryant, millinery, has sold out to her principal creditors.

ST. LOUIS.—G. M. Harding, pictures, was advertised to be sold out by the constable.

ST. LOUIS.—William B. Haseltine, Jr., & Co., leather and findings, have been attached, and assigned to William Giessler. Assets $12,000.

ST. LOUIS.—Kade Brothers, furniture manufacturers, have been attached and assigned.

NEBRASKA.

GRAFTON.—C. E. Ballard, drugs, was pressed and sold out.

NEVADA.

EUREKA.—C. Provost, saloon, has been attached and sold out.

NEW HAMPSHIRE.

ROCHESTER.—Albert M. Cousins, grocer, has been closed by the sheriff.

NEW JERSEY.

ELIZABETH CITY.—Abel Roberts, groceries and liquors, who was reported to have recently been burnt out without severe loss, is offering to compromise at 50 cents.

HARRISONVILLE.—D. P. Lippincott, miller, has assigned.

HOBOKEN.—Frederick L. Ernst, pickles, etc., has assigned to Budenbender & Moller. Liabilities are placed at $3,000; nominal assets $2,500.

NEWARK.—The Alpha Improved Leather Company has failed. John A. Meehan, of Philadelphia, is proprietor, and Robert H. Belden, of Newark, manager. Mr. Meehan is reputed to be wealthy. He is a retired merchant, and is said to be formerly of Hood, Bonbright & Co., of Philadelphia. The business was formed in 1878, but shortly after passed into the hands of the parties just named. The credit of the concern has been good, owing mainly to Mr. Meehan's reputed means. The liabilities are reported at $20,000, and it is thought the assets may realize about 40 to 50 cents. Unprofitable business for some time past and losses by Mr. Meehan are ascribed as the probable causes of the failure.

NEW MEXICO.

LAS VEGAS.—Rupe & Bullard, saw mill, are reported to have assigned to Joshua T. Raynolds.

NEW YORK.

ALBANY.—Weatherhead & Co., fancy groceries, have assigned. Several suits had been instituted of late.

BROOKLYN.—Isaac Cohn, clothing, assigned on the 14th inst. to Henry Brash, giving preferences for $8,542, of which the largest were to Cohn, Ball & Co. $3,974; Max Samter & Son $3,427. He has been in business sixteen years.

CLYDE.—Charles E. Graves, paints, has assigned to George G. Roe, giving preferences for $1,304.

DUNKIRK.—Lyons & Paxtin, grocers, have been attached and closed out by creditors.

FAR ROCKAWAY.—Eugene H. Cole, drugs, is reported to have suspended and is insolvent. He is out of business.

LYONS.—Lydia Stern, clothing, has assigned to C. H. Frisbie. Preferred claims about $2,000.

NEW YORK CITY.—Valentine Hoerschelman, manufacturer of butchers' fixtures, has assigned to Emil Koehler, with preferences as follows: John Mairr $209; C. Hoershelman $825, and John Rachow $85; total $1,102.

NEW YORK CITY.—The schedule and inventory of B. Lawrence & Co., wholesale stationers, who failed April 6, and assigned to Ellis S. Yates, are very voluminous. They were filed Wednesday. They show nominal assets of $100,670; actual assets $55,218; and liabilities $164,066, which include about $60,000 of accommodation indorsements and exchange notes with Thaddeus Davids & Co. The difference between the nominal and actual assets is caused by the worthlessness of a claim of $10,000 against James I. Chapman, of Washington, D. C., who failed in February last, and was sold out by the sheriff to the entire exclusion of B. Lawrence & Co., and a claim of $5,000 on an old partnership indebtedness which is not at present collectible, and to depreciation of fancy goods forming a large portion of the stock.

NEW YORK CITY.—The schedules of F. F. Leich, desks, show liabilities $12,137; nominal assets $11,328; actual assets $6,933.

NEW YORK CITY.—The president of the Levett-Muller Electric Light Company announces to the creditors that the company will pay all claims in full on presentation at the office.

NEW YORK CITY.—Edmund Macy, packing box manufacturer, Nos. 501 and 509 East Seventieth street, has assigned to James H. Preator.

NEW YORK CITY.—Charles Nonnenmacher, manufacturer of folding lounges, has assigned to George F. Geminder, giving two preferences for $786. Liabilities $2,869; nominal assets $3,617; actual assets $2,849.

NEW YORK CITY.—The schedules of Louis B. Phillips, clothing, show liabilities $6,608; nominal assets $11,339; actual assets $4,842.

NEW YORK CITY.—E. G. Rideout & Co., publishers and dealers in novelties, offer 25 cents in their own notes, without security, at three, six and nine months. Liabilities $107,000; assets $31,000.

NEW YORK CITY.—The schedules of Ezekiel Schreiber, grocer, show liabilities $4,133; nominal assets $2,778; actual assets $1,933.

NEW YORK CITY.—Toby Thomas & Co., stationers, assigned on the 9th inst. to Henry W. De Forest.

NEW YORK CITY.—E. V. R. Trethway, trading as the American Dairy Company, oleomargarine, assigned on the 11th inst. to John L. N. Hunt.

NEW YORK CITY.—Vanderhoof, Morrison & Co., stock brokers, suspended on the 11th inst., and assigned on the 12th inst. to R. B. Gwillim, giving a preference to J. H. Morrison, of Plainfield, N. J., for $25,000 for money loaned. The firm have been in business about two years, and have always been known as a "bear" house. Some of the partners speculated on their own account in both oil and stocks, and were caught short of stocks in the recent rise. The liabilities are reported at about $60,000. The seat in the Stock Exchange, belonging to the senior partner, was attached to satisfy claims of about $18,000 in the board.

NEW YORK CITY.—Wistar & Gee, grocers, assigned on the 14th inst. to John H. Harnett.

PORT JERVIS.—Henry Munnich, boot and shoe manufacturer, assigned on the 7th inst. to Jacob Kadel. In January he claimed $20,565 assets, against which were $18,565 liabilities. He has been established there for twenty-three years.

SARATOGA SPRINGS.—H. P. Huling, bookbinder, has assigned.

NORTH CAROLINA.

MONROE.—G. R. Lowell, general store, is reported to have assigned. He began about eighteen months ago on a small capital.

NEW BERNE.—J. J. Tolson & Co., grocers, recently assigned, owing to being pressed for money due. They were cramped, owing to not being able to collect money from planters because of low price of cotton. They were believed to have sufficient assets to pay in full. It is believed that with an extension they will come out all right.

OHIO.

BARNESVILLE.—Mrs. M. Anderson, grocer, has assigned.

BOWLING GREEN.—William Wade, shoemaker, has failed.

BUCYRUS.—George C. Trumple, shoes, has been closed by the sheriff.

CANTON.—A receiver has been appointed for Williamson Brothers, grocers.

CINCINNATI.—The Cincinnati Shoe Manufacturing Company has assigned to Samuel Pritz. The company was organized in 1873; capital stock $25,000, with $21,000 paid in.

CINCINNATI.—Nathan Moses, wholesale clothing, has mortgaged stock to Moses Bloom & Weil, of New York, Bernard Schroeder and A. & H. Strauss, Cincinnati, for $11,000. Afterward he assigned to Benjamin Hirshland.

CLEVELAND.—The Silver Metal Company has assigned to Charles E. Gorman. It was incorporated in December, 1881, with a nominal capital of $150,000, of which $27,500 was paid in.

DEERSVILLE.—W. H. Lukins, general store, has assigned.

GROVEPORT.—W. L. Parker, dry goods and boots and shoes, has assigned. He was formerly of Columbus.

LANCASTER.—Samuel H. Long, boots and shoes, has been closed by the sheriff. Liabilities reported at $15,000.

VAN WERT.—William H. Longworth, handle manufacturer, has been attached.

OREGON.

PORTLAND.—William Collier, machinist, has been attached on a chattel mortgage for $975.

PORTLAND.—V. H. Harding, contractor, has failed.

PENNSYLVANIA.

CHAMBERSBURG.—The stock of Brodbeck & Co., clothing, was advertised to be sold out by the sheriff.

CARROLLTOWN.—Eckenrode & Schroth, general store, assigned June 7 to Adam Shettig for the benefit of their creditors, with no preferences. It is thought they owe about $5,000, with assets enough to cover.

CHESTER.—H. C. Eyre & Co., machinists, have been closed by the sheriff.

DAUPHIN.—Henry McKee, general store, has assigned.

GARRETT.—R. Maher, general store, has failed.

MECHANICSBURG.—William Presby, general store, has made an arrangement by which the unsecured creditors accept the store in full for their claims, and the judgment creditors take the real estate. The latter will probably realize in full, and the former from 25 to 50 cents.

PHILADELPHIA.—Barrett & Cattell, stock brokers, suspended Monday. They were short of Pennsylvania, Reading and Northern Pacific common. About 2,000 shares of the stocks were bought under the rule. The liabilities in the board were reported at $5,000. They subsequently settled with creditors and were reinstated in the board.

PHILADELPHIA.—Albert J. Bilhartz, china, glass and queensware and house furnishing goods, was advertised to be sold out by the sheriff on confessed judgment for $510 in favor of M. McCrystal.

PHILADELPHIA.—Fridolin Boser, shoes, was advertised to be sold out by the sheriff.

PHILADELPHIA.—John W. Colfer, boots and shoes, was to be sold out by the sheriff on judgment for $1,759 in favor of G. F. Powell.

PHILADELPHIA.—H. K. Curtis & Co., publishers of *The Tribune and Farmer*, have been sold out by the sheriff. A new firm has been formed under the style of The Tribune and Farmer Company (Limited.)

PHILADELPHIA.—Henry Genth, dry goods, etc., has assigned to Alexander Rickey. Genth had been practically out of business for some months, his brother-in-law and judgment creditor meanwhile conducting the business. Genth failed in January, 1882, compromised at 50 cents on the dollar, and procured an extension. Two notes are yet to come due on this extension.

PHILADELPHIA.—Edmund L. Hall, grocer, was sold out by the sheriff June 12.

PHILADELPHIA.—The Iron Publishing Company was sold out by the sheriff on the 8th inst., and was bought in by A. W. Selden, who held a judgment for $468.

PHILADELPHIA.—Kehrum & Robb, cotton and yarn brokers, have been sold out by the sheriff.

PHILADELPHIA.—Samuel Lees, carpet manufacturer, was recently sold out by the sheriff, realizing about $400. He had nominal assets about $2,000; liabilities about $1,500, with preferred claims of $825.

PHILADELPHIA.—Jacob Lilley, shoes, was advertised to be sold out by the sheriff.

PHILADELPHIA.—Constantine G. A. Loder, druggist, who recently offered to compromise with his creditors at 25 cents, has standing against him unsatisfied judgments to the amount of $5,031, and execution has been issued.

PHILADELPHIA.—Orr, Hess & Morgan, machinists, were closed by the sheriff, and assigned to Joseph Morgan. Judgments aggregating $28,166 have been entered against them. The liabilities are estimated at $55,000, of which $19,000 is mortgage on real estate. The floating debt, mainly notes, is estimated at $18,000.

PHILADELPHIA.—William H. Rankin, dry goods, gave judgment on the 11th inst. for $492 in favor of W. Doughten, upon which execution has been issued.

PHILADELPHIA.—John E. Riley, gents' furnishing goods, has been closed by the sheriff. Liabilities about $2,200; he claims assets $3,200.

PHILADELPHIA.—Noah N. Rosenberger, manufacturer of cotton goods and grocer, has called a meeting of creditors.

PHILADELPHIA.—George Schauman, saloon, was advertised to be sold out by the sheriff.

PHILADELPHIA.—Benjamin Smith, saloon, has been sold out by the constable.

PHILADELPHIA.—The University Chemical Preparation Company is advertised to be sold out by the sheriff June 18. The company is not incorporated.

PHILADELPHIA.—Edward P. Wetzlar, stock broker, who failed on the 6th inst. with liabilities estimated at $25,000, has compromised at 50 cents cash, and the balance in twelve and fifteen months.

PITTSBURGH.—Execution has been issued against James Hindley, restaurant, for $1,050.

PITTSBURGH. — Execution for $1,533 has been issued against J. Muth, Jr., & Co., maltsters.

RHODE ISLAND.

PAWTUCKET.—Charles W. Clough, jewelry, etc., has assigned to C. A. Warland.

PAWTUCKET.—Henry Jerauld, commission yarns, owes about $18,000 direct, and possibly $5,000 as indorser; assets about $8,000.

PAWTUCKET.—L. Upham & Co., pattern makers, have been attached for $500. They are also reported damaged by fire, but insured.

SOUTH CAROLINA.

COLUMBIA.—C. Bonknight, Exor & Co., dry goods, have failed. Liabilities $36,000; nominal assets $40,000; mortgaged stock $6,000.

NEWBERRY.—L. A. East, drugs, was burnt out recently. He was insured for $4,000, and the insurance money has been attached. He owes about $3,000.

WELFORD.—R. M. McClaim, general store, has been closed by the sheriff. Liabilities about $3,000; nominal assets $1,500.

TENNESSEE.

LEBANON.—W. T. Cartwright & Son, dry goods, was sued and the stock levied upon, after which he gave a deed of trust to W. M. Orgain.

TEXAS.

CHICO.—Barrick Brothers, groceries and hardware, are reported attached by Decatur creditors to the amount of $300. Liabilities are thought to reach $1,500; nominal assets $1,000.

DENISON.—J. M. Lea, furniture, has assigned.

HICO.—N. Hocker & Co., drugs, are reported to have been attached for $2,400.

UVALDE.—W. F. Burkett, general store, has assigned.

WACO.—John G. Hornes, drugs, has assigned with $7,609 liabilities and $9,337 assets. He began in 1881 with $12,000 capital.

WACO.—C. W. Slattery, grocer, is reported to have been closed by the sheriff on claims for $12,000.

VERMONT.

BETHEL.—A. E. Worthen, drugs, recently sold out, and is trying to settle at 20 to 30 cents.

VIRGINIA.

ALEXANDRIA.—S. J. Reed, fish packer, has assigned, preferring his wife.

CORRYSVILLE.—G. W. Howell & Co., general store, are reported to have been closed up by J. H. Cutchin, of Norfolk, whose claim is said to be about $5,500.

FRANKLIN.—Jenkins & Cutchin, general store, are reported to have been closed up by J. H. Cutchin, their principal creditor.

NORFOLK.—C. P. Edwards & Co., dry goods, have assigned to L. R. Watts, giving preferences for $11,500.

PETERSBURG.—S. O. Jones & Brother, groceries and liquors, are reported to have failed. Liabilities about $8,000; assets $600.

RICHMOND.—A. Geese, saloon, has given a trust deed.

RICHMOND.—Levy, Davis & Co., dry goods, have obtained an extension of two, four and six months on their largest bills.

RICHMOND.—Mrs. E. J. Thurston, millinery, has failed. Liabilities about $5,300; assets $1,000. She offers 25 cents.

RICHMOND.—H. Westerhoff, saloon, is reported to have failed.

WISCONSIN.

STOUGHTON.—T. G. Mandt, carriage manufacturer, has been attached in a large amount by local banks and others of his creditors. The establishment is a large one. Mandt was burned out in January, but is not thought to have suffered seriously. Negotiations were pending to form a stock company to carry on the business and enlarge the works, when his creditors, becoming anxious, got out attachments.

WESTBY.—W. D. & R. Elliott, general store, have failed.

MANITOBA.

BRANDON.—A. E. Gavin, general store, has assigned.

BRANDON AND REGINA.—Owen Carson, general store, has assigned in trust.

REGINA.—J. J. Campbell & Co., general store, have obtained an extension.

WINNIPEG.—Alexander & Bryce, dry goods, have assigned. They obtained an extension last April.

WINNIPEG.—Stirsky & Myllius, jewelers, are reported to have left town.

NEW BRUNSWICK.

MONCTON.—Michael Sullivan, dry goods, has assigned.

ST. ANDREWS.—E. H. Stimson, dry goods, recently failed, owing $8,809.90. The nominal assets amount to $6,500. A part of his creditors have agreed to the assignment.

NOVA SCOTIA.

HALIFAX.—John Woodill, wool and hides, has failed.

PICTOU.—Robert Campbell, tanner, who suspended in November last, with liabilities estimated at the time to amount to about $200,000, has been attached by J. W. Roberts & Co. on a note given September 23 last amounting to $5,304.

TENECAPE.—George W. Smith, grocer, has assigned.

PROVINCE OF ONTARIO.

HAMILTON.—Thomas Chessum, painter, is in the hands of the sheriff.

LEAMINGTON.—C. Tedrow, grocer, offers 75 cents.

MOUNT FOREST.—Stovel & Son, printers, and H. H. Stovel, general store, have assigned.

PORT HOPE.—J. B. Trayes, printer and publisher, is offering to compromise.

SHELTON.—Hewetson & Smith, general store, have called a meeting of creditors.

STRATHROY.—James Chalmers, tinware, has assigned.

SUTTON.—Alex. Williams, general store, has assigned.

TORONTO.—E. T. Riordon & Brother, hardware brokers, are reported to have left town.

WELLAND.—J. E. Whalley, merchant tailor, has been closed under a chattel mortgage.

PROVINCE OF QUEBEC.

MONTREAL.—Bigarutte & Frere, grocers, offer 15 cents.

MONTREAL.—Charles Cadotte, shoes, offers 60 cents.

MONTREAL.—J. C. Prefontaine, dry goods, has assigned.

MONTREAL.—C. E. Thompson, rubber stamps, has called a meeting of creditors.

MONTREAL.—Turgeon & Co., dry goods, have assigned.

QUEBEC.—John Le Grand, grocer, has failed.

TROIS PISTOLES.—A. E. Quellette & Co., general store, have assigned.

IMPORTANT NOTICE.

SCIENCE.

The undersigned begs leave to state a specimen copy of SCIENCE—the new weekly illustrated paper—will be sent to any address on receipt of ten cents. It should be borne in mind that SCIENCE is the only periodical of its class in America, and every reading American can well afford to have it regularly sent to his home, in order to get concisely the scientific news, in all departments of science, from all parts of the world. SCIENCE is owned by The Science Company, whose directors are Daniel C. Gilman, of Baltimore, President; Alex. Graham Bell, of Washington, Vice-President; Gardiner G. Hubbard, of Washington; O. C. Marsh, of Yale College; and Samuel H. Scudder, of Cambridge, Editor and Treasurer. The price of SCIENCE by the year is $5. (52 numbers, two volumes, 1,500 quarto pages, neatly printed and well illustrated.) By single numbers, 15 cents each.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.
Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.
The synopses of recent legal decisions constitute an exceedingly valuable feature.
As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.
THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

FINANCIAL.

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, JUNE 23, 1883.

NOTES OF THE WEEK.

The failure of a number of speculators in staple commodities at Chicago has given rise to a deal of moralizing in the newspapers over the sin of gambling in bread and meat, and also to frequent demands for legislative interference with the view of checking such speculation. The proposal for statutory intermeddling has as its basis the belief that the put and call business of the exchanges results in rapid fluctuations far in excess of the movement in prices before the put and call methods were instituted. At the time of the investigation by the New York Senate committee, about a year ago, we showed that fluctuations in the prices of staple articles are rather less violent now than formerly, before speculation was made easy to the public. This is proved by the history of prices since the call board on the New York Produce Exchange was instituted. This being true, the proposal for interference falls to the ground save so far as it can be sustained on purely moral grounds. Assuming the possibility of stopping the speculation by statute, as a matter of business expediency it would be very unwise, as this speculation is but incidental to the present development of legitimate trade. The merely speculative ventures are so bound up with the bona fide transactions that to repress the one is to cripple the other, the other being the very web and woof of modern trade. As we have already insisted, the only remedy at hand—and that is, of necessity, only a partial one, for the difficulty is part and parcel of human nature itself—is to erect a more exacting standard, to the end that the standing of the iron, the dry goods, or the general merchant will be far more seriously affected than now on the well-founded suspicion of being a dabbler in speculative wheat or other ventures. Beyond this, let more severe punishments be meted out to the discovered speculator with other people's money.

The bull movement in the stock market was stopped short by the troubles in Chicago, and prices of stocks declined so much more rapidly than they had risen that about all the work of the bull operators for nearly three weeks was undone between Monday and Thursday. The market was in its worst condition that day, when a sudden change was effected by large supporting orders being sent in from some of the great operators, the execution of which caused a sharp recovery in prices. Yesterday a strenuous effort seemed to be made to sustain them at the level they had reached in the rally. The very serious condition of affairs in the west quite puts out of the question the idea of that great rise in prices which Mr. Gould so confidently predicted to begin on the 15th of this month. His own stocks have given little assistance in helping the market upward, and it might seem that his plans have gone wrong. It is a period of much uncertainty in Wall street.

The New York Senate has referred to the State Board of Railroad Commissioners the following bill:

SECTION 1. The charges by any railroad organized under the laws of and doing business within this State, for freight, not through freight, shall be at *pro rata* rates on its through freight rates, with a charge not exceeding twenty cents per ton for loading and unloading local freights, in all cases in quantities not less than a carload, and in less amounts at such uniform rates as the railroad company may establish, not exceeding ten per cent. over carload rates; and through freights under this section are hereby defined to mean quantities not less than a carload, to be carried from any terminus of any railroad, as aforesaid, to another terminus thereof.

§ 2. Any officer, agent, servant or employé of any railroad corporation who shall violate any of the provisions of this act shall be guilty of a misdemeanor, and be punished accordingly; and shall also be liable in a civil action for damages to the person aggrieved in the sum of two hundred and fifty dollars for each offense, recoverable at the suit of any plaintiff who shall bring an action for the same in behalf of himself and the People of the State of New York, and conduct said action to judgment; which said judgment may be satisfied upon the payment of one-half of said penalty to the State Treasurer, and the other half to said plaintiff, and not otherwise. In case any plaintiff instituting an action at law under this act shall fail to make out and maintain such action, it shall be the duty of the court to enter judgment against said complainant for the costs of said action.

The board with the view of determining as to the wisdom of enacting the proposed measure, have issued a circular to the merchants and shippers of the state, embodying the following questions:

First. What were your freight rates upon each railroad patronized by you, during the years of 1881 and 1882, to and from your principal shipping points?

Second. To what extent were you a shipper upon each road?

Third. Are you aware of any unjust discrimination in railroad freight classification or charges? If so, state the same fully.

Fourth. What remedy therefore do you suggest?

In proceeding thus to investigate fully before venturing to enact such a law as the one proposed the legislative mind acts wisely. It is to be hoped that all who are in possession of facts calculated to throw light on the problem, will communicate with the board. The answers to questions will not be made public, say the commissioners.

The platform adopted by the Ohio Democratic Convention in some degree reflects the change that has been gradually coming over public opinion, in that much of it is devoted to questions of an economic character instead of to the perfunctory political declamation which has hitherto formed the substance of such instruments. Not that matter of that kind is entirely wanting; that would be a crowning grace such as the public have as yet no right to expect, but it is in a measure subordinated. Coming to the declarations themselves there is little in them to commend on the score of intelligibility, to say nothing of the issues which are intended to be presented, if indeed the convention is to be credited with the intention of endeavoring to present any issues whatever. The declarations regarding the tariff are in the highest degree unsatisfactory. They are evidently framed with the intention of confusing the real questions upon which the judgment of the voters is asked. This end is sought to be secured by the rather rude method of endeavoring to blend the inconsistent principles of free trade and protection, so as to produce what some would be likely to call a "moderate" platform. The result is a very incongruous combination which can only be effective in deluding the ignorant and unwary. It is just such a declaration as one would expect from a party of political tricksters who have no higher consciousness than that of an organized appetite.

The convention declares in favor of "a tariff for revenue, limited to the necessities of a government economically administered, and so adjusted in its application as to prevent unequal burdens, encourage productive interests at home and afford just compensation to labor, but not to create or foster monopolies." This is a clear (or rather unclear) evasion of the real question at issue. It seems to be a mixture in about equal parts of free trade and protection, so as to affront the adherents of neither doctrine. It in no sense defines the position of the party. The next plank in the platform begins by referring to the reduction of the tariff on wool as iniquitous legislation, discriminating against the agricultural interests of the country, and closes with an approval of the action of the Democratic members of the Ohio delegation for voting against the increase of the tariff on woolen goods. The convention then goes on to declare its opposition to "sumptuary legislation and unequal taxation in any form," a declaration which may mean very much or nothing at all. The "abuses of the present contract system" in the State Penitentiary are condemned as "injurious and unwise." In order that the platform may not be entirely destitute of definite and clearly expressed principles, some intelligent and conservative member of the committee on resolutions has injected a declaration that the protection of the government is due to all American citizens, the precise application of which statement at the present time it is not very easy to discover.

The London *Economist* strongly favors the maintenance of amicable relations between England and France. At the present time there is a certain unnecessary strain manifest between the two governments regarding several questions awaiting solution in which both countries are interested. First is the settlement of Egypt to the exclusion of France; next the Suez canal difficulty looms up. Again, there is the desire of France to conquer Annam, in which she is openly opposed by China and secretly—Frenchmen believe—by England. In this, however, the French are said to be in the wrong. In the Lebanon, Tunis and Madagascar, England also appears to be in France's way. It is pointed out that in these questions there is no need for the British government to be unfriendly to France; and the inference is drawn that Lord Granville, by seeking to check France here and there, is making her suffer for her policy at Dulcigno and Alexandria. The irritation amongst political Frenchmen just now is said to be intense, the dangerous condition of Europe and the fear the French peasantry have of war being all that prevents a rupture between the two powers. In deprecating Lord Granville's methods, our authority points out that after all in Europe nothing signifies to Great Britain but France, and while the *entente cordiale* exists between the two powers the peace of Europe is fairly secure. Such questions as those of Madagascar and Annam pale into insignificance when the peace of Europe is considered. This can almost alone be assured by a friendly union of the two great liberal powers, which certainly will not be brought about while they spit at each other through the journals, as they are doing now.

FUTURE COMMERCIAL POLICY OF THE UNITED STATES.

When dealing with the various phases of the tariff discussion, during the past year, we laid stress upon the difficulty of arriving at any intelligent solution of the problem presented until some more or less clearly defined principle was adopted upon which a revision of the tariff, with a view to a permanent settlement thereof, should be conducted. Without some clue of this kind as a guide through the mass of detail in which the subject was involved, it was clearly impossible to compass any other than a tentative and temporary adjustment. This being so, it is of the utmost public importance to discover the principle which should govern in the recasting of the tariff. The conditions of the country, having reference both to the past, the present and the future, require that such a principle, to be at once wise, just and practicable, should, while looking to the ultimate policy to be pursued in the future, take account of the interests likely to be affected by any change which might be made, and avoid alterations of policy so sudden that competent foresight could not provide against their results. The elaboration of the principle in detail, as regards the questions of time, etc., involved, would be of course a matter for the practical legislator after the ultimate policy should be determined upon. What that policy is to be, as far as the United States is concerned, is the point of real importance. In regard to this question it would seem that a considerable change of public sentiment has taken place within the last few years and is still going on. During the sessions of the Tariff Commission a New England manufacturer astonished that body by declaring in favor of free trade. In another column we print a letter from a well-informed New England protectionist, in which he arrives at the conclusion that a commercial peace between England and the United States (which he declares is necessary to the elevation of the conditions of labor and of the standard of living of the laborer) can only be brought about by the gradual adoption of the principles of free trade by the United States. In this course he declares there is industrial safety for America and the sure establishment of an industrial amity between the two countries which has never yet existed. He calls attention to the fact also that many intelligent manufacturers in Great Britain are beginning to feel that free trade in the United States means stagnation to the trade of British producers, and that this view is shared by many of the economists of Great Britain. It is possible that there may be some exaggeration in this statement, but it points to the general truth that reflecting Englishmen are by no means filled with the belief (which they are said to cherish) that the adoption of a free-trade policy by America would be, of itself, an unmixed advantage to Great Britain.

The reasons which prompt the change in public opinion referred to are not far to seek. They lie for the most part upon the surface, although confused and travestied by extreme theorists on both sides of the tariff question, and they suggest in no uncertain way what our commercial policy must be in the not very distant future. The immense productive development of the country and the position which it has given us and must continue to secure to us among cheap food-producing nations is perhaps the most important of these. This will necessitate an enlarged market for our commodities such as would be impossible under a severely restrictive system. If we will not buy we cannot sell; by prohibiting importations exportations will be prevented, and thus the producers will be deprived of a market, which will be all the more necessary to them as their operations expand, unless indeed production is checked by a shortsighted policy. The position of the United States, as will be seen from this, must naturally force it to adopt a liberal policy. There are additional reasons which appeal particularly to manufacturers, and which should determine them in favor of a change in the direction we have indicated. It is without doubt true, as is claimed by many manufacturers, that they are, as a class, not particularly benefited by high protective duties, especially where there is any home competition. Such competition, being free, must naturally operate to curtail their profits. More than this, manufacturers are even worse treated under the present tariff than under the old mercantile system, for under the latter materials and instruments of production were lightly burdened, in order to assist the manufacturer, whereas under the present tariff they pay a heavy duty. Besides, even under a free-trade system, the natural protective duty of the cost of carriage would always operate in their favor. These, of course, are reasons aside from the general one that, in view of the close relationships of the modern world and the intimate interdependence of all its parts, that isolation which some have termed industrial independence is impossible. It is opposed to the spirit of the age, and must give way before it. If men have learned anything from their experience of the past it is that the greatest good for the greatest number is not compassed, but is defeated, by a system of antagonisms and reprisals such as a restrictive commercial policy tends to strengthen and perpetuate.

ELIZABETH AND ITS CREDITORS.

The first attempt of the U. S. Court at Trenton to compel by writ of mandamus the Board of Assessors at Elizabeth, N. J., to insert in the coming year's tax levy a particular sum to meet a judgment against the city has resulted in the resignation of so many of its members as to leave the board without a quorum. The assessors remaining in office have made a return to the court's order, saying that the levy is not made as directed owing to the fact that the board is without a quorum for the transaction of business. The sum in question was so small that the probable action of the assessors was doubtless due to fear of a later mandamus requiring a tax levy of a million or more to meet overdue interest on the city's debt. A further complication has now arisen. The vacancies can be filled by appointment, but can the court compel the appointees to accept office? The practice has been on the part of United States courts to refuse to direct the marshal to set on foot a tax-levying and collecting machinery, and thus their writs have been of no avail against the perverseness of local officials. It is reasonable to conclude, therefore, that, so far as relates to the action of the courts, the debt question of Elizabeth is as far or further removed from a settlement than ever before. The truth is, as we have more than once pointed out, that the writ of mandamus as a means of compelling a city to pay its debts is potent only about as far as it is not needed. As soon as taxes become so onerous as to eat into the bread and butter of taxpayers the result is to depopulate the city in proportion to the extent and severity of the tax. It is indeed surprising that otherwise competent lawyers should undertake the collection by mandamus of a tax which would work the result indirectly. This is traceable to the teaching of the doctrine, pernicious in its effects, that while a municipality mortgages the labor of the tax-paying public to meet a bonded debt it contracts as a private citizen, and is therefore amenable to the courts.

It is to be hoped that the officials of the city of Elizabeth and the creditors thereof will be able to effect a permanent adjustment of the existing difficulties. It is as plain as noonday that Elizabeth cannot pay the existing debt, or at least that she will not. In the absence of any effective method of coercion the only practical thing to do is to compromise. The question at issue is only one of dollars and cents. No principle is involved which forbids settlement by compromise. When society has evolved bankrupt laws to forgive the debts of overburdened individuals it is fairly impossible to compel a city to pay, whether she can or not. So far as we have observed, no court, whether state or national, has succeeded in compelling payment of a city debt, when seriously involved, by means of the writ of mandamus. It will not be done this time. The institutions which bought the promises of Elizabeth until a tax of 10 per cent. is necessary to meet the existing debt burden did so with their eyes open. They had the means at hand for learning that the city was borrowing more than it could pay. This fact should be taken account of now when light has dawned on all parties to the contest.

CIVIL SERVICE REFORM IN PRACTICE.

It is generally a suspicious circumstance when a public measure, the object of which is to effect a change in policies in which many influential persons are interested, is passed without a prolonged struggle. Such a circumstance is indicative either of indifference on the part of the politicians (perhaps because they perceive the futility of the measure considered as a means of accomplishing its end) or of a resolution on their part to affect an apparent submission, under which the intent and purpose of the law may be more successfully defeated. Something of the suspicion hinted at was in the minds of many when the Civil Service bill was passed and some of the acts of the President, both before and since that time, seemed to show that he was not a very earnest believer in the reform. One particularly unfit appointment prompted us to remark that it is one thing to have a measure of reform passed and another to have it carried out according to its spirit, and that with regard to the practical enforcement of any particular policy the administrator has in many ways the advantage of the legislators. The truth of this seems to become more clear as time goes on.

A striking illustration of the extent to which the intent of the law may be frustrated in practice is afforded by the recent action of Mr. Walter Evans, the lately appointed Commissioner of Internal Revenue. Before that gentleman had been a month in office he removed five members of the internal revenue service upon the ground that he has begun a reorganization of the internal revenue service—a weeding out of incompetent men to make room for fit successors. There are some very peculiar circumstances about the "reorganization" proposed, which will strike those who believe in an efficient civil service very unfavorably. One of the internal revenue agents removed it appears has been in the service for eighteen years and is familiar with the details of every branch of it. His fitness is evidenced by the fact that he compiled the regulations for the service. A natural presumption in his favor is that his superiors, under different administrations during his long term of service, have seen no reason to justify his removal. The question naturally arises, how did Commissioner Evans, in his short incumbency of a few weeks, discover that evidence of incompetency which had escaped his predecessors for so long a time.

A greater difficulty even will be found with the appointments made to fill the vacancies thus created. Of two of the appointees it is said that not only have they shown no evidence of the possession of particular qualifications for the positions which they have been called upon to fill, but they were actually removed by Commissioner Evans' predecessor for cause. The removal of other officers is expected as being necessary to complete the "reorganization." In reply to criticisms on his course, the commissioner admits that there are no charges against the men removed, and that nothing is known which reflects upon their personal characters. They are, however, it appears, not "up to the standard," and must make room for those who are. It would be interesting to know just what the standard set up by the new commissioner happens to be. With a large magnanimity he assures the public that he takes the whole responsibility for these removals upon himself, but adds that before acting he had the President's sanction. This is all disappointing in the extreme. From all that appears, the public servants removed were competent men, in one instance at least especially so. The men appointed to fill their places were, in two instances, presumably incompetent men. Add to this that the commissioner had not even the poor excuse of partisanship upon which to lean for a justification, and we have a humiliating picture of the extent to which the intents of the Civil Service law may be defeated under an administration which, at its entry and since, made loud protestations of its sympathy with the cause of reform.

THE CARPET TRADE.

The rapid development of the carpet trade of this country is in the main due to the success which has attended constructive ingenuity in so improving the mechanism of manufacture as to produce at a minimum cost all the various makes. Our looms, as a rule, excel those of all other carpet-manufacturing countries. The result of improvement has been in simplifying processes. The most elaborate designs, unlimited as to shades of color, are within the compass of our manufacturers. The facilities of production are fully equal to the consumption of the country—in fact, at times, especially in the past two years, would seem to have run beyond it. The inventiveness shown in designing patterns as well as producing goods suited to all possible requirements is unapproached in Europe. The demand for sightly appearance and durable wear are met at reasonable cost—a cost only made possible through mechanical advances and the scale of pro-

duction,—whilst individual taste is gratified by exquisite combinations of harmonizing and contrasting colors. Designs are improving year by year, and so stimulating sales. The bringing carpets into accordance with surroundings, as these may be modified, is itself a source of special demand. The raw material for our woolen carpets, which from 1879 has ruled high, is obtained mainly from southern Russia, South America and the East Indies, a long fleece being required, whilst for cotton ingrain and worsted carpets, or carpets of both combined, we have our own home supplies.

A large proportion of the mills sell directly through agents; in other instances the agents act through jobbers. It is simply impossible for the large mills to handle their own productions. Some of these mills have been built at once, others gradually enlarged. Mills, agents and jobbers employ commercial travelers, who visit not only every state but every county in each state, local requirements differing. Actual contact of retail dealers with the trade, which concerns patterns as well as quality and price, is essential. The commercial travelers carry from 500 to 2,000 pounds' weight of patterns in their trunks, according to the districts visited and the class of goods they represent. It is not practicable to apportion the amounts in quantity and value taken by different sections of the United States, but we may state generally that both the middle and the western states buy quite as largely as the east. The west, taken as a whole, probably equals the east in wealth, and, in what are known as rich districts, large quantities of the best class of goods are taken. The character of goods purchased depends, in fact, on the wealth of the section. As buying capacity increases, finer carpets as well as costlier furniture are necessarily coming into demand. Medium goods, which, after all, constitute the bulk of American production, can everywhere be relied on as salable. Accordingly, ample scope is found for the host of commercial travelers in the business. The south, we have to add, is increasing in its purchases, and is looked to as an expanding field. The leading eastern mills are noted for maintaining a high standard in such makes as Wilton, Brussels and three-ply, whilst Philadelphia—in which, by the way, new mills have recently been erected—supplies every variety. Philadelphia has the honor of being the largest carpet-manufacturing city in the world. For ingrain carpet alone it has no less than 6,000 looms. Whilst the Philadelphia mills have their agents and commercial travelers, the bulk of their output is distributed by New York, which, as the commercial emporium of the country, with her vast railway facilities and business and financial organization, necessarily possesses special advantages. The conditions attaching to the carpet manufacture are such that the business of production will in all probability be retained in the east.

There is no department of textile business which involves so much skilled judgment as that of carpets, not only the character of the patterns entering largely into sales but the special wants of different localities. Carpets own to changes of fashion as well as dress and furniture, and new departures are constantly needed. It is a part of the business of carpet manufacturers to forecast the general tendencies of public taste, although it is true that patterns suited to one locality are not adapted to another. Hence the business of determining the types of patterns to be worked is a peculiarly complex one. There has been a reaction from the somewhat sombre styles of last year, and for the fall patterns bright, handsome colors are needed. The subdued antique styles and formalized æsthetic extravagances have been left behind, and in high-class and medium carpets floral designs prevail. At the same time there are standard patterns which always sell, and it would be simply impossible to classify the novelties brought out.

At the present time the large buyers are in the market for the fall trade, and heavy orders have been placed. There is somewhat of a conflict between these and mill agents, some being indisposed to grant any concession in view of the restricted amount of stock on hand consequent on the shutting down of a large number of mills earlier in the season, the periods of closing varying from one to two months. The operating cause for manufacturers not going on was that trade was dull in the spring. Prices, however, are lower than those that then prevailed, though higher than buyers had anticipated, but most manufacturers are ready to meet them half-way for the general benefit of the trade. Looking to the prospective operation of the amended tariff on carpets, manufacturers were unwilling to make stock to carry to a lower market, Purchasers, confident of a reduction of prices, pursued a conservative policy, and retailers from here to California, believing prices would be lower, cut down stock to a low position, and now need extra supplies. The forthcoming reduction of the duty on wool will be grateful to carpet manufacturers. It is impossible as yet to tell what effect the reduction on certain grades of foreign carpets will have on importation, but the impression in the trade is that it will be scarcely appreciable. One feature showing the increasing activity of the carpet trade is that buyers who formerly purchased in August for the fall trade now carry out their transactions in the early part of June, whilst spring trade patterns are put out in December. Our Wiltons, Axminsters, Brussels, Moquettes and velvets, with other varieties, are quite equal to foreign makes, and we are practically independent of importations, although, as in all articles in which taste, or even fancy, is concerned, the products of British fabricants will find sale, to some extent on the score of pattern, but chiefly from a false impression of superiority. The importations from Great Britain tend more and more to be restricted to high-class carpets, and the amount in quantity and value is steadily declining.

One branch of carpet importation is a growing one, that of Eastern rugs and carpets, which contribute in an important degree to the luxurious furnishing of interiors. It is a curious fact that the rugs which command the highest prices are those which have been worn for a long series of years, possibly a lifetime, the wear imparting a sheen which varies the hue with every change of the angle of light. Large operators in these rugs and carpets send their purchasing agents out to India and Eastern Asia, thus buying at first hand and escaping charges of intermediaries. Not only are the cities of Bagdad, Delhi, Lahore and Samarcand visited, but even the villages and encampments of the wild tribes of Turkestan, the carpets being purchased one by one in the Arab tents or native Indian and Persian dwellings. Each family reproduces some special type of ancestral design, thus acquiring unexcelled excellence. These rugs and moderate-sized carpets are not considered in the trade as coming into competition with American productions; they simply supplement these, serving by their indescribably beautiful combinations of color and charming patterns to set off by contrast the carpets on which they are laid.

CONSULAR REPORTS.

In the April number of the State Department Consular Reports there are several interesting letters from Consul Tanner, of Liege, in Belgium, who has evidently taken a deep and active interest in extending the trade of merchants in the United States within the limits of his consular district. The practical quality of Mr. Tanner's mind in this direction is well illustrated by his endeavors to show American furniture makers that they can sell goods abroad if they will. He saw a "fine, high-topped walnut bedstead at $8" advertised in some trade paper, and sent for one, with the avowed purpose of learning what, if anything, could be done in Belgium by American dealers. "After many delays and some cavalier treatment" (at which we are glad to learn he was not discouraged in his good work) he received the "fine, high-topped," etc., with bill as follows: Cost $8; packing $3; transportation $8; total $19, exclusive of duty. Of course, the added expense would be proportionately much less on a large consignment. Similar bedsteads at Liege, it was learned, are worth from $24 to $28, upon which Mr. Tanner says: "This shows American furniture manufacturers their opportunity, without comment from me."

Belgium is one of the oldest beer-producing countries in the world, yet it is learned that beer from Milwaukee and Cincinnati has been finding its way to Belgian restaurateurs through the efforts of Mr. Tanner, aided by the efforts of the mayors of the cities named, to whom our consul applied for names of leading brewers. This inquiry, it may be added, was prompted by an application for addresses of responsible dealers in the United States on the part of the present Belgian customers thereof. There is also a third letter from our enterprising consular representative at Liege and Verviers, on "American Trade Journals and Newspapers Abroad." The list of those which are received monthly at the consulate contains the names of some well known on this side of the water. The aggregate of the price per copy of the seven to nine mentioned is $2.20. Their circulation at the consulates is gratuitous, and this suggests an interesting calculation to Mr. Tanner. He notes that there are 34 United States legations, 313 consulates, 313 vice-consulates, and 400 consular agencies, a total of 1,060. A free distribution of a like number of American periodicals to all these agencies for the United States government abroad is said to be (exclusive of postage) about $3,000 per month, or nearly $40,000 per annum in all. Mr. Tanner has also counted the number of advertisements which he finds in the journals referred to, and says that they aggregate 7,000, "representing the interests of more than twice that number of persons engaged in business, and a capital of many million dollars." In order to answer promptly and intelligently any inquiries sent him as to American mercantile matters, Mr. Tanner has made a list of all the advertisements in said papers coming under his notice during his six years' residence abroad, and takes the further opportunity to speak in the highest terms of the good work for American commerce done and now doing by the publications he receives. He says: "I seriously doubt if our commerce would have taken the astounding strides, which have placed it in the front rank with older nations, had it not been *chaperoned* by these able and inimitable journals." The inimitable journals will probably forgive the wording of the latter clause, in view of the evident good will expressed. These fulsome praises lead to the natural conclusion. Mr. Tanner finds it inconvenient to himself pay for all these *chaperones* of American commerce, yet feels sure "that the nation cannot but be willing to pay for such benefits, and that it does not wish its employés to be the recipients of favors on which their usefulness in some manner rests without some return to those returning favors."

Mr. Tanner is laboring under an evident misapprehension of fact. He desires to recompense the "export trade journals," which go to him regularly free of charge at the expense of the whole people of the United States. He probably forgets that the State Department furnishes some of the journals he names with full monthly reports from the consuls, gratis, and that most if not all foreign editions of export trade journals are paid for in advance by the advertisers—those who most expect to be benefited, as is eminently proper.

Since the thorough discussion in the press of the eastern and southern states of the charges of fraudulent packing of cotton intended for export to England but little additional complaint has been heard from the latter quarter. It is, therefore, fair to presume that more care has since been taken to secure carefully baled cotton. Yet Consul Hazelton, of Genoa, Italy, transmits to the State Department a letter signed by six leading Genoese cotton-spinners giving the reasons why they have not for several years purchased American cotton with as much confidence as formerly. The unevenness of quality in a single bale is greatly complained of; the bales are frequently very moist, therefore weighing more than they will after being dry; earth and sand has been found in the center and in corners of bales, and the "iron rings" binding the bales are said to be so heavy in some instances as to exceed the usual tare. It is concluded that these causes contribute to give to American cotton a value interior to that which it should have. Often the East Indian cotton is preferred by the Genoese spinners because it has not the objections aforesaid. It will be for the interest of the American cotton planters to note the criticisms made, that they may be overcome.

Consul-General James R. Weaver, at Vienna, presents an interesting exhibit of the leading exports of the Austrian empire to the United States during 1882. The principal articles are shown to be dried fruits, 21 per cent. of the whole, glassware 19 per cent., buttons 13 per cent., and textiles 11 per cent. The total value of the Austro-Hungarian exports to the United States have nearly doubled in four years. It was $4,896,588 in 1879, $7,108,830 in 1880, $7,501,661 in 1881, and $8,708,127 in 1882. The value of dried fruits increased from $1,090,506 in 1879 to $1,795,197 in 1882; of glassware, from $599,580 in 1879 to $1,602,544 in 1882; of buttons, from $1,071,907 in 1879 to $1,144,523 in 1882, and of linen goods from $277,503 in the former to $491,155 in the latter year. The increase in the aggregate value of exports to this country from 1881 to 1882 was 16 per cent.

The progress of railroad building in Mexico, October 31, 1882, as reported by Consul-General Strother, of the City of Mexico, showed a total of 1,987 miles in the republic. The number of mines June 30, 1879, was 133 in fifteen states. They had produced during the fiscal year ended on the date named 543,120,598 kilograms of pure silver, valued at $21,903,429 in Mexican money.

The cultivation of sugar-cane, cotton, tobacco, coffee, grapes, olives and the mulberry tree have been actively stimulated by direct encouragement from the Mexican government. Although specia efforts have been made to encourage native manufacturers and to produce the raw material necessary therefor, the most important manufacturing establishments in the country are yet obliged to import from foreign countries the greater portion of the foreign material used.

The federal government is said to be affording liberal aid to all legitimate enterprises for material improvement and development of the natural wealth of the republic. A national banking law, modeled upon that of the United States, is now under discussion, and will probably be passed. A commission has been appointed to devise a radical reform in the postal system of the country, with lower rates of postage. After January 1, 1884, the old system of weights and measures, inherited from Spain, is to be abolished, and the French metrico-decimal system adopted as the national and legal standard. As this system is already in very general use by the government and the commercial community, the change will be effected with comparatively little difficulty. A new code regulating railroads has been promulgated, while the civil, criminal and military laws have been reformed and codified. The system of free schools is being extended and improved, and the question of compulsory education is under discussion. There are at present 10,000 miles of telegraphic lines in operation in Mexico, connecting with those of the United States at various points on the northern border and by submarine cable between Vera Cruz and Galveston. A cable has recently been put in operation on the Pacific coast between Mexico and Central and South America. During the present month was passed a contract for the establishment of the new savings and mortgage bank. It is authorized to establish its main house in the City of Mexico, and to open branches in other cities of the republic.

Before opening an actual deposit of $50,000 in coin must exist in its vaults. This capital can be increased subsequently, with the approval of the executive. As local banks now existing have largely withdrawn their loans on mortgages, and as no savings banks as yet exist here, this new institution will prove a great advantage to borrowers on real estate and to small depositors. Any sum, no matter how small, will be received, but the amount loaned can, in no case, exceed one-half of the appraised value of the securities offered. Much interest is felt in the matter as a means of developing habits of thrift and economy among the people.

As suggesting the probable "Mexican boom" to be dependent doubtless on the rapid mineral and other developments of the republic, it may be mentioned that the fishing for pearls in the gulf of California continues to be a profitable industry. A telegram received in the City of Mexico recently announced the finding of one weighing seventy-five carats, which is believed to be one of the largest and finest known. It was sold on the spot to the first bidder for $14,000.

AMERICAN PETROLEUM ABROAD.

In a communication to the State Department, dated February 23 last, Consul-General Heap, at Constantinople, discusses the prospective competition between Russian and Roumanian and American petroleum. The points which he makes are of interest in that they supplement with important data the elaborate report on the same subject made by a special correspondent of BRADSTREET'S at Vienna, and published in this journal December 23, 1882. That letter was prepared after an investigation through Roumanian oil-land owners, well superintendents, Austrian and Hungarian refiners, geologists, government special agents appointed to look into the subject, and others. The conclusions reached were: 1. While in the past American refined oil has formed a leading Austrian importation, the higher tariff on refined and the discriminating duty in favor of Roumanian crude oil will be likely to draw more largely of crude from this country. 2. That the Roumanian crude oil regions (when better developed) will be likely to successfully compete with American oil, owing to low cost of production, favoring tariffs and low freights. 3. That even Baku oil (from the west shore of the Caspian in Caucasia) can be transported in oil cars to Poti and Batoum, on the east shore of the Black Sea, and thence be shipped to Turkey or to Roumania and Austria via the Danube (or by way of the Dardanelles and the Adriatic) and yarded at Vienna or Trieste at a much lower rate than American petroleum.

Some analyses of Roumanian oils were given as reported by official and interested experts, but which, while interesting, are far from satisfactory. The question of the future competition of petroleum from the old with that from the new world, in the markets of Austria, Turkey, Asia Minor and in other oriental countries, has therefore been barely opened, and Mr. Consul-General Heap, as noted above, contributes some valuable information. He mentions the adulteration of American case oil by the Russians, who dilute it and sell the same in the proportion of one part of American to two of Caucasian, and sell the same as the pure Pennsylvania product to the trusting inhabitants of Asia Minor. Other Russian merchants are less scrupulous. They collect the discarded cases in which our refined oil is sent abroad and fill them with Baku petroleum, pure and simple, seal them, and dispose of the same on the reputation of the once-used American trade-mark on the outside.

This practice of simulating the American brands is believed to be an important reason why exporters here need not seriously fear Russian competition for some time to come. It points conclusively to the fact that the Nobel Brothers' refineries at Baku, with skilled chemists, oil experts and others are unable to produce a high grade oil from the deposits in the south Caucasian region. The oil is heavy, and in illuminating qualities has been claimed to rank with our export grade about as 3 to 5. The Roumanian oils, so far as reported in BRADSTREET'S in December, 1882, and according to other and later reports, are likewise heavy. In this way then must the American product continue to claim distant eastern markets. The Consul-General at Constantinople has instructed the consular agent at Trebizond to protest with the custom house officials against the illicit practice of using American cases and trade-marks in which to sell Russian oil. The value of American petroleum imported at Constantinople has increased from $254,844 in 1880, to $722,937 in 1881, and to $726,579 in 1882, in the face of Russian facilities for reaching that market. Roumanian oil is exported in tin cases, which pay a heavy duty to get into the hands of the exporters, and as there is no rebate upon the export thereof, the Roumanian oil (heavier than Russian, by the way) cannot compete at Constantinople even on a low basis. The belief exists that with a high standard of refining maintained in the United States there is little probability of the much talked-of Russian or Roumanian oil fields excluding American petroleum even in their own markets.

OCCASIONAL NOTES.

In dealing with the advocates of the compulsory coinage of the silver dollar we have as occasion served endeavored to show how utterly groundless was the charge made by them that the enemies of silver hoped to create a distrust of that metal, and thus force it out of circulation. We believe, as we have more than once declared, that under the circumstances the proper thing to do is to encourage the use of silver as a subsidiary coin as much as possible, and to further extend the clearing-house principle so that there may be less need of either gold or silver. It is open to serious question whether those who insist upon forcing the silver dollars upon the community are not the real enemies to the extended circulation of silver. There can be no doubt of the substantial unanimity of opinion against the coinage of this unwelcome money. That is shown by the unvarying regularity with which it is returned from circulation. There can be just as little doubt, we think, that the very lively prejudice against the silver dollars, which the persistent efforts to force it upon the community have excited, has operated to hinder the legitimate use of the metal as a subsidiary coin. This is a point which has received less attention than it deserves, and which we commend to the attention of the earnest advocates of silver.

The Philadelphia *American* contains some remarks upon the establishment at the University of Pennsylvania of the Wharton School of Finance and Economy. The foundation of this school is of interest, as an illustration of the renewed efforts being made under the guidance of Prof. Robert E. Thompson to extend the sphere of protectionist influence within the state. Meanwhile it is an interesting political fact that the Philadelphia *Record*, a journal advocating free-trade principles, has, under the direction and management of Mr. Theodore Wright, reached a circulation of 100,000 copies, principally in Philadelphia and Pennsylvania. That in a state and a city where the doctrine of protection has made its home a journal advocating opposite principles can wield an influence such as its large circulation must give to the *Record*, is a fact full of significance for the advocates of extreme protection.

From some recent statistics given in a French viticultural journal it appears that, while the production of alcohol and spirits derived from wine has been reduced by more than 90 per cent. in the last ten years, in consequence of the ravages of the phylloxera, the production of what are known as manufactured spirits, on the other hand, has increased to such an extent as to supply very largely the deficiency resulting from the failure of the vine. From 1872 to 1881, inclusive, the average production of spirits in France was 35,246,706 gallons, the lowest year, 1877, having produced 28,795,382 gallons, while in the year of greatest production, 1872, there were 41,628,048 gallons produced. There seems to have been a considerable increase in the quantity of alcohol imported during the decade and a decrease in the quantity exported. The extent to which the French manufacturers have been compelled to resort to other sources than the vine for their spirits will be readily perceived from the fact that the production of alcohol from farinaceous substances, such as grain and potatoes, increased from 1,747,504 gallons in 1872 to 11,138,006 in 1881. A slight increase is noted in the amount produced from molasses during the same period. Beet root has been largely resorted to, the quantity distilled therefrom amounting to 6,003,426 in 1877 and 12,391,280 in 1881. A curious table is given of the average consumption of alcohol per head, from which it appears that the consumption is greatest in Havre, where the average per head in 1882 was 3.98 gallons, while Paris stands ninth on the list, with an average consumption of 1.54 gallons. Marseilles and Lyons stand still lower, the former being credited with a consumption of 1.29 gallons and the latter with 1.14 gallons.

Hitherto China has not counted as a factor in the wine production of the world. The vine, which was until recently regarded with indifference in the Celestial Empire, has now, we learn, become an object of interest to Chinese agriculturists. In many instances proprietors have cleared lands, apparently fertile, for the purpose of planting the vine. Thus far it appears the plant has succeeded well, the climate in which the experiments have been carried on being favorable. It is perhaps too early as yet to pronounce upon the ultimate success or failure of the viticultural industry in China; but should the favorable results already attained continue vine planting will probably be carried on on a much larger scale than at present. It is said that even now small proprietors having only eight or nine acres of land under vines make a yearly saving of from $300 to $350. The system of cultivation which obtains in China is such as to promise the best results for the new industry, assuming, of course, that the other requisite conditions are not wanting. No portion of the land is neglected. In the most mountainous districts artificial meadows are formed and advantage is everywhere taken of the neighborhood of rivers for the purposes of irrigation. We shall await with interest further developments regarding this new Chinese industry.

The discussion which has been carried on of late concerning the shortage of the forthcoming foreign crops of raw silk now seems to be well founded. The price of raw silk has advanced and will in all probability rise still higher. For the past two years the fluctuations in the price of raw silk here have not exceeded 15 cents per pound, and the tendency has been downward. At the present time there is information of the failure of the Chinese crop, which probably means that it is shorter than usual, and on the heels of this intelligence word is received that the Italian crop will not equal expectations. The deficiency in the Chinese crop is said to be about 30,000 packages (or bales), the total for last season being about 75,000 packages. The price of raw silk is said by the *Times* to have been advanced from $5 to $7 per pound by the failure of the Chinese crop. There is naturally a tendency to speculate, and expected consignments to this side have been withheld to profit by the advance. The retailer will be affected last of all, of course, as the manufacturer and the wholesaler will be first to feel it. No ease is to be looked for until January at the earliest, and then only in view of a prospectively abundant crop for the ensuing season. In 1866 prices began to rise under similar circumstances early in the summer and before December had doubled.

SPECIAL CORRESPONDENCE.

GOVERNMENT BY COMMISSION.

Washington, June 20.—The system of government by commission at Washington is a partially successful experiment. It has existed long enough to show that, with some modifications, it will serve the purposes of municipal administration in the District of Columbia. Congress is its only support. Congressmen support the system in Washington, where there are no political influences to affect them, who would not support it within the states. The commission realizes more absolutely the political disfranchisement of the citizens of the District of Columbia than any other form of government could.

The United States is now in partnership with the people of Washington in the administration of their local affairs. The partnership is equal in the respect that both parties contribute, approximately, equal amounts to the support of the government. It is very unequal in that the people governed have no voice in the government. This anomalous form of government is adapted to the anomalous condition in which the District of Columbia, by the federal Constitution, is placed. The founders of the government, in setting apart the ten miles square, and in providing that the inhabitants of that area should not have a voice in the election of President, intended to divorce, absolutely, the citizens of the District from any participation in national politics. It was possibly not the intention that the District should be taxed without representation. Nor was it the intention that the inhabitants of the District of Columbia should have no voice in the management of their local affairs. Suffrage as to municipal offices existed in Washington until suffrage was extended to the negro. It is a curious commentary upon one of the results of the war that, in the District of Columbia, where the slave was first freed, he has been deprived of his vote by act of Congress.

The local relations between the United States and the District of Columbia are now well defined. Congress, after considering the subject for a series of years, has practically come to the following conclusions:

1. That Congress has absolute legislative authority over every rightful subject of legislation within the District, without any reservation whatever to any state or states or to the people within the District itself. Any local government erected in the District can only be regarded as an agency of the federal government.

2. The capital was to be a city where all improvements made and expenses incurred were to be for the benefit of the people. The burden of expenditures was never intended to be placed upon those citizens who might temporarily, or permanently, take up a residence at the capital.

Anomalous as the political conditions are in the District of Columbia, the citizens in the main are well satisfied with the administration of the government by three men in whose selection they have no voice. They have all the benefits of good government without any of its responsibilities. The government on the commission plan succeeded the territorial form of government, which was conspicuous for "the comprehensive system of improvements" under the Board of Public Works and for the Shepherd dynasty.

The people, crushed by the burdens of a local government in which they nominally shared, were glad when Congress chose to assume the entire responsibility of local administration by appointing the commissioners as its agents.

The District government at Washington has within the last ten years almost created a new system of internal improvements. A complete sewerage system has been inaugurated, an increased water supply obtained, parks extended, streets improved, and bridges built. One of the most discreditable drawbacks to Washington for years was the fact that, notwithstanding Congress at an expense of many millions of dollars had built an aqueduct sixteen miles long from the upper Potomac, owing to an inadequate system of "mains" and distributing reservoirs portions of the two cities of Washington and Georgetown were almost entirely without water. For this reason some of the best houses in the city have had to be built with tanks in the garret and bath-rooms in the basement. This defect, owing to the persistent representations of the engineer branch of the District government, is now being rapidly remedied, and a system has been adopted which, it is believed, will furnish the city with sufficient water for years to come. It is not many years since a general sewerage system was adopted in Washington, and since the war the "Tiber," a little creek flowing openly at the foot of the capitol, carried the sewerage of a large section of the city. The commissioners, following out the plans of the extravagant Board of Public Works which had preceded them, are constantly perfecting the sewerage system, and it is expected that before long Washington will have as perfect a sewerage system as any city in the country. The engineer member of the commission has devoted much attention to the sewerage problem, and very marked improvements have been made in this system under the commission form of government.

The trust of these commissioners has been well administered, and probably most of the citizens would look to a change to a different permanent form of government with some concern. The commission has given the District of Columbia a more economical and more efficient administration than it has ever known before. Politics have been in great measure divorced through the commission management. It is a singular illustration of the non-political character of the organization that, under a Republican national administration, the president of the Board of District Commissioners, Judge Edmonds, is to-day a Democrat, the other member of the majority of the commission, Major Lydecker, is an army officer who has never taken any part in politics, and that the minority member, Mr. West, is the only active Republican upon it. There is no question that the municipal administration in the District of Columbia is not only cheaper under the commission system than it has ever been before, but that it is cheaper than it is in most cities. There are better and cheaper pavements in Washington than there are anywhere in the world, and Washington City is believed to have more smooth streets than any city in the world. The prices now paid for pavements carry out this assertion. There is no place in this country where asphalt pavement has been brought to such a state of perfection. This has only been possible under a form of government where the municipal affairs are administered as they would be by a business house. The chemist DeSmedt is the inventor of one of the most approved modern methods of mixing and laying asphalt. He had been paid large royalties by the district. The commissioners observed this, and offered him a lucrative, permanent place under the district government as its chemist on condition that he should

make no claim for a royalty for pavements laid in Washington, and that he should personally superintend the laying of all the pavements, and give the benefits of any improvements he might make to the city. The result is a system of pavements, under the commission government, which is the admiration of all Americans. The commissioners have a greater task in the care of the streets of the city than is generally supposed. According to recent measurements there are 260 miles of streets and avenues, and these range from 90 to 160 feet in width, the streets and avenues actually embracing one-half the area of the city. The extent of this part of the plan may be judged from the following comparative area of the streets to the whole area of a number of cities :

	Per cent.		*Per cent.*
Paris	25.08	Boston	26.02
Vienna	35.08	New York	35.03
Philadelphia	29.08	Washington	54.05
Berlin	26.04		

From this table it will be seen that Paris, thought by many to be the most beautiful city of Europe, notwithstanding its grand boulevards and its Champs Elysees, has less than one-half the street area of Washington City. The greater part of the business streets of Paris are, for the convenience of business, made narrow, while their avenues and boulevards are broad and beautiful ; but here there is not a street less than double the width of Broadway, New York.

Another cause for the success of the commission plan of administration is the strict accountability of contractors for local improvements. There are no politics in the bidding, and the contract once awarded, it must be faithfully executed. All contracts for public improvements are under the exclusive charge of the engineer commissioner. From his decision the commission has decreed that there shall be no appeal. This commissioner is an engineer officer, and generally a West-Pointer. He is accustomed to command. He is not susceptible to the corrupting influences of politics. The consequence is that contractors are held to the strictest accountability, and that better and cheaper work is done in Washington than elsewhere. A member of the District Commission, who has taken the pains to make comparative estimates of the cost of local improvement in Washington and elsewhere, finds that the percentage of cost per capita is considerably cheaper in the District of Columbia.

The commissioners found the District with a heavy burden of debt, over $20,000,000. It still has a large burden of indebtedness, but, in consequence of legislation which has been enacted in great measure in consequence of the development of the commission plan, the debt has been placed upon a sound basis. The commissioners are not now responsible for the debt. The government, under the system of partnership established in connection with the commission plan, has made the Treasurer of the United States the commissioner of the sinking fund of the District of Columbia. The bonds of the District of Columbia, therefore, are under the same control as the finances of the United States. The large debt of the District of Columbia was not created by the commissioners. It was an inheritance from the territorial government, which was based on popular suffrage in local affairs. If the commissioners have not materially decreased the debt, they have established it on a solid basis; have improved the credit of the District, and have helped to provide more efficient means for the management of the debt.

The system of personal responsibility and accountability is more immediate under the commission plan than under any other form of government. The commissioners are appointed by the President and confirmed by the Senate. They are always amenable to the President, and the latter, for sufficient cause, can remove any or all of the commissioners by a stroke of his pen. No considerable abuses could be committed or sanctioned by the commissioners without the knowledge of the President, under whose eye the commissioners constantly work. The chief magistrate of the nation, therefore, has a practical veto power upon any act which the commissioners might do. It would not be necessary to wait for an election for aldermen or mayor to correct flagrant evils.

The changes in Washington within the last few years have been remarkable. For some of the improvements the old Board of Public Works should be credited. The commissioners have taken up their plan where they found it ; have chosen that which was best, and have perfected it. When this system of improvements began Washington was noted for its unpaved, dirty streets, which furnished mud in winter and dust in summer. The moss-covered market sheds occupied the most conspicuous squares, where the finest market houses in the country now stand. The old canal, filthy and stagnant, was a pest breeder in the heart of the city, on the very edge of the White House grounds. The avenues seemed to lead nowhere. At every outlet from the city there was a toll gate where money was exacted for passing over what were called roads. What are now the fashionable parts of the city were a morass. The city treasury was bankrupt, and there was nothing to show for the money that had been expended. The agitation for the removal of the capital was rife. Congress refused appropriations, and the city was in bad odor. The territorial form of government lifted Washington out of the mud at a cost of millions. The District commissioners have carried out the best part of the programme which was outlined, and have secured excellent work at low prices. There are, of course, objections to government by commission. There are many who insist that suffrage should be restored ; that taxation without representation is unjust and unrepublican ; that the commissioners are given too much power ; but on the whole the commission plan works satisfactorily, yields good results, and could not be displaced by any other permanent form of government without causing great dissatisfaction to the most substantial citizens.

POINTS OF INTEREST FROM THE PACIFIC COAST.

San Francisco, June 13.—The outlook for the season's trade never was better, and retailers are doing an exceptionally good business in all lines, cash purchases being more general than at any former period, which is very satisfactory to jobbers. New wheat and barley will soon be coming into market, and the certainty of an unusually large crop has had the effect of weakening prices and limiting speculative purchases. One or two samples of new barley have already appeared. An impetus has been given to the fruit industry by a reduction of $100 per car load on fruit to eastern points. It cost $320 per car to ship fruit east, the consequence being that oranges were left rotting on the trees. Since the late reduction in freight the railroads have been carrying heavy shipments from the orange-raising sections of California. The freight charges are still far too heavy.

The agitation regarding freights and fares continues, public meetings being held in rural sections to denounce two of the railroad commissioners who are accused of having sold out to the corporation. But inasmuch as the two commissioners indicated were notoriously the railroad nominees, although elected on an anti-monopoly ticket, the dominant democracy which elected them has little cause for complaint. But a very strong undercurrent of dissatisfaction has set in, and one cannot safely predict what the outcome will be. That it is unsettling business is beyond question.

There is a small "boom" in Comstock stocks, but inasmuch as there has been no mining development at the back of it the lack of merit throws a shade of suspicion over the entire business. In all probability it is preliminary to the usual fall stock deal, which is engineered for the patriotic purpose of transferring the crop returns from the pockets of the honest grangers to those of scheming and dishonest speculators. For the last three years the farmers did not bite at the bait, but inasmuch as it has been announced that Flood and Mackay, two of the bonanza firm, will give their personal attention to the mines and stock market, it is evident that this season's operations will be more skillfully engineered. It may be set down as an infallible rule that any farmer gambling in mining stocks in San Francisco will lose his money.

The City of New York sailed on the 10th inst. for Honolulu and Australia, a very full ship. She was eight days behind time, owing to a breakdown in the machinery. She took the heaviest mail ever shipped to the Antipodes, consisting of 750 bags, of which five only were for Honolulu, one for Samoa, and one for New Caledonia. The remainder were for Australia and New Zealand. As showing the magnitude of the American postal relations with New Zealand and Australia, it should be added that 173 of these bags of mail matter originated in the United States, or about one-fourth of the total. This proves the absolute necessity for maintaining the San Francisco postal service with Australia intact.

Advices have been received by the mail which arrived on the 11th inst. by the English steamship Zealandia, two days ahead of time, that the mail contract had been continued conditionally for two years, New South Wales reserving the right to withdraw at the end of the first year if the United States did not contribute an equivalent to one-third of the annual subsidy. The amount of subsidy to be paid is £50,000 yearly, of which New Zealand pays £31,250 and New South Wales £18,750. It is quite clear that the maintenance of this service will depend upon New Zealand, as Mr. Creighton, special postal commissioner from that colony, stated during his recent visit east. The ultimate decision of the Post Office Department at Washington will probably influence New Zealand in going on alone with the service, inasmuch as New South Wales is negotiating a contract with the Orient Steamship Company to give it control of the direct trading and postal facilities of that competitor with the Peninsula & Oriental line. The New Zealand government feel aggrieved, and justly so, with the action of New South Wales.

The Zealandia brought up 1,435 ingots of tin from Australia and a large quantity of soap and glue stocks ; also £10,000 in gold, besides sugar, rice and fruit from Honolulu. Heavy shipments of rice, sugar, pepper and opium have arrived from Macao, the Portuguese settlement in China.

A new direction has has been given to our trade with Australia. The City of New York took down 172 rams and ewes on Australian account, and the deck space has been engaged for every steamer, it is understood, for a year to come. The picked rams cost about $2,000 a head and the picked ewes $400. They go to New South Wales and Victoria, and are from eastern merino flocks. A California shipper has taken the deck space for sheep from California merino flocks by next steamer. This is an important fact, and should be extensively known among the farming sections of the country.

Manufacturing industries are steadily progressing on the coast, and the influx of population is very considerable.

BENEFIT SOCIETIES IN THE WEST.

St. Louis, June 13.—The Western Commercial Travelers' Association was organized in 1878, and has its headquarters in this city. It is one of about fifteen similar societies scattered among various large cities. There is good feeling between them and no particular rivalry. This association was formed partly to facilitate acquaintance and cultivate fellowship between traveling salesmen and partly to concentrate influence upon questions affecting their interests and arising either legislatively or in mercantile and manufacturing circles. But unquestionably one of the strongest motives of membership is the "death benefit" feature. By it the family or heirs of a deceased member are entitled to receive whatever is realized from an assessment upon all other members not exceeding $2 each. The various organizations of this character have paid on this account an aggregate of something over $1,000,000 to the widows and children of deceased members.

As to the proposition discussed occasionally by newspapers that merchants should combine to rid trade of the costly appendage styled the "drummer," the gentlemen of this society either ignore it, or, if they look upon it as a possible issue, they carefully refrain from making public their treatment of it. The organization is certainly regarded with favor rather than jealousy by the proprietary element of commerce.

The only direction from which the traveling men seem to fear a blow against their occupation is, perhaps, best indicated by the explicitness with which membership is limited to the male sex.

This association is not hedged in by any geographical metes and bounds. A New-Yorker or a Crescent City man is quite as eligible as a native St.-Louisan.

An admirable characteristic of the society is the strictness with which members are required to maintain good habits and good business reputation. The association is prosperous and growing in strength.

BRITISH INTERESTS IN SOUTH AMERICA.

London, June 7.—There is just now in this country a distinct tendency to favor South American securities. By "South American" we may include every country south of the United States, for the Central and bona fide South American states have very much in common, not only as regards their predominant Spanish elements, but also, from a British investor's standpoint, because throughout these territories so many instances of defalcation and repudiation are to be met with. Even the early history of the Brazilian debt, where the Spanish element gives place to the Portuguese, was not wholly free from remissness in this respect, and Chili paid no interest for many years prior to 1842, and has since suspended her sinking funds. These are the two least sullied instances of South American indebtedness, and in almost all other instances defaults are of much more recent occurrence; but, as already remarked, there is at the present time, and has been for a twelvemonth or more past, a much increased desire to believe well of such securities, and a rise in market prices has been the natural accompaniment. The numerous negotiations and arrangements recently carried on and effected between bondholders' committees here and South American governments have naturally tended to direct attention thereto, and in some of those instances the bondholders were undoubtedly prepared to accept lower terms than those actually obtained from hitherto defaulting states. Of course, the reason for this openhandedness on the part of needy governments lies very near the surface. The progress made with railway construction in South America has been mainly by the aid of capital subscribed here, and in almost all South American countries there is just now a great desire to extend railway communications. Even Mexico, which, as long as she could get all the money she wanted in the United States, paid very little attention to the repeated reminders of her English creditors, has now found it advisable to offer terms which, if there be a fair prospect of her abiding by them, cannot be regarded as otherwise than substantial. Then there are the Montevidean negotiations, pointing to increased returns on the Uruguayan debt, and the conclusion of the war between Chili and Peru raises hopes that the sinking funds on the Chilian loans may before long again become operative. The Peruvian bondholders themselves appear to be hoping against hope that something may turn up to their advantage, while as regards Costa Rica it is known that for some time past the terms of a resettlement of the debt have been under discussion. Last week even Paraguay bonds were in request, though for what definite reason it would be hard to say, while Venezuela debt maintains its price in the market in spite of the refusal of the Venezuelan government to give the bondholders the additional 1 per cent. dividend arranged for in 1880.

But it is not only to the direct government loans that the attention of the market here is being directed. The railways of Brazil, the River Plate republics, Chili and Mexico have also been attracting a good deal of attention, and it is worthy of remark that a very considerable number of them stand at a substantial premium, even in those cases where a government guarantee has not been obtained or has been relinquished. Then again, England has some considerable sums of money embarked in South American banks, mines, shipping, telegraph and other undertakings, and it will be interesting to form some sort of estimate as to what amount of British capital is at the present time invested in that part of the world. This may be the more readily done that so many South American securities are held almost wholly in this country. The loans are sterling loans; the companies have their head offices and directorates here, and, although it is impossible to give with absolute accuracy figures of this description, the following estimate may be taken as not altogether wide of the mark :

BRITISH INVESTMENTS IN SOUTH AMERICA.

	Government.	*Railway.*	*Together.*
Argentine	£15,000,000	£11,500,000	£26,500,000
Brazil	23,000,000	17,000,000	40,000,000
Chili	7,000,000	1,000,000	8,000,000
Colombia	2,000,000	500,000	2,500,000
Costa Rica	2,400,000	.....	2,400,000
Ecuador	1,500,000	.....	1,500,000
Guatamala	500,000	.....	500,000
Honduras	3,000,000	.....	3,000,000
Mexico	15,000,000	8,000,000	23,000,000
Paraguay	1,500,000	.....	1,500,000
Peru	23,000,000	1,500,000	24,500,000
Uruguay	3,000,000	2,000,000	5,000,000
Venezuela	2,500,000	700,000	3,200,000
Totals	£99,400,000	£42,200,000	£141,600,000

If to this total be added fully £10,000,000 additional capital embarked in Central and South American banks, mines, steamships, tramways, cables, and so forth, we have a total of fully £150,000,000 sterling, apart altogether from the large outlay of wealthy private firms in those countries. These are really large figures, and probably if the interest could be calculated at 5 per cent. per annum would be yielding upward of £8,000,000 per annum to British capitalists. But so much of this capital is in default that the return cannot be set down at so high a percentage—that is, as far as the public securities are concerned. The defaulters, including Mexico therein, represent quite £50,000,000 out of this total of £150,000,000, and the partial defaulters some six or seven millions additional. There is a larger return than 5 per cent. made upon Argentine and Brazilian investments—the two most important in the above list—but probably, taking the entire mass, the return is not above 4 per cent.—say £6,000,000 over the entire investment. Still it must be admitted that, with all the depreciation due to South American defalcations, British interests there are not only large on paper but large in reality, and they are apparently likely to grow a good deal in the future. Of course, the amount of British capital sunk in North America is very much more extensive than this, but enough has been said

to prove that this country has a very material stake in the welfare of South America as well.

It is curious that while we have lent money in times past to Central and South American governments, and are at the present time very ready to lend more, British emigration should steer almost wholly in other directions. We send contractors, men of business, and others temporarily to South America, but they do not settle in those countries. They go upon business, as they do to India or to Egypt, and come back when their business is accomplished. As far as the export of human beings is concerned no comparison whatever can be instituted between the tides setting in the directions of North and South America. It is not necessary, however, that capital and emigration should proceed together, although possibly, if English people were settling in considerable numbers in any South American country, that country would enjoy better credit than the rest, for the reason that people here would have a more intimate acquaintance with its capabilities and a larger voice in its finance than they have now. But having regard to the many rebuffs which British investors have sustained at the hands of the Spanish-American republics, it does appear somewhat strange that they should be so ready as they are at the present time to forget the past.

LETTERS TO THE EDITOR.

THE COMMERCIAL PEACE OF ENGLAND AND AMERICA.

To the Editor of BRADSTREET'S.

SIR—The very satisfactory social relations existing between the people of the United States and the people of England often lead us to suppose that the two are cementing all ties and really making one great English-speaking people. Such sentiments are always expressed with fervor and eloquence at all gatherings where Englishmen and Americans meet, and are heartily applauded. In truth, such sentiments do exist, and in a social way the two peoples do constitute one grand English-speaking nation. But, when social relations are dimmed, there is, unhappily, but little in common between the two nations. At least the actions of those interested in the industrial forces of the two indicate that there is a deep-seated commercial antagonism existing, and my own observation leads me to judge that such antagonism is as fully cherished upon the one side as upon the other. Business interests, diverse in their nature, are constantly intensifying this antagonism, and the diverse doctrines of protection and free trade add an element to the antagonism which all the social courtesies which constantly pass cannot remove. The Englishman, engaged in manufacture, feels that the true province of American industry should be the production of food, and that he should be left to make the goods required by the States. This was the doctrine before the revolution, and it is the doctrine now. The professional economists of England have always insisted that this is the true doctrine, and both manufacturers and economists look upon American manufacturers as poachers upon their preserves. The American manufacturer, on the other hand, claims, and rightfully, too, that the mechanical arts should be fostered in the United States as well as in Great Britain, and justly feels indignant at all attempts to restrict his trade. All this grows out of the simple competition of the two countries; but the American producer feels more indignation at the endeavors of the Englishman to convince the people of America that the best industrial policy for America to adopt for her own interest is the one Britain has adopted, namely, that of free trade; and the American naturally asks, if the policy of free trade is the best for America why does the British producer desire to have it adopted? Various views are held in both countries upon this question. I do not propose to discuss either side as an industrial question, but simply to see how the commercial peace of the two may be affected by the continuance of the present American policy or the adoption of the English principle.

Ever since the establishment of free trade by England she has been endeavoring to get the world to adopt the same policy. In the United States her endeavors have met with very warm opposition every time they have been apparent, from those put forth in the Polk campaign down to the distribution of Mongredien's idiotic pamphlet. I say idiotic, because free traders call it so. All these efforts, most of them of much less magnitude than is commonly supposed, have retarded the growth of free-trade ideas in America. On the other hand, they have aided in confusing the views of the English producer. At the present time some of the manufacturers of Great Britain feel that if the United States adopt free trade many of the American mills can be shut, and this fear is felt very generally in America. On the other hand, many intelligent and very observing manufacturers in Great Britain are beginning to feel that free trade in the United States means stagnation to the trade of British producers, and this view is shared now by very many of the economists of Great Britain. A very observant American who has resided in Europe much of the time for ten years does not hesitate to say that the establishment of free trade in the United States would result in war between the countries. While this view seems very far out of the reach of the conditions which might exist should the present industrial policy of the United States be reversed, it gains some standing when it is remembered that nearly all of England's wars for many generations have been waged upon commercial grounds. The changed conditions resulting from the adoption of free trade by America means a far bitterer commercial antagonism than that now existing, and would for many decades delay that amity of trade so desirable for the elevation of the working masses of the two powerful rivals, for without a more friendly condition the wage-receiver is only ground the finer in the battle for supremacy. Such would be the result if the radical free traders could have their way.

Much is said in the discussion of the questions referred to about the effect upon wages of the two systems, but when it is understood that the relative increase in wages under the two has been coequal during the past half century, which is the fact, one is obliged to dismiss that part of the discussion, although it probably is true that the sudden adoption of free trade by the United States would result in a decrease in wages for a period of years far too great for the compensation which might come to industry at a later period. But industry which does not bring happy conditions to the wage receiver is not the best industry, and that condition which reduces the standard of the living of the wage workers should be prevented if possible. Now the conditions which exist in England and the United States, or rather the industrial relations of the two countries, do not tend to the elevation of the standard of living to that degree which the moral progress of the world demands, and certainly the sudden revival of even existing relations would not tend to such elevation. I therefore come to this conclusion: The elevation of the conditions of labor and the standard of living of the laborer demands the commercial peace of England and America, and the commercial peace of these two powerful producing nations can only be procured by the gradual adoption of the principle of free trade by America. In this course there is industrial safety to America, and the sure establishment of an industrial amity between the two countries which has never yet existed.

On broad moral grounds this conclusion could be most completely maintained; for the present purpose I need not discuss them.

The recent action of Congress, in view of what has been said, in the enactment of the new tariff, must, therefore, be a disappointment to all who believe that one nation cannot long thrive if others are unthrifty. The universal welfare of the industrial forces should be the aim of nations. In this way only can the best moral conditions be secured.

I have said what I have as an American protectionist, deeply interested in the elevation of the workingmen of America. NEW ENGLANDER.

London, June 8, 1883.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

An important decision was rendered by the United States District Court at Austin, Tex., on the 14th inst., in which the constitutionality of the Civil Rights act of 1875 was involved. That act declared that all persons within the jurisdiction of the United States should be "entitled to the full and equal enjoyment of the accommodations, advantages, facilities and privileges of inns, public conveyances on land or water, theatres and other places of public amusement, subject only to the conditions and limitations established by law and applicable alike to citizens of every race and color, regardless of any previous condition of servitude." The act further provided a penalty for the violation of its provisions, and gave exclusive jurisdiction to the District and Circuit Courts of the United States in cases arising under the law. The case before the District Court at Austin was a criminal suit brought to enforce the penalty provided by the act referred to for excluding a colored woman from a "ladies' car" on the Houston & Texas Central Railroad. The judge held that the act of 1875 was unconstitutional, as being an infringement on the rights of the several states, and that the state tribunals alone had jurisdiction of such offenses. This opinion seems to be in accord with most of the decisions in which the scope of the Fourteenth Amendment has come under discussion. It is only in that amendment that any constitutional sanction for legislation like that under review could be sought, and the inhibitions of that amendment having regard to the abridgment of the privileges and immunities of citizens, are directed only against the states. This being so, it is difficult to see how discriminations made by persons or corporations as such and affecting the privileges and immunities of citizens could become the subjects of congressional legislation.

Whether the retaining by an insurance company of proofs of loss for a considerable time is a waiver of defects in the same is a question for the jury, and not a question of law for the court, according to the opinion of the St. Louis Court of Appeals, in the case of Kramer et al. vs. The People's Insurance Company, decided on the 12th inst.

A man who invites others to deal with him and provides a place where persons may deliver articles bought by him is bound to use reasonable care to make and keep the approach to such place in a reasonably safe condition for use for the purposes for which it was intended, according to the opinion of the Supreme Court of Indiana in the case of Nave et al. vs. Flack, decided on the 5th inst. The court held further that a person who acts on the directions of a servant of the owner of the premises and proceeds along a way which is maintained as an approach to the premises is not guilty of contributory negligence unless he knows or has reason to believe that the way is unsafe, and also that the person to whom the duty of keeping the approaches safe is owing has a right to presume that it has been performed and that he is only bound to use ordinary care in making use of such approaches.

The case of Hillebrand vs. Burgess et al., decided recently by the Texas Court of Appeals, involved a point of some interest to the mercantile community. The appellees sold some goods to a Waco firm and shipped them to that place from New York. The Waco firm refused to receive them, whereupon the appellees notified the railroad company to hold them. The appellant Hillebrand got the bill of lading of the goods from the Waco firm in payment of a debt, and got the goods from the railroad company, the agent overlooking the fact that he had been ordered to hold them for Burgess & Co. The latter sued Hillebrand for the value of the goods, and recovered judgment in the court below. This decision of the lower court was affirmed by the Court of Appeals, which held that, under the circumstances, the goods were the property of Burgess & Co.

In an action against a common carrier for the loss of a cargo of bran delivered to it for shipment, the St. Louis Court of Appeals held that it was competent to show in discharge of the carrier that the goods which were directed to "shipper's order" were delivered according to the orders of a person who, though not the general agent of the shipper, yet had, with the knowledge of the shipper, held himself out to the general public and to the carrier as the shipper's general agent, and who was, therefore, regarded by the agents of the carrier as the general agent of the shipper. Watson, assignee, etc., vs. Hoosac Tunnel Line Company, decided June 12. In the opinion of the court, delivery to a shipper or to his general agent, or to one as to whom the shipper is estopped to deny that he was his general agent at the time, discharges the carrier so far as any claim of the shipper against the carrier for loss of the goods is concerned.

The receiver of an insolvent corporation issued to appellees' testators a certificate of indebtedness, which recited that the receiver, by order of a certain United States District Court, acknowledged an indebtedness of the corporation to William R. Bowers in the sum of $10,000. This was assigned to the appellants in blank. They received $7,500 on it, and brought an action to recover the balance. They had a judgment in the court of first instance, but this was reversed on appeal by the Supreme Court of Indiana in McCurdy et al. vs. Bowers, decided on May 28. The court held that no recovery could be had on this instrument on the ground that it was a negotiable instrument, and that the assignor was not chargeable as an ordinary indorser of a note or bill, for the reason that such an instrument is not negotiable as commercial paper. Such an instrument could not be regarded as a promissory note. The assignor of such an instrument does not bind himself as a guarantor, and there can be no recovery on the ground that the assignor warrants that the instrument will be paid.

A person purchased a round-trip ticket from Mobile to Niagara and return, and signed a contract printed on the ticket that the return part of the ticket must be stamped and the passenger's signature witnessed for identification at Niagara before it should be honored for passage. In an action by the passenger against the railroad company for damages for being ejected on his return trip on account of refusal to pay his fare (the return ticket not having been witnessed for identification according to the contract) the St. Louis Court of Appeals held that, under the circumstances, the passenger could have no recovery; that in the absence of any evidence of waiver, or that the passenger had no opportunity to know the terms of the contract when he signed it, such an agreement as that set forth above was binding. The court further held that, where the contract was made by the agent of a line of connecting roads, the waiver of its terms by one of the roads would not bind the others, and that a railroad passenger conductor is not a general agent of the road, authorized to waive the terms of a written contract such as that referred to. Cloud vs. St. Louis, Iron Mountain & Southern Railway Co., decided on the 12th inst.

In the case of The State vs. Penny, decided by the Supreme Court of South Carolina on the 19th of April, the defendant was indicted, under an act regulating the pilotage of the port of Charleston, for having brought into the port a certain vessel of which he was master, not having a license as a pilot of the bar and harbor of said port. Upon trial the defendant was convicted, but he moved in arrest of judgment, on the grounds, among others, that the act conflicted with Section 4,237 of the United States Revised Statutes, which provides that "no regulations or provisions shall be adopted by any state which shall make any discrimination in the rate of pilotage or half pilotage between vessels sailing between the ports of one state and vessels sailing between the ports of different states," and also that the act was unconstitutional, as being in violation of Article 1, Section 9 of the United States Constitution, which provides that "no state shall, without the consent of the Congress, lay any imports or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws." Upon those points the court ruled against the defendant, although, owing to the court below not having jurisdiction, the appellate court was unable to decree the execution of the judgment.

An interesting decision was rendered by Judge Thayer, of the St. Louis Circuit Court, on the 11th inst., in the case of the Globe Pickle Company vs. Deming. It appeared that in September, 1882, plaintiff contracted to deliver, on or before November 1, 1882, and defendant contracted to take, a certain quantity of pickles at a fixed price, to be paid for sixty days after the time of delivery. No place of delivery was specified in the contract. Plaintiff had the pickles at his place of business ready for delivery on November 1, 1882, but the defendant did not call for them or indicate a place of delivery. No tender of the goods was made by plaintiff prior to November 1, 1882, but on December 12 he made a tender by letter, stating that the pickles had been held subject to the defendant's orders since November 1. The defendant declined to accept the tender, and the action was brought for the breach of defendant's obligation to accept the goods. Judge Thayer, in rendering his decision, remarked upon the conflict of authority existing as to the respective duties of the seller and the purchaser in the case of a sale of goods for future delivery, where the place of delivery is not specified in the contract. The weight of authority appeared to be in favor of the rule that when goods are sold and no place of delivery is designated the delivery is to be made at the place where the goods are at the time of sale, and that if the seller has the goods ready for delivery at such place at the appointed time he discharges his entire duty, and is not bound to hunt up the buyer and make a formal tender. In opposition to this view the courts of Pennsylvania and Massachusetts apparently hold that, in order to put the purchaser in default, the seller must not only hold himself in readiness to deliver at the appointed time, but that he must also seek the purchaser and call upon him to perform, or at least give notice of his own readiness to perform. The Supreme Court of Missouri having adopted the Massachusetts and Pennsylvania view in its fullest extent, he felt bound to decide the case on the principles laid down by the courts of those

states, and gave judgment for the defendant on the ground that there was no tender of the pickles on November 1, 1882, at the defendant's place of business, and no request made of the defendant prior to November 1, 1882, to appoint a place of delivery.

BUSINESS NOTES.

The Mexican Congress adjourned June 18, after authorizing the President to settle the national debt, amending the constitution to permit the federal Congress to administer the mining and commercial laws, and authorizing several railway grants. The most important concession is for a line of way and charter to the state of Michoacan.

The Lower California newly-discovered gold placers, which were recently reported to contain enormous quantities of the valuable metal, are now officially reported of no special value. The word comes from the United States Consul at Guaymas, Mexico, who states that forty-five of the miners who left Arizona for Lower California have returned and that the others are expected back soon.

The stocks of sugars at the principal Cuban ports, reported May 31, were composed of 60,286 boxes, 181,242 hogsheads and 149,405 bags. The export from the island and the consumption there from January 1 to May 31 consisted of 49,783 boxes, 368,907 hogsheads and 98,496 bags. This shows a total of 410,614 tons of sugar made on the island up to May 31, against 516,959 tons for the same period in 1882.

The Mexican government is taking active measures to encourage the paper and textile manufacturing industry. Two individuals have acquired the right to gather the cactus or maguey plant on government lands or such land as they may acquire, provided they build a paper and a textile mill (one of them within the federal district) within two years. These mills must cost at least $150,000 apiece, and the government will pay a $30,000 subsidy to each.

The total number of failures in the United Kingdom and Ireland, reported to *Kemp's Mercantile Gazette* (London) during the week ended June 2, was 233, as compared with 164 in the like week last year and 236 in the corresponding week in 1881. England and Wales had 209, against 147 and 221 respectively in the weeks referred to in 1882 and 1881; Scotland had 21, against 17 and 10, and Ireland 3, against none reported in the like week in 1882 and 5 in the corresponding period in 1881.

A meeting was recently held at Pittsburgh of the Connellsville coke producers at which 6,000 ovens were represented. The trade, as heretofore explained, has been much depressed for some months. The meeting was held to devise means to overcome the existing condition of the trade, and an asssociation was organized to restrict production and maintain a card-rate which will accord remunerative prices. All the firms represented signed a paper agreeing to close down one-third of their ovens.

Mexico is seeking prominence in the silk manufacturing industry among her other enterprises. The Mexican Industrial Society has been organized to cultivate the mulberry tree and to promote the raising of silk-worms in different localities. Twenty establishments for providing raw material are to be started and a silk mill built "with all the latest improvements." The subsidy amounts to $1,200 for ten years to each of the twenty establishments, and $600, besides the land, "to all colonies established to assist in this industry."

The progress of the fishing industry and the business of canning the toothsome inhabitants of the waters of Washington territory and British Columbia may be realized in part by the information from Victoria, British Columbia, that the gigantic floating fish cannery, recently built there, has gone to sea. It will follow the runs of fish from river to river, and all the work will be done on board. This is a "fishery exhibit" the like of which is undoubtedly not to be seen at the exhibition now being held in London. In operation the "floating cannery" would probably astonish the natives of any country.

The report on immigration into the United States during may last, made by the Bureau of Statistics, shows that the total number arriving here was 99,601, against 141,035 in May, 1882, and for eleven months ended May 31 was 517,290, against 685,636 in the like eleven months in the preceding fiscal year. Of this number, there arrived in May, 1882, from England and Wales, 13,443; Ireland, 15,169; Scotland, 4,383; Austria, 1,668; Belgium, 373; Bohemia, 1,404; Denmark, 1,743; France, 455; Germany, 29,787; Hungary, 856; Italy, 7,276; Netherlands, 1,068; Norway, 4,898; Russia, 382; Poland, 183; Sweden, 6,801; Switzerland, 2,080; Dominion of Canada, 6,922; and from all other countries, 710.

The total amount of capital invested in industries in Canada in 1881 amounted to $165,302,723, or more than twice the total reported in 1870. The distribution of the aggregate capital devoted to industrial purposes in 1881 was as follows:

Ontario	$80,950,847	British Columbia	$2,082,835
Quebec	59,216,932	Manitoba	1,583,331
Nova Scotia	10,183,060	Prince Edward Island	2,085,000
New Brunswick	8,425,282	Northwest territories	104,500
Total			$165,302,723

In 1881 the value of the products of Dominion industries was $309,676,008, of which $3,413,026 was credited to Manitoba, $3,400,280 to Prince Edward Island, and $2,926,784 to British Columbia.

The exports of iron, steel, etc., from Great Britain to the United States during May last, as reported by the London *Ironmonger*, with comparisons, were as follows:

	—May— 1882.	1883.
Hardware and cutlery	£36,240	£34,155
Pig iron, tons	40,435	22,187
Bar, angle, bolt and rod iron, tons	1,422	587
Railroad iron of all sorts, tons	11,946	7,737
Iron hoops, sheets, and plates, tons	1,535	3,043
Tin plates, tons	17,803	17,513
Cast or wrought, tons	842	304
Old iron, tons	6,848	6,179
Steel, unwrought, tons	13,831	3,321
Lead, tons	1	4
Machinery—steam engines	£9,117	£4,542
Machinery—other descriptions	£41,052	£46,721
Tin, unwrought, cwts	948	252
Special returns—		
Iron rails, tons	2,140	130
Steel rails, tons	9,517	7,522

The British labor market, as reported in the London *Labour News* of June 6, continued fairly satisfactory, although somewhat unsettled at various points owing to demands for increased wages. The weather was bright and favored field work in agricultural regions as well as building and other outdoor industrial operations. Farm hands were in request. Some iron works were idle owing to the North Staffordshire colliers' strike, which promised to continue for some time. As a natural result, however, increased activity at the North Wales coal mines was reported. A strike was announced at the Bridgport Railway extension, where the laborers demanded an additional two shillings per week. In the textile trade there had been little or no change during the week ended on the date named. Work in the Kentish hop and fruit gardens was brisk. Emigration was increasing.

The following national banks have been organized: The Sprague National Bank of Brooklyn, N. Y., capital $200,000; N. T. Sprague president, H. C. Copeland cashier. The First National Bank of Rochester, Pa.; capital $50,000; Henry C. Fry president, W. S. Shallenberger cashier. The United States National Bank of Omaha, Neb.; capital $100,000; Smith S. Caldwell vice-president, Milton T. Barlow cashier. The First National Bank of Palmyra, Mo.; capital $55,500; James M. Bates president, Samuel Logan cashier. The First National Bank of Aberdeen, Dak.; capital $50,000; S. H. Jumper president, George L. Cadwell, Jr. cashier. The Produce Exchange Bank has filed certificate of association with capital stock of $1,000,000; the share holders are R. E. Orr, Forrest H. Parker, S. Jacoby, Munroe Crane, Alexander Munn, L. J. N. Stark, A. P. Armour, E. S. Whitman, J. A. Bostwick, R. H. Laimbeer, Asa Sterms and Henry W. O. Edye. The Mechanics' National Bank of New York City has elected W. H. Cox president in place of Benjamin D. Sherman, resigned; Mr. Cox was cashier for many years, and H. E. Garth succeeds as cashier. The Massachusetts National Bank of Boston has elected A. O. Bigelow president in place of H. A. Rice. The Madison County National Bank of Anderson, Ind., has elected C. T. Dixey president in place of J. E. Corwin.

The outcome of the late "war" between the iron mill employés and proprietors at Pittsburgh has received full treatment in these columns, and views on opposite sides have been printed respecting the allegation that the capitulation of the manufacturers was due to their being afraid of western competitors. There is little doubt, of course, that the struggle in the iron trade is the industrial feature of the day, and in commenting thereon the Chicago *Tribune*, dropping all "alleged's" and "reported's," speaks as by authority, as follows: "The resumption of work by the Pittsburgh manufacturers was a part of their tactics to exterminate their western competitors. Domestic competition, which will be internecine, will be the special feature of the iron business hereafter. The tariff will probably never again cut much of a figure. The principal ironmakers of Pennsylvania are beginning to migrate to Virginia and Alabama, where iron can be made for $10 to $13 a ton, against $17 to $20 in Pennsylvania. With such competition within our lines a tariff to shut out foreign iron is not of much account." There is a certain air of self-confidence about this paragraph which is refreshing—even winning. The statement that "the tariff will probably never again cut much of a figure" is particularly referred to. It is to be feared that the *Tribune's* wish on this point is the author of the sentence. It requires a long telescope to see the end.

The corrected statement of detailed exports and imports for April last, and for ten months ended April 30, 1882, has been received by the Bureau of Statistics at Washington. The totals are as follows:

	—Ten months ended April 30— 1883.	1882.
Imports free of duty and from Hawaiian Islands	$175,221,471	$173,029,754
Imports dutiable	426,891,960	419,670,142
Total imports merchandise	$602,113,431	$593,599,896
Exports domestic merchandise	$595,521,947	$635,955,541
Exports foreign merchandise	15,900,044	14,329,782
Total exports merchandise	$711,421,991	$650,285,323
Imports coin and bullion	$26,360,872	$40,582,425
Exports domestic coin and bullion	$18,223,002	$22,748,984
Exports foreign coin and bullion	8,331,251	4,707,178
Total exports coin and bullion	$26,554,253	$27,456,162

A summary of the above is given as follows:

	—Ten months ended April 30— 1883.	1882.
Total imports merchandise	$602,113,431	$593,599,896
Total imports coin and bullion	26,360,872	40,582,425
Total imports all kinds	$628,474,303	$634,182,321
Total exports merchandise	$711,421,991	$650,285,323
Total exports coin and bullion	26,554,253	27,456,162
Total exports all kinds	$737,976,244	$677,741,485

The balance of trade, so-called, was for the ten months ended April 30.

Total exports	$737,976,244	$677,741,485
Total imports	628,474,303	634,182,321
Excess exports	$109,501,941	$43,559,164

or, excess exports over imports in the ten months ended April 30 last, as against April 30, 1882, $65,942,777.

OLEOMARGARINE IN MISSOURI.

The St. Louis *Republican* has the following: The trial in the United States Circuit Court at Kansas City of the oleomargarine case has ended in an indefinite result. A law of Missouri prohibits the manufacture and sale of this counterfeit substitute for butter, and under it the agent of a Louisville establishment was arrested for selling it. At the request of the prisoner the case was taken to the United States Court on a writ of habeas corpus, the prisoner's counsel arguing that the state law is unconstitutional because it forbids the manufacture of an article which is wholesome and is protected under a United States patent. The court holds that the United States patent does not give an unconditional right to manufacture the patented article, but only protects the patentee by prohibiting others to manufacture it; and the state law does not violate this right. The evidence went to show that oleomargarine is a wholesome article of food, and this the court admits; but under the proceedings it has no right to try the case on this point. It, therefore, remands the prisoner for trial before the courts of the state. It will devolve upon the local courts, therefore, to interpret the state law, and this will be done when the prisoner's case comes up for trial.

The state statute was enacted to protect its important dairying interest from the destructive competition of a cheap counterfeit made of tallow and placed on the market as genuine butter. Oleomargarine may be a pretty good substitute for butter; but it is not butter, and its manufacture on an extensive scale would seriously impair an interest of great value to the state. This is why the statute was enacted. Whether it can stand or not is a question for the state courts to decide.

OYSTERS AT THE FISHERIES EXHIBITION.

The *Pall Mall Gazette* remarks that by no means the least interesting feature of the Fisheries Exhibition is the department devoted to oyster culture, concerning which it gives the following facts of interest:

The first stand is that of Mr. Bingham, who shows models of a couple of ponds, with collectors of shells, tiles, and hurdleing. This system has stood the test of time, and is one of the earliest if not the earliest, used. The system was employed at St. Helen's, in the Isle of Wight, in 1866, and ten years later 1,500,000 were taken from the beds, while in 1877 the total reached 2,000,000 oysters. There is also a case containing specimens of oysters of various ages, and a curiosity in the shape of an oyster that attached itself in early life to the bowl of a tobacco pipe, just as another, in the Seasalter Company's stand, may be seen fastened to the neck of a bottle. The stand of the Seasalter & Ham Oyster Company is No. 767, and will well repay examination. In a glass tank are models of three Whitstable smacks with their dredges at work—notice the make of the dredges. Each boat carries three dredges, and there is one man to each. In a long narrow bottle is the spat of a single oyster, estimated to contain 1,740,000 eggs. If each of these became an oyster we should have no reason to despair of again enjoying natives at one shilling per dozen. Here, too, are specimens of oyster shells of various ages, from four months to an unknown number of years, and the visitor should not fail to notice the shells of some oysters fourteen months old, but forced to abnormal size by a new process at present wrapped in the breast of the inventor, but which may some day be made public. So far as can be seen at present, France sends nothing in the shape of oyster-breeding appliances. Arcachon, where a fishery exhibition was once held, is a great place for oyster culture, the locality being peculiarly favorable to that industry. The bay admits of all the beds being laid in the open instead of in inclosed waters. For the information of the uninitiated it may be mentioned that oysters are believed to be hermaphrodites, and that wherever the spat drops there it remains unless removed by manual force. It follows, therefore, that in unattended places a larger portion of the spat settles nowhere, and is wasted; while, if the spat is dropped upon an existing bed, the shells of the oysters form resting places for the fall of spat. In artificial breeding-places collectors of either wood or tiles are laid down to receive the spat; and when the oysters grow to a certain size they are removed and packed in an "ambulance" till they grow big enough to be unassailable by the natural enemies of young oysters. When they attain that size they are laid down in the beds. Within the limits of a single article it is impossible to do more than point out a few of the principal things to be seen in this most interesting department, and the non-mention of any exhibit must in no case be taken as indicating its non-importance.

THE MATCH INDUSTRY.

The Chicago *Times* has the following: Purchasers of friction matches complain that, notwithstanding the abolition of the stamp tax, the combination controlling the trade keeps the prices up to the old scale, and announces that there is no intention of coming down. Some people, it seems, think there is no appeal from the decision of the monopolists, and that they alone will reap the benefit of the removal of the tax. This conclusion is premature. It is not at all surprising that the monopolists keep up the prices, and it is to be expected that they will do so as long as possible. It is not at all common for men to let a good thing go so long as they can keep it. The question is, can the match men keep their good thing? Congress did its best to enable them to keep it by leaving the old duty of 35 per cent. on imported matches unchanged, when it ought to have abolished the duty along with the stamp tax. Congress helped create the monopoly by authorizing the sale of stamps at a much lower price at wholesale than at retail, as well as by the duty on foreign matches. Thus aided, the stronger manufacturing concerns were able to absorb the entire business by crushing out or buying up the smaller fry. Now that they have the trade all in their own hands and the duty still in their favor, their position is for the time being a strong one. Competition cannot be expected to arise and do its work instantly. At first we may expect that men who go into the business on a small scale, or contemplate doing so, will be bought out, and that the monopoly will thus be maintained for some time. But this business of buying out will become too large to be profitable at no very distant day, and then competition will come into play. The match-making business is not like the petroleum business or some other lines. Without government aid monopoly cannot be maintained a great while. Materials are abundant, and it requires no great amount of capital and no extraordinary skill to run the business successfully. We may depend upon it that competition will come. Meantime, gentlemen of the House of Representatives who contemplate taking an active part in tariff agitation and legislation next winter will please enter in their memorandum-books a minute to the effect that the 35 per cent. duty on matches is one of the things to be wiped out.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

The terrible smash-up in Chicago last week fell upon the stock market like a load of bricks. The bull movement was knocked to pieces. It was shaky enough before, but this laid it prostrate at a blow. Much talk was indulged in about the failures in the grain and provisions markets helping the stock market, because it is a rule that the causes which tend to raise the price of food products are those which depress the prices of securities, and vice versa. But there are exceptions to this rule, as to all others. The stock market is never helped by failures, and the larger and more disastrous they are the worse it is. They may be compared to a thunderstorm which clears the air and makes it healthier, but at the same time is so violent and destructive as to spread ruin all along its path. The market may recover again, but for the time being it was knocked to pieces, and only temporary rallies check the downward course of prices instead of there being that regular advance which was so fondly hoped for last week. The first effect of the news from Chicago last Saturday was comparatively small, but as the telegrams came pouring in, showing the extent of the disaster, prices fell lower. It was on Monday, however, that the effect was felt heavily, and on that day, Tuesday, Wednesday and Thursday the market went on falling lower and lower. All Wall street had by this time turned from bull to bear. The great body of room traders had gone to selling stocks short with unrelenting vigor, and the prices of stocks which had mounted highest in the short bull movement where driven down in quite an alarming style. To add to the trouble, it was published all over the street Thursday morning that Mr. William H. Vanderbilt had on Sunday last had a stormy interview with one of his sons who had been bulling the market, and warned him that this was not a good time for a movement of that kind; that he was opposed to it in toto, and furthermore that it was interfering with his (Mr. Vanderbilt's) plans. It was said that the free throwing over of stocks which had been going on since Monday was due to the interview. Of course under such influence as this Wall street unanimously went to selling stocks worse than ever, while reports from the west of another break-out of trouble between the Rock Island and St. Paul roads, of floods and washouts there, and trouble among the trunk line presidents at their meeting the day previous about the cutting of rates by the Lackawanna, encouraged the cheerful game. Prices of many stocks fell that morning to a lower level than they had touched any previous day of the week. Suddenly, in the midst of this jubilee of the bears, some of the leading traders in the room changed front to the bull side with bewildering effect on the crowd. Their voices, heretofore raised in clamorous offerings to sell, were as loudly raised in offerings to buy. They bought stocks right and left; they seemed ready to buy anything offered, and the whole room was thrown into great excitement. Rumors flew about that two or three of the large operators had decided they had made a mistake in selling, and were buying back their stocks as fast as possible, and there was a general rush to cover shorts, under which the whole market rallied sharply, and when the flurry was over everybody seemed to be wondering what it was all about. There was a slight reaction again, but the closing prices were a decided improvement on those which had been reached in the morning. Yesterday the market was very dull indeed, but prices were sustained about where they closed the day before.

But where, it may be asked, was that wonderful rise in the market which Mr. Gould had so confidently predicted as to occur on the 15th of June? From the 15th until yesterday the course of the market was almost uniformly the other way. Mr. Gould's reputation as a prophet has been sadly impaired. He will doubtless claim any rise it may have between now and next year as the rise he predicted, only a little belated; but meantime Wall street is inclined to be merry over his prophesies. He was so very particular in fixing the date that it was inferred he had some plans afoot which would reach maturity about that time, and this was doubtless true. It is customary now to believe that everything which happens in Wall street is Mr. Gould's own handiwork, and probably a great many people believe that the falling of the market when he had predicted a rise was his own contrivance; but the truth seems to be that Mr. Gould did have plans to put up the market, but they have been wholly disarranged. In the first place, it would have been next to impossible to advance it in the face of the Chicago troubles; but the more serious difficulty was the Western Union matter. It is universally believed in Wall street that the Court of Appeals was to give its decision on Tuesday last—the usual day for handing down decisions—in the cases on appeal from the decision of the General Term declaring $15,000,000 of the stock of the company to be an illegal issue, and void. It is just as widely believed that the decision was to be one reversing the decision of the General Term and declaring the stock valid. The Western Union people themselves had so openly talked about the matter that it got into print, even the names of the judges and how they were to vote being given. At the same time it had been given out that the stock was to be listed in London on Tuesday or Wednesday; Mr. George Gould had been sent abroad with a large block of it, to be transferred to the names of certain gentlemen prominent in English financial circles, Mr. John Pender being one, and a transfer agency had been opened at the London Joint Stock Bank, one of the foremost financial institutions of that city. The meaning of these publicly advertised preparations will be understood when it is stated that the litigation questioning the validity of the consolidation of the American Union and Western Union companies has proved an insuperable barrier to listing the stock on the London Exchange. They would not touch it over there until this matter should be disposed of, and, of course, if the decision of the court of last resort should be against the company that would be the end of the whole matter. The Stock Exchange here would not list a stock whose validity was questioned; even less likely would they be to do it in London. Had the decision of the Court of Appeals been handed down, as expected, and been in favor of the company, as expected, Western Union would by this time be quoted on London Stock Exchange, and Mr. Gould would have been ready to start a boom in all his stocks. But something went wrong. The decision did not come, and the London preparations are left hanging in the air. Western Union went down instead of going up; and it was semi-officially given out that no decision was expected from the Court of Appeals before the court adjourns on Friday next. When argument was heard on it Tuesday of last week it was semi-officially given out that a decision was expected within two weeks. It should be mentioned here that in January last motion was made before the court to advance the case on the docket, and the court, after argument on both sides, formally decided to refuse the application and entered a rule to that effect. This put it over for the remainder of the year at least. When the court assembled at Saratoga, according to custom, two weeks ago, this case mysteriously turned up almost the first on the calendar. On the same day, in fact a day or two before the argument was heard, Wall street was flooded with rumors of what the decision was to be, and the way the judges were to vote had been given in print. The whole aspect of this celebrated case is decidedly queer.

One effect of the Chicago troubles has been to create an active call for money from there upon this center, to replenish exhausted margins on the grain and provisions markets, just as a great fall in the price of stocks would cause a wide demand upon holders here to keep their margins up to the regulation 10 per cent.; and it is fortunate that the call comes at a time when the banks are well filled, as they usually are at this time of year. Owing to this fact the loan market has continued easy through the week, some activity only being observable in the latter part of it; but the ruling rates on call were not affected, being 2 to 2½ per cent. Time loans were 5 per cent. Foreign exchange has declined, and the probability of gold shipment seems to diminish. The posted rates are now $4.85½ and $4.88. We may fairly expect a renewal of the export movement as the prices of our export products decline from the prohibitive point they have so long been held at, and as this movement increases, if it does increase, the danger of having to ship gold, which is always a terror to Wall street, will disappear. The Bank of England reserve is now up to 40 per cent. of its liabilities, but the discount rate still remains at 4 per cent. Some buying of the more solid kinds of our securities is reported, and bills drawn against them have appeared in the exchange market.

The government bond market is quiet as usual. The following were the closing quotations yesterday:

	June 15, —bid.	—*June* 22,— bid.	asked.
U. S. 5s extended (3½ p. c.)	103⅜	103⅜	—
U. S. 4½s 1891, registered	112¾	112¾	113
U. S. coupon	113¼	112¾	113
U. S. 4s 1907, registered	118⅞	118⅞	119⅛
U. S. 4s 1907, coupon	119¾	119⅞	120

The bank statement to be published to-day may show some important changes, but that of last Saturday showed none. The following are the comparative totals of the statements of June 9 and June 16:

	June 9.	*June* 16.	*Differences.*	
Loans	$320,136,600	$321,748,100	Inc.	$611,500
Specie	61,550,000	62,269,800	Inc.	718,900
Legal-tenders	26,341,000	25,943,800	Dec.	397,200
Deposits	315,290,900	317,690,200	Inc.	2,399,300
Circulation	15,941,800	16,802,400	Dec.	139,400

The proportion of reserve to liabilities is now 27.76 per cent., against 26.83 per cent. at the same date last year.

From New Orleans, La.: In securities there is little disposition to buy or sell and little variation shown, though the Mrs. Gaines matter has depressed city securities somewhat.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

SUMMARY.

The general business situation throughout the United States, as reported to BRADSTREET'S by special telegrams from leading business centers, presents added elements of strength. These may be briefly stated to be due to the collapse of the Chicago provisions corner and the brighter prospects for an average crop of wheat in many states where it had been supposed irreparable damage had been done. From many interior towns the word comes that, while the movement of general merchandise is only fair, the harvesting season has begun, the prospects for a crop are good, and that within a few weeks the revival in general trade is therefore confidently expected. Provisions were abnormally high and the legitimate home and foreign demand had long been checked by the prices ruling at Chicago. Wheat and corn, in sympathy with the break in provisions, have declined, and during the greater portion of the week have exhibited a nervous irregularity, due to the efforts made to sustain them, an increased shipping demand, and rumors of failures of grain and produce houses east and west. The position of the foreign grain markets does not warrant a belief in an active export demand, as supplies from other sources are abundant and prices here are still relatively higher than in London. The iron market has sustained a slight improvement for the better brands of pig at several cities. Prices are unchanged, but the demand for supplies of raw iron are more frequent than of late, and a better feeling is apparent among holders. Anthracite coal is still moving west in noticeably large quantities, and is equally conspicuous in the east for dullness. Petroleum is somewhat lower on the week, after having suffered a depression of 5@6c. on Monday and Tuesday. There appears to be no cessation to the organized bull and bear movement, and the alternating advance and depression between $1.10 and $1.20 have as yet left no particular advantage on either side, beyond the inability of the short interest to break prices. The position of refined is no more settled than a week ago. Ocean freights on the berth are somewhat firmer, due to there being less available tonnage in the face of a moderately increased inquiry. Chartering has been light. The wool trade has continued quiet and the markets generally have ruled weak. There were 178 failures in the United States reported during the past week, 13 more than the preceding week, 41 more than the corresponding week of 1882, and 93 more than the same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: The grocery trade is active the volume being greater than for the same time last year.

From Boston, Mass.: There are not many new features in the business situation. The volume of trade in leading manufactures is fully as large as last week, and in some departments the outlook is more promising, but the prevailing tone is rather tame. All kinds of general merchandise are quiet. Money continues in good supply, and bank discounts range from 5 to 6 per cent., with most of the transactions between 5@5½. Call loans, 4@5. Balances between banks rule at 4 per cent.

From Buffalo, N. Y.: Based upon the movement of merchandise the situation shows no special change. Staples move freely in response to a fair consumptive demand, while in most other lines business is only fair and of a very conservative tone. The general feeling regarding the prospects for a good fall trade are however encouraging. Collections are very fair.

From Rochester, N. Y.: Jobbers in groceries are well satisfied with their trade, and collections are reported good.

From Cleveland, Ohio: Has been quiet. The spring trade has been light and is virtually over for the season.

From Cincinnati, Ohio: There is apparently a comfortable feeling in money matters. Movements of merchandise warrants the belief that there will be a fair volume of summer business. The restriction of production and the increased consumptive demand are all favorable indications.

From Chicago, Ill.: Money is easy at 5 @ 6 per cent. Exchange is par. Large offerings of foreign bills are made against shipments.

From Indianapolis, Ind.: Trade is fair in most lines, but not heavy. Collections somewhat slow, country merchants putting payment off until after harvest.

From Evansville, Ind.: Somewhat dull.

From Peoria, Ill.: General trade is dull. Collection good.

From Louisville, Ky.: The general trading situation is quiet. The banks report money plenty and collections fair. Local securities are firm and active.

From St. Louis, Mo.: General trade rather quiet and suffering some from interrupted transportation. The annual flood is doing immense damage to low farming lands. Above the flooded bottoms, crops are doing well except corn, which is often suffering for the plow. An early change to dry weather will only save it. Money is only in routine demand at unchanged rates. New York exchange 75c. to $1 premium; prime commercial bills par.

From Detroit, Mich.: In general lines of business trade is only fair. Collections hardly up to the average.

From Kansas City, Mo.: Dullness prevails in nearly all lines; it is considered merely temporary and partially caused by uncertain crop prospects. All railroads leading east but one are washed out, and shipments cannot be resumed for several days. Money unchanged.

From Davenport, Iowa: Has only been fair. Groceries are fair, but not equal to last week.

From Des Moines, Iowa: Retail trade in all lines is dull; wholesale a trifle more active. Collections very slow.

From Minneapolis, Minn.: Jobbers report trade good for the season, with satisfactory collections. There is less effort to extend trade than usual, and until the harvesting of the growing crop is complete and the product secured a conservative course will be pursued by jobbers and country dealers. Neither are disposed to press goods on the market. The money market is fairly easy for all classes of legitimate business, quotable at 8 to 10 per cent. for good commercial paper.

From Milwaukee, Wis.: Fair.

From Lawrence, Kan.: Steady and fair, with no particular features in any line. The outlook is favorable in view of the abundant crops now almost assured. Money is easy.

From Topeka, Kan.: Satisfactory and steady. Collections good. Money, on commercial paper, loans at 9 @ 10 per cent. Mortgage loans, 7 @ 8.

From San Francisco, Cal.: Business during the past week has been good without special feature. Hardware is in brisk demand.

From Baltimore, Md.: Improved some, but was only moderately active.

From Norfolk, Va.: All departments of trade inactive. Dry goods and boot and shoe jobbers preparing for the fall trade. The season's business has been quite satisfactory, but not excessively large.

From Richmond, Va.: General business slightly improved.

From Memphis, Tenn.: Dull.

From Dallas, Tex.: Retail trade of the city is quiet. Wholesale lines are fairly active.

From Waco, Tex.: Collections are said to be rather backward, and money is readily loaned at 12 to 15 per cent.

INDUSTRIAL FEATURES.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: The mechanical industries are profitably employed.

From Philadelphia, Pa.: Textile production has not increased, but no additional stoppages are reported. Other manufacturing interests fairly employed. The general situation is about the same as last week.

From Baltimore, Md.: Manufacturers of furniture appear busy, and that branch of industry has reached large proportions. Ship-builders also have many orders on hand and are doing a satisfactory business.

From Louisville, Ky.: The industrial branches are moderately employed. Several hundred workmen are putting the finishing touches on the great Southern Exposition buildings.

BREADSTUFFS ABROAD.

The position of the foreign breadstuffs market as outlined from week to week during the past month has become more and more defined, and it is now generally admitted that the United States is not to control the price of wheat in London for the ensuing season at least. It would hardly be wise to do any predicting in detail on this subject, but with the rapid growth of India, Chili and New Zealand as wheat exporters, not to refer to the probabilities of Russia and Australia in the same direction, it becomes a matter of extreme doubt if the United States is again to occupy a position to dictate the price of wheat in Mark Lane. The effort has been made to do so this year. Chicago speculators and others interested in the movement have held up the price of wheat on varying pretexts until favoring skies, and a pretty general knowledge that the wheat crop is not so badly damaged beyond recovery as has been reported, have forced quotations down in spite of them. It goes without saying that the British grain markets have all along been below those here, relatively, and they have been weak and transactions, in American, lifeless. Meanwhile supplies from the Baltic, from India and elsewhere have been freely taken. The general excellence of the weather in the United Kingdom, in France, Germany and Austria has resulted in promising growing grain, and the outlook in those countries is now for an average yield. This fact has backed the Englishman in his independence of what he now calls "dear American corn," and the absence of full average crops in other exporting countries hereafter, if accompanied by a marked shortage in the importing countries, now seems likely to prove about the only combination which will enable the United States to sell her wheat abroad on her own terms. In its weekly review on the 18th, the *Mark Lane Express* says that while rain was greatly needed in the United Kingdom the crops promised a fair return. English wheat is scarcer and rates are firmer, but the trade in foreign wheat is not encouraging. Arrivals are numerous and prices, while weak, were unchanged. English and French country markets are unchanged.

The quantity of grain on passage to the continent and the United Kingdom June 20, as per Beerbohm's cable, was as follows:

	Wheat, qrs.	*Maize,* qrs.
To the United Kingdom	1,875,000	370,000
To continent	510,000	60,000
Total quarters	2,385,000	430,000
Equal bushels	19,080,000	3,440,000
Compared with the previous week:		
To the United Kingdom	2,225,000	290,000
To continent	480,000	50,000
Total quarters	2,705,000	340,000
Equal bushels	21,640,000	2,720,000
Increase bushels	.....	720,000
Decrease bushels	2,560,000	.....

AMERICAN WHEAT MARKETS.

The crop reports during the past week have been favorable, which, together with the decline of grain, in sympathy with the break in the produce markets, has conspired to further depress prices. The week has, therefore, shown a material decline. They have not reached an export basis, however, to judge from the lack of shipping orders, and, despite the belief in some circles that the natural reaction from the present level should again induce higher figures, there is good reason to doubt whether the bottom has been touched yet. The option markets have been irregular, fluctuating in conformity to the varying news of the week respecting the reported solvency or insolvency of leading brokers at New York and Chicago, as influenced by the speculative disaster at the latter city, and being likewise dependent upon new views as to the outcome in the late months under the readjusted conditions affecting the market. Harvesting is beginning in several western states, and will be fully under way in others within the next ten days. This will mean further receipts from farmers' hands at western points, which, with the already large stocks in sight, and especially in the absence of any renewed demand, will be likely to exercise a bearish influence on the market.

The receipts of wheat at tide-water for the week ending June 16 decreased from 1,252,078 bushels on June 9 to 1,042,273 bushels. The exports from the Atlantic ports for the week ended June 16 amounted to 732,233 bushels, against 724,509 bushels June 9. From September 1, 1882, to June 16 the exports of wheat from the Atlantic ports were 58,537,106 bushels, against 37,594,113 bushels in a corresponding portion of the preceding year, a gain of 20,942,993 bushels.

The course of the wheat market during the past week is indicated by the following prices in the New York and Chicago markets, for July wheat on the dates mentioned: New York, Saturday last, $1.20; Monday, $1.19¼; Tuesday, $1.18⅝; Wednesday, $1.18¾; Thursday, $1.17⅝; Friday, $1.17¾. At Chicago, Saturday, $1.08⅞; Monday, $1.07⅛; Tuesday, $1.06⅜; Wednesday, $1.06⅛; Thursday, $1.05¼; Friday, $1.05⅝. A decline on the week of 3c. at New York, and 5⅛c. at Chicago.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended June 16 amounted to 813,192 bushels, against 1,061,678 bushels in the preceding week, and the shipments to 314,423 bushels, against 606,316 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) June 16, as against the preceding week, showed an increase of 36,403 bushels, as compared with an increase of 297,651 bushels from June 9 to June 16. Business at the Produce Exchange in New York has been feverish and excited at times during the week, owing to failures and rumors of failures at Chicago. Some better demand for wheat for export and home consumption existed, and prices have been firmer. As may be presumed transactions in a speculative line were encouraged thereby, and have therefore been large.

CORN.

On Saturday this cereal, in common with the general course of the grain market, in sympathy with provisions, declined sharply. Corn options went off again on Monday and Tuesday. Later in the week it was unsettled and irregular. Active buying from the shorts helped to steady the market at times and declines were frequently checked and an advance secured in this manner. More steadiness was observed toward the close of the week and prices were advanced to a degree to cover a large share of the loss; but the irregularities in the market contributed to unsteadiness and corn again went off. The receipts of Indian corn at the Atlantic ports for the week ended June 16 were 1,925,223 bushels, against 1,915,954 in the preceding week, while the exports from the same points amounted to 1,443,234, against 1,374,291 bushels. From September 1 last to June 16 the exports of Indian corn were 35,772,135 bushels, against 24,953,019 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, June 16, had increased 306,109 bushels as compared with June 9.

The course of the corn market during the past week is indicated by the course of prices at New York 3 p.m. and Chicago 1 p.m. on the dates given, as follows: At New York, on Saturday, 64¼c.; Monday, 63¾c.; Tuesday, 62⅞c.; Wednesday, 62⅞c.; Thursday, 62¼c.; Friday, 62⅝c.. At Chicago, Saturday, 55½c.; Monday, 54⅝c.; Tuesday, 54⅛c.; Wednesday, 54⅜c.; Thursday, 53¾c.; Friday, 54⅜c., or a decline of 2⅜c. on the week at New York and 1⅛c. at Chicago.

The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending June 16, were 2,613,737 bushels, against 3,096,365 the week preceding, and the shipments were 3,171,545 bushels, against 2,231,892 in the preceding week.

The closing prices of breadstuffs in New York last evening, as against those of the Friday preceding and the corresponding date last year, were as follows:

CLOSING PRICES OF BREADSTUFFS IN NEW YORK.

GRAIN CROPS AND BREADSTUFFS.

[By Telegraph to BRADSTREET'S.]

From Rochester, N. Y.: Millers report a very dull trade.

From Philadelphia, Pa.: Flour dull with winter wheats in light supply and hence steady, but springs pushed for sale at concessions. Grain inactive and prices lower both for spot and future deliveries. Speculation has been crippled by the western failures and break in values, and shippers have been holding off for a more settled market.

From Cincinnati, Ohio: Flour during the week has been in moderate demand only, but closes better. Stocks on hand are fair and as a rule of high

grade. Wheat and corn have declined under slightly increased receipts over last week.

From Indianapolis, Ind.: Wheat and corn crops both show improvement.

From Evansville, Ind.: The weather for the past week has been fine for the crops. Farmers in this vicinity are busy cutting wheat. It is thought that the crop will average about fifteen bushels to the acre.

From Peoria, Ill.: Corn is reported to have a good stand and a better feeling exists regarding the crops generally.

From Louisville, Ky.: Flour is quiet and easy. Stocks are light. The crop prospects are in the main favorable, and calculations are for a good fall business. Wheat harvesting has commenced in southern Kentucky and in Tennessee, and cutting will be general in this state next week. Fields lack uniformity and yield varies greatly. The quality of the grain is excellent, but fear of rust is inducing farmers to cut rather too early. Weather warm and seasonable.

From St. Louis, Mo.: All grains depressed and unsettled. Flour neglected and hardly quotable.

From Kansas City, Mo.: Recent advices show considerably improved feeling in the country, and the outlook for wheat is now considered very fair.

From Detroit, Mich.: The crop prospect in this state is good.

From Des Moines, Iowa: The crop outlook is fair to good with seasonable weather from this on.

From Milwaukee, Wis.: The crop outlook for spring wheat was never better, though the low lands were damaged some by the heavy rains, which continue frequent and if not checked will give too much growth of straw. Winter wheat looks well and is now heading out finely. Oats promise a large crop. Barley is doing well and a full crop promised. Corn is thin and poor owing to too much rain. The grass crop is large on the high lands and light in marshes. The wheat market is excited, feverish, and 3c. to 4c. lower for the week. The millers here have begun to start up since the decline in wheat. One cargo of No. 2 spring has been taken for shipment.

From Minneapolis, Minn.: Weather in the northwest unsettled; considerable rain during the week, but higher temperature. Growing wheat is doing well and has advanced satisfactorily in Dakota and northwestern Minnesota. The crop looks unusually promising. Oats and barley are in good condition. Corn is backward and there is a poor prospect for a crop. The grass crop is large. The wheat movement is light and the market is weak and lower. Receipts at Minneapolis for the week were 310,000 bushels. Flour is slow and the market inactive, but not lower to buy. The production for the week was 58,000 barrels. Two-thirds of the milling capacity is idle.

From San Francisco, Cal.: The new crop is coming in. Wheat is dull and the harvest promises abundantly.

From Baltimore, Md.: There is very little inquiry for flour and holders appear more anxious to sell, but as yet no stocks are offered at low prices. Transactions in wheat were light and prices tend downward. A firmer feeling in oats has been brought about by a better inquiry, but the supply is ample and prices remain unchanged.

From Wilmington, N. C.: Grain and breadstuffs are steady.

From New Orleans, La.: Flour has declined a little. Nothing has been done in bulk wheat. There were no exports of bulk corn and the receipts were small.

From Waco, Tex.: Breadstuffs are firm and in good demand.

From Memphis, Tenn.: Flour quoted lower. Corn and oats dull with a drooping tendency.

From Nashville, Tenn.: Flour is dull. Wheat lower and dull. The growing wheat has been damaged by rust. The yield will be less than expected.

PROVISIONS.

On Saturday the failure of McGeoch, Everingham & Co., of Chicago, who are reported as having been engaged in an effort to corner lard for July, fairly demoralized the Chicago market, where the deal was being conducted. Something very like a panic was precipitated on the Produce Exchange there, and the hundreds of thousands of tierces of lard and barrels of pork which were unloaded by the longs broke prices disastrously to many who had been speculating on their faith in the efforts of those who had been manipulating that market for a rise. The fact now stands forth, as it had long previously to most of those who knew anything of the subject, and whose pockets had not colored their views, that the provisions market was suffering from unduly inflated prices. As had been repeatedly recorded in these columns, and in those of other journals, the price of lard, pork and other provisions had ruled too high. Foreign buyers had long since ceased to buy, and the home trade was practically stagnant. The legitimate trading atmosphere, in the line of lard and provisions, had become close and stifling, and the thunderclap out of a clear sky which was precipitated by the downfall of the projects of the McGeoch party proved quite as grateful and purifying in its effects as an electrical discharge ordinarily is when the air becomes abnormally heated. The effect of the crash upon legitimate trading therefore is decidedly for good. Those who lost heavily were engaged in an effort to force prices unnaturally high and thus force others to pay out large sums of money in order to make good their contracts. But Messrs. McGeoch et al. who went out to shear came back shorn. The straggling failures of lard and provisions brokers, the few rumbling after-claps each in turn recoiled upon a naturally strong market at the lower rates, yet the commodities most affected have exhibited considerable strength at the lower range. The variation in prices for lard and pork at New York on the week has been as follows:

For pork closing prices spot mess on Friday, June 15, $19.25; Saturday, $18.50; Monday, Tuesday and Wednesday, $18.75; Thursday, $18.50, and on Friday $18.50, a decline of 75c. since the close on Friday of last week. June lard, at the third call on the New York Produce Exchange on Friday, June 15, was $11.30 bid; Saturday the price offered was $10.10; Monday, $10.25; Tuesday, $10.15; Wednesday, $10.00.; Thursday, $10.00, and last evening, $10.00, a decline of $1.30 since the close on Friday of last week.

The export of hog product from the following places for the week ending June 16, 1883, was:

	Pork, barrels.	*Bacon and hams, pounds.*	*Lard, pounds.*
New York	2,883	2,153,964	2,621,648
Boston	285	240,602	365,125
Portland	..	....	....
Montreal	11	125,000	33,330
Philadelphia	34	541,500	5,000
Baltimore	17	391	89,859
New Orleans	15	1,200	....
Totals	3,245	3,062,747	3,114,962
Previous week	3,404	5,119,485	3,573,441
Two weeks ago	2,517	3,411,729	3,147,298
Corresponding week in 1882	3,076	5,301,806	4,066,604

The total export of hog product from the abovementioned places from November 1, 1882, to June 16, 1883, was as follows:

	1882-83, pounds.	*1881-82, pounds.*	*Decrease, 1882-83, pounds.*
Pork	30,272,200	36,507,800	6,235,600
Bacon	273,960,851	287,540,149	13,559,298
Lard	151,579,237	165,763,561	14,184,324
Totals	455,832,288	489,811,510	33,979,222

PROVISIONS AND LIVE STOCK REPORTS.

[By Telegraph to BRADSTREET'S.]

From Buffalo, N. Y.: Provisions are in very fair demand. Prices are lower and weak under the influence of heavy receipts of hogs and the unsettled condition at Chicago.

From Philadelphia, Pa.: Hog products have been depressed by the collapse of the Chicago lard corner and consequent failures, but the jobbing trade has been more active at the decline. Beef is firmer and in small supply. Speculation in butter has subsided, but prices hold steady. Cheese is more plentiful and lower.

From Cincinnati, Ohio: In this market provisions and lard have manifested sympathy with Chicago, and the market has been demoralized and transactions insignificant.

From Louisville, Ky.: Provisions are irregular and demoralized. There was some speculative buying at the decline.

From St. Louis, Mo.: Provisions are away down and phenomenally dull. Hogs in big offering and inactive at large decline. Cattle receipts the heaviest of the season and of good quality, selling fairly at downward values. Horses and mules in better supply at steady prices.

From Kansas City, Mo.: Cattle market weak in sympathy with unfavorable eastern advices and interruption to transportation by floods; prices 10@15c. lower. Hogs dull and slow; prices declined 40@50c.; large lots accummulating in yards, owing to lack of shipping facilities and interruption to packers, caused by high water.

From Des Moines, Iowa: The provisions market is well supplied and prices are weak.

From Topeka, Kan.: Quiet with a slight decline in prices. The demand is small.

From San Francisco, Cal.: Provisions and rice are inactive.

From Baltimore, Md.: The jobbing trade in provisions is fair and the market rules easy.

From Wilmington, N. C.: Provisions dull and lower.

From Savannah, Ga.: The grocery trade has improved, with more demand for smoked sides and salted meats. Sales of canned goods have lessened.

From Memphis, Tenn.: Meats and lard are weak and the stock is light. Cornmeal is dull.

From Nashville, Tenn.: The cattle market is dull.

From New Orleans, La.: Provisions have declined considerably owing to the condition of western markets.

From Waco, Tex.: Cattle of all grades and ages command good and in many cases fancy prices. Heifer yearlings, $15; one-year olds, $25, and three-year olds, $35@$40.

THE NEW YORK DRY GOODS MARKET.

There still continues a general quietness in nearly all branches of the dry goods business. As the demand in one department falls off the request is apparent in some other, thus keeping the volume of sales about equal. Cottons, prints, printing cloths, flannels and blankets have been in but moderate demand. A fair request has been made for ginghams and lawns and other summer fabrics. Woolens seem to retain the briskness developed last week and sales generally are reported satisfactory for the season. In silks and dress goods there is very little doing, it being still too early in the season. Jobbers are buying as little as possible, as their stock-taking time is now on hand. There is not much really active business looked for in fact until after the 4th of July.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, June 21.—The Manchester market is steadier, though no improvement in prices is quoted and sales are small. The tone is hopeful.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: The dry goods trade is languishing.

From Boston, Mass.: The most prominent feature in dry goods is the stiffening up of prices of a few brands of bleached shirtings which were recently reduced to clear off accumulations. The general demand is light, and except where material concessions have been made sales are confined to small lots. Jobbers still hesitate about stocking up. They are clearing up pretty well, and their spring trade is turning out somewhat better than was expected. On woolens the outlook is a little better, though buyers are still very cautious. Flannels, blankets and carpets have been opened at a lower range than last year, and are beginning to move.

From Providence, R. I.: The print cloth market is quiet and steady, the amount of sales being moderate; 64s are quoted at 3⅝c., and 56x60s at 3 1/16c. There are about 150,000 pieces on hand.

From Buffalo, N. Y.: Dry goods continue a prominent exception to the general rule, and show a steady gain over the corresponding week and month of last year. Prices as a rule, are firm, and a satisfactory feeling exists in the trade.

From Rochester, N. Y.: The jobbing dry goods trade report business during the past week brisk and fully 20 per cent. better than in the corresponding week last year, notwithstanding the fact that the season is nearly over. The retail trade is also good and collections are very satisfactory.

From Philadelphia, Pa.: Package buyers show little disposition to commence operations for the fall trade, and business in seasonable stocks is small. Jobbers are not busy, but trade is up to the usual average for the time of year in most lines.

From Pittsburgh, Pa.: In dry goods there is a brisk demand for seasonable goods. Some complaints are heard in regard to collections.

From Cincinnati, Ohio: Dry goods and clothing show no improvement in the general features. There is fluctuation in some lines of specialties, particularly woolens. Staples are held firm. Hemp is unchanged on a firm market.

From Cleveland, Ohio: In common with other lines, has been without much life, but throughout the spring trade in this line has been exceptionally good.

From Indianapolis, Ind.: The dry goods trade is very fair and satisfactory.

From Chicago, Ill.: Dry goods sales strictly on orders average for June better than last year. Fuller lines are being called for. Collections are fairly satisfactory and trade is considered healthy. Country retailers in most sections are in good condition. Millinery and fancy goods are in fair summer demand. All lines more active than last week.

From Peoria, Ill.: Only fair.

From Detroit, Mich.: In dry goods a fair volume of business for the season is being done.

From St. Louis, Mo.: Dry goods are more active than usual at the beginning of the dull season. Prices are well sustained.

From Kansas City, Mo.: Dry goods quiet and unchanged.

From Davenport, Iowa: Light movement but steady.

From Topeka, Kan.: The demand for dry goods is regular, and the trade still continues good.

From San Francisco, Cal.: Dry goods is having a steady trade with the appearance that spring demand will continue into fall. Several lines of dry goods have been marked lower.

From Baltimore, Md.: Sales of dry goods are fair and better than for the previous week. Retail dealers are doing a very satisfactory business. Jobbers think the prospects for the fall are good, but show little disposition to buy large stocks.

From Richmond, Va.: There is no change in the condition.

From Wilmington, N. C.: Dry goods are inactive, and the weather is hot.

From Savannah, Ga.: Dry goods are steady and unchanged. Collections are slightly improved.

From Galveston, Tex.: Dry goods and general jobbing trade is fair for the season. Bank interest and exchange unchanged.

From Dallas, Tex.: The wholesale dry goods trade is quite active.

From Waco, Tex.: The wholesale trade is rather inactive, but country merchants are buoyant and hopeful. They are placing liberal orders for the fall trade.

From Memphis, Tenn.: The wholesale dry goods trade continues quiet.

THE CLOTHING MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Clothing is selling moderately for the season, but the call is now mainly for very thin goods, which do not make much of a show in gross value.

From Chicago, Ill.: Clothing is dull, as is customary at this season.

COTTON.

The spot market at New York during the week past has remained practically unchanged from that of last week. Sales for the week are as follows: For export, 4,000 bales; for consumption, 1,607 bales, and for speculation, 130 bales. The total sales foot up 5,737 bales, against 1,500 bales last week. Included in the above are 30 bales to arrive. The deliveries on contract amount to 1,700 bales. The quotations for spot middling uplands have been lower, the price having dropped a point on Saturday, and has since remained unchanged, closing last night at 10½c.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week.*	*Last year.*
Ordinary	7 9-16c.	7¾c.	9⅝c.
Strict ordinary	8	8 1-16	10 3 16
Good ordinary	8 13-16	8⅞	11
Strict good ordinary	9½	9 9-16	11 7-16
Low middling	10	10 1-16	11⅜
Strict low middling	10 5-16	10⅜	12⅛
Middling	10½	10 9-16	12 5-16
Good middling	10⅞	10 15-16	12 11-16
Strict good middling	11⅛	11 3-16	12 15-16
Middling fair	11⅜	11 11-16	13 7-16
Fair	12⅜	12 7-16	14 3-16

STAINED.

	This week.	*Last week.*	*Last year.*
Good ordinary	7	7 1-16	9 3-16
Strictly good ordinary	7 13-16	7⅞	9⅜
Low middling	8½	8 9-16	8 9 16
Middling	9⅜	9 11-16	9 11-16

The market for spot cotton closed dull and nominal.

The New York market for futures shows no material change, the same conditions governing it as have been manifested during the several preceding weeks. Dealings have been light and confined almost entirely to inside operators, there being scarcely any outside speculation.

The price has fallen an average of 12 points for near months and 5 points for later ones.

The total sales for the week foot up 355,400 bales, against 490,300 the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
June	10.44	10.55	12 29
July	10.44	10.53	12.31
August	10.51	10.59	12.41
September	10.25	10.33	12.10
October	9.95	10.02	11.63
November	9 87	9.92	11.46
December	9.88	9.94	11.48
January	9.97	10.01	11.60
February	10.07	10 12	11.73
March	10.17	10.22	11.86

The market for futures closed dull and steady.

The southern markets have been quiet and

steady. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales	To-day.	Last year.
Galveston	2,173	9 15-16	12⅛
New Orleans	8,600	9⅞	12⅜
Mobile	700	9⅞	12
Savannah	580	9⅞	12⅛
Charleston	145	10	12⅛
Norfolk	393	10	12
Baltimore	102	10⅜	12¼

The total receipts of cotton at the ports since September 1 are 5,862,683 bales, an increase of 1,296,145 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	Last year.
Galveston	821,343	421,789
New Orleans	1,646,189	1,167,515
Mobile	310,503	261,233
Savannah	807,814	721,650
Charleston	564,528	493,751
Wilmington	128,635	133,062
Norfolk	791,577	600,829
Baltimore	77,759	35,587
New York	151,100	168,108
Boston	188,600	224,666
Philadelphia	94,591	77,383

Below will be found the receipts for each day of the week ending Friday, June 22, at eleven leading ports, as compared with last week and the same week one year ago:

	Sat.	S. & M.	Tues.	Wed.	Thurs.	Fri.
Galveston	571	194	203	369	102	120
New Orleans	277	940	782	537	627	434
Mobile	....	139	22	5	....	130
Savannah	145	138	668	291	64	235
Charleston	26	80	16	68	1	113
Wilmington	1	119	....	7	....	6
Norfolk	107	178	29	58	94	180
Baltimore	602	379	10	173	327	260
New York	....	10	....	62	....	139
Boston	318	86	....	190	45	32
Philadelphia	141	29	636	204	450	10
Totals	2,190	2,292	2,366	1,904	1,710	1,655
This day last week	4,130	3,286	5,823	3,428	2,022	2,485
This day last year	2,140	1,826	4,224	1,514	1,358	2,273

The total receipts at the ports for the week were 12,303 bales, against 21,455 last week and 13,637 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 3,045 bales, against 5,677 bales last week and 2,410 bales for the corresponding week last year. The shipments for the week were 9,845 bales, against 9,893 bales last week and 11,470 bales for the corresponding week last year. The stocks for the week were 79,654 bales, against 89,756 last week and 56,181 for the same week last year.

At Liverpool the market for prompt delivery uplands shows no material change from that of last week, being dull and easier, with a moderate inquiry which was freely supplied; quotations have remained unchanged, closing at $5^{11}/_{16}$d, the closing price one week ago.

The market for futures has been very dull and quiet. The prices for options have scarcely changed since Friday last, not varying more than 2 points either way for any month, from the closing quotations of last Friday evening.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week	Last week.	Last year.
June	5 42-64d.	5 44-64d.	6 51-64d.
June-July	5 42-64	5 44-64	6 51-64
July-August	5 44-64	5 47-64	6 51-64
August-September	5 48-64	5 52-64	6 54-64
September-October	5 46-64	5 50-64	6 46-64
October-November	5 41-64	5 42-64	6 33-64
November-December	5 39-64	5 40-64	6 33-64

The sales for the week at Liverpool were 38,000 bales (of which 29,000 were American), against 114,000 (of which 62,000 were American) last year. The sales for export were 2,400 bales, against 10,000 bales last year. The sales for speculation were 1,100 bales, against 20,000 bales last year. The amount forwarded was 11,000 bales, against 9,200 bales last year. The stock in port is 982,000 bales (of which 739,000 are American), against 900,000 bales (of which 534,000 were American) last year. The total imports for the week were 43,500 bales (of which 33,500 were American), against 37,500 bales (of which 15,000 were American) last year, and the amount afloat 261,000 bales (of which 111,000 are American), against 301,000 bales (of which 72,000 were American) last year.

The Manchester market closed dull.

The Havre market closed quiet.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Cotton is dull and spots unchanged. Futures have declined 4 to 9 points. A turn in the market believed to depend solely on future change in the crop.

From Savannah, Ga.: The cotton market has no leading features and is generally at a standstill with light receipts.

From Baltimore, Md.: Cotton is firmly held, and prices remain steady.

From Memphis, Tenn.: The cotton market is quiet and steady. The stock on hand is 23,000 bales.

From Cincinnati, Ohio: Cotton is in moderate local demand and stocks are light, and prices well sustained.

From St. Louis, Mo.: Cotton dull, and sales this week have been very small; sales for the year thus far are nearly 50,000 bales ahead of last.

From Providence, R. I.: The cotton market is quiet, and sales are light. Middling uplands are quoted at 11c. and middling gulfs at 11¼c., at which prices they are firmly held. The stock on hand is moderate and being reduced.

From Louisville, Ky.: Quiet and steady.

From Philadelphia, Pa.: Transactions limited to spinners' urgent wants. Prices ⅛c. lower for the week, and market dull at the close.

COTTON CROP REPORTS.

[By Telegraph to BRADSTREET'S.]

From Norfolk, Va.: The weather is very warm but favorable for the growing crop.

From Wilmington, N. C.: The cotton crop has a good stand. The market is quiet and receipts exceed the average.

From Galveston, Tex.: The weather during the past week continues hot and the prospects for a good cotton crop are increasing.

From Waco, Tex.: The recent rains have greatly benefited the cotton and the present outlook is favorable for a fair to good crop.

From Dallas, Tex.: The weather for the past week has been exceptionally fine and warm and favoring the harvesting of grain crops and the growth of cotton.

WOOL.

The situation and outlook have not materially changed during the past week. Consumers have been operating with caution in all markets, and there has been little or no tendency to speculation. Seaboard stocks are increasing, but the accumulation is not so rapid as last year, as dealers generally are purchasing with greater caution in the country markets. As regards values, the position favors buyers and the general feeling continues weak. Occasional concessions have been made to increase sales, but the market, as a rule, is not quotably lower. There is a good deal of uncertainty as to the future of the market, and all classes of operators are disposed to move cautiously pending the developments of the next thirty days, as during that period the new tariff on wool and its manufactures will have gone into effect, and a great part of the new clip will have been concentrated in the seaboard markets. Manufacturers, with very few exceptions, are carrying small stocks and are buying sparingly in the belief that lower prices will prevail later in the season. The decline in wool from the highest point has probably been sufficient to offset the reduction in the rate of duty on foreign wools; but the unknown factor in the future of the market for the staple is the extent to which the existing depression in woolen goods may be increased by the change in the tariff on yarns and fabrics. Confidence will not be restored to the trade until this matter has been practically determined.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The wool market remains without improvement. The sales this week amount to 1,200,000 pounds of all kinds, and included Ohio and Pennsylvania fleeces at 37@38c. for X, 38@40c. for XX, and choice selections higher. Some New York and Michigan fleeces have been sold at 35c., and a fair quotation for Michigan is 35@37c. per pound. Combing and delaine fleeces are quiet, with sales of fine delaine and combing at 39@45c. per pound. A lot of 6,000 pounds fine unwashed delaine at 32c., and Kentucky combing is nominally 27@28c. per pound. There is a fair stock of unwashed wools offering, including new Texas, and the demand is light. The sales have been in the range of 25@29c. for Texas and 23@29c. for fine and medium western and territory. A lot of 13,000 pounds Georgia sold at 27c. The sales of pulled wool have been moderate, but prices range about the same. The sales of choice Maine and eastern supers have been at 42@43c., and common and good supers from 25@40c. per pound. In foreign the principal sale was 60,000 pounds Cape at 30c. per pound and upward. Carpet wools continue very dull.

From Philadelphia, Pa.: A larger business has been done in Texas clips, and one or two round lots of quarter unwashed have been sold at 1@2c. decline, but general trade has been dull at old prices, with the feeling weak and outlook unsatisfactory.

From Cincinnati, Ohio: The wool market is dull and unsatisfactory. Dealers in this state claim that the clip this year is the largest ever known here.

From Chicago, Ill.: Wool continues dull.

From Louisville, Ky.: Receipts of wool are moderate and inquiry fair.

From Savannah, Ga.: There is no improvement in the wool market. Receipts continue light.

From Waco, Tex.: Wool-growers are, with a very few exceptions, holding their wool for better prices, and express themselves as confident of a reaction in their favor.

IRON.

There is a better tone to the trade in American pig iron, but prices continue unchanged and transactions are not materially larger. Still there is a little more anxiety displayed by buyers to secure favorable terms and to contract for supplies, which gives confidence to holders. At a number of western iron markets this feature is more clearly developed, as may be noted by referring to the special dispatches given below. Prices are held a little more stiffly on No. 1 than on inferior grades. In fact on some brands of No. 1 iron $23 is asked and obtained. Scotch pig arrivals have been light during the week, not aggregating over 800 or 900 tons. This had been placed prior to arrival. The port is practically bare of stocks of Scotch. The sales were not in excess of the arrivals. Prices of Scotch are unchanged here, but weaker on the better and stronger on the inferior brands abroad. Bar iron is very dull at prices as last given. There are no new features respecting steel rails or scrap iron.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

From London: Pig iron, if anything, is dearer. Cleveland shipments are large. There is no recovery in steel rails. Plates are not selling well.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: There is a better feeling in the crude iron market. Sellers are declining to contract for future deliveries of No. 1 foundry at present prices. No. 2 is weak, but forge is gaining strength, though the supply is still ample. Merchant bar is weak and declining. Plate and structural iron moves freely at recent concessions. Steel rails are weak and business for winter delivery is expected under $38. Old material and scrap dull and declining.

From Pittsburgh, Pa.: Pig iron appears to be again at a standstill and little improvement is looked for before August 1st. Furnace owners say they cannot meet present prices without a loss on manufactured iron. The situation has not materially changed. The mills are running mostly on back orders. Manufacturers do not regard the outlook as very encouraging. The nail trade continues good, though a shut down of thirty days, commencing next month, is contemplated.

From Cleveland, Ohio: The iron trade situation presents no new feature of a favorable character, demand, prices and the general condition being same as throughout the month.

From Cincinnati, Ohio: Iron is in an unsatisfactory condition. The demand is exceedingly moderate. Furnaces manifest a disposition to meet any reasonable quotation for present delivery, but will not make future contracts at such prices. Business is quiet. Manufactured iron partakes somewhat of the feeling of pig, but there is a fair demand for it.

From Detroit, Mich.: The iron market is stagnant. Prices are low and business is done without profit.

From Chicago, Ill.: Hardware is quiet with fair orders for staple lines. Bar and angle iron and nails are meeting an average demand. Prices are steady and stocks fair. Pig iron is unchanged, with average sales in job lots. The impression exists that demand and consumption will improve as summer progresses, as works are without stock and must buy a supply to meet current wants. Steel rails are in fair demand at about the cost of production.

From St. Louis, Mo.: Demand lighter for manufactured iron with firm rates and small stocks. Pig iron is in improved request and values are stronger though quotations are unchanged.

From Savannah, Ga.: The demand for iron is backward, but in hardware a good business has been done in filling contractors' orders. There is a steady demand for nails.

COAL.

The anthracite trade continues about as reported last week. The movement is moderate, but healthful. It is more active at the west than in the east, and the lake movement to Milwaukee and Chicago from Buffalo is already large and promises to show continued gains. The stocks at tidewater being in the neighborhood of 600,000 tons only June 1 speak well for the absorptive capacity of the country, when it is recalled that the excess production over the first half of 1882 has been nearly 1,500,000 tons, and that trade has been considered dull for two months past. The coming week will witness but half time at the mines. The July prices are still being discussed on the basis of a 10c. to 25c. advance, according to size. Bituminous coal is dull and unchanged.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I. The coal market is very dull, and sales are reported small. Prices are low and the margin of profits is small. The stock on hand is light.

From Buffalo, N. Y.: Coal is active and the trade in a healthy condition—stocks are somewhat lower than last week. Prices are firm notwithstanding late rumors to the contrary which investigation proves are unfounded. Shipments to date are 355,543 tons, as compared with 313,810 in 1882 and 184,267 in 1881. Rates to Chicago and Milwaukee are 75c.

From Cincinnati, Ohio: Coal is in fair demand, but notwithstanding the good shipping stage of the river stocks in hands of jobbers is lighter than last year. Dealers are well supplied; however, a tendency to cut prices has slightly demoralized the market.

PETROLEUM.

The speculative market during the past week sustained a severe pressure in the early portion in the form of reports of a surprisingly large, steady flow of oil from Grandin well, No. 9, which was by its backers claimed to be a stayer. The truth of this allegation opened up the probability of at least a two-mile stretch of new oil territory, with all the hideous nightmares of Cherry Grove gushers attendant thereon. The market, therefore, fell away on Monday and Tuesday, in part, also, from the statement that an embarrassed Pennsylvania iron firm were heavy holders of oil. By Wednesday the Grandin well was reported to be doing ten barrels per hour only, and the courage of the bull party rapidly revived. The market once more advanced under offers to buy. The short interest which had been created during the two days of bear prosperity was likewise responsible for a part of the advance, for when the bears saw which way the market was shaping they naturally had to do considerable buying to cover. The talk of the exchanges is still strongly on the basis of the mysterious bull syndicate, which is credited with all the advances made in prices, and the suppositious bear attitude of the Standard Oil Company. The "big boom in oil," which was so extensively advertised in the daily papers last Monday, which was to witness oil go to $1.50 per barrel, through the manipulations of a blind pool with $15,000,000, engineered by a prominent Pittsburgh bank president, had about the weight throughout the trade, of the paper on which it was printed. It would be a pretty sight, however audacious the attempt to witness a $15,000,000 pool encounter the Standard Oil Company by buying and carrying some 27,000,000 barrels of oil now in the Standard's tanks, and to whom carrying charges would have to be paid. These charges on 27,000,000 barrels are nominally about $14,000 a day, and in the event of such a struggle as that referred to they would probably go much higher.

The speculative petroleum market on Friday in the earlier portion of the day was fairly steady. It opened at $1.18½ and closed at noon, after fluctuating within narrow limits, at $1.17⅝, at which figure the afternoon session opened. Shortly after some weakness was shown under free offerings. There was no special news received from the regions. At the close the price bid was $1.16⅝, against $1.19½ last week Friday evening, a decline of 2⅞c. on the week.

The following shows the fluctuations in pipe-line certificates of crude during the week ended last evening:

	Opening.	Highest.	Lowest.	Closing.
Saturday	1.18½	1.19¼	1.17¼	1.19¼
Monday	1.19¼	1.19¾	1 16½	1 16⅞
Tuesday	1.16⅞	1.17¾	1.13⅜	1.14⅛
Wednesday	1.14	1.16½	1 13⅜	1.15¼
Thursday	1.16⅛	1.19⅜	1.16⅛	1.18¼
Friday	1.18½	1.18½	1.16	1.16⅝

Refined has continued dull and in light request in view of the uncertain position of crude during the week. Prices have been unchanged. Case oil and naphtha have been fractionally reduced, as shown below.

The quotations for certificates of crude petroleum and of petroleum products last evening, as against those at the close of the three preceding weeks, are as follows:

	June 1.	June 7.	June 15.	June 22.
Certificates, crude	1.19¾	1.15¾	1.19½	1.16⅝
Refined, 110°	8	7¾	7¾	7¾
Refined, 70°	8⅛	7⅞	7⅞	7⅞
Crude, in barrels	7⅜@8	7¼@7⅞	7¼@7⅞	7@7¾
Case, plain	9½	9½	9½	9½
Naphtha	5¾	5¾	5¾	5¾

The stock of petroleum at the seven principal continental ports, afloat, and loading in the United States therefor amounted June 1 to 1,861,050 barrels, against 1,504,720 barrels June 1, 1882. At London the total was 446,640 barrels, against 328,847 June 1, 1882. And in both cases the receipts since January 1 last have exceeded the deliveries at the ports indicated.

The total quantity of petroleum (crude equivalent) exported from the United States from January 1 to June 16 was 281,580,615 gallons, against 280,502,646 gallons in a like period of 1882, an increased exportation of 1,077,696 gallons. For the week ending June 16, the foreign shipments were 15,013,286 gallons, against 16,429,676 gallons in the previous week. New York city's export of petroleum from January 1 to June 16 amounted to 235,905,242 gallons, against 227,581,808 gallons in a like period in 1882, an increase of 8,523,434 gallons this year.

OCEAN FREIGHTS.

There have been lighter offerings of tonnage during the past week, on account of which rather higher rates have prevailed. Provisions, dairy products and grain, to a certain extent, have been shipped abroad during the past few days more freely than for some time previously, and the attendant call for room per steamer has advanced rates in that line. Some 35,000 tierces of lard have been exported from Chicago, mostly for Liverpool. The uncertain market for refined has prevented a free movement of that commodity, but prior engagements have been filled, mostly for the Baltic ports, at rates varying according to the size of cargo from 3s. 9d. to 4s. The break in the grain and provisions markets, while not inducing active purchases on the part of foreigners, has stimulated the ocean freight markets a trifle, and both rates yesterday were firmer.

OTHER OCEAN FREIGHTS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Grain freights have continued dull. The supply of tonnage is light but ample for requirements. Rates barely steady. Petroleum tonnage is rather scarce and hence very steady, but chartering demand is not active.

From Baltimore, Md.: In the freights market the demand for steamers to load grain during the summer continues fair, but rates are unchanged.

From Wilmington, N. C.: Freights, foreign are firm; coastwise are steady.

From Savannah, Ga.: Ocean freights have ruled quiet and tonnage is sufficient for demands. Cotton freights are quiet; by steam to Liverpool, 5/16d.; to Havre, ⅝c. Grain, to Liverpool, steam, 5d.; to Havre, 6d. Oil cake, steam, to Liverpool, 21s. per per ton.

ATLANTIC COAST FISHERIES.

[By Telegraph to BRADSTREET'S]

From Portland, Me.: This industry is active.

From Boston, Mass.: Mackerel are arriving more freely this week, and the prospect of the catch is more promising. Supplies of mackerel are coming forward from the Provinces much more freely than last year. Prices are easing off. Codfish and other kinds of fish are not selling to any extent.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Lumber is active.

From Buffalo, N. Y.: Lumber is fairly active, particularly in the building trades, but presents few features of interest. Dealers hold different views regarding the outlook.

From Wilmington, N. C.: Timber receipts are good and sales are prominent. Lumber is steady and shingles are firm.

From Cleveland, Ohio: The lumber trade is very good and there is a steady demand for building materials of all kinds.

From Chicago, Ill.: Lumber is more active.

From Minneapolis, Minn.: The lumber market rules steady and fairly active. The rise in the upper rivers is bringing out the logs, and the supply is ample to keep all the mills running through the season. The daily cut is about 1,500,000 feet.

NORTH CAROLINA RICE.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: The rice crop stand is good and the market here is firm.

NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Spirits of turpentine is easy at an advance. Rosins are low and dull; medium and high are firm. Tar and crude turpentine are steady.

From Savannah, Ga.: Naval stores have ruled quiet and dull. Manufacturers are less active, most of their contracts having been filled.

SPECIAL LOUISIANA TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Sugar continues in fair request and is steady. Rice is steady at previous prices. Crude cottonseed oil 33c.; oil cake 23½c.; cotton seed, 12c.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Whisky is dull and heavy with more sellers than buyers.

From Cincinnati, Ohio: Whisky is unchanged with possibly an improved demand for straight goods.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Tobacco market is firm and well supplied. The demand is apparently for all grades, and transactions in each have been liberal.

From Louisville, Ky.: Leaf tobacco is stronger on all grades. Receipts fair.

From St. Louis, Mo.: Leaf tobacco is dull and offerings are of low quality. Tobacco acreage in Missouri this year will be considerably smaller than usual. Plants are plenty, but heavy rains have prevented planting for nearly two weeks.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The boot and shoe trade is fully as good as last week, and the market is in a satisfactory condition. Orders continue to come in by mail, and the jobbers are still contracting, so that manufacturers are kept well employed and have enough work on hand for several weeks to come. Shipments are increasing and running larger than last year. This week's foot up 45,000 cases, and total shipments since 1st of January are 83,700 cases more than for the same time a year ago. Prices rule steady.

From Chicago, Ill.: The boot and shoe trade is noticeably dull.

From Rochester, N. Y.: Judging from the orders received by the shoe manufacturers and reports from their agents the outlook for the fall trade is not so good as last year, and trade will be fully twenty per cent. less than in the corresponding season a year ago.

From Savannah, Ga.: Boots and shoes have ruled quiet with jobbers and the retail trade generally has fallen off.

HIDES AND LEATHER.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Hides steady and active; leather sluggish. Tanners complain of high prices of hides and slow movement of stocks.

From Buffalo, N. Y.: There has been a better inquiry for good hemlock sole, but the general condition of the trade is flat and unsatisfactory.

From Boston, Mass.: Sole leather has been selling a little more freely, and upper is doing better, but both continue at lower prices. Hides are steady, but no sales.

TRADE EMBARRASSMENTS.

The past week has been an eventful one for failures, particularly in Chicago, where eleven firms in grain and provisions suspended on account of the collapse of the lard corner and the failure of McGeoch, Everingham & Co., the most important being M. S. Nichols & Co., Peck & Bausher, Ellis & Lightner and George Stewart & Co. Several have since made arrangements to resume. Besides the speculative failures in Chicago, the important suspensions elsewhere were the Union & Bay State Manufacturing Company, straw goods, New York; W. T. Cook & Co., straw goods, Foxboro', Mass; The Palmetto Lumber Company, Georgetown, S. C., in which Peck & Barnard, lumber, Williamsport, Pa., and Lloyd & King, lumber, Philadelphia, are involved; The Williamson-Stewart Paper Company, St. Louis; Prescott Brothers & Co., wholesale hardware, Fort Wayne, Ind. There were 178 failures reported to BRADSTREET'S during the past week, 13 more than the preceding week, 41 more than the corresponding week last year, and 93 more than the same week of 1881. Compared with the preceding week the middle states had 38, a decrease of 1; New England states 20, a decrease of 11; southern states 31, an increase of 3; western states 61, an increase of 15; Pacific states and territories 28, an increase of 7; Canada and the Provinces 28, an increase of 5. In the principal trades they were as follows: General traders 29; grocers 22; manufacturers 17; grain, provisions, etc., 14; drugs 8; hardware 7; liquors 6; clothing 6; dry goods 5; shoes 5; millinery 4; tobacco and cigars 4; lumber 4; hotels and restaurants 4; coal 3; jewelry 3; gents' furnishing goods 3; stationery 2; confectioners 2; butchers 2.

ALABAMA.

PRATT.—Gilmer & Zachry, general store, are reported to have failed.

ARKANSAS.

CENTER POINT.—Thomas J. Nesbitt, general store, is reported to have failed.

HOPE.—Bateman & Davis, grocers, have failed and gone out of business. Liabilities about $2,000.

CALIFORNIA.

CENTREVILLE.—A. Tiscornia, general store, has given a conditional bill of sale.

GRANITEVILLE.—Gustave Rohrig, saloon, has been attached.

HOWLAND FLAT.—H. C. Stout, general store, is reported financially embarrassed.

MAXWELL.—A. Jacobs, general store, who was recently burnt out, owes about $900.

OAKLAND.—J. B. Mirandi, cigars, has been attached.

OAKLAND.—J. F. Reinhart & Co., crockery, have been attached.

OAKLAND.—Scoville & Co., iron works, have been attached and assigned.

RED BLUFF.—J. W. O'Brien, hardware, has assigned. He sold out last April.

SAN FRANCISCO.—James Buchan, shoes, has been attached.

SAN FRANCISCO.—S. B. Chalomer, hotel, is advertised to be sold out by the sheriff.

SAN FRANCISCO.—Eugene Daclin, blacksmith, has been attached.

SAN FRANCISCO.—A. H. Lissak, of White & Lissak, commission, has been attached.

SAN FRANCISCO.—S. Turpin & Co., fruits, are advertised to be sold out by the sheriff.

WESTPORT.—J. T. Tuttle, hotel, has been attached.

COLORADO.

BOULDER.—W. P. Hollingsworth, drugs, has been attached for $257.

BRIGHTON.—George Lahr, saloon, has been attached for $350, and sold out.

DENVER.—Tavis & Menschke, saloon, have been attached.

PINE GROVE.—Forgey & McCoy have been closed by attachment.

CONNECTICUT.

BRIDGEPORT.—John H. Wright, machinist, has assigned.

HARTFORD.—W. F. Rockwell & Son, wholesale beef and butter, have assigned.

MIDDLETOWN.—Nathan Harris, clothing, has assigned.

DAKOTA.

GRAND FORKS.—Douglass & Alexander, musical instruments, have assigned.

OJATA.—J. W. B. Hunter, agricultural implements, has assigned.

WATERTOWN.—H. A. Hagan, general store, has assigned to B. F. Budd. Liabilities $2,500. His exemptions of $1,500 and a chattel mortgage of $300 cover all the assets.

GEORGIA.

COLUMBUS.—S. J. Wynne, general store, has failed.

IDAHO.

LEWISTON.—F. I. Tedford & Co., general store, are reported to have been attached. Liabilities $30,000; assets $20,000. They are involved in a partnership quarrel.

ILLINOIS.

CHICAGO.—J. S. Abrahamson, paper boxes, has assigned.

CHICAGO.—J. M. Ball, trading as J. M. Ball & Co., commission groceries and provisions, suspended on the 16th inst., through the failure of McGeoch, Everingham & Co. His liabilities are placed at about $60,000.

CHICAGO.—M. B. Crafts, trading as M. B. Crafts & Co. grain commission, suspended on the 16th inst., the result of the failure of McGeoch, Everingham & Co. His losses are reported at about $30,000.

CHICAGO.—Samuel Dalley, provision broker, suspended on the 20th inst., the result of the fall in prices and inability to respond to calls for margins.

CHICAGO.—Cosman Eisendrath, grocer, has assigned.

CHICAGO.—Ellis & Lightner, grain commission, suspended on the 16th inst., through the failure of McGeoch, Everingham & Co. It is said they held 22,000 tierces of lard for the latter's account. The liabilities are placed at about $120,000.

CHICAGO.—H. R. Green, Jr., commission grain and provisions, has suspended.

CHICAGO.—Holley & Allen, grain commission, suspended on the 16th inst., on account of the failure of McGeoch, Everingham & Co. Their losses are placed at about $50,000. They were caught in the drop in lard.

CHICAGO.—Lynch Brothers, hats, have been closed by the sheriff.

CHICAGO.—McGeoch, Everingham & Co., grain and provisions, suspended on the 16th inst., the result of the failure of the lard corner which Peter McGeoch was manipulating. The firm were loaded heavily with lard, which they had been bulling for months past. The gradual decline in prices during the previous few days necessitated the locking up of a large amount of money in margins; the firm responded to the calls for margins as long as they could stand it, and being unable to obtain more money from friends and parties supposed to be interested in the deal with them, they had to close out. This broke the market, precipitating a panic which carried under seven other firms in the same day, who either acted as brokers or were interested with McGeoch, Everingham & Co., and later in the week three more firms had to suspend from the same cause. All the trades with the firm were closed out, but the amount of the unsettled liabilities has not yet been ascertained. The total amount of trades on the firm's books is placed at over $10,000,000. John R. Bensley has been appointed receiver.

CHICAGO.—William Martin & Co., commission grain and provisions, suspended on the 16th inst. on account of the failure of McGeoch, Everingham & Co.

CHICAGO.—Melville S. Nichols, trading as M. S. Nichols & Co., commission grain and provisions, suspended on the 19th inst. on account of losses sustained by the failure of McGeoch, Everingham & Co., variously estimated at from $50,000 to $100,000. Calls were made upon the firm for margins, and it claimed to have put up $250,000, when additional margins for an equal amount were called, to which it refused to respond. The firm closed out their deals on the 19th inst., and as soon as the trades were settled, announced its suspension. Mr. Nichols did a very large commission business, being the Chicago correspondent for R. H. Parks & Co., of New York, and a partner in the latter firm up to March 1, when he withdrew. At a meeting of the creditors on the 21st inst. arrangements were made for a settlement in full, the firm to resume at once. It is said their statement showed an actual surplus of $50,000.

CHICAGO.—Peck & Bausher, lard and lard oil, assigned on the 19th inst. to R. Wesley Faulkner. The firm say the assignment was thought advisable on account of the recent decrease in the price of lard, which affected them heavily, and was made to protect the creditors. The liabilities are reported at about $100,000. They began as a firm September 1, 1878, succeeding Bickford & Bausher. Their specialties were lardine and oleomargarine, which they manufactured. About five weeks ago they claimed to be worth $150,000 to $200,000.

CHICAGO.—George Stewart & Co., provision brokers, suspended on the 20th inst. It is said they suffered a loss of about $35,000 upon nearly 10,000 tierces of lard which they had sold McGeoch, Everingham & Co., but which the latter were not able to take. On the 21st inst. they decided to resume, paying in full.

CHICAGO.—Tabor & Wilson, commission groceries and provisions, suspended on the 16th inst., on account of the failure of McGeoch, Everingham & Co., paid up all differences, and resumed on the 18th inst. They brought an attachment suit for $50,000 against McGeoch, Everingham & Co.

PEORIA.—M. J. Moffit, drugs, has been closed on a chattel mortgage.

PEORIA.—E. Tobias & Co., coal, who recently failed, owe $12,700; no assets. They sold out everything to a creditor.

SYCAMORE.—David Purvin, clothing, has been closed by the sheriff.

INDIANA.

ALBION.—Henry R. Shirk, carriage manufacturer, has assigned.

DELPHI.—B. Jenkins & Co., millers, have failed. Liabilities $50,000.

ELKHART.—Krienke & Crouse, clothing, gave a chattel mortgage for $3,300 and assigned.

FORT WAYNE.—Prescott Brothers & Co., wholesale hardware, gave a chattel mortgage for $50,000 and assigned on the 18th to George H. Wilson. Liabilities $100,000; assets about the same. They began in 1874 with $20,000 capital. Their business of late has been considered as too extended.

FRANKLIN.—Oscar F. Jones, dry goods, has assigned.

INDIANAPOLIS.—Baumhardt & Effinger, laundry, have ailed, and turned over the business to mortgagee.

INDIANAPOLIS.—Application has been made by eastern creditors for a receiver for J. W. Hess & Co., dry goods.

INDIANAPOLIS.—Ignatz Roth, dry goods, has assigned. Assets about $500.

ROCKVILLE.—Fisher Brothers, grocers, have failed.

IOWA.

COUNCIL BLUFFS.—H. Pethybridge, market, has, it is said, mortgaged stock for all it is worth.

FARRAGUT.—J. L. McGraw has mortgaged his stock.

KIRKMAN.—J. N. Stewart, hardware, has given a bill of sale.

TAMA CITY.—Mrs. J. C. Barrett, millinery, has assigned. Liabilities $3,000; assets $2,000.

KANSAS.

WILSON.—Barton & Carbiener, hardware, have had a mortgage foreclosed.

KENTUCKY.

CLAY.—C. N. Blackburn, general store, has become financially embarrassed and thinks he can secure 50 cents. Liabilities $1,200.

EDDYVILLE.—A. Hunter & Son, dry goods and saddlery, have assigned.

PARIS.—William Davis & Co., wholesale liquors, have been closed by the sheriff. They recently lost, it is said, about $40,000, which they paid out on whisky they were carrying.

LOUISIANA.

NEW ORLEANS.—P. Casanbeilh, shoes, offers 35 cents. Liabilities $3,300; assets $3,000.

NEW ORLEANS.—Henry Krueger, cigar manufacturer, has assigned. Liabilities $947; assets $226.

NEW ORLEANS.—G. T. Lathrop, stationer, has asked a respite. Liabilities $12,170; assets $34,000. Collections were very slow and he was sued by a New York firm for $1,050.

PORT HUDSON.—H. Skipwith, Jr., general store, who recently failed, owes about $8,000; assets about $5,000.

MAINE.

BANGOR.—Adams Brothers, shoes, who recently failed, have settled at 45 cents and continue.

BUCKFIELD.—G. A. Gordon & Co., drugs etc., have failed.

PORTLAND.—George Cower, of Babb & Cower, table manufacturers, has gone into insolvency.

ROCKLAND.—E. Sullivan & Co., grocers, have settled at 15 cents. Liabilities $1,700; assets $250.

MARYLAND.

BALTIMORE.—J. H. Heagy, groceries and provisions, has failed and gone out of business.

BALTIMORE.—George N. Mackenzie, Jr., saddlery hardware, offers 25 cents, in three, six and nine months, without security, which has been accepted by most of his creditors. Actual liabilities $20,000; contingent $11,000; actual aesets $6,000.

MASSACHUSETTS.

ASHLAND.—Henry Lock, baker, has failed.

BOSTON.—The liabilities of Allison & Seaverns, curriers, are: Direct $7,923; indirect $10,307; nominal assets $1,668.

BOSTON.—At a meeting of the creditors of B. F. Cobb & Co., lumber, the statement showed liabilities $27,758; nominal assets $22,612. They offered 50 cents in unindorsed notes at three, five and seven months, but the offer was not accepted, the creditors wanting cash or security. The firm have dissolved and B. F. Cobb succeeds.

BOSTON.—Samuel K. Elliott, agent of the Creedmoor Electric Belt & Cap Company, has failed and will settle in insolvency. Liabilities $1,720; no assets.

BOSTON.—The liabilities of the Gay Machine and Tool Company, which has gone into insolvency, are about $8,600, of which $1,200 is secured; unencumbered assets small.

BOSTON.—Rodney J. Hardy, trading as Rodney J. Hardy & Co., wholesale grain and wool, failed on the 21st inst.

FALL RIVER.—Thomas Murray, fancy goods, is reported to have been attached.

FOXBORO'.—W. T. Cook & Co., manufacturers of straw goods, failed on the 20th inst. The failure was a surprise to the trade, the cause being attributed to poor spring trade. They owe Boston banks largely. Mr. Cook is the president of the

Union & Bay State Manufacturing Company, whose store is in New York, and manufactured the goods for the company. The firm's liabilities are placed at about $200,000.

LEOMINSTER.—E. M. Rockwell, woolen manufacturer, offers 65 cents.

LOWELL.—L. W. Godin, shoes, has failed. Liabilities about $10,000; nominal assets $7,000.

LOWELL.—The liabilities of James H. Stackpole, fruits, are about $1,600, of which $500 is secured. No unincumbered assets.

NEW BEDFORD.—W. H. H. Allen, grocer, offers 25 cents. Liabilities about $7,500; assets $600.

NEW BEDFORD.—H. E. Langis, drugs, has left town and been sold out by the mortgagee.

NEW BEDFORD.—J. F. McKinney, gents' furnishing goods, has failed and been attached.

NORTH ATTLEBORO.—L. F. Merrill & Co., harness, have assigned, and offer 30 cents.

TAUNTON.—W. H. Flagg, millinery, has been attached.

WAKEFIELD.—W. A. Barrett, grocer, is in insolvency.

WALTHAM.—W. A. Hunnewell, coal, owes $32,000; nominal assets $13,000. He offers 40 cents. The failure was caused by endorsing. It is claimed the firm of W. A. Hunnewell & Co., of East Cambridge, is solvent, and owes $15,700.

WORCESTER.—J. E. Browning, millinery, has been attached.

MICHIGAN.

DETROIT.—Spannberg & Rooks, rags, have assigned to D. W. Simons.

JONESVILLE.—L. S. White & Co., woolen manufacturers, have assigned. They were attached in New York for $1,032 by E. M. Moers.

OTSEGO.—J. R. Cloud, hardware, has assigned.

MINNESOTA.

MINNEAPOLIS.—F. W. Bullard, bag manufacturer, has assigned.

ST. VINCENT.—William O'Keefe & Co., general store, have assigned. Liabilities $40,000; assets $20,000.

MISSOURI.

COLUMBIA.—A. D. Wereeman, grocer, is in the hands of a receiver.

HANNIBAL.—The Hannibal Printing Company has assigned.

MOBERLY.—P. Brady, saloon, has been closed by creditors.

MOBERLY.—Michael Horn, grocer, etc., has been closed by creditors.

ST. LOUIS.—S. C. Cabanne, wholesale cigars, has been attached.

ST. LOUIS.—Milburn & Mack, cigars, have assigned, and confessed judgment for $650. Assets $2,000.

ST. LOUIS.—The Williamson & Stewart Paper Company assigned on the 20th inst. to J. P. Whyte. Liabilities $219,500; assets $152,000, subject to a trust deed for $90,000. The company was incorporated August 14, 1876, and had a paid in capi, tal of only $25,000. The surplus was absorbed by bad debts and a threat for the appointment of a receiver, it is said, precipitated the failure.

MONTANA.

DILLON.—Sweet & Baldwin, general store, have failed. Liabilities $45,000; nominal assets $51,000, of which $30,000 is stock and $21,000 accounts.

NEBRASKA.

PLAIN VIEW.—Henry Poggensee, general store, has mortgaged stock and is said to have declined payment of accounts.

SALTILLO.—William Davis, grocer, is reported to have left town.

NEVADA.

EUREKA.—William E. Davidson, books and stationery, has given a conditional bill of sale.

RENO.—G. E. Perkins, general store, has been attached and called a meeting of creditors.

NEW HAMPSHIRE.

ROCHESTER.—The liabilities of A. M. Cousins, grocer, are about $1,500; nominal assets $800.

NEW JERSEY.

NEWARK.—James E. Martinhoff, restaurant, has been sold out under a chattel mortgage.

PATERSON.—The creditors of R. & H. Adams, manufacturer of buckram, nettings, etc., have accepted a compromise at 55 cents, payable 10 cents yearly for four years and 15 cents in the fifth year, in firm notes.

PATERSON.—The Crescent Silk Manufacturing Company has been placed in the hands of a receiver, T. Frank Hoxsey. The liabilities are reported at $17,500; nominal assets $22,500.

TRENTON.—The City Pottery Company has been placed in the hands of a receiver. The total liabilities are about $80,000, of which $53,000 is secured by mortgage on real estate and machinery.

NEW MEXICO.

DEMING.—George P. Armstrong, general store, assigned on the 19th inst. to F. W. Craig. Liabilities $28,000.

NEW YORK.

BROOKLYN.—Jacob Smith, clothing, has assigned to Morris Levy.

BUFFALO.—William H. Carney, gents' furnishing goods, has assigned.

BUFFALO.—The schedules of H. T. Gillett & Son, wholesale liquors, show liabilities, excluding mortgages and including accommodation notes, $106,871; assets $31,679, of which $21,954 is equity in real estate. The preferences are $19,860.

ELMIRA.—John W. Collins, harness, has assigned to James Clatworthy, giving preferences for about $2,000.

GREENBUSH.—Theodore H. Press, upholsterer, has assigned to John P. Munger.

JAMESTOWN.—A. Hazeltine, dry goods, has assigned.

JOHNSONVILLE.—C. C. Akin, grocer, has assigned to Frederick H. Akin, giving preferences for $1,443.

LYONS.—The liabilities of Lydia Stern, clothing, are $5,462; actual assets $?,152.

NEW YORK CITY.—Sophie L. Auersbach, manufacturer of neckwear, assigned on the 20th inst. to Philip Nast, giving preferences for $1,758.

NEW YORK CITY.—The schedules of Thaddeus Davids & Co., ink, show liabilities $172,784; nominal assets $195,363; actual assets $74,150.

NEW YORK CITY.—Froehlich & Landsberg, jewelry, assigned on the 20th inst. to Herman Schwartz, giving a preference to David Froehlich for $1,000.

NEW YORK CITY.—Augustus P. Green, riding school, assigned on the 19th inst. to Edward P. Green, giving the latter a preference for services and $500 to Peter Carroll for borrowed money.

NEW YORK CITY.—The schedules of Valentine Hoerschelman, butchers' fixtures, show liabilities $6,094; nominal assets $4,461; actual assets $2,051.

NEW YORK CITY.—Isaac S. Lawrence, wholesale jewelry, assigned on the 18th inst. to Charles S. Benham, giving a preference to Adeline T. Pell $2,500. Liabilities about $12,000.

NEW YORK CITY.—The schedules of Max Lilienthal, tobacco, show liabilities $28,988; nominal assets $36,952; actual assets $10,690.

NEW YORK CITY.—The schedules of Walter K. Lits, druggist, show liabilities $4,500; nominal assets $4,362; actual assets $3,000.

NEW YORK CITY.—Lucas & Merritt, agents coal, have failed. They gave a bill of sale of their effects for $15,000 to Joseph K. Wells and J. D. Kurtz Cook, two of their largest creditors. The liabilities are placed at about $30,000.

NEW YORK CITY.—Joseph Nicholas, straw goods, assigned on the 19th inst. to Frederick Nichols, giving preferences to Hiram F. Beebe $2,886; L. R. Hoyt $1,861; John P. Stoecker $163; Belding Brothers & Co. $3,940; George E. Tilge & Co. $2,827; Frank W. Stephenson $250; Charles M. Evarts $3,606; total $15,533.

NEW YORK CITY.—R. H. Parks & Co., stock and grain brokers, suspended on the 19th inst. at the New York Stock Exchange, but paid up their differences on the 20th, and were reinstated. They were the New York correspondents of M. S. Nichols & Co., of Chicago, and when the failure of the latter was announced they suspended temporarily, to see how they stood. Their drafts for about $45,000 were dishonored by M. S. Nichols & Co., while the latter had subsequently drawn $20,000 cash from R. H. Parks & Co. It is said they had been trying to obtain a statement of their accounts with M. S. Nichols & Co. for some time past, but were unable to. Mr. Nichols was a partner with R. H. Parks & Co., but withdrew March 1, when the partnership expired by limitation.

NEW YORK CITY.—The schedules of Dora Taylor, fancy goods, show liabilities $6,451; nominal assets $4,092; actual assets $2,600.

NEW YORK CITY.—The schedules of Thomas Tobey & Co., stationers, show liabilities $4,713; actual assets $1,843.

NEW YORK CITY.—The schedules of Enrique Trujillo, shipping and commission merchant, show liabilities $36,896; nominal assets $18,397; actual assets $13,622.

NEW YORK CITY.—The Union & Bay State Manufacturing Company, straw goods, has suspended. It is said the liabilities will not exceed $500,000, and the nominal assets are much larger. In the last annual report the assets were valued at $743,833, composed of real estate $184,136; machinery $98,000; material $297,325; cash and debts $140,482; patent rights $20,000; miscellaneous $3,889. The liabilities were then $439,794, exclusive of capital stock. Four-fifths of the liabilities are in Massachusetts, principally to banks in Boston. At a meeting of the Boston bank presidents who hold the company's paper, on the 20th inst., a committee was appointed to look into matters and report on the 27th inst. The company was incorporated September 12, 1876, being a consolidation of the business of Oliver Carpenter & Co. and A. Alden & Co. The original capital stock of $500,000 was scaled down to $300,000 about a year ago to represent the real value of the assets. There has been no money in the business for some time past, and this is ascribed as one of the principal causes of the suspension.

NEW YORK CITY.—At a meeting of creditors of Wistar & Gee, grocers, they showed liabilities $2,400; actual assets $2,500. They offered 60 cents cash, but some of the creditors wanted 75 cents.

ROCHESTER.—Miss Ann McGlue, millinery, has assigned to Daniel Sullivan, giving preferences for $1,171.

TICONDEROGA.—J. B. Wicker, grocer, has assigned. Liabilities about $11,000; assets $3,500; preferences $3,900.

UTICA.—Perry Brothers & Hawley, wholesale and retail clothing, confessed judgment to the First National Bank for $28,685, upon which the sheriff took possession. The liabilities are reported at about $60,000.

WEST TROY.—Thomas Knowlson, lumber, is asking an extension, and has called a meeting of creditors for the 29th inst. Liabilities $71,036; assets $131,630.

NORTH CAROLINA.

EDENTON.—E. Wood, fishery, has assigned to W. D. Pruden. Liabilities estimated at $4,500; assets $2,500.

ELIZABETH CITY.—Abel Roberts, grocer, offers to compromise.

VAUGHAN.—Vaughan Brothers, general store, have assigned.

WADESBORO'.—T. T. Carraway, general store, is reported to have failed and gone out of business. It is thought he will eventually settle all claims against him.

OHIO.

CANTON.—A. W. Oberlin, coal, is reported to have left town, and is about to be attached.

CINCINNATI.—G. A. Carson, clothing, has assigned.

CLEVELAND.—C. C. Paine, woodenware, owes about $35,000; assets about $21,000, against which there are preferred claims for $23,450.

COLUMBUS.—Gleich & Schroder, carriage makers, have assigned to W. O. Henderson.

GALION.—Brokaw, Riblet & Krohn, dry goods, have assigned to O. H. Green.

GREENVILLE.—O. Rothman & Co., grocers, have assigned.

NORWALK.—W. G. Dorland, carriage trimmer, has assigned.

REESEVILLE.—J. B. Toner, general store, has assigned.

TIPPECANOE.—Hartzel Rannels, drugs, has sold out, and claims he is unable to pay in full.

ZANESVILLE.—Joseph Stecker, dry goods, has assigned.

OREGON.

CENTREVILLE.—D. G. Coy, general store, has been attached and called a meeting of creditors.

PERRYDALE.—McGrew & Waller, general store, have failed.

PORTLAND.—N. Davis, tailor, has been sold out by the sheriff.

PORTLAND.—F. Scott, hotel, is reported to have failed.

PORTLAND.—Todd & Biven, grocers, have been attached.

PENNSYLVANIA.

CARROLLTON.—The liabilities of Eckenrode & Schroth, general store, are about $11,000; actual assets $7,000.

CHESTER.—J. M. Stotesbury, manufacturer of cotton yarns, has failed. The liabilities are about $70,000; actual assets $25,000; preferences $23,700. He does not continue the business.

CLEARFIELD.—Samuel Potterf, carriage maker, has been closed by the sheriff.

GENEVA.—C. H. McLean, drugs, has been closed by the sheriff.

INDIANA.—Judgment for $11,000 has been entered against E. H. Wilson, of Wesley, Wilson & Co., furnaces.

KANE.—J. Redmond, grocer, has been closed by the sheriff.

NORRISTOWN.—Joseph M. Cohen, clothing, has been closed by the sheriff.

PHILADELPHIA.—Judgments to the amount of $428 have recently been entered against Joseph Dumbell, grocer, and execution has been issued.

PHILADELPHIA.—Richard Fayre, gents' furnishing goods, has sold out, gone out of business, and offers to compromise.

PHILADELPHIA.—Execution has been issued against M. Elkin & Co., hardware specialties.

PHILADELPHIA.—Orr, Hess & Morgan, merchants, have been sold out by the sheriff.

PHILADELPHIA.—John W. Lesher & Brother, paper hangings, etc., have failed. Liabilities about $5,000. They offer 25 cents, two months notes, without security.

PHILADELPHIA.—Paper indorsed by Lloyd & King, wholesale lumber, has gone to protest. The firm was interested in the Palmetto Lumber Company, of Georgetown, S. C., which has confessed judgment to the firm for $175,000.

PHILADELPHIA.—N. N. Rosenberger, manufacturer of cotton goods, owes about $15,000; assets machinery $7,500; bank balance $1,500. He is said to have suggested a compromise at 50 cents, but creditors think he should pay more.

PHILADELPHIA.—Edward L. Scholl, shoe findings, is in the hands of the sheriff.

PHILLIPSBURG.—Doyle, Sons & Co., glass manufacturers, have assigned to George H. Karcher. They owned their works and other property.

PITTSBURGH.—At a meeting of the creditors of Graff, Bennett & Co., iron manufacturers, the statement showed firm liabilities $1,282,752, and liabilities of the Grafton Iron Company, for which they are responsible, $330,000. The personal assets are $1,169,637, and real estate $2,000,000. An extension was granted, the firm agreeing to pay 40 per cent of personal liabilities, in 10 per cent. installments of four, eight, twelve and sixteen months, and 60 per cent. realty debts to be paid in 10 per cent. payments, in twenty, twenty-four and twenty-eight months, notes secured by mortgage on their real estate. J. R. McCune and P. H. Miller act as trustees.

PITTSBURGH.—Execution has been issued against Abram Skerball, liquors, for $1,000.

WILLIAMSPORT.—Peck & Barnard, lumber, are embarrassed by the failure of the Palmetto Lumber Company, of Georgetown, S. C., in which they were interested. The firm indorsed for the latter and for Lloyd & King, aggregating between $200,000 and $300,000, for which most of the assets of the company will be liable. The firm say that while from the nature of their assets it will be impossible to protect their name promptly at maturity, they hope to be able to make such arrangements as will satisfy all the creditors in due time.

WINGSTON.—M. C. Gregory, grocer, has been closed by the sheriff.

RHODE ISLAND.

PROVIDENCE.—Herbert E. Dodge, auctioneer, has been attached for $1,500.

SOUTH CAROLINA.

CHARLESTON.—John Corbet, carpets, is reported to have assigned.

GEORGETOWN.—The Palmetto Lumber Company has suspended, and the property is in the hands of the sheriff on a confessed judgment for $175,000 to Lloyd & King. The company was organized about six years ago, and had a paid-up capital of $62,000. Loose management is said to be the cause of their embarrassment. The assets consist of real estate, timber, lumber and shingles.

TENNESSEE.

MEMPHIS.—D. G. Shelby, trading as D. G. Shelby & Co., grocers, has assigned to W. S. Smith. Liabilities about $2,000; nominal assets the same.

ROCKWOOD.—T. W. Weatherford & Co., general store, are reported to have failed.

SPARTA.—George J. Spurlock, general store, has assigned Liabilities $4,000.

WAYNESBORO.—T. D. Young, general store, has failed. Liabilities $5,500; assets $2,500.

TEXAS.

BURNETT.—Williamson & Co., saddlery, have been closed by creditors.

CISCO.—J. B. Austen, jeweler, is reported financially embarrassed.

CISCO.—K. S. Fisher, drugs, has assigned. Liabilities $2,500; assets $1,500.

CORPUS CHRISTI.—Benito P. Rosales, grocer, has been closed by attachment.

LAMPASAS.—Take Harris & Co., confectioners, have been attached.

LULING.—J. B. F. Borne, grocer, has assigned to W. F. Hale. Liabilities about $3,000; assets $2,500.

VIRGINIA.

COGHILL.—Philip H. Coghill, general store, has assigned.

FERGUSON'S WHARF.—A. M. Harrison, general store, is reported to have failed.

FINCASTLE.—J. W. Slicer, general store, has assigned.

FRANKLIN.—Jenkins & Cutchins, general store, are reported to have confessed judgments for $14,027.

PORTSMOUTH.—F. M. Beaton & Brother, shoes, have assigned.

WISCONSIN.

MILWAUKEE.—Execution has been issued against J. V. Creap, refiner, for $2,531.

WYOMING.

LARAMIE.—Moritz Meyer, grocer, has been closed on attachment.

MANITOBA.

CARTRIGHT.—Muir & Waugh, saw mill, have assigned.

WINNIPEG.—Miss S. G. Clark, milliner, is advertised to be sold out by the sheriff.

WINNIPEG.—S. J. Cohn, jeweler, offers 35 cents.

WINNIPEG.—J. W. Peddie, dry goods, offers to compromise.

WINNIPEG.—The stock of E. F. Radiger & Co., wholesale liquors, has been seized under a chattel mortgage.

NEW BRUNSWICK.

FLORENCEVILLE.—Executions have been issued against David Semple, general store, for about $800.

GRANT FALLS.—Wilbur Armstrong, general store, has failed. Liabilities about $2,500; no assets.

NOVA SCOTIA.

HALIFAX.—A. Atkinson & Co., woolen manufacturers, have assigned.

PROVINCE OF ONTARIO.

CASSELMAN.—William Fawcett, general store, has assigned.

DUNDALK.—G. W. Parsons, drugs, has assigned.

ORANGEVILLE.—E. W. Rosevear, shoes, is in the hands of the sheriff.

OWEN SOUND.—Mrs. E. Redfern, fruits, has failed and gone out of business.

ROSEDALE.—P. Mortson, general store, offers to compromise.

TORONTO.—John Howlett & Co., builders, have assigned.

TORONTO.—Larter Brothers, stoves, have assigned.

TORONTO.—T. A. Lockington, furniture, has assigned.

UFFORD.—H. A. Gill, general store, offers 70 cents.

WAREHAM.—William Crabb, general store, is in financial difficulties, and being sued.

PROVINCE OF QUEBEC.

FARNHAM.—T. Perrault, contractor, is reported in financial difficulties.

MONTREAL.—A. Bourbonniere, auctioneer, is reported to have left town.

MONTREAL.—Charles Cadotte, shoes, has compromised at 60 cents.

MONTREAL.—N. Cantin, grocer, has failed.

MONTREAL.—The effects of Joseph Desjardins, furniture, have been seized for rent.

MONTREAL.—J. B. Lallamme, gents' furnishing goods, has assigned.

MONTREAL.—H. G. Leveters, wholesale jeweler, has assigned.

MONTREAL.—E. Poliwka & Co., glue, have assigned.

MONTREAL.—J. C. Prefontaine, dry goods, offers 60 cents.

MONTREAL.—Senecal & Co., church ornaments, offer 25 cents.

MONTREAL.—C. E. Thompson, rubber stamps, has compromised at 15 cents.

E. B. HARPER, PRESIDENT.

O. D. BALDWIN, AUDITOR,

*President Fourth National Bank, N. Y.**

**This Bank has Thirty Million Dollars Assets, Twenty-five Million Dollars Deposits, and Four and One-half Million Dollars Capital and Surplus.*

CENTRAL TRUST COMPANY OF NEW YORK, TRUSTEE.

This Trust Company has Twelve Million Dollars Assets, with One Million Seven Hundred and Fifty Thousand Dollars Capital and Surplus.

Total Business of Association, $55,000,000.

An Association composed of TWELVE THOUSAND FIVE HUNDRED business and professional men who possess TWO HUNDRED MILLIONS of Dollars in their own right, all united together upon a COMMON SENSE PLAN, by which their families may be protected, from want, in the day of adversity.

The Certificates of Membership in THIS ASSOCIATION are EXEMPT by the law of New York from ATTACHMENT by CREDITORS and cannot be seized, taken or appropriated to pay any debt or liability of a deceased member.

ONLY EIGHT ASSESSMENTS MADE (at age 35) OF $1.24 EACH PER $1,000 FOR THE ENTIRE PERIOD OF TWO AND ONE-HALF YEARS, MAKING BUT $4 PER YEAR FOR EACH $1,000 INDEMNITY.

SIXTY THOUSAND DOLLARS realized from one single assessment, sufficient to cover fifteen average losses. OUR MONTHLY business exceeds THREE AND ONE-HALF MILLIONS OF DOLLARS.

All losses promptly paid in full.

Certificates of Membership issued from $1,000 to $10,000.

This Association has received written endorsements from Insurance Commissioners, Insurance Actuaries, Insurance Managers and Agents, including such names as the Hon. Elizur Wright, Sheppard Homans, and other eminent men.

It has had four separate examinations made of its books, accounts, income and disbursements within the past six weeks by accountants and business men. It has had thirteen like examinations within the past eighteen months, and in each case this Association has been TRIUMPHANTLY ENDORSED by the Examiners, who were strangers to the Management, and absolutely disinterested parties.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.
Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.
The synopses of recent legal decisions constitute an exceedingly valuable feature.
As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, JUNE 30, 1883.

NOTES OF THE WEEK.

The stock market has see-sawed a good deal during the week, going down from Monday till Thursday—much as it did last week—and being sharply turned on the afternoon of that day, as also happened then. Whether this be the result of a fair contest between the leading operators who are bulling and bearing prices, or of that sort of manipulation known as "milking," does not positively appear; but it has rather the appearance of the latter. The troubles in Chicago, and the quarrelings among the trunk lines about the Lackawanna's performances, had a depressing effect on the market, but better news about the crop outlook assisted the bulls in maintaining prices. Either way it was purely professional work. Mr. Gould's stocks have been very quiet, and his "great June boom" has been a complete failure.

During the past week the Mississippi valley, between Cairo and Alton and the valley of the Missouri in the vicinity of Kansas City and St. Joseph, Mo., have suffered from the "June rise" of the rivers named. The levee on the banks of the Mississippi, opposite the mouth of the Missouri, gave way under the tremendous pressure of water brought to bear upon it, and thousands of acres of the most fertile lands in southern Illinois were flooded and the growing crops destroyed. On the Missouri shore like damage was inflicted. Live stock was swept away, and the labor of a whole season in several counties rendered of no avail. Railway trains were for a time prevented from making good their entry into or exit from St. Louis, although Kansas City was perhaps the greatest sufferer in this respect. By this time, however, the impediments to transportation have been in good part removed, as the water has been slowly subsiding for two days past. The damage to the agriculturists who were submerged on the Illinois and Missouri lowlands will run well into the millions, although it is at present impossible to give anything like even an approximate total of the loss. Western Michigan and western and southern Pennsylvania have also suffered from freshets and exceptionally high waters in the rivers, and considerable loss has been sustained in this way in those regions. New Orleans looks upon the upper Mississippi "June rise" without a shadow of a suspicion that the high waters will do any damage in the lower river valley, and expects that the high water above will undoubtedly insure uninterrupted barge traffic between it and St. Louis.

Our conclusion, expressed last week, that so far as the action of the courts was concerned Elizabeth's debt question was as far removed from a settlement as ever, has been confirmed by the decision rendered by Judge Nixon in the United States Circuit Court on Wednesday, in the suit of the Ætna Insurance Company against the city of Elizabeth. As will be remembered, a writ of alternative mandamus had been issued requiring the Board of Assessors to show cause why a peremptory mandamus should not be issued to compel them to insert in the tax levy the amount of the judgment recovered by the company against the city. The board consisted of eight members, but before the writ was served four of the members resigned, leaving the board without a quorum. This fact was certified to the court in a return to the writ by the remaining four members. This return was held to be good, and the writ of mandamus was dismissed by Judge Nixon, who decided that the law of 1882 allowed officers of municipalities to resign and absolved them from any duties of their office, and also that the court could not compel four men to do what the law required to be done by at least five.

It now looks as if that anomalous coin, the trade dollar, would be finally driven out of circulation. The post-office and the elevated roads in the city of New York have for some time refused to take trade dollars. Many merchants and others in the city have within the past few days given notice that they will not receive the coins in question after the 1st of July. Agreements have been signed refusing to accept the coin at its nominal value after July 1, and many who decline to sign these agreements nevertheless refuse to receive the dollars except at a discount. Employés even have in many instances informed their employers that they will no longer receive the trade dollars in payment of wages. It is unlikely that the obnoxious coin will be long able to withstand combined opposition of this nature. This suggests the reflection that, by a similarly organized movement, the so-called standard dollar might, without much difficulty, be effectually retired, notwithstanding the fact that it is a legal tender. If contracts and all other instruments calling for the payment of money were framed so as to exclude the silver dollar (by providing for payment in gold or paper) that last relic of the silver craze would disappear before long, and the government would probably see the wisdom of disposing of a large portion of its accumulated stock to the silversmith instead of building expensive vaults for the storage of the same.

The Republicans of Minnesota have issued their declarations upon the tariff and the other questions now before the country. There appears to be an uneasy feeling abroad that the success of the cause of civil service reform is as yet by no means assured, notwithstanding the passage of the Pendleton bill by the last Congress. This feeling appears to be shared in by the Minnesota Republicans, who, we observe, declare in favor of the reform. Among other declarations adopted by the state convention are resolutions approving the whisky and tobacco tax; favoring liberal appropriations for internal improvements, and recommending the submission of the question of prohibition to a popular vote. The tariff plank in the platform declares in favor of maintaining a system of internal revenue levied upon articles of luxury, such as whisky and tobacco, together with a system of duties upon imports, so applied as to provide revenue for the necessary expenses of the government, and so adjusted as to encourage the manufacturing interests of the whole country. This, as will be seen, is a protectionist platform, but it is commended by the leading Republican newspaper of the country—itself of free-trade leanings—as the most sagacious declaration regarding the tariff made by any convention of the party this year. As will be seen, it avoids the extreme ground of those protectionists who would abolish internal revenue taxes entirely so as to throw the whole burden of taxation upon imports. The Minnesota platform may prove to be of more than local interest. The New York *Times*, we notice, advocates the adoption of the resolution as a fair compromise, declaring that the ground taken therein is one upon which the Republican party throughout the country can meet their opponents without fear, no matter what position the latter may occupy.

One would have thought that, judging from common report, there was at least one class of people in the United States who were very well able to take care of themselves, namely, plumbers. It appears, however, that the strength of their position has been overrated, and that their character and services have not been sufficiently appreciated. Representatives of the master plumbers from many parts of the country have just held a meeting in the city of New York, and in accordance with the fashion of the times have set forth a "claim for protection" and a "demand for relief." Protection is demanded against speculative builders who do the plumbing in houses without any knowledge of the business. How much depends upon the point of view in the formation of human opinion is seen from the fact that the sanitary engineer, who is generally regarded as one of the triumphs of modern scientific progress, is regarded by the plumber as the chief bane of his existence. The plumbers, we observe, are dissatisfied with the present system of building inspection, and demand the substitution of "practical men" instead of physicians as inspectors. The meeting resulted in the organization of the National Association of Master Plumbers, the chief object of which is to protect the members against encroachments upon their rights either by the public or by their apprentices.

A special envoy from Mexico is on his way to England to arrange for the resumption of diplomatic relations between the two nations, with a view to the negotiation of a commercial treaty upon an equitable basis. This preliminary step has seemed necessary for the reason that according to the view of the Mexican government no treaty at present exists between it and England, that government insisting that on the downfall of the Mexican empire all treaties made and entered into by the imperial government became null and void. The taking of this step is one among many recent indications of the rapid development of the industrial and commercial spirit in Mexico. The envoy, M. Mariscal, in a recent interview, assigned as reasons for the negotiation of a commercial treaty with England the fact that while the number of Englishmen in Mexico is small, they are nearly all large capitalists and hold much real estate: and also, that the Mexican ports are almost entirely given up to English shipping. England, apparently, is anxious to secure a definite settlement of her commercial relations with Mexico on favorable terms. A special envoy has been sent from London to Mexico on a mission similar to that of M. Mariscal.

MERCANTILE FAILURES FOR THE QUARTER.

The number of mercantile failures reported to BRADSTREET'S for the second quarter of 1883 shows a considerable decrease as compared with the first three months of the year, but a striking increase when comparison is made with the second quarter of 1882. The average number of failures occurring each week in the first quarter of 1883 was 245; in the second quarter, 162; in the first quarter of 1882, 165; in the second quarter of 1882 the average number of failures each week was 115. As previously pointed out, the first of January being the date of balance-sheets and general settlements, the number of failures in the last and first quarters of each year is uniformly larger than in the other quarters. The following table shows the failures, with assets and liabilities, for the first and second quarters of 1883:

	Number.	*Actual assets.*	*Liabilities*
First quarter	3,189	$23,763,828	$12,235,535
Second quarter	2,107	16,126,760	31,560,207

The average liabilities of each failing trader for the first quarter were $13,240, and for the second quarter $14,979. The percentage of assets to liabilities for the first quarter of 1883 was 56, for the second quarter 48. The following table shows the failures for the second quarters of 1882 and 1883:

	Number.	*Assets.*	*Liabilities.*
Second quarter 1882	1,503	$12,006,174	$23,372,345
Second quarter 1883	2,107	16,126,760	31,560,207

For the second quarter of 1882 the average liabilities of each failing trader were $15,551, and the percentage of assets to liabilities 52. The following table shows the failures for the first six months of 1882 and 1883 respectively:

	Number.	*Assets.*	*Liabilities.*
1882	3,049	$27,329,765	$52,383,289
1883	5,296	39,889,202	73,594,205

The increase for the last six months in the number of failures is 1,647, or 45 per cent. The average of liabilities for the first six months of 1882 was $14,360, and for the last six months $13,900. The percentage of assets to liabilities for the first and second quarters of 1883, respectively, is 56 and 48; for the second quarter of 1882, 52 per cent. For the first six months of 1882 the percentage of assets to liabilities was 53, and for the first six months of 1883, 54 per cent. The failures in Canada and the Provinces for the last quarter number 337, against 409 in the first quarter of the year, and 137 in the second quarter of 1882. The table showing the failures for the last six months by trades reveals the now familiar fact that by far the greater part of the trade disasters are among small retail dealers. This again emphasises the wise doctrine that the consumer should pay cash. In making up the statistics for the quarter it has been thought best to ignore the recent failures in the provision and grain trades as being merely speculative transactions. Mere betting on the probable price of lard at a future date is scarcely more legitimate than the hazards at the Sheepshead Bay races. Our aim is to summarize mercantile disasters only. At times to classify closely is impossible, but when the distinction is plain speculative ventures are not included. The number of failures reported to BRADSTREET'S from week to week still continues large, though less than for the first quarter of the year. The number of failures reported for recent weeks has been increased by the disasters in speculative trades at Chicago and New York. The outlook, however, is for decreasing disasters. The developments of the year promise to go far in proving that, instead of decennial panics—a time when solvent traders fail—we are to have recurring periods of special activity and comparatively moderate depression. If, as now appears certain, the belief shall be made good, a distinct and beneficial advance will have been made, and this through the development of business statistics.

THE JUNE COTTON REPORT.

The June cotton report to BRADSTREET'S is based on 1,204 replies. This is the most exhaustive report yet received from the cotton fields of the south. The report from Texas consists of replies from 223 correspondents, representing 114 out of the 121 counties in the state growing over 500 acres of cotton each, an average of about two replies to the county. The 1,204 replies come from 98 per cent. of the the cotton-growing regions, or 617 counties out of the 657 counties raising 500 acres or more. The mail advices are to June 16, and tell of the weather and progress of the crop for the month ending that date. The period from June 16 to date is covered by telegraphic advices to date. The mail advices show the weather to have been from fair to good; 443 correspondents say good, 467 fair and 291 bad. As to the condition of the stands on June 16, 456 replies say good, 613 fair and 132 bad. From this the condition was little better than fair. The prospects for a good crop were then regarded as scarcely more than fair. The condition of the fields as to cultivation was from fair to good. Below is our customary table:

CONDITION OF THE COTTON CROP ON JUNE 16.

States.	*Cotton counties of over 500 acres*	*Number of counties reported*	*Percentage of area reported*	*Condition of weather since May 18.* Bad	Fair	Good	*Condition of stand.* Bad	Fair	Good	*Prospect for a good crop.* Bad	Fair	Good	*Condition of fields as to cultivation.* Bad	Fair	Good

Totals	657	617	98	443	467	291	456	613	132	394	605	179	509	551	141

Up to May 18 the weather had been only fair, owing to cold and wet, and the condition of the stand was only fair. This month brought very little improvement. Our telegraphic advices are from 35 points in the south. The reports, while somewhat contradictory, point to a distinct improvement since June 16. The general condition and prospects of the crops cannot be put down as good, but an advance beyond fair has been made with an auspicious outlook. On another page we give interesting memoranda from the remarks of correspondents.

SOME FEATURES OF THE NEW TARIFF.

The Tariff act which was passed by both houses of Congress March 3 will go into effect to-morrow. The leading features have been already referred to in the columns of this journal, but inasmuch as this act was finally passed in compliance with a widespread and unmistakably strong desire for the introduction of lower rates of duty, some consideration of that aspect of the enactment is particularly appropriate at the present time.

The Boston *Herald* has made a careful analysis of such portions of the new Tariff act as make actual or suppositious reductions of duty. From the results arrived at it is evident that, considering the wealth and political influence of those industries which struggle continuously for a retention of the old rates of duty, or a higher tariff in instances, a substantial concession has been made to the desires of the great body of consumers throughout the country.

The list of articles given in the first class, as arranged in the list referred to, comprises those on which the lowered duties represent a real relief as compared with the rates under the now expiring Tariff act. They are pig iron, bar iron, silks, linens, wool and woolen cloths; and the late rates of duty thereon, those recommended by

the Tariff Commission, and those finally adopted by Congress, are as follows:

	Old rates.	*Tariff Com'n.*	*New rates.*
Pig iron	$7 per ton	$6.72 per ton	$6.72 per ton
Bar iron	1c. per lb.	.9c. per lb.	.8c. per lb.
Silks	60 per cent.	50 per cent.	50 per cent.
Linens	40 per cent.	35 per cent.	35 per cent.
Wool	10c. pr. lb. + 11 p. c.	10c. per lb.	10c. per lb.
Woolen cloths	50c. pr. lb. + 35 p. c.	30c. per lb. + 35 p. c. if val. under $1. 35c. per lb. + 40 p. c. if val. over $1.	35c. per lb. + 35 p. c. if val. under 80c. 35c. per lb. + 40 p. c. if val. over 80c.

As has been frequently pointed out heretofore the reductions obtained on pig and bar iron are trivial and much less than those commodities can well stand (but 28 cents per ton on the former and $4.48 per ton (gross) on the latter, to $17.92.) The cut on rates of duty on silks amounts to over 16⅔ per cent. The reduction of duty on linens (the value of which is over 30 cents per square yard) from 40 per cent. to 35 per cent has no bearing on the question of protection, as goods of this variety are not made in the United States. The rate on linens, therefore, becomes a question of fiscal importance solely. The rate on clothing and combing wools has been simplified by the removal of the annoying and absurd "additional 11 per cent. duty." The alteration in the duties on woolen cloths, from as close an examination as we have yet been able to make, appears to be the outcome of a vigorous effort on the part of Congress to straddle the issue. It was necessary that the public demand should be met by lower rates, but at the same time the loud, long and uninterrupted arguments of the wool interests were of sufficient magnitude to cause the Tariff Commission to fix a rate (or a series of rates) which would apparently concede something to that side. This naturally did not mend matters much. Congress did a little better by lowering the basis of the rate of duty as fixed by the Tariff Commission, but the lament of the "wool interests" is now heard through the length and breadth of the land at the insufficient aid afforded them by the rate to go into force to-morrow. Yet it may be doubted whether the real or supposititious advantage gained on the other side will be sufficient to reach the consumer, for whose benefit ostensibly the agitation was undertaken. On fine woolens a reduction, though a very small one, is apparent. The cut [in the interest of consumers] is from 50 cents to 35 cents per pound (specific), which is in good part offset by an increase [in favor of the interests mentioned above] in the ad valorem rate of 35 to 40 per cent. This class of woolens is almost all imported. It is very doubtful whether there will be any actual relief at all through the new duties on the coarser varieties of woolen goods. Heretofore the importation of this class of fabrics has been almost prohibited by the high rates of the existing tariff. Whereas it used be 50 cents per pound and 35 per cent. ad valorem, the Tariff Commission suggested 30 cents per pound and 35 per cent. ad valorem when in value under $1, but Congress listened long and attentively to the producers' side of the question, and finally established the new duty on the coarser grades at 35 cents per pound plus 35 per cent. ad valorem, after cutting down the basis of estimate to "when valued below 80 cents." No change in prices of this largely consumed line of fabrics will be likely to be noticed by the retail customer, and neither will importation be specially stimulated by the changes made.

On all the articles named above a reduction of duty was sadly needed; and though in most cases the reduction has been small —in cases even trivial—the fact that the concession to the public demand has been gained at all is significant. It is also of import that there are no signs of any change in the public temper in this respect.

The ridiculous plea that the reduction on coarse cottons, flannels and blankets is of benefit to consumers will not bear examination. The previously existing duty on cotton goods has not been other than nominal. For fifty years these goods have been made as cheaply in the United States as in any other country. They would not be imported if there were no duty at all. In fact, they are steadily exported. To speak of the reduction of duty on them as a reduction of taxation is nonsensical.

In regard to blankets, flannels and similar woolen goods, the case is similar. There is a nominal lowering of duties from the specific rate of 20 cents per pound on the most inferior grades to 10 cents or 12 cents per pound. On the expensive grades, however, as previously explained, the rate of duty has been prohibitory, and, while reduced in fact, is no less prohibitory than before. Prices will continue high, and the purchaser will not know that the rate has been varied. It is believed that these goods, so far as the manufacture goes, can be made, in the main, as cheaply in the United States as they can abroad. Their increased price is caused, not, as in the case of silks, by a higher cost of manufacturing but by the higher price of the raw wool, which is due to the duty on wool. The voluntary reduction in the duty on these goods shows how exorbitant must be the present rates. The duty on cotton hosiery, laces, embroideries and trimmings has been advanced from 35 to 40 per cent. ad valorem. And these are the only variety of cotton goods whose importation continues to any considerable extent.

On dress goods made wholly of wool there has been an increase of the specific duty from 6 and 8 cents a square yard to 9 cents. Fine dress goods are made only to an inconsiderable extent here, and are imported in large quantities. On the cheaper grades the Tariff Commission recommended, and Congress made, a slight decrease of duty. But on the fine all-wool grades the Commission recommended an increase of duty to 12 cents, and Congress granted an increase to 9 cents, a square yard. This is unmistakably a case of additional taxation.

The second class of commodities to be considered are those in which the duties have been reduced, but the reduction on which, from the circumstances of the case, is merely nominal and will bring no relief from taxation. Of these the leading ones, as already given, are coarse cottons and flannels (blankets, etc., cheap) as well as steel rails and copper. The two first mentioned have been considered. The rates heretofore existing, those proposed by the Commission and those adopted by Congress, are as follows:

	Old rates.	*Tariff Com'n rates.*	*New rates.*
Cottons, coarse	5c. per sq. yd.	3c. per sq. yd.	2½c. per sq. yd.
Flannels, blankets, etc.	20c. per lb. + 35 per c.	8c., 12c. per lb. + 35 p. c	10c., 12c. per lb. + 35 p. c.
Steel rails	$28 per ton	$17.92 per ton	$17 per ton
Copper	5c per lb.	4c. per lb.	4c. per lb.

The lessened duty on steel rails amounts to nothing now in the way of reducing taxation. The high protective tariff of $28 per ton, which expires to-night, backed by the extraordinary demand for rails in the past three years, so stimulated the steel rail industry that our capacity for production to-day far exceeds the demand. British steel rails cannot be laid down in New York for less than $45 per ton (including the new duty of $17 per ton), so that there is no reduction of revenue (or taxation) by the cut of $11, which looks so large to those unfamiliar with the situation, inasmuch as the price here is $38@39 per ton according to delivery.

The present duty on copper of 5 cents per pound was levied by the act of 1869, which, as the Boston *Herald* says, "has its equal only in the wool and woolens act of 1867 as a specimen of extravagant legislation for the benefit of particular classes." By far the largest part of the copper produced in the United States comes from the mines of one county in Michigan, and more than one-half comes from a single mine. These mines are probably the richest copper mines in the world. Under the stimulus of the duty they have greatly increased their product, until at present the quantity of copper produced is more than the country can use. Prices have therefore gone down. The importation of copper ceased years ago. At existing prices importation will not be resumed, notwithstanding the fact that the duty goes down from 5 cents to 4 cents per pound. The change in the tariff will be of no effect in this case. The third class of importations mentioned consists of those on which the duties are heavy and are real taxes, but which are consumed to so small an extent that the burden is not great. They are, however, so unjustly taxed, being for protection alone, not for revenue at all, that they are to many unprejudiced students very exasperating. The class includes articles of little economic importance, of which but few thousand dollars' worth per annum are consumed, yet enough to put many dollars in the pockets of the monopolist of the production. Three examples are given:

	Late duty.	*Tariff Com'n rate.*	*Rate adopted.*
Marble	50c. per cub. ft. + 20 p. c.	75c. per cub. ft.	65c. per cub. ft.
Nickel	20@30c. per lb.	25c. per lb.	15c. per lb.
Emery ore	$6 per ton.	$5 per ton.	Free.

There is one emery mine in Massachusetts, and we believe but one nickel mine in the United States, owned by a prominent Philadelphian and an active apostle of protection. The duties on these products therefore have operated to the sole and direct benefit of actual and absolute monopolies. The marble tax was levied to prevent the importation of Italian marbles, the only competitors of which are the Rutland (Vt.) quarries. It will be sufficient to add that the duty on imported marble was put on in 1864, at the instance of the Vermont representatives in Congress, of whom Senator Morrill, "the father of the tariff" itself, so-called, was the most conspicuous and influential.

The tariff act which goes into existence to-morrow will, however, serve as a beginning.

THE CHINESE LABOR QUESTION.

Sufficient time has elapsed since the Chinese immigration law came into operation to note its effect upon the varied industries of the Pacific slope. Our San Francisco correspondent alluded to this point in his letter of June 20, in which certain material facts are dwelt upon. The first of these is the improved condition of labor consequent upon the cessation of Chinese immigration; and the second and most pregnant one is the conflict between the coolies engaged in shoe factories in San Francisco and their Chinese employers for the purpose of enforcing a higher scale of living. It follows, from the conditions mentioned, that the enactment of the anti-Chinese law was a public necessity in the interest of the Chinese themselves. It has given them a chance to better their condition in the scale of existence which they have not been slow to avail themselves of.

One cannot doubt for a moment how this conflict of Chinese labor and Chinese capital upon American soil will finally end. It must end in the elevation of the Chinese workman to the same plane, or relatively so, of the American workman. He will become a free agent, and will not be compelled to eat, wear and sleep at the command of his employer, who made several profits out of his necessities in addition to the legitimate one from his labor. The tendency all the time, therefore, is to a leveling upward toward the plane of the American workman; under the old method of unrestricted coolie immigration the tendency was in the opposite direction, white labor being steadily dragged down toward the lowest plane of coolie competition.

For some time past, according to reliable advices from the Pacific coast, the Chinese residents have been steadily putting up prices in all departments of industry, and these demands, having quietly been responded to, the fact was not so generally noted as it should have been. This is especially the case in the line of domestic service, in the laundry business, and in the various handicrafts and callings. The supply being limited, Chinese labor ceases to be cheap. And as the upward movement in cost is steadily progressing, it follows that when the point is touched at which white labor can be employed with equal economic advantage the preference will be given to it by American employers, if not, indeed, also by Chinese manufacturers, who are the last people in the world to sacrifice profit to sentiment. This is partly illustrated by the hiring of white labor—men, girls and boys—in Chinese shoe factories of San Francisco, to the exclusion of the striking coolies, at prices ranging from $1 to $5 a day, less, of course, of the more highly-paid labor being employed. The coolies, however, are thoroughly organized, and will make a successful fight, as we stated at the outset of this article, all the conditions favoring success.

In Oregon and Washington Territory the relations of Chinese labor to capital are practically identical with what we have noted regarding San Francisco, which may be taken as fairly representing California. It is different in British Columbia, however, the labor requirements of the Canada Pacific railroad, combined with unrestricted immigration, having created a glut in the coolie labor market, which the Chinese merchants at Victoria affect to regret, inasmuch as they have written home advising no more to be sent over for purposes of general utility. This may or may not be a sincere expression of opinion. Our judgment is that it is intended to propitiate provincial sentiment, which is strongly set against coolie immigration.

The point hence arises: What is to become of the coolies on the Pacific slope when their places in factory, workshop and household have been filled by European immigrants or Americans? They will simply be dispersed abroad throughout the country, earning better wages and doing better work than at present, because they will work under higher conditions of servitude. And in this way San Francisco will be ultimately freed from the intolerable incubus and nuisance of Chinatown. Thus, a great industrial, economic, moral and

social revolution is being silently worked out under the new law which prohibits the importation of coolie labor from China.

THE VARNISH TRADE.

The importance of varnish to external decoration in the way of heightening the beauty of hardwoods and affording protection as well as a lustrous brilliancy to various surfaces, however ancient in the far East, is somewhat modern in Europe, dating back in England to the latter part of the last century. For fine furniture, for the inlaid woods or veneers of railroad cars, for the exterior garnishing of these, for coach bodies, varnishes are at once a necessity and a luxury. Among their uses is the protection of burnished brass and iron work. The basis of a good proportion of varnishes is gum copal, which is found buried in the earth in the sand hills of the eastern shores of Africa, opposite Zanzibar, in the interior of that continent and on the coast of Guinea, and which comes to us also from Australia, New Zealand and India. The cheaper grades of varnish form the basis of the bulk of transactions, but owing to the progress of manipulative and chemical skill varnishes are now turned out of a grade formerly only obtainable by the best quality of the gum copal of commerce. The greater portion of the gums used by our manufacturers are received direct from the countries of production. We may here mention incidentally that the supplies of the better grades of turpentine have shifted from North Carolina to Georgia and Florida, owing to their better class of white pine leaf trees. No little enterprise has been expended in bringing the American manufacture and trade in varnishes up to its present satisfactory position. Improvements in makes are continually taking place. It is only within the past ten years that our finer grades of varnish have coped with those of England. At the outset varnishes were made in the shops where used, these being followed by factories. The varnishes made in early times were exclusively of coarse varieties, unsuited to impart the requisite luster to coaches, pianos and fine furniture. This state of dependency on foreign supplies for higher grades stimulated enterprise. Vessels hailing from this city and Boston in the India and African trades brought back varnish gums as a portion of their return cargo; the processes so jealously guarded abroad were sought out, makers availing themselves of the knowledge of foreign workmen, as well as of their own tentative experiments. American varnishes by leading makers now rank well with those produced abroad, and much of the export trade carried on is due to the admirable flowing qualities of these varnishes, covering the body most completely and enabling work to be done with great expedition.

Out of less than a hundred varnish makers in this country, some seven or eight houses divide among themselves the cream of the trade. In addition to commanding the requisite skill, they owe their position to the vast capital invested in costly appliances, in their ability to buy large quantities of material at once and at the most favorable moments so as to secure uniformity, and their power to let a portion of their means lie idle in the aging of the varnish, which extends from six to eight months.

All the imported varnishes received from England, and which amounted last year to 46,779 gallons, valued at $36,222, are of high grades, and their sale is pushed by agents located in various cities, these holding stock for the general trade. The enormous investments in the business by English makers enable them to hold their stock for purposes of ripening for a longer period than is the practice here. The whole importation from England per annum does not exceed 5 per cent. of the total production of this country, which may be placed at somewhat under 1,000,000 gallons per annum. While our makers are equal to the supply of all home requirements American varnishes form a growing article of export. In 1882 we exported 102,967 gallons of varnish, valued at $181,938. Our varnishes were dispatched last year to thirty-two different countries—certainly a world-wide distribution.

The chief articles dealt with in the trade are gums, which impart the glossy body, turpentine, the working quality, and linseed oil, durability. Varnishes should have all the qualities of glass, so transparent as to bring out the full luster of surface without any indication of distinct color of their own. For a varnish to be really good, it should be limpid, brilliant, transparent and durable, the latter being the greatest and rarest excellence. In the high grade varnishes learned and experienced chemical skill is required in melting the gum and in determining the moment of blending the oil and gum and their right proportions, as well as in testing the period of ripening and settling.

The most active season of the trade extends from August to November, and from the middle of January to the middle of June. The cheaper grades of varnish, in which consist the bulk of the sales, are now a little lower. The oil market is steady, and there is no likelihood of any great change. This is the season when turpentine is low, the new crop coming in. This crop is expected to be unusually large, as the high prices which have ruled for two years led last winter to preparations for larger production, new parties entering into the business. Gums are firmly maintained. It is to be observed of copal that, notwithstanding the remoteness of the sources of supplies, it is not subject to any sudden, unforewarned fluctuations. Shellac is higher and is expected to go up still further, owing to the prohibitory effect of the amended tariff on shellac varnish through the duty imposed of $1.32 per gallon on the alcohol, its solvent, and which, free of duty, has hitherto been imported in order to pass the shellac. As two pounds of shellac went to the gallon of alcohol, the imported varnish, which requires double the amount of alcohol to be thoroughly cut, had to be worked over by our varnish makers to render it marketable. Accordingly direct consignments of shellac are in order.

AMERICAN SHEEP IN AUSTRALIA.

Some time ago BRADSTREET'S correspondent at San Francisco mentioned an important fact in connection with the rearing of blooded horse stock in this country, namely, that a market had been created in Australia and New Zealand for American trotting horses. Quite a considerable number of sires and mares have been shipped to both countries, but at present there is a cessation of the trade. The colonists are content with what they have got of the new strain, and will doubtless make the best possible use of it by judicious crossing. In time, when the new blood has become fully assimilated, it is probable that fresh shipments will take place.

But whilst this is true of horseflesh a new impetus has been given to sheep raising by the demand for American merinos from the antipodes. It had almost become an axiom in this country that the United States could not raise as fine merino sheep as the Australasian colonies, and that our manufacturers were therefore compelled to go to the antipodes for long-staple wool or to buy it at second hand in England from dealers. That they did so is certain; that they need not have done so if sheep breeding had been more generally conducted upon scientific principles in America is now demonstrated by the fact that Australian flockmasters are coming to this country for fresh blood to renew their stock. Our San Francisco correspondent, in his last letter from that point, made this very clear in his general statement that the mail steamer City of New York, on her last outward trip, carried away for Australia 172 head of American merinos, which were insured for about $25,000, and that the deck space of the mail steamships had been engaged for similar shipments for the next twelve months.

This fact was so important in itself, and in its ultimate bearing upon the industrial development of this country in relation to the thriving Anglo-Saxon commonwealths of the South seas, that our correspondent was requested to furnish more detailed particulars, which he accordingly does substantially as follows:

The sheep in question were selected from the best registered flocks of American merinos in Vermont and western New York. The flocks from which selections were made are those of George Hammond, Middlebury, Vt.; F. D. Barton, Vergennes, Vt.; V. Rich, Richville, Vt.; S. B. Lusk, Batavia, N. Y.; E. Townsend, Pavilion Center, N. Y.; D. Cossett, Syracuse, N. Y., and Goodrich Sherman, Avon, N. Y. A wide range of choice was therefore presented to Mr. Hay, who bought this shipment on joint account of Mr. James Winter, a well-known Victorian wool-grower, and of Messrs. William Hay & Sons, Mr. Thomas Brown and Macfarlane Brothers, all of New South Wales. These gentlemen will not ship any sheep by the Zealandia, which sails about the end of June, the deck space in her having been taken by Mr. Thomas G. Jones, of San Francisco, who is shipping from the merino flock of Mr. Ashly, of Stockton, Cal.

Our correspondent inquired why Mr. Hay had not purchased in California in preference to the east, thus saving in freight, insurance and time, and was informed that although the sheep were first-class animals their owners had failed to keep up their register, and therefore their pedigree was lost. This was considered so serious a defect that the Australians went to Vermont and New York for their sheep. American breeders of merinos have so improved upon the original stock from Spain and Saxony that they are justified in claiming to have established a distinct variety of sheep, possessing just those special points in which the finely bred Australian merinos are wanting. This was proved about fourteen years ago by Mr. Winter, who imported an American merino ram, and was so impressed with the economic advantage of the new strain that he determined to make further imports. The Messrs. Hay bought some of these improved sheep from Mr. Winter, and were so satisfied with the result that they determined upon the present large experimental purchase. Macfarlane Brothers also sent ten ewes to Mr. Winter's imported ram and got three ewe lambs each that cut three pounds per fleece more than the best Australian merinos of like age. The American merino gives ten pounds of scoured wool fit for manufacturing while the Australian merino only gives eight pounds. It is therefore of great advantage to introduce a strain which will give greater density of fleece to the Australian flocks, the wool of which lost density as it acquired fineness. The wool of the unmixed American merino is not so fine as the Australian wool, but it is denser, while the cross preserves the fineness and adds to the density. It is therefore a much more profitable wool to grow.

BRADSTREET'S considers these points of more than usual importance to the sheep-breeding and manufacturing interests of the country. The fact appears to be clearly demonstrated that this country can grow long-staple wool, fitted for manufacturing, as profitably as it can be produced in Australia or New Zealand; and it further appears that, by an infusion of blood from Australia, our merino wool would acquire the requisite fineness, just as Australian wool acquires superior density by an admixture of American blood. This matter should be carefully looked into by the large and important interests affected by this new departure in sheep-breeding and wool-growing. We should profit by the experience of Australians.

OCCASIONAL NOTES.

The cotton trade at Louisville is reported as steadily expanding. Board of Trade statistics show the following as the actual net handling of factors here:

	Receipts, bales.	Sales, bales.
1879-'80	[illegible]	16,850
1880-'81	27,287	27,751
1881-'82	[illegible]	31,125
1882 to June 20, '83	32,114	27,363

The overland movement at Louisville for the past three seasons was as follows:

	Receipts, bales.	Shipments, bales.
1880-'81	227,655	216,584
1881-'82	285,326	288,005
1882 to June 25, '83	242,500	237,000

The overland movement was reduced at least 50,000 bales this season as regards this point on account of a disagreement about freights existing between Louisville's leading southern road and one of its terminal connections. The *Courier-Journal* calls attention to the fact that the relative position of Louisville in cotton statistics has been in certain quarters much underrated by reason of its actual net local operations being compared to the gross overland movement of a neighboring city. The geographical situation and present complete and varied shipping facilities of Louisville are such that a continued increase of its cotton trade seems distinctly assured, and the figures of recent seasons will probably be largely exceeded in the next. The cotton interest at Louisville is, besides, much greater than indicated by the local movement of the baled staple; omitting the extensive general merchandise trade enjoyed in the cotton states by Louisville jobbers there are here numerous manufactories of all kinds of southern plantation implements and machinery; two cottonseed oil refineries, bagging factories, a cotton compress of large capacity and sundry other establishments directly connected with the cotton situation. Her factors are each year extending into new territory. A cotton mill of great proportions is actively projected, and with the opportunities for cultivating and directing new business through the great "Southern Exposition," which opens here August 1st prox., the cotton business and all convergent branches must certainly gain a new impetus that will result in healthy, vigorous and rapid development.

The Mexican government, with a view to the rehabilitation of the valley of Mexico with a forest growth, has, as we learn from the *Financier*, made a contract for the planting of 2,000,000 trees in the valley within the four years beginning March 15, 1884. Under the contract 500,000 trees are to be planted each year in places which the government shall designate. The contractor is to maintain a number of nurseries which must contain a specified number of each kind of tree to be planted. The trees are to be in plantations of from 50,000 to 100,000 each, and the contractor is obliged to maintain them for two years after planting. The contractor is further obliged to receive into the nurseries each year three graduates of the School of Agriculture, who will study the science of forestry. The contractor must, in addition, maintain a nursery of fruit trees and of other useful plants suitable to the climate, which are to be for free distribution. A government inspector is to be appointed who will watch all the operations and whose expenses will be paid by the government. One of the provisions of the contract calls for the translation by the contractor from the German of some authoritative work on arboriculture every year for five years, and also for a translation, within two years, of the German laws regarding the protection of mountains by forest growths. As compensation the contractor is to receive the sum of $200,000. It is expected, not without reason, that this step on the part of the government will be fruitful in results, not alone to the extent of the work undertaken by the government but also as an example to individual proprietors.

The tendency to deal with economic questions, which we remarked upon as becoming generally characteristic of the political platforms of the day, is illustrated in the declarations adopted by the Republican convention which has just met in Iowa. After the usual review of the record of the party the resolutions declare their adherence to the constitutional amendment in favor of prohibition, and demand the enactment by the General Assembly of such laws as shall provide for the establishment and enforcement of the principle embodied in the amendment. The convention further urges the prohibition under penalties of all arbitrary discriminations by pools and combinations to prevent competition or work injustice to communities or individuals at either competing or non-competing points, and the enactment of a law prohibiting the giving or receiving by public officers of any railway pass during their terms of office. In regard to the tariff the platform is, as might be expected from the secure position of the Republican party in Iowa, distinctly protectionist in tone. It declares that stability is desirable in

such public policy as relates to and affects all productive industries, and deprecates the efforts of the Iowa democrats to bring about free trade. The resolutions upon this subject further insist upon such revenue laws as will "encourage American industries and protect American labor," in order that American workingmen shall have "a fair day's wages for a fair day's work." Other resolutions deal with a variety of subjects such as are habitually overlooked in political platforms, as, for instance, the creation of a department of industry, the protection of employés in dangerous vocations, and the providing a means for the equitable adjustment of differences between employers and employés.

Canada, it appears, is practically to have the right to make her own commercial treaties; at least such is the inference to be drawn from the statements of Sir Alexander Galt, which have just appeared in print. Representatives of Canada are to be associated with the British minister, and the terms of a proposed treaty are in each instance to be submitted to the British government for approval. England, of course, reserves the self-preservative right of rejecting treaties which might lead to international complications or which might be otherwise objectionable. The important point is that the Dominion has the initiative, the right retained by the English government being confirmatory in its nature. The gentleman mentioned, however, is of the opinion not only that the independence question is a dead issue, but that it has never been a live one. That may be, but in the arrangement just referred to, one would think the germ of a very lively issue might be found in case a sufficiently important difference upon questions of commercial policy should arise between the Dominion and the mother country.

The *Century* for July is more than usually attractive. Mr. E. V. Smalley contributes two articles. One of these, entitled "Striking Oil," is a graphic and well-illustrated description of the oil regions of Pennsylvania and of the trade in their product. The other, on "The Philadelphia Committee of One Hundred," is a short essay on municipal reform, suggested by the overthrow of the Philadelphia ring. Among the papers of historical interest may be noted Mr. A. R. Boteler's "Recollections of John Brown's Raid," which is written from a southern point of view, and the "Comments of a Radical Abolitionist" thereon, by Mr. F. B. Sanborn. Another article of this nature is General Stone's paper on "Washington on the Eve of the War." The writer, more recently noted as Stone Pasha, of the Egyptian army, organized the District of Columbia militia for the defense of Washington in 1861, and gives from his special knowledge an account of the dangers that threatened the capital on the eve of the rebellion. The literary articles are of more than common interest, and include a study of "Anthony Trollope," by Henry James, and the conclusion of Mr. James Herbert Morse's discussion of "The Native Element in American Fiction."

The *Victorian Review* publishes one of the innumerable replies to "Progress and Poverty" with which the periodical press seems to teem of late. The author, Mr. J. Turnbull Thomson, has no sympathy with Mr. George, whose project he terms "a nefarious scheme." Mr. W. G. Carroll gives a sketch of the present condition of the civil service of Victoria, which appears to be in a somewhat unsatisfactory state. Efforts have been made before to put the civil service of the colony on a proper basis, but the results have been for the most part disappointing. The first Victorian commission was appointed in 1859. This commission made a report very general in its terms, which led to the enactment of a civil service act in 1862, which provided that every person, as a preliminary to admission, should pass a civil service examination. In 1870 a second commission was appointed to consider the subject. After suggesting a variety of regulations in regard to the commission, it recommended the appointment of a permanent civil service commission to report annually to the legislature, but suggested no change in regard to the manner of appointment. There seems now to be a demand for a system of open competition in the service, instead of the system of appointment by the ministers, which has hitherto prevailed, and which, it is alleged, has led to numberless abuses of the power of patronage. Mr. W. H. Dick contributes the second of a series of articles on "Gold and its Treatment." In "A Few Words About the Transvaal," an anonymous writer criticises severely the course of Mr. Gladstone's administration in South Africa. Mr. George A. Bicknell, a writer of jingo proclivities, advocates "The Annexation of New Guinea" on military and commercial grounds.

The July number of the *North American Review* is one of unusual interest. President Seelye, of Amherst, discusses "Dynamite as a Factor in Civilization." He expresses the opinion that whatever governments may be overthrown in the future, government itself will not cease, since advancing civilization neither weakens the power nor diminishes the necessity of civil government, but rather increases these, and that the attempted application of anarchical theories to the civilized world will find itself hindered quite as much by a popular instinct as by governmental resistance. Gen. P. H. Sheridan describes graphically the circumstances attending "The Last Days of the Rebellion," down to the surrender at Appomattox. Mr. William S. Holman, "the great objector," has an article on "The Increase of Public Expenditures." He shows that while Congress is charged with the control of the public moneys, and has the undoubted constitutional power to fix a definite limit on their expenditure, yet, because of the practice of "permanent and indefinite appropriations," the dependence of Congress on the executive departments for details of the public requirements, and especially the persistent habit in departments and bureaus of making expenditures and contracts involving expenditures in excess of the appropriations, which sooner or later in the form of "Audited Accounts" receive legislative recognition, the responsibility for the expenditures is practically divided between Congress and the executive departments. He points out the abuses to which this system leads and lays stress upon the necessity for constant vigilance if they would be even in part avoided. His views regarding the system of economy to be pursued by the government will be regarded by many as rather extreme, as when he says that "even the most sweeping retrenchments that have ever been made in our expenditures have not embarrassed the public service for an hour." The conclusion reached by him is characteristic, namely, that in a government like ours there is no safe ground between severe economy and prodigal expenditure.

SPECIAL CORRESPONDENCE.

NOTES FROM CHINA AND JAPAN.

Yokohama, May 30.—Business is about as dull in Japan as it well can be, and the outlook is not very bright. There is some uncertainty regarding the silk crop, but rumors of short crops are not always reliable, although that usually well-informed journal, the *Japan Mail*, puts the shortage in the three principal silk-producing districts—Joshin, Koshin and Shinshin—at 50 per cent. under last year's yield, owing to serious mortality among the worms. This is probably an extreme view, which the facts will not sustain. The tea trade has a fair promise at lower prices, which are regulated by the American market.

Considerable dissatisfaction has been expressed by Japanese at the liberal terms of the American-Corean treaty as compared with the treaty of amity and commerce between Japan and the United States. The Corean treaty recognizes, by the fifth article, that "the authority to levy duties is of right vested in the government of Chosen," but no such right is admitted in the Japan treaty. By consent of Corea, or Chosen, its right to levy ad valorem duties on certain articles is limited to 20 per cent.; in the case of Japan the line is drawn at 5 per cent. But for this restriction, which lies at the root of Japanese fiscal embarrassments, the United States is not responsible. The original fiscal regulations agreed to in 1858 by the Japanese, which were prepared by Mr. Harris, the American Consul-General, were quite as favorable to Japan as the Corean treaty is to the peninsular power; but these were altered a month subsequently by Lord Elgin, who represented Great Britain, and who took every advantage of the Shogun's government. By this latter instrument cotton and woolen goods were made subject to a duty of 5 per cent., instead of 20 per cent., under the Harris regulations. The innovations did not stop there, however. England and other European powers kept pressing the Japanese until all foreign importations, including wines and spirits, passed under an ad valorem tax of 5 per cent. The right of tariff revision is limited to periods of five years, "if the Japanese government desires it," in the American treaty; in the case of England and other foreign powers, the consent of both parties to revision is practically necessary. This restriction is very galling to Japan, and it has become more so since the Corean treaty was published. The foreign element (outside of Americans) is furious. It had hoped to be able to command the Corean trade without contributing anything to the support of the Corean government, which is practically the case in Japan, in which the cost of administration has been enormously increased by opening the country to foreign commerce. The United States would do well to take a bold stand in this matter, and at once recognize the right of Japan to regulate, in its own way, its own tariff and trade. This would strengthen its hold upon Japan. The foreign trade of Japan in 1882 with Corea was:

	Exports. Yen.	*Imports.* Yen.
Merchandise	1,587,682	1,202,475
Specie	74,746	578,135

Mr. Aston, of the English consular service, a gentleman thoroughly familiar with the Corean language and customs, is now in Corea negotiating a tariff to suit the British trader. He has been well received by the king and the Chinese representative, through whose good offices England concluded its treaty. Nothing has been done in this direction by the United States.

The new banking regulations issued by the Japanese government mark an important epoch in the financial history of the country. The effect of these regulations will be to withdraw from circulation in the next fifteen years 32,000,000 yen of bank paper, without any cost to the country, or any serious interference with the banks. The government takes the banks' reserve of 7,953,220 yen and buys with it 7 per cent. bonds, which are now at 20 per cent. discount, paying therefor 8.75 per cent. interest. Each bank is also to pay from its profits a sum equal to 2.5 per cent. of its note issue, the aggregate issue being stated at 31,812,880 yen. This fund will also be invested in 7 per cent. loan-bonds. This operation would redeem 18,789,390 yen of bank notes in fifteen years, leaving 13,023,490 yen in circulation. Against this circulation the government would hold as security loan bonds or fiat notes of a face value of 24,853,811 yen, and a real value at the present market price of 19,883,050 yen.

At this point the bonds purchased with the annual banking profit fund are to be applied to effect a further reduction. At present rates this yearly accumulation, with interest added, would be represented by 11,093,660 yen, which would be set off against the outstanding bank circulation of 13,023,490 yen, leaving 1,093,660 yen in circulation. The profit on the bonds themselves, however, which are redeemed at their face value by the government at maturity, is estimated to be sufficient to meet this amount, so that practically the entire bank note circulation of Japan, outside the Fifteenth National Bank, whose entire paper issue has been lent to the government, will be withdrawn from circulation in 1893. There will be no reissue of bonds, no increase of taxation, and no financial disturbance in anyway. Should government securities increase in value, as they probably will, the operation would not be seriously interfered with. The average unexpired term of the bank charters is fifteen years, and these financial regulations would seem to imply that they will not be renewed.

The foreign trade of Japan does not develop rapidly. This is owing in great measure to the rapid transition from Oriental exclusiveness to Western methods, to the displacements and industrial disturbances incident thereto, and to the operation of foreign treaties. Heavy expenditures have also been gone to in warlike equipments, and the civil war which suppressed the Shogunate and the feudal chiefs left its legacy of waste, debt and decay. Nevertheless, Japan is holding up to its obligations manfully, and will yet become a leading manufacturing and commercial nation. Greater attention is being paid to agriculture, and improved machinery and implements of husbandry will probably be introduced from America. The tendency is in that direction.

From China there is not much to report beyond the dispute regarding the right of foreigners to operate manufacturing industries within the concession limits at treaty ports. The Chinese maintain that no skilled labor can be employed at productive industries, while the treaty powers contend that it can. For two years this dispute has been pending between the T'sung-li Yamen and the foreign representatives. The dispute in the present case is as to the meaning of the word "kung-tso," which in the German, French and Belgian treaties is translated "industrie," but by the T'sung-li Yamen is rendered "manual labor." Under this limited interpretation they deny the right of foreigners to establish factories at treaty ports, and therefore object to the employment of Italian silk operatives in the three foreign filatures at Shanghai. The Italians supply the skilled labor and machinery, and the bulk of the filature products is shipped to Milan. But it is said that although nominally British and American firms run these establishments, the capital is found by Chinese, who thus evade taxation. The authorities naturally object to this. A similar practice prevails quite extensively in the open ports of Japan, subjects of the empire doing business within concession limits, and avoiding taxation by pretending to be servants of their landlords. In China, according to the *North China News*, mandarins in the interior are urging the people to pull down the stoves or furnaces of the foreign silk filatures for drying cocoons, assuring them that such structures are no longer under the protection of the authorities. The hostility of the Chinese government to foreigners is further shown by a decree from the T'sung-li Yamen ordering that all land telegraphs be built exclusively by Chinese, and that the Great Northern may only connect up to a point outside the ports. Referring, in this connection, to a statement in the New York papers some time ago, to the effect that the objection to the American silk factory was caused by the Chinese immigration law, nothing could be further from the truth. The Chinese government is irreconcilably opposed to foreign competition in China in any shape or way.

The China Merchants' Steam Navigation Company, which contemplates establishing a line of steamers between Shanghai, British Columbia, San Francisco and Honolulu, has determined upon launching out boldly to capture the South American trade. A direct line of steamers is to run between Shanghai and Brazil, touching en route at Genoa. This would divert much of the China trade with Italy, which now passes across America from San Francisco. Agencies are to be established at Genoa and Rio de Janeiro. Representatives of the company have started for Europe, and are empowered to buy steamers in England. A systematic trade in coolies to Brazil will be established. As it now looks, China will divide the carrying trade of the world with England, while England makes money by furnishing ships. The United States government is content that foreigners—even Chinese—should do all its carrying trade to "protect" one or two shipyards in a wasteful monopoly on the Delaware.

There are continued rumors of war. China and Japan are arming, for what purpose one cannot well make out. China is fearful of France, but its real enemy is Russia, and against the northern power its fleets are no defense.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

The question whether the word "person" includes corporations was the controlling one in the case of the Phœnix National Bank vs. Ellis, decided by the general term of the New York Court of Common Pleas on the 25th inst. It appeared that in 1865 the United States government seized certain money held by the Phœnix Bank as the correspondent of the Georgetown Bank of Georgetown, S. C. The seizure was made under the authority of the acts of Congress declaring the forfeiture of goods and money owned by persons in insurrection or likely to be used for insurrectionary purposes. Ellis, who had bought from the receiver of the Georgetown Bank its claims against the Phœnix Bank, sued the latter for an accounting of its business with the former, and for a judgment for whatever sum should appear to be due thereon. The bank set up the action of the United States as a bar to the suit, but this plea was disallowed and judgment given for the plaintiff by the Court of Common Pleas at Special Term. This judgment was affirmed by the General Term in an opinion written by Chief-Justice Daly, in which it is held that the seizure by the United States did not release the bank from liability inasmuch as the forfeiture acts passed by Congress on August 6, 1861, and July 17, 1862, did not authorize the confiscation of the property of corporations, and the seizure was therefore illegal.

Under the charter and the ordinances of the city of St. Louis the appointment of the assessor of water rates was for a term of four year and until his successor should be appointed and qualified. The charter of the city prohibited any change in the salary of any officer during the time for which he was elected or appointed. The city council passed an ordinance which was approved before the expiration of the four years' term increasing the salary of the officer above referred to. When the term of the assessor expired no successor was appointed and the assessor continued to discharge the duties of his office. The assessor applied to the auditor to have an account for the salary at the increased rate audited, but this was refused by the auditor. The St. Louis Court of Appeals, on the 19th inst., in the case of the State ex rel. Stevenson vs. Smith, decided that the incumbent was entitled to the salary after the

expiration of the four years at the increased rate. The court held that the word "term" in the prohibitory clause of the charter and in the ordinance should be interpreted to mean the definite period of four years fixed by law for the tenure of the office and not to include any period that the officer might hold over under the terms of his appointment to prevent an interregnum.

In a recent suit upon a promissory note in the St. Louis Court of Appeals it appeared that the notary mailed at the St. Louis post-office in due time a notice of demand and refusal to defendant, the indorser of a promissory note, directed to him by his name at Washington, D. C. The notice was sent during the Christmas recess of Congress. Defendant was a member of the House of Representatives and was in the habit of receiving his mail at a special post-office. It did not appear that this was known to the notary, but it did appear that as to the notice he followed directions received by him on inquiring at the St. Louis post-office, where the notice was mailed. The court in the Bank of Commerce vs. Chambers, decided on the 12th inst., held that this evidence would warrant a finding of sufficient diligence to hold the indorser, the law exacting of the holder of negotiable paper not that he shall give actual notice to the indorser but that he shall use reasonable diligence to do so.

An agreement to take shares in a company to be formed inures to the benefit of the company when organized according to the opinion of the St. Louis Court of Appeals in the case of Haskell vs. Sells, decided on the 12th inst. The court further held that where the written subscription to shares was unconditional on its face a contemporaneous understanding between the subscriber and the promoter that the subscriber should have an option to take the shares or not could not be set up by the subscriber as a defense after others had been induced to subscribe on the faith of his subscription. The liability of the subscriber having been once fixed by subscription could not be avoided by notice on his part to the promoters that he declined to take the shares, nor could such liability be affected by the fact that he failed to meet subsequent calls, that no call was made upon him, that he participated in no meetings of the company, and that no certificate of stock was issued to him. Stock being a trust fund for the benefit of the creditors of a corporation, and being created by a binding agreement to take shares, such a contract in the opinion of the court could not be released by the officers of a corporation without consideration and in fraud of the rights of other stockholders and of the creditors of the corporation.

The question under what circumstances one person may insure the life of another for his own benefit was before the Kentucky Court of Appeals in the case of Basye vs. Adams, on the 16th inst. The court held that it was essential to the validity of a policy of insurance obtained by one person for his own benefit upon the life of another that the party so obtaining the policy should have an insurable interest in the life of that other, and that the assignment of a policy to a person not having an insurable interest was as objectionable as the taking out of a policy in his name. The court further said that to constitute an insurable interest there must be a reasonable ground, founded upon the relations of the parties to each other, either pecuniary, or of blood or affinity, to expect some benefit or advantage from the continuance of the life of the assured.

BUSINESS NOTES.

Parisian workmen and artisans have conceived a novel method of preventing competition from foreign labor. At an industrial congress recently held in Paris they adopted a resolution "to compel masters to pay all foreigners the same rate of wages as are paid to French workmen."

The president of the Southern Pacific railroad has promised to aid the California farmers in marketing their surplus wheat and other crops by giving competitive rates to Liverpool from San Francisco, via the road named to New Orleans and thence per steamer. He claims to be equipped to transport one-third of California's immense crop, and, if necessary, can get the extra cars to carry one-half of it. It is proposed to land wheat in Liverpool by this route in thirty-one days.

The total number of failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette*, during the week ended June 9, was 224 against 196 in the same week of 1882, and 200 in the corresponding week in 1881. England and Wales had 202 against 169 and 188 respectively in 1882 and 1881; Scotland had 19, against 20 and 12, and Ireland 3, against 7 and none each in the weeks specified in 1882 and 1881. The groceries and provisions trades lead in the number of disasters reported, followed by about half as many (each) liquor and clothing dealers.

The Baltimore *Manufacturers' Record* announces that twenty-five steamships are due to arrive at that port prior to September with 45,000 tons of iron ore from Mediterranean ports. It is estimated that the total quantity to arrive during the period named will equal 90,000 tons. Since January 1 the total receipts at Baltimore have been 93,000 tons, against 50,000 tons in a like portion of 1882. The bulk of this ore goes by rail to the Pennsylvania steel mills. To move the 90,000 or 100,000 tons to arrive within sixty days about 10,000 cars will be required. Freights from the Mediterranean to this side are now low.

The annual convention of the National Millers' Association was convened in Chicago during the present week. There was, as might be expected, a good attendance from the northwest. The subject of rates of transportation was discussed with a view of overcoming the advantage to grain shippers who can hold and ship at the most favorable seasons. The matter was referred to a committee. A member who has lately returned from Europe reported that large quantities of flour are in store in foreign countries, and that the crops are prospering unusually well. He predicted that fancy prices would not rule for flour during the current year.

The British labor market, as reported by the London *Labour News* of June 13, was still unsettled. Building and construction continued active, but the trouble in the colliery districts had not been done away with, particularly in North Staffordshire, where the strike was in its fifth week. The Norwich brushmakers had also struck, but the boot and shoe strikers had returned to work. The industrial situation in Scotland was fairly good. At Birmingham and at Sheffield (except in the file trade) business was brisk. There was a good demand for haymakers in the agricultural districts, as well as for hop and fruit pickers. Emigration was "steadily progressive."

It is estimated that the forthcoming New Orleans cotton exposition will require not less than 10,000,000 feet of lumber. A large quantity will be required also for the railway station to be built at the exposition grounds. It is maintained that this extensive employment of native southern woods will afford an excellent opportunity to so dispose them as to, in reality, constitute an exposition of southern lumber. The New Orleans *Times-Democrat* says that the southern lumber mill men have, as a rule, been compelled to live from hand to mouth, thinking themselves fortunate if after a season's work they were out of debt. That there are various areas of undeveloped forest land contiguous to that city and that it has been permitted to lie untouched, undeveloped, for lack of energy, capital and attention, is a fact still more notorious.

The *Pioneer Press* of St. Paul, Minn., has information that preparations are making to drive the the last spike on the Northern Pacific road. The place for driving it, when the last rail in the now fast closing gap in Montana is placed, is said to be about ten miles west of Helena. The spike, of course, is of gold, and is said to have been appropriately engraved. It is now in the possession of Mr. Villard, the president of the road. An excursion train from New York is expected to start west for the scene of spiking the last rail, which will carry about one hundred invited guests, "including some from Europe." The sledge to be used in persuading the golden spike to bury itself, is to be of silver, with an ebony handle. Mr. Villard expects to wield the sledge first, and if more force is needed other "prominent men" will be allowed to swing it. The occasion will be full of significance to "the great northwest."

The Russian section of the International Fisheries Exhibition at London shows that the extent and importance of that industry in the Russian empire have not been well understood heretofore. It appears that the quantity of fish caught annually in the European portion of the empire amounts to 645,000 tons, including 700,000,000 head of roach, and that 3,225 tons of sturgeon caviare are produced yearly. One section of the collection includes the Schemaya (*Alburnus chalcoides*), found on the shores of the Caspian sea, somewhat resembling a large pilchard, very rich in oil, and also a fish which is between the sturgeon and the sterlet, being more agreeable to the palate than the former, and possessing a higher nutritive value than the latter. A product, comparatively new to commerce, is shown in some lamprey oil of a fine orange color. Although the lamprey itself is eaten either salted or pickled, the oil only serves for illumination and lubrication.

The recent charges made by McGeoch, the bankrupt Chicago speculator, that certain grades of lard were unfit to deliver on contracts as they were adulterated with cottonseed oil, seems to have brought the makers of the last-mentioned article to the fore. At a meeting of cottonseed oil manufacturers held at Chicago during the past week about sixty mills were represented. In discussing the charges of "adulterating lard with cottonseed oil," the members present endorsed the views of those who alleged that such adulteration actually improves the lard, or rather, that the boot is on the other leg altogether, and that the lard spoils the oil. Each is said to be better without the other, and oil for cooking purposes was declared to be better than lard, which always contains a percentage of water. The process of manufacturing the oil is said to be perfectly cleanly. The product is said to be 33⅓ per cent. cheaper, and the belief was expressed that cottonseed oil will yet take the place of lard for cooking.

The following national banks have been organized: The First National Bank of Salisbury, N. C.; capital $50,000; S. W. Cole president; I. H. Faust cashier. The First National Bank of Cleburne, Tex.; capital $50,000; Christopher W. Mertz president; Oliver S. Heath cashier. The First National Bank of Tipton, Iowa; capital $50,000; Herbert Hammond president; C. A. Snyder assistant cashier. The Hamilton County National Bank of Webster City, Iowa; capital $50,000; Leslie A. McMurray president; O. K. Eastman cashier. The Merchants' National Bank of Seattle, Wash. Ter.; capital $50,000; Angus Mackintosh president; William H. Reeves cashier. The Capital National Bank of Bismarck, Dak.; capital $50,000; Nehemiah G. Ordway president; William G. Nixon cashier. The Bank of North America, Philadelphia, has elected Charles S. Lewis president, in place of T. Smith. The First National Bank of Portsmouth, Ohio, has elected James G. Gordon president, in place of E. Miller.

The London *Statist* publishes a review of a work recently published, which severely criticises the wisdom of the proposed Manchester ship canal. Readers of BRADSTREET'S will recall that this project contemplates the construction of a ship canal from the Mersey to Manchester, in order to render the latter city in some respects a seaport, and to give its enormous and varied industries the advantage of water-route rates as a check on the railroad tariff to the seaboard. Mr. Provaud, in the book referred to, discusses the probable cost and earning power of the proposed canal, and concludes that, while a canal is a necessity, it must be a different kind from that proposed in order to pay. It would have to be free from the financial and engineering difficulties of a ship canal, and would have to cater for a trade which it could get and work profitably, and not be like the present scheme, which aims at a trade of which it could get only an insignificant portion, and which would have to be done on non-paying terms. The canal, as designed, would be too small for large ships, and will be more than twice the depth required for a steam barge that could carry 500 tons of cargo.

It is announced that two new cables will be laid between Europe and America during the present year by the newly-chartered "American, British & Continental Cable Company." The cables are now making in England, and it is said will cost one-third less than former cables, owing to an improved method of manufacture. The first cable will extend from the vicinity of Glasgow, Scotland, to Belle Isle, 300 miles north of Heart's Content, Newfoundland. This will connect direct with the Dominion telegraph system. The second cable will extend from Penzance, Land's End, England, to Sable Island, about 200 miles southeast of Halifax, Nova Scotia, and from thence to the easterly end of Long Island, where land for the terminus has already been secured by Alderman Hadley, of London, who has been in New York arranging the details of the cable project here. It has been stipulated that there shall be no pooling of earnings or combination with other cable companies by the terms of the contract made for connection with an American system of telegraph lines. It would be interesting to learn if the Postal Telegraph company is to reach Europe by means of these cables.

A pamphlet has been published by Mr. William Campbell, "an old Victorian (Australia) statesman," entitled, "India in Six Days, and Australia in Sixteen." The plan is based on the necessity for closer communication between England and her Indian, Australian and other colonies in that quarter of the globe. The long-talked-of Euphrates Valley and Rangoon (Burmah) railways doubtless suggest the line of railway which Mr. Campbell says should be constructed by Great Britain, as follows: From Constantinople along the Euphrates valley to Kurrachee in India, thence across Hindostan to the Ganges, from the sacred river to Rangoon, thence along the Tennasserim coast to Singapore, where passengers and mail would be shipped for Port Darwin, Australia, in fast steamers. This rail line, if built, which is not more improbable than was the laying of an Atlantic cable twenty-five years ago, would render it possible to throw the notable feat of going "Round the World in Eighty Days," made by Jules Verne's well-known hero, well into the shade. Thus, the journey could be made from London to Australia in sixteen days; Australia to San Francisco, thirty days; San Francisco to New York, six days; New York to London, say ten to eleven days—total days, sixty-two.

The production of beer in the United States for the year ending May 1, according to Wing's Brewers' Handbook for 1883, was 537,832,144 gallons, an increase of 22,723,806 gallons over the product of 1882, about 4½ per cent. The total production during the past year allows an average of 10 gallons to every man, woman and child in the United States, or about 160 average-sized glasses each, per annum, or one glass every two and one-fifth days per capita throughout the year. Considered as a nation, therefore, the beer-drinking proclivities are seen to be quite moderate. Unfortunately, however, a great many people not drinking beer, places a heavy load upon others to maintain the average rate of consumption noted above. The south drinks the least beer, but it is to be feared they make up for less beer with something stronger. Leaving out Missouri, each of the cities of Boston, Cincinnati and Newark drink more beer per annum than is consumed in the southern states. New York state consumes the greatest quantity. Georgia appears to be taking kindly to the custom, as she consumed 11,000 barrels last year, against but 2,870 barrels the year before. Less beer was sold last year in Iowa, Indiana, Kentucky, Tennessee, Louisiana, Nevada, South Carolina, Texas, Arizona and Wyoming than during the preceding year, but the decline was small. It would be gratifying to learn that the increased consumption of the milder malt beverage meant a corresponding decrease in the quantity of "hard liquors" consumed. Here is a good field of inquiry for the brewers' statistical friends to work in. If they can show this they will have a weapon of defense which will win them friends where they need them.

MEMORANDA FROM THE JUNE COTTON REPORT.

The following memoranda of correspondents are from the June cotton report:

NORTH CAROLINA.

From Cabarrus county: The weather continued dry until about two weeks ago, which caused the stand in red-clay lands to be almost a failure; but since the rain the stands have improved very much, and with warm, favorable weather the plant is growing finely. Since the 5th inst. the grass has been growing fast.

From Cleveland county: The weather for the past ten days has been very fine, with light rains. Cultivation was never better; no grass, and labor plenty. Farmers are very hopeful.

From Craven county: The cotton crop came up well and bade fair to be a fine one, but the cold weather in May and rain during the past eight or ten days have materially retarded its growth, and the prospects can only be called fair.

From Cumberland county: The plant is two weeks later than last year and much smaller. The weather is good now, and the plant is growing well and is free from grass.

From Harnett county: The past month has been too wet generally for the successful cleaning and thinning of the plant. The stand is good, but, on account of so much rain, the fields are very grassy.

From Lenoir county: Stands are generally good, but heavy and continued rains are preventing cultivation, and grass is getting the upper hand. Prospects for a good crop at this time may be considered fair.

SOUTH CAROLINA.

From Abbeville county: The weather during the month of May was dry and cool, and cold winds injured the plant to some extent. We had frost on the 23d, but it did not injure the plant materially. The fields are well worked. The crop is about two weeks later than last year.

From Aiken county: Cotton is somewhat smaller than an average, but is green and healthy. Have had a week's rain, which has made the grass grow very fast, and if it continues much longer we will be badly in grass.

From Barnwell county: We had no rain in this section from the 18th to the last day of May. The plant did not appear to suffer, but did not grow much. The dry spell enabled farmers to clean the crop well from grass. The stands are good, but the plant is small and about ten days late. We have had plenty of rain for the last six days, and the plant is now doing well. There is a fresh crop of grass growing up now, but planters, being well up with their work, can attend to it.

From Charleston county: The weather from May 18 to June 1 was too cold and dry. Since then it has been more favorable and stands have improved, but are not yet satisfactory, and will require good weather to regain lost ground. The above refers to Sea Island cotton.

From Chester county: Since May 18 there has been a decided change in the prospects for cotton, and, although the plant is small and ten days late, it has been well worked and looks healthy.

From Clarendon county: The plant is small, but growing well. The fields are badly in grass. The weather had been fair for the growing crop up to June 1, but since that time there has been too much rain. On the 1st day of June there was a heavy fall of rain, washing away crops on the hillsides and inundating lowlands, and generally causing much damage. The prospects may, however, be called fair for a good crop.

From Colleton county: The crop is generally backward and grassy. For the last six days we have had continuous rains, which have rendered the ground too wet to work, and farmers are complaining greatly of grass, which has no doubt already injured the crop.

From Darlington county: Continued heavy rains for ten days past since June 1 has caused considerable grass to grow, and to some extent has been damaging to the present growth of the plant. Stands in some places have been damaged by taking the grass out.

From Lancaster county: The weather, on the whole, has been very favorable for the last three weeks. The stand is very good—better than at this date last year. Owing to the recent rains the crop is not quite so free from grass as last year.

GEORGIA.

From Bartow county: We had some cold weather he last of May, but since then the weather has been warm and damp, and cotton is doing finely.

From Brooks county: We think the present prospect for a good crop an average one. Stands are good. The plant is considerably smaller than usual at this season, but we do not regard that as very unfavorable, provided the caterpillar does not come too soon.

From Burke county: The weather had been very dry for a month up to June 6. Since then we have had too much rain. The stand is only fair, plant small and young, but cultivation good. The outlook for fine weather is now good.

From Butts county: The weather since May 17 has been all that could be desired for cotton. The stands were somewhat damaged in low, wet lands during the cold snap in May, but the higher lands have good stands on them. The cultivation of the fields has never been better, and they are free from grass.

From Campbell county: On the morning of the 19th of May there was a slight frost, which did some damage on low grounds, though not very material. The cold weather following retarded the growth of everything for a few days, but for the past three weeks the weather has been very favorable for cotton. Cultivation is good.

From Cobb county: Stand of cotton is regular, but plant is very small and crop at least two or three weeks late; fields clean and free from grass. We have had frequent rains during the last ten days and warm weather, which have improved the crop outlook.

From Dodge county: The spring has been unprecedentedly good for cleaning the crop, and it is free from grass where moderate labor has been applied. The crop prospects at this time are good.

FLORIDA.

From Alachua county: The fact that this country is experiencing its "rainy season" in June is considered as a favorable sign or augury for the growing crop. The usual hot, dry August will kill out the caterpillars should that scourge prevail on account of the rains.

From Baker county: Most planters say that the prospect for a good cotton crop is good, but complain some of grass. We are now having plenty of rain.

From Columbia county: The stand is good, but owing to the late spring and the recent rains there is some danger of too much grass; also a great danger of caterpillars.

ALABAMA.

From Barbour county: We have had entirely too much rain for the last two weeks for crops of all kind, and hear some complaint of grass. The cotton plant is small, but in a very good condition.

From Chambers county: There has been too much rain in this section for the past ten days for the good of cotton. Stand is good. Cultivation fair up to the past ten days. In consequence of so much rain there is considerable grass in cotton.

From Dallas county: During the last ten days of May the weather was too cold, but did no injury save retarding somewhat the growth of the plant. Since June 1 all the conditions have been favorable, and in no respect is there now cause for complaint.

From Lauderdale county: We have as favorable prospects for a good cotton crop as we have had since the war. The farmers are well up with their work, and are not disposed to go in debt as formerly. They have plenty of corn and fodder, and more provisions on which to make a crop than for a good many seasons past. The crop is clean and in good condition.

From Madison county: For the past eight or ten days we have had an excess of rain, not sufficient to cause any damage as yet; still planters fear that if it continues another week crops will get badly in grass.

From Perry county: Recent rains, which threaten to continue, will make the crop grassy. Within the past week much complaint is heard from the ravages of cut-worm in the cotton in old lands.

From Pike county: The weather since May 18 has been good until the last five or six days, when we have had rather too much rain. The stand of cotton, we think, is good enough. Some think it too thin; but when it spreads they will find a very good stand—in fact, as much as the land will support. The cultivation has been exceedingly good this year in this section.

MISSISSIPPI.

From Alcorn county: The weather has been extremely favorable, and stands were never better. The fields are well cultivated and prospects are good. Labor is plentiful.

From Attala county: The present season has been unusually good for cultivation of cotton and nearly all fields are clean, but the weather has been unusually cold throughout the whole season and the plant is very small and backward, fifteen or twenty days later than last year. Have not had a week at one time of growing weather this season.

From Bolivar county: The stand throughout the county is not good; I think due mostly to the cool weather. The cultivation is good, and but for the bad stand the outlook would be good. The weather has been too cool heretofore, but is now good.

From Clay county: The stand of cotton is only fair and the plant is very small, but doing well since the weather is better. We have had too much rain, which has caused the grass to get a good start, and it will take more work than usual to kill it out; but with a continuation of the present good weather we will have good prospects for a crop.

From Hinds county: The weather for May was fine for cotton, and it is now clean and in good order. We are having a showery June and very warm but fine weather for the plant.

From Jefferson county: Very cold weather since last report has injured the stand, and heavy daily rains have put cotton in grass. It has sustained an injury here already, and unless the weather should be exceptionally good from now out, the outlook for a good crop will be bad.

From Lafayette county: Owing to dry and cold weather to June 1 the plant is backward in growth. Nearly all farmers report lice on cotton, but up to date it is comparatively free from grass.

From Leake county: The weather for the cultivation of the crop has been unprecedentedly good, and cotton for the past two weeks has been growing finely. The stand cannot be called more than fair.

From Monroe county: During May the weather was rather too cool, and retarded the growth of the plant; but since June 1 we have had very warm weather, with warm rains, which have improved the condition very much. The stands generally are reported good and fields clean of grass.

From Rankin county: Owing to cool nights the crop is about two weeks late, but is now in good growing condition and free from grass. Labor is working well.

From Washington county: Owing to wet weather the crop is at present grassy, and the stand somewhat injured by cut-worms and grasshoppers. The crop is fully two weeks later than last year. If the weather continues rainy the crop will be materially injured.

From Wayne county: Owing to continued wet weather the farmers have not been able to work, and if the present state of the weather should continue many days longer the crop in this section will be ruined. As a general thing there is a good stand of cotton; but in many instances, where cotton had been put to a stand during the dry weather, after the wet weather set in a new and full stand of cotton came up, and also a magnificent stand of crab grass, and in consequence of this fact it will have to be rechopped when the weather will admit it. Upon the whole the present prospect is anything but encouraging to farmers.

LOUISIANA.

From Bossier parish: The weather of late has been very unfavorable to the plant, as the rains prevent the crop from being cultivated as it should be, and the grass is growing rapidly. As to the stand, I would say that in some localities it is good and in others bad, but I think that the average may be called fair.

From Caddo parish: Within the past ten days we have had very heavy rains, flooding the country generally and making grass-killing impossible. I have never seen grass and weeds spring up so suddenly as they have in ten days. I now consider the prospect only moderately good for an average yield, and I fully calculate on 10 per cent. less yield than last year under the most favorable circumstances from this out.

From Concordia parish: We have had a little too much rain in this section since May 18, but lately have had hot and dry weather. Cotton has a fair stand and looks healthy; as a general thing is free from grass. Labor plentiful. Found on one plantation on the island in Lake Concordia about forty acres in full bloom and well bolled. Consider the outlook very promising if dry weather continues.

From East Baton Rouge parish: For the past three weeks we have had rain nearly every day, and crops are seriously injured, being in grass, and unless dry weather prevails we will find them injured to a very considerable extent.

From East Carroll parish: The weather since June 1 has been good for cotton, but up to that time it was very bad. The crop is very small, but with a favorable season we may make a good crop. All depends on the weather hereafter. In some places, where the negroes are left entirely to themselves, the crop is quite grassy. It has been raining now for three days, and if it continues the stand may be injured trying to get the tie vines worked out.

From Madison parish: Cotton is freer from grass than ever known at this season, and the weather since June 1 could not be improved upon. The land is in excellent condition.

From Sabine parish: Weather has been fair up to the 1st of June and favorable for cultivating crop. Since then have had good rains all over the parish, but not too much to prevent working.

TEXAS.

From Corsicana county: Since last report we have had fine rains, and the condition of the crop has been materially changed for the better. Much more rain at present would be detrimental rather than beneficial. Taking everything into consideration, we may expect a fair outturn next season. Farmers are in good spirits.

From Gudalupe county: The fields are better cultivated than I have ever seen. The grass has not bothered much on account of so much dry weather. I would call the prospects for a good crop very fair. The plant is small but thrifty and well formed.

From Harrison county: Planters were a little backward in planting on account of cold weather. The weather since has been very favorable, and the crop is as far advanced as at this time last year. The fields are well cleaned, and the general condition of the plant is good.

From Henderson county: Heavy and frequent rains have fallen since the 1st of June, retarding the progress of cultivation, but have imparted an unusual stimulus to the growth of the plant.

From Hill county: We consider the prospect good for cotton now growing. Up to June 1 the weather was dry; since then rains have set in, and, while the season is two or three weeks late, with favorable weather in the future this will not be detrimental to a good yield. Taken altogether, we consider the outlook fair.

From Lee county: The weather for cotton is fine and stands are tolerably good. Cotton bloomed earlier than for years. Some blooms were seen the last of May.

From Leon county: The plant is rather small for the season, and some farmers on black land are complaining of its dying out. We have had seasonable rains, and a few warm nights will add to the looks of the plant greatly.

From McLennan county: The spring was very cold and we had unusually dry weather until the 5th. Since then we have had good seasonable rains with warm weather. The plant is now doing fairly, but is still about ten days behind last year at the same time.

From Robertson county: At this writing (June 15) our prospects for cotton are very flattering, with good stands, a healthy and vigorous plant and a generally clean condition. We are now having too much rain, and should it continue it will soon cause injury. With favorable weather for sixty days an immense crop will be made in this section.

ARKANSAS.

From Arkansas county: Owing to wet weather the farmers are behind with cleaning their crops, and it will require two or three weeks of good, clear, hot weather to put crops in good condition.

From Bradley county: Since May 18 we have had almost too much rain, and some fields have become very grassy. The plant is small, but the weather is now warm, and the plant is growing very well.

From Clark county: The plant is looking very well now, and is just beginning to grow out of the crisped, lousy condition that was caused by the cold nights in May. There has been too much rain for the proper cleaning of the crop, and grass may prove troublesome.

From Clay county: Since May 18 we have had frosts, cold nights, and almost continuous wet weather. The stand is very bad, the cool weather killing the plants. Fields are very grassy, and the ground is so wet that farmers cannot plow.

From Cross county: We had a frost about June 23 that killed a part of the cotton in many places in the county, and it was wet and cold for two weeks following, and the plant became lousy and prospects were very gloomy; but for the last two weeks or ten days the weather has been warm, and the plant has come out wonderfully, and looks well, but very small. We are having too much rain; but should the rain stop now for two weeks the farmers would have their crops free from grass and weeds; should the rains continue the crops will be in bad condition in two weeks. Most of the farmers are done chopping and going over the second time. On the whole we consider the prospects for cotton yet good.

From Dallas county: We are having entirely too much rain, and the fields are very grassy. If we do not have fair weather soon the grass and weeds will be serious.

From Hempstead county: The farmers are well up with their work, but the late warm showers are putting them behind; besides, the plant is growing so rapidly that a short drouth would do serious injury.

TENNESSEE.

From Carroll county: The crop needs work now, as it has been too wet nearly all the time for two weeks past. If we should have two weeks more wet weather the crops will be in very bad condition as to grass and cultivation, but if dry it will be put in good shape.

From Crockett county: We are having too much rain, and as a consequence cotton is grassy. On the night of May 29 we had a severe hailstorm that totally destroyed the crop in spots, some farmers having to begin again anew with planting. The area covered by the hail was about five by twenty miles, but spotted in said area. Otherwise the stands are good and the plant is growing well. We need dry, hot weather.

From Fayette county: During the latter part of May and up to date we have had frequent and some very heavy rains, delaying very much the cultivation of the plant, which is now very grassy and full of lice. After each rain we have had very cool weather and one heavy frost, which at one time we thought would ruin the stand, and did damage it to a very great extent in this section.

From Hardin county: The weather has been warm and wet for two weeks nearly, and the cotton is growing and coming out fast, but is now getting somewhat grassy. Good stands are generally reported.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

It is scarcely necessary to say there has been no particular bull feeling observable in Wall street this week. As the full proportions of the Chicago failure opened themselves and the silliness of the silly talk about all trouble having blown over was demonstrated by the news daily received of the violent shrinkage of values in the market there, it was matter for wonder that the stock market held up so well as it did. Were it not that stocks are so concentrated in the hands of professionals, and that prices are down to a safer level than they were eighteen months ago, there would not be such steadiness. The condition of the Chicago banks caused some uneasiness, for it appears that they are creditors of the defunct firm of McGeoch to the extent of $4,000,000, and for this large sum they have the lard on which the advances had been made. Beyond this causes nearer home worked for depression of prices. The constant cutting of rates by the Lackawanna road having told heavily on the west-bound business of the Erie and New York Central lines, they were impelled to make a move in retaliation by creating a fifth class of freight, at 25c. per 100 pounds, into which was put substantially all the articles which had previously been classed as fourth class, paying 35c. The Erie Company compelled this, that having been the principal sufferer by the Lackawanna's cutting. The same company is also reported to have cut heavily on its passenger rates to Buffalo, to meet the cut rates of its new rival. Nevertheless, it was not Erie stock which has been most depressed this week, for, while that seems to be well supported by Mr. D. O. Mills and his following, no concerted raid has been made on it by any one of the big operators, and without this no sudden break comes, though the price may go on showing a slow shrinkage. New York Central is the stock over which the warmest fight has been made by bull and bear, and it was forced down at one time to 118½, while several thousand shares were sold one per cent. below that, seller 60—that is, the seller need not deliver the stock until the expiration of the period named. This is a method of selling short sometimes employed where the stock has been made scarce for immediate delivery. In the case of New York Central it has been made so scarce this week that at times it was only to be borrowed at a high premium, and Jersey Central was subjected to the same manipulation. A few days of such "squeezing" generally compels all the small bears in the stock to cover their short contracts. Only the big ones can stand the great cost of remaining short, unless the stock happens to decline rapidly. In that case the profit on the fall compensates everything. The "squeezing of the shorts" in Central resulted in sending the price back to 120, when the market had a rally on Thursday afternoon. It went a fraction above this figure yesterday.

One other stock was broken down in price, and in its fall did more to break the general market than the decline in the Vanderbilts—this was Denver & Rio Grande. Indeed, it was really this stock which did the mischief. It was selling on Monday at 45¾, and after acting queerly all the morning, in such ways as indicate to the professional eye that there is some move afoot in it, the price began to drop by eighths, and with great activity in the trading and no little excitement it declined to 43¾, a clean drop of 2 per cent., most of it made in the last hour. Next day it held steady, but on Wednesday it broke another 2 per cent., to 41¾, and once more with most demoralizing effect on the general list, for the raid on New York Central was proceeding at the same time. There was a great flurry about the matter, every one inquiring what was the matter with Denver, why it was being sold, and whose stock was coming on the market. There was a rumor that washouts had occurred on the line, which was highly probable, considering that the road runs through a region where water is so valuable that it is sold by the cubic inch; another rumor that the company was in trouble about its July interest, but that is already advertised to be paid. No inquiry could get a satisfactory response, and the street was forced to conclude either that one of the pool in this was selling out on his associates or that some of the clique whose stocks Mr. Woerishoffer had been bearing had attacked his Denver by way of retaliation. In the Thursday rally Denver advanced to 44 almost as rapidly as it had previously gone down, and the advance gave a powerful stimulus to the market. It may be suspected that the move both ways was a trick of manipulation, done for effect; and the general up and down way in which prices have been moving seems to show Mr. Keene's hand. He has practically been out of the market for several weeks, being engaged in oil speculation and with some other outside matters which appear to have taken up all his time. Yesterday the market was rallied again by putting up Reading, and a general appearance of strength given to it.

Mr. Gould has done little with his stocks. They have followed the market in a moderate way up and down, neither helping nor hindering. Western Union has hung between 85 and 87, generally near to the first figure, and the talk about listing it on the London Exchange, about the transfer agency at the London Joint-Stock Bank, and about Mr. George Gould's mission, has died away. It was given out that no decision was expected from the Court of Appeals until after the summer recess of the court, which does not end till next October. Yesterday the court adjourned for the term, and no decision was handed down. None can now be given until it reassembles. This seems to indicate a complete miscarriage of Mr. Gould's plans. The London transfer agency may close up its doors for the summer. Some people hint that the Court of Appeals has really reached a decision adverse to the validity of the stock, but consented to allow it to stand over till the fall to give Mr. Gould time for making arrangements to meet this state of affairs. It is not unlikely the facts will be known one way or the other before October.

The Stock Exchange has been notified of an intended increase by the Wabash Company of its common stock to the extent of $2,600,000. The new issue is to be exchanged for the stock of one of the numerous roads absorbed into the Wabash system two or three years ago. It was supposed the transaction had been completed at the time, but the Wabash Company is one of surprises, and there is no knowing how many more it has in store. Some day it may be found to be earning its fixed charges, which would be the greatest surprise of all. In this stock increase the Wabash is only following the prevailing fashion. The Governing Committee of the Stock Exchange, at its last meeting before the summer adjournment on Wednesday, added to the list new securities of the par value of $108,000,000. They also rejected applications to list about $50,000,000 more. This was a conservative policy, first shown at the former meeting, where certain stock was rejected until the road it was issued on should be further developed, but its bonds were admitted. Among the refusals of Wednesday was the stock of the Chicago & Atlantic line, over which the Erie now gets into Chicago. The committee considered it bad policy to list the stock while it was held in bulk in the Erie Company's treasury. Mr. Gowen's Reading deferred bonds were also rejected. The committee objected to them on a variety of grounds. The $108,000,000 may be considered the heaviest instalment yet presented of the securities which have come into being with the building of 11,000 miles of railroad last year. The supply, however, is by no means exhausted.

The loan market has been as easy as ever this week, the ruling rates on call being 2½ to 3 per cent. and time money 4½ to 5 per cent. Exchange remains steady at $4.85½ and $4.89 posted rates, and we hear no more talk of gold shipments. The export movement ought to revive under the continued drop in the price of breadstuffs and provisions; but it is said to be still remarkably sluggish. There is scarcely any appreciable movement of securities either way between here and London, where, according to the cable dispatches, affairs are in a midsummer sleep. In the government bond market business has been very light. The closing quotations yesterday were:

	June 22, bid.	June 29, bid.	June 29, asked.
U. S. 5s extended (3½ p. c.)	103⅜	103⅜	
U. S. 4½s 1891, registered	112¾	112¾	113
U. S. coupon	112¾	112¾	113
U. S. 4s 1907, registered	118⅞	118⅞	119⅛
U. S. 4s 1907, coupon	119⅞	119⅞	120⅛

The bank statement of Saturday showed no special change in the surplus reserve, but it did show an extraordinary expansion in the loans, that item being increased $4,296,300. There was an increase in the surplus of $191,850, bringing it up to $8,982,900, which is a trifle less than it was in the corresponding week last year. The following are the comparative totals of the statements of June 16 and June 23:

	June 16.	June 23.	Differences.
Loans	$321,748,100	$326,044,400	Inc. $4,296,300
Specie	62,269,800	63,233,800	Inc. 964,000
Legal-tenders	25,943,800	26,525,700	Inc. 581,900
Deposits	317,690,200	323,106,400	Inc. 5,416,200
Circulation	16,802,400	15,799,200	Dec. 3,200

The proportion of total reserve to liabilities is now 27.76 per cent., against 28.08 per cent. for the same week of 1882.

From Baltimore, Md.: Money is in good supply and transactions in stocks were more animated than the past week. Virginia consols were a shade stronger, and 10-40 coupons advanced during the week from 43 to 45. Marietta bonds were in fair demand. Mining fancies are very dull.

From New Orleans, La.: Financial circles are still depressed by the Gaines matter, which, though somewhat modified, still hangs like the sword of Damocles over the taxpayers, and depresses real estate considerably. Money continues in good request at steady rates for call and short loans, but stronger prices for long dates. State and city bonds have shown little animation or quotable variation. Stocks are generally quiet, but are fairly maintained. Exchange is without any marked feature. General trade is running in summer grooves.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

	June 30, 1882.	June 22, 1883.	June 29, 1883.

COMMERCIAL.

SUMMARY.

Special telegrams to BRADSTREET'S this week from the leading business centers throughout the United States reveal the very general effects of the opening of the dull summer season. Interior trade throughout the great wheat-growing belt is awaiting the results of harvesting. There are, however, general features of the commercial situation which induce a belief in an early improvement in general trade. These are (1) the better outlook for a fair wheat crop—an outturn considerably in excess of that credited on June 1—(2) the noticeably active distribution of dry goods at various business centers, and (3) the quite general improvement in the pig iron market. The June cotton report to BRADSTREET'S is based on 1,204 replies. It shows a distinct improvement since last report, but the prospects of the crop cannot yet be considered good. The wheat market during the week has steadily declined, and in sympathy therewith the market for Indian corn. Provisions have suffered similarly, and the underlying cause of the weakness of the three appears to have been a lack of confidence in the financial condition of leading dealers in those products at Chicago, concerning whom ill-judged statements have been set afloat. To this cause must be added the withdrawal of foreign buyers to await a steadier market, the dullness of the home trade, better crop prospects, and heavy arrivals. The conspicuous firmness in the pig iron market has been gained so quietly that there is good reason to suppose it has come to stay. The tide has at last turned in sellers' favor, and contracts are not so readily made at existing prices, which are as yet nominally unchanged. Petroleum has gained somewhat during the week, although the process has been a labored one. A dull market ruled most of the time. The June report of operations in the producing regions is not so clearly a bull document as had been expected. In fact there is an increase in the number of wells drilling as compared with May. The anthracite coal trade has improved a little, the increase being mainly through eastern shipments. The July increase in prices will go largely into effect. The gain in production from January 1 to June 23, as against a like period in 1882, is about 1,300,000 tons. Wool has continued quiet in all markets, and no large movements are anticipated until the effect of the new tariff on the raw staple and its manufactures has received a practical test. There were 165 failures in the United States reported to BRADSTREET'S during the past week, 13 less than the preceding week, 12 more than the corresponding week of 1882, and 62 more than the same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: General trade continues fair.

From Boston, Mass.: In some departments there is a slight falling off in trade, as usual during the closing week of June, but the general movement is about the same as for two or three weeks past. In fact, in some branches June's business has held out better than last year, and so far as the retail jobbing movement is concerned there is very little to complain of. Large buyers are not operating to any extent, and a quiet spell may be expected for a few weeks. In all departments of manufactures the volume of sales for the first six months of the year compare favorably with the corresponding period last year. Owing to the depreciation in values there may be some falling off in the aggregate amount of cash, but even in this we do not think there will be much difference. Profits are small in all branches. Boston exports for the six months foot up a valuation of $34,500,000, an increase of about $5,000,000 as compared with last year. Imports have decreased about $1,500,000 in the same time. The money market has ruled quiet and easy, with bank discounts at from 5 to 6 per cent., and outside transactions at a little lower rate. Loans between banks have been mostly at 3@3½ per cent.

From Rochester, N. Y.: Trade in general lines is reported dull.

From Cincinnati, Ohio: General business is apparently undisturbed by the recent troubles in hog products, and aside from the inclement weather, which possibly retards business, there is a satisfactory movement in all lines. The anticipated July settlements will set afloat a large volume of money, in view of which money is extremely easy.

From Cleveland, Ohio: The general jobbing trade presents an improved condition over that of last week, especially so in groceries, hardware and lumber. Money is close and in active demand, barely sufficient for legitimate wants. Prime short-time paper, however, is held at 7 to 8 per cent. Country collections reasonably fair only.

From Columbus, Ohio: Some complaints are heard regarding the dullness of general trade, which is caused to a great extent by wet weather. Collections are a little slow.

From Dayton, Ohio: There is but little demand for money. Collections are reported hard to make. Trade generally very dull.

From Indianapolis, Ind.: Trade presents no new features, but is rather dull in most lines. Weather stormy.

From Evansville, Ind.: Quiet, but improving slowly.

From Peoria, Ill.: There is no perceptible change in the condition of trade, which is quiet.

From Grand Rapids, Mich.: Trade in nearly all branches has been light during the past week. Collections slow. Country roads poor.

From Louisville, Ky.: The merchandise movement is of moderate dimensions and somewhat better than at the same period last year. Money is easy and bank funds are comfortably employed. Rates 6@7 per cent. Exchange firm, 80c. premium. The Southern Exposition committees report the work in a most satisfactory condition, with prospects for a brilliant opening August 1. The indications point to an extraordinary success in exhibits and attendance.

From St. Louis, Mo.: General trade is showing its usual summer stagnancy, which has been heightened by impeded transportation. Money remains dull at unchanged rates. New York exchange 80c. premium; prime commercial bills 50c. premium.

From Kansas City, Mo.: Trade continues quiet, the floods are subsiding, and transportation east has been partly resumed. Collections are very fair.

From Detroit, Mich.: In general lines of trade business has been restricted by a continuous rainy season which has affected interior towns considerably. Collections are better than anticipated.

From Des Moines, Iowa: Trade in all lines, wholesale and retail, is a little more active, owing to pleasant weather.

From Burlington, Iowa: General trade has been very fair for the season. Jobbers are filling some good orders, though the demand is light. Money is in fair demand.

From Topeka, Kan.: General trade is steady in its normal condition. No change is to be expected until after harvest. Collections are fair. Hardware supplies are in quite fair demand, as are groceries. An excess of country produce has been brought to market.

From Lawrence, Kan.: Quiet during the past week, and will remain so until after the wheat harvest is finished. There are no special features to be noted. Money is easy and collections good.

From Omaha, Neb.: All lines of trade are more active. Collections are somewhat improved.

From San Francisco, Cal.: General business is without new feature during the past week. Trade is conducted on a conservative basis, and credits are reduced to the lowest possible limit, and speculative transactions are not encouraged. Stocks are fairly filled in. There is a large accumulation of opium and Sumatra tobacco, to evade the payment of increased duty. Exchange is 5½ to 7c. premium.

From Baltimore, Md.: The general trade situation remains quiet and unchanged.

From Richmond, Va.: Slight improvement in general business over last week.

From Norfolk, Va.: All branches of trade are dull. The weather is very warm. The trucking interest is very active. All steam lines are doing an active freight business. Money is easy. Collections are only moderate.

From Wilmington, N. C.: A canvass shows a fair business.

From Savannah, Ga.: Movements in groceries are fair for the season. Staple articles are steady. Rice is active and steady for small lots with firmer prices. The summer trade is quiet, and the fall outlook is encouraging.

From Selma, Ala.: There is dullness in every department of trade. Groceries not as active as usual at this season.

From Nashville, Tenn.: Light in all lines.

From Memphis, Tenn.: Trade in all lines is very quiet.

INDUSTRIAL FEATURES.

[By Telegraph to BRADSTREET'S.]

From Savannah, Ga.: The mechanical industries are quite active. New improvements are continually being added.

From Wilmington, N. C.: Factories are moderately busy. Mechanics are fully employed.

From Philadelphia, Pa.: Considerable activity is reported in all branches of the building trade, and most of the local industrial establishments, aside from the textile mills, continue fairly busy. The cotton and woolen machinery in this vicinity, however, is running very irregular, and a large percentage of capacity is unemployed.

BREADSTUFFS ABROAD.

Foreign wheat in British markets has continued very dull, and cargoes off coast have continued slow and on passage and for shipment have been neglected, No. 2 red, at Liverpool, quoted at 43s. 3d. Early in the week there was a renewed demand for American wheat in a small way, induced by lower prices on this side, but the publication in France that the surplus stock from 1882 had been underestimated about 2,500,000 quarters weakened prices and bidding was stopped. The effect at Marseilles, France, was to seriously depress that market. No other disturbing elements have interfered with the breadstuffs situation abroad, as the weather, with small exception, has been very favorable. The wheat plant in the United Kingdom is backward, as it is in France and Germany, but the weather being favorable, good progress has been made. In Hungary the weather has been excellent. In 1882 a surplus of 24,000,000 bushels was raised there, and the outlook by last advices is fully as good for this season. The damage by rust and insects to the growing plant in Austria is confined to certain districts. The dispatch from southern Russia that the pest "had virtually destroyed the fall-sown wheat in the east and southeastern provinces" is contradicted by later reports from American consuls in that region. The situation in Europe, then, as summarized by the London *Miller*, shows but two existing drawbacks: 1. The reduced wheat acreage in England of 500,000 acres, representing 16,000,000 bushels, and a like area in France representing, say, 10,000,000 bushels; and (2) the general backwardness of the season, amounting to about two weeks in England, Germany and northern France, and about a week in southern France and Austro-Hungary. The same authority, in discussing British wheat stocks June 1, expresses the belief that the increased consumption of bread and Indian corn, owing to the higher prices of potatoes and meat, has amounted to fully 10 per cent. The stocks January 1 last were 3,413,869 quarters, of which, added to the surplusses of five months' importation, were 5,726,065 quarters. The latter, less, say 1,200,000 quarters (for increased consumption), gives 4,526,065 quarters. The quantity of wheat and flour on passage to the United Kingdom June 1 was 2,500,000 quarters, which, with the approximate total stocks just explained, furnished a visible supply for the United Kingdom June 1 of 7,026,065 quarters, or about 56,208,520 bushels, against estimated requirement to close of the summer months of 6,000,000 quarters, or 48,000,000 bushels. The independent attitude of the British millers and grain buyers during the past month is hereby explained. Their position is a safe one, and enables them to choose their own time for buying and make the best of competing offers from Atlantic and Pacific coast ports, the Black Sea, the Baltic, Calcutta and Bombay.

Since this situation has been explained to the officials of Indian grain-carrying roads by British government officials the rates of railway freight to Indian ports has been reduced. When the Indian government shall have taken the additional competitive step of cabling regularly wheat shipments from Calcutta, Bombay and Kurrachee, the exports from that quarter will have a more immediate effect on prices in London. At present, cargoes of Indian wheat are often well on their way to England before the fact is known in London. Another handicap in Indian wheat are the excessive Suez canal charges, and by this fact much of the vigor of the second (British) Suez canal movement is explained. On the other hand, the trial grindings by both the roller and stone systems of various grades of Indian, English, Australian, New Zealand, Californian, American (east of Pacific slope), Russian and Egyptian wheats, made by Messrs. McDougall Bros., at the request of the Secretary of State for India, shows a marked superiority of Indian wheat for milling purposes.

Beerbohm's London cable dispatch, June 28, reports the quantity of grain on passage as follows:

	Wheat, quarters.	*Maize, quarters.*
To the United Kingdom	1,900,000	310,000
Continent	360,000	60,000
Total quarters	2,260,000	370,000
Equal bushels	18,080,000	2,900,000
Compared with the previous week:		
To the United Kingdom	1,875,000	370,000
Continent	510,000	60,000
Total quarters	2,385,000	430,000
Equal bushels	19,080,000	3,440,000
Increase	.....	.....
Decrease	1,000,000	480,000

AMERICAN WHEAT MARKETS.

There has been no relief since the tidal wave caused by steady and favoring weather and the failures in Chicago two weeks ago. The current has gone steadily on downward. The demand for spot wheat has been slow. Speculation in options has been of varying temperament. While the course of prices has preserved a decline there have been several temporary checks, due to the reappearance of exporters in the market and heavy coverings by the short interest upon observing indications of bad weather at the west. The hasty retreat of the exporters and the clearing away of the clouds were signals of course for prices to decline once more. Failures to make satisfactory settlements on the part of several of the recently failed provisions and grain houses at the west have also exercised a depressing effect. Later in the week the speculative wheat markets were excited. Transactions were not excessive, but less confidence was shown in the general situation than had been supposed to exist.

The crop situation at the west continues to steadily improve. Particularly favoring reports come from Wisconsin, Michigan, Minnesota and Dakota. It is not probable, at this time, that Illinois will raise more than 50 per cent. of an average yield, and that Ohio and Indiana will likewise suffer severely. Harvesting has been begun in a number of western states, and new wheat arrivals are being chronicled almost daily at western centers. Prospects are improving in southern Indiana. The enormous yield on the Pacific coast now expects to secure a new outlet to the east, to Europe—and it is promised at rates to compete with cargoes going via Cape Horn—by way of the new Southern Pacific line and its direct steam connection to Europe from New Orleans.

The receipts of wheat at tide-water for the week ending June 23 decreased from 1,042,273 bushels on June 16 to 846,964 bushels. The exports from the Atlantic ports for the week ended June 23 amounted to 607,044 bushels, against 732,233 bushels June 16. From September 1, 1882, to June 23 the exports of wheat from the Atlantic ports were 59,144,150 bushels, against 38,191,212 bushels in a corresponding portion of the preceding year, a gain of 20,952,938 bushels.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended June 23 amounted to 733,693 bushels, against 813,192 bushels in the preceding week, and the shipments to 595,260 bushels, against 314,423 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) June 23, as against the preceding week, showed a decrease of 378,435 bushels.

The course of the wheat market during the past week, at New York, Chicago and Milwaukee, was as follows:

	AT NEW YORK.				
	July.	*Aug*	*Sept.*	*Oct*	*Nov.*
June 23	$1.16½	$1.19	$1.21	$1.23	$1.25⅛
June 25	1.14⅞	1.17⅜	1.19⅜	1.21⅜	1.23½
June 26	1.14⅞	1.17⅜	1.19½	1.21½	1.23½
June 27	1.14⅜	1.17⅝	1.19¼	1.21⅛	....
June 28	1.13⅜	1.15¾	1.18	1.19¾	1.21¾
June 29	1.12	1.14⅞	1.17⅛	1.18⅞	1.20⅞

	AT CHICAGO.		AT MILWAUKEE.	
	July.	*August.*	*July*	*August.*
June 23	$1.04½	$1.06⅝	$1.02½	$1.06¼
June 25	1.02¾	1.05	1.01½	1.04½
June 26	1.02	1.04	1.00⅜	1.03⅛
June 27	1.01⅝	1.04	1.00¼	1.03⅜
June 28	1.00½	1.02¾	.99½	1.02⅛
June 29	.99½	1.01⅜	.97¾	1.00¾

The New York market for wheat flour has ruled in buyers' favor, with but little change during the week. The exports continue very moderate.

INDIAN CORN.

There has been but a moderate export demand for corn. Prices have declined steadily during the week, though less than on wheat. The corn crop in Iowa now promises to be a large one, but in Wisconsin and Minnesota the outlook is for two-thirds of a crop only. The at times excited condition of the breadstuffs speculative market naturally affected the corn options, though the latter cereal has exhibited more strength than wheat. The receipts of Indian corn at the Atlantic ports for the week ended June 23 were 2,078,524 bushels, against 1,923,223 in the preceding week, while the exports from the same points amounted to 1,105,735, against 1,443,234 bushels. From September 1 last to June 23 the exports of Indian corn were 36,877,870 bushels, against 25,132,789 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, June 23, had decreased 291,964 bushels as compared with June 16. The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending June 23, were 2,030,617 bushels, against 2,613,737 the week preceding, and the shipments were 1,820,336 bushels, against 3,171,545 in the preceding week.

The closing prices of Indian corn in New York and Chicago during the past week were as follows:

AT NEW YORK.

	July.	Aug.	Sept.	Oct
June 23	.62⅛	.63¼	.61½	.65⅛
June 25	.61½	.62⅞	.61	.65¼
June 26	.61¼	.63	.61⅛	.65⅛
June 27	.61¼	.63⅛	.61⅛	.65⅛
June 28	.61½	.63	.61	.65¼
June 29	.59⅞	.61⅞	.62½	.63¼

AT CHICAGO—1 P. M.

	July.	Aug.
June 23	.54⅛	.54⅛
June 25	.53⅜	.53¾
June 26	.54⅜	.54⅜
June 27	.53⅜	.53⅜
June 28	.52¼	.53⅛
June 29	....	....

The closing prices of breadstuffs in New York last evening, as against those of the Friday preceding and the corresponding date last year, were as follows:

CLOSING PRICES OF BREADSTUFFS IN NEW YORK.

	June 22	June 29.
No. 2 flour	$2.60 @3.50	$2 60 @3.40

Rye	1,878,412	1,774,750	807,802	162,527

GRAIN CROPS AND BREADSTUFFS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: The crop prospects are good; the weather very wet.

From Philadelphia, Pa.: Flour has ruled dull with a downward tendency but little actual decline; buyers have shown no disposition to operate freely even at concessions. Stocks are moderate. Grain has sharply declined in consequence of the depression in the west and general lack of confidence in speculative circles growing out of the recent failures in Chicago. Exporters have not increased purchases to any extent, but are apparently holding off for a more settled market.

From Cincinnati, Ohio: Flour transactions have been confined largely to consumption, but prices as a rule have been well sustained, but now there is a downward tendency in prices. Wheat dull under lighter receipts. Corn easy under liberal receipts.

From Evansville, Ind.: The past week has been cool and rainy, rather retarding the harvesting. Corn is looking well.

From Indianapolis, Ind.: The price of wheat keeps declining, and the wheat crop, it is thought, will be considerably larger than anticipated.

From Peoria, Ill.: Crops are reported progressing well except on the lowlands.

From Detroit, Mich.: The wheat prospects continue good and an abundant crop will be assured if we can have dry weather for harvest.

From Grand Rapids, Mich.: We have experienced the heaviest fall of rain known for years. It is feared the crops in this vicinity have been injured.

From Des Moines, Iowa: The crop prospect is constantly improving, and all departments of trade greatly encouraged.

From Milwaukee, Wis.: Crop outlook is unchanged. The spring wheat reports are good. The secretary of the National Millers' Association returned from Chicago meeting to-day, and says the delegates from all parts of the country corroborate the May report of the association. Dakota by this estimate will yield 20,000,000 bushels. Minnesota and Iowa have their acreage reduced, but the condition of the crop there is better than last year. Nebraska reports too much rain, six to eight inches per week of late. Missouri will yield from 50 to 75 per cent. as much as last year, Michigan and Kansas 70 and Indiana 60 per cent. The Illinois outlook is more favorable than in May, and the yield estimated at 25,000,000, against 23,000,000 last month. The wheat market is still demoralized and 2c. lower, owing chiefly to the bad state of affairs at Chicago, Nichols, it is said, being unable to pay above 40 per cent.

From Omaha, Neb.: The weather is warm and the prospects for the crops are greatly improved.

From Lawrence, Kan.: The crop prospects both for wheat and corn are good.

From Topeka, Kan.: Corn is quite active and wheat is dull.

From San Francisco, Cal.: Harvesting is in full progress throughout the state, but threshing is not so far progressed that an accurate estimate of the harvest can be formed. A 10 per cent. reduction must be allowed for the effect of the hot winds in the valley and coast counties; but the foothill counties have not been heard from and they may reduce the general average of losses. Barley will be a heavier crop than last year. Corn and other summer crops promise well. Honey will be a fair crop and improved in quality. Hops look very healthy, with greatly increased yield. Fruits, including grapes, are progressing very satisfactorily and will yield well. Cherries, currants and plums suffered from heat in some counties.

From Baltimore, Md.: Some concessions in prices of flour are still expected, but holders maintain confidence and the market quotes steady. The demand for wheat has only been fair, but prices remain firm.

From Norfolk, Va.: There are encouraging reports as to the harvest of wheat. Cotton and corn very promising.

From Wilmington, N. C.: Breadstuffs, grain and provisions are unchanged.

From Savannah, Ga.: Grain has shown but little improvement, yet good demand for prime lots. The stock on h nd is moderate.

From New Orleans, La.: Bulk wheat is now at a standstill. The receipts of bulk corn have amounted to scarcely 250,000 bushels and the exports to only about 50,000 bushels. There is no local bulk-corn market, and the quotations are nominal at 55c. Flour has weakened. Provisions have strengthed slightly under the impression that Chicago holders have obtained a better grip.

From Memphis, Tenn.: Feedstuffs are especially dull. Flour is low and weak. Corn is dull. Cornmeal quiet and prices low.

From Louisville, Ky.: Wheat and corn crop prospects are reported improving gradually. The weather is showery, and farmers complain of excessive rains preventing proper cultivation. The grain trade is dull and nominal.

From St. Louis, Mo.: Wheat continues weak and downward, but corn and oats are improving in tone and are active. Flour very quiet. Grain is being harvested all through this section excepting the flooded districts, where it is destroyed. In southern Missouri the harvest is about over.

PROVISIONS.

Foreign cables during the week have brought very unsatisfactory intelligence respecting the provisions markets abroad. Prices on the other side have manifested a tendency to steadily decline. The slight export movement noted a week ago, the origin of which was the break in prices caused by the Chicago corner failure, has dropped away. Stocks abroad are large, and receipts at domestic packing points continue heavy in the face of a very dull home trade. The markets here have consequently been very weak, and prices have materially declined. Rumors of further complications among provisions dealers and speculators at the west have made matters worse. The only demand for provisions at all has been of a retail nature, beef and pork hams being the varieties demanded. As may be supposed, the short interest in provisions have been in high feather.

The closing prices for pork and lard at New York during the week just closed were:

	June 23.	25.	26.	27.	28.	29.
Pork, s pot mess	$18 50	$18.50	$18.25	$18.00	$18.00	$17.75
Lard, July	10c.	9.92c.	9.65c.	9.50c.	9 50c.	9.44c.

The exports of hog products from the following places for the week ending June 23, were:

	Pork, barrels.	Bacon, pounds.	Lard, pounds.
New York	2,004	3,357,003	2,766,038
Boston	144	700,318	225,638
Portland	..	....	....
Montreal	..	753,000	24,420
Philadelphia	..	590,000	24,750
Baltimore	..	....	....
New Orleans	23	4,600	1,005
Totals	2,261	5,404,921	3,041,851
Previous week	3,245	3,062,747	3,114,962

The total exports of hog products from the abovementioned places from November 1, 1882, to June 23 last, were as follows:

	1882-83, pounds.	1881-82, pounds.
Pork	30,724,400	37,000,600
Bacon	270,385,772	291,162,821
Lard	154,621,088	170,833,908
Totals	464,731,260	498,997,329

PROVISIONS AND LIVE STOCK REPORTS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Hog products have again declined and ruled dull, the market reflecting the unsettled feeling and depression in Chicago. Butter has slightly advanced and closes strong with a good deal of speculative buying, but only a moderate demand for present consumption. Cheese is steady in the better grades, which are in small supply.

From Cincinnati, Ohio: Transactions in provisions have been only nominal under a feverish and short-lived rally in prices.

From Evansville, Ind.: Provisions are strong with a fair demand.

From Louisville, Ky.: Provisions sales moderate and irregular at unsettled prices. Eight summer packers, mostly small houses, are curing an aggregate of twenty-five hundred hogs weekly. Live stock receipts light, demand fair and prices improved. Produce and vegetable receipts are liberal and the market active.

From St. Louis, Mo.: Provisions market dead, scarcely enough selling to fix prices. Cattle active, but hogs depressed.

From Kansas City, Mo.: The market for shipping grades of cattle is steady, and prices are substantially unchanged. Hogs are dull and slow, with prices 5c. to 10c. lower.

From Baltimore, Md.: The provisions market is easy and prices have a tendency to lower. The jobbing demand is fair. Stocks of butter have fallen off some, and fine grades are in good demand. Creameries have advanced 1@2c. Prices of cheese are weaker.

From Memphis, Tenn.: Meats and lard are weak.

From Nashville, Tenn.: Cattle are very light and dull.

THE NEW YORK DRY GOODS MARKET.

During the past week business has ruled quiet with first hands; this is usually the case just prior to the holidays of the 4th. There was but little doing, with the exception of some request for ginghams, lawns and other light fabrics. Jobbers of dry goods have been endeavoring to reduce stocks as much as possible during the month, and for the past week extra efforts were made and inducements offered to clean out balances of department stocks left over. The importing houses are not doing much with the exception of booking some late orders for fall delivery. Jobbers of clothing from the interior have shown themselves much earlier this season, but their purchases so far have been light; they are around the market, however, picking up some novelties. This branch of trade anticipates a good fall business. It is expected that the dry goods business in general will slightly improve next week and gradually increase in activity thereafter.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: The dry goods trade is only moderate for the season.

From Providence, R. I.: The print cloth market is quiet and steady, the amount of sales being light; 64s are quoted at 3⅝c., and 56 and 60s at 3⅛c. There are about 150,000 pieces on hand.

From Boston, Mass.: Movements continue to be confined to small lots for current distribution, and there is no increased animation. Prices of cotton fabrics are fairly maintained, but there are some irregularities, owing to the desire to clean up before the close of the half year. Woolens are not attracting much attention this week, but the situation holds the favorable features previously developed.

From Rochester, N. Y.: The dry goods jobbers report a good trade during the past week, fully 10 per cent. heavier than the week previous and 20 per cent. in excess of trade during the corresponding week last year. This, despite the fact that the season heretofore usually closed at this date, is very encouraging. Retail trade has been quite dull and has fallen off 25 per cent., as compared with previous week, yet comparing favorably with the corresponding week last season. Collections are only fair, jobbers reporting a number of instances where extensions have been asked; the weather during the past fortnight has much to do with this, the season having been unusually wet and disagreeable.

From Philadelphia, Pa.: Jobbers have been doing a quiet trade as a rule, though in some cases business has been quickened by means of low prices, made to clean out broken stocks, preparatory to stock inventories. The package trade has ruled dull. There is a better feeling in the woolen goods market, in consequence of the stoppage of so many mills in New England.

From Pittsburgh, Pa.: Dry goods are in quite active demand, and the volume of business is considerably above the average at this season of the year.

From Cincinnati, Ohio: There is fair seasonable demand for dry goods, with firm prices for cotton staples.

From Cleveland, Ohio: In dry goods there is a good, active business, and the movement of goods is fully up to the standard of the season.

From Columbus, Ohio: Fully as good as anticipated for this reason. Quoted quite low, although somewhat better than last year.

From Indianapolis, Ind.: The dry goods trade is light.

From Louisville, Ky.: Dry goods fair summer assortment. Trade and prospects for fall season good.

From St. Louis, Mo.: Dry goods quiet and slow at steady prices.

From Kansas City, Mo.: Dry goods are quiet and unchanged.

From Detroit, Mich.: In dry goods business is only of fair volume, lighter than last week.

From Burlington, Iowa: The dry goods trade holds on very well. There is a fair demand since the warm weather set in.

From Topeka, Kan.: The dry goods trade still continues good, in spite of the advance of the season.

From San Francisco, Cal.: The dry goods trade for June brings up the average for the half year equal to that of last season.

From Baltimore, Md.: Business in the dry goods market is only moderate, and jobbers are now arranging for the fall trade. Retail dealers continue active and prices remain firm.

From Richmond, Va.: There is no change to report this week.

From Savannah, Ga.: The dry goods market for the season has shown less fluctuation than any other. Stocks are now much decreased, and the fall prospects are reported good.

From Selma, Ala.: The dry goods trade is better than usual at this season, though it is dull.

From Galveston, Tex.: The dry goods trade has improved.

From Memphis, Tenn.: Jobbers in dry goods report sales light. Business will be quiet for some weeks.

THE CLOTHING MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Trade has tapered off to a fine point, and a quiet market is expected for three or four weeks, when the fall business will begin. The season closes with stocks well cleaned up, and manufacturers look forward to an early opening in the autumn.

From Savannah, Ga.: Clothing quiet and sales mostly on orders. Retailers are very quiet and sales have fallen off.

COTTON.

There is nothing new to chronicle in regard to the market for spot cotton at New York for the week just passed. Trading continues very light and in small lots. Sales for the week were as follows: For export 1,737 bales; for consumption 2,086 bales. The total sales foot up 3,823 bales, against 5,737 last week. The deliveries on contract amount to 1,300 bales. The quotations for spot middling uplands are lower, having fallen off two points on Tuesday and one point on Friday, closing last evening at 10 5/16c.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	Last week.	Last year.
Ordinary	7⅜c.	7 9-16c.	9 15-16c.
Strict ordinary	7 13-16	8	10½
Good ordinary	8⅜	8 13-16	11 5-16
Strict good ordinary	9 5-16	9½	11¾
Low middling	9 13-16	10	12 3-16
Strict low middling	10⅛	10 5-16	12 7-16
Middling	10 5-16	10½	12⅝
Good middling	10 11-16	10⅞	13
Strict good middling	10 15-16	11⅛	13¼
Middling fair	11 7-16	11⅜	13¾
Fair	12 3-16	12⅜	14½

STAINED.

	This week.	Last week.	Last year.
Good ordinary	6 13-16	7	9½
Strictly good ordinary	7⅝	7 13-16	10½
Low middling	8 5 16	8½	11 3-16
Middling	9 7-16	9⅞	12 3-16

The market for spot cotton closed quiet.

The New York market for futures shows no material change, the same conditions governing it as have been manifested during the several preceding weeks. Dealings have been light and confined almost entirely to inside operators, there being scarcely any outside speculation, the sales on

Monday only aggregating 18,700 bales, which is the lightest day's business for many months.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
June	10.28	10.44	12.68
July	10.33	10.44	12.81
August	10.44	10.51	12.39
September	10.24	10.25	12.73
October	10.	9.95	11 55
November	9 90	9.87	11 58
December	9.92	9.88	11.69
January	10.	9.97	11.81
February	10.11	10 07	11.93
March	10.23	10.17	

The market for futures closed steady.

The southern markets have been dull and steady. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales	*To-day.*	*Last year.*
Galveston	1,492	9 15-16	12⅛
New Orleans	9,100	9 13 16	12½
Mobile	908	9¾	12¼
Savannah	250	9⅞	11⅞
Charleston	100	10	12¼
Norfolk	462	10	12 5-16
Baltimore	662	10¼	12⅜

The total receipts of cotton at the ports since September 1 are 5,874,108 bales, an increase of 1,276,765 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	828,463	422,138
New Orleans	1,640,487	1,169,854
Mobile	310,594	261,662
Savannah	808,281	722,562
Charleston	565,031	494,630
Wilmington	128,703	133,115
Norfolk	792,619	602,225
Baltimore	78,338	35,621
New York	151,457	168,127
Boston	189,068	225,669
Philadelphia	94,720	78,487

Below will be found the receipts for each day of the week ending Friday, June 29, at eleven leading ports, as compared with last week and the same week one year ago:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	394	660	859	925	210	1,069
New Orleans	497	954	753	259	168	657
Mobile	....	28	1	13	7	42
Savannah	31	191	8	200	7	3
Charleston	40	69	94	120	95	85
Wilmington	3	31	21	3	7	3
Norfolk	311	74	123	163	222	149
Baltimore	116	....	113	....	219	131
New York	44	81	38	95	78	21
Boston	36	45	214	59	21	138
Philadelphia	....	....	84	....	....	....
Totals	1,472	2,133	2,318	1,837	1,034	2,298
This day last week	2,190	2,292	2,366	1,904	1,710	1,655
This day last year	956	1,678	2,416	508	1,032	1,926

The total receipts at the ports for the week were 11,419 bales, against 12,303 last week and 9,236 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were 2,999 bales, against 3,045 bales last week and 2,728 bales for the corresponding week last year. The shipments for the week were 10,715 bales, against 9,845 bales last week and 11,076 bales for the corresponding week last year. The stocks for the week were 71,534 bales, against 79,654 last week and 44,480 for the same week last year.

At Liverpool the market for prompt delivery uplands shows no change from that of the several preceding weeks, being dull and easy, with a moderate inquiry, which was freely supplied. The closing quotations last night were the same as last week, *i.e.*, 5 11-16d.

The future market has been very dull, prices a trifle lower, closing about 3 points off from last week.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
June	....	5 42-64d.	6 56-64d.
June-July	5 40-64d	5 42-64	6 56-64
July-August	5 40-64	5 44-64	6 55-64
August-September	5 45-64	5 48-64	6 58-64
September-October	5 43-64	5 46-64	6 49-64
October-November	5 39-64	5 41-64	6 35-64
November-December	5 37-64	5 39-64	....

The sales for the week at Liverpool were 40,000 bales (of which 29,500 were American), against 70,000 (of which 42,500 were American) last year. The sales for export were 1,890 bales, against 8,500 bales last year. The sales for speculation were 130 bales, against 12,000 bales last year. The amount forwarded was 6,400 bales, against 4,300 bales last year. The stock in port is 991,000 bales (of which 738,000 are American), against 884,000 bales (of which 523,000 were American) last year. The total imports for the week were 58,000 bales (of which 34,000 were American), against 41,500 bales (of which 37,500 were American) last year, and the amount afloat 239,000 bales (of which 100,000 are American), against 285,000 bales (of which 62,000 were American) last year.

The Manchester market closed dull and tending down.

The Havre market declining slowly.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The cotton market is quiet and steady, and sales are reported very light. Middling uplands are quoted at 10¾c., and middling gulfs at 11c. The stock on hand is about 9,000 or 10,000 bales.

From Philadelphia, Pa.: The movement has continued slow, spinners buying only for actual wants, but prices have undergone no change.

From Cincinnati, Ohio: Cotton under light demand has sustained satisfactory prices.

From Louisville, Ky.: Cotton dull and unchanged; stocks moderate and demand light.

From Baltimore, Md.: The inquiry for cotton has improved, but the market continues quiet and prices are unchanged.

From New Orleans, La.: Since last Thursday spots dropped ⅛c. on all grades except middlings, which was only 1/16c. lower, but the aggregate of sales was larger than for the corresponding time last week. The movement in futures was small and the market showed little variation except in July, which declined 7 points from previous prices.

From Savannah, Ga.: The cotton market quiet. Growing crop reported looking well.

From Memphis, Tenn.: Cotton market is quiet and steady.

COTTON CROP REPORTS.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Cotton crop reports continue good. The weather is favorable and receipts are fair and the market quiet.

From Raleigh, N. C.: Crops are suffering some from grass, the weather being too wet. Everything is growing rapidly.

From Atlanta, Ga.: Weather favorable and cotton plant has very much improved.

From Meridian, Miss.: The plant is growing finely, but continuous wet weather is unfavorable.

From Arcadia, La.: The weather is favorable and crop good; some worms in the cotton plant and great damage is apprehended.

From Baton Rouge, La.: Weather since June 16 has been favorable and crops are still in grass but doing well; with continued good weather will soon be all right.

From Galveston, Tex.: The weather for the past week continues hot with occasional rains. The outlook for good cotton crop at present is bright.

From Savoy, Tex.: Weather favorable. Plant in good condition, but 25 per cent. short in acreage.

From Malvern, Ark.: From 16th to 25th hot; 25th to 27th cool, with rain in places.

From Charlotte, N. C.: Since the 16th inst. the weather has been very favorable, and the cotton crop has made fine progress.

From Charleston, S. C.: The weather is fine at present, and the condition of the crop improved, but still backward.

From Greenwood, S. C.: The weather was hot and dry until the 25th inst. Good rains then. The plant is small, but clean, healthy and growing.

From Spartanburg, S. C.: The weather has been very favorable, and cotton is growing finely.

From Montezuma, Ga.: The weather since the 16th inst. has been fine, with plenty of rain. The cotton plant is growing vigorously, and is well up to former years' growth.

From Rome, Ga.: Weather partly fair and cloudy. Reports of cotton plants are very flattering; it is well fruited.

From Madison, Fla.: Rains not yet excessive; grass and weeds growing; otherwise cotton plant is doing finely.

From Montgomery, Ala.: Weather is more favorable. The plant is small and badly worked, while worms have appeared in some localities. Prospect not favorable.

From Prattville, Ala.: The cotton crop since June 16 has developed rapidly; the weather on Wednesday, this week, a little cool, but otherwise all that could be desired.

From Selma, Ala.: Weather favorable; plant is growing and looks well, some are blooming. A few worms reported.

From Columbus, Miss.: The weather has been favorable since 16th inst., but the cold weather of May has materially injured the cotton plant; stands are small and defective; crop is two weeks late.

From Natchez, Miss.: Too much grass produced by incessant rains has damaged the cotton crop fully 5 per cent.; farmers with large crops have to abandon part, otherwise stands are fair.

From Port Gibson, Miss.: Since June 16 the weather has been very favorable. Too much rain in sections for the last few days. The cotton crop is considered promising.

From Clinton, La.: The weather has been good. Cotton has improved since 16th inst., but is still grassy and wormy.

From Shreveport, La.: The weather is generally favorable and the condition of the plant promising at present, though late.

From Athens, Tex.: The weather has been favorable, and the condition of the plant is good.

From Calvert, Tex.: We had a good rain on Wednesday, the first since the 9th inst. Cotton is in fine condition and prospects are good.

From Corsicana, Tex.: The weather had been dry until Wednesday last, when an acceptable shower fell, and more is promised. The plant is making excellent progress, though much of it is not yet chopped out to a stand by reason of delayed planting.

From McKinney, Tex.: Cotton is in good condition and weather favorable.

From Marshall, Tex.: Thermometer 95° and no rain in fifteen days. Cotton ten days later than usual, but prospects good at present.

From Terrell, Tex.: We had a good rainfall on Wednesday. The outlook for crops could not be better. The weather has been favorable since the 16th.

From Waco, Tex.: Weather since the 16th dry and very hot until Wednesday, when a light rain fell, but more is badly needed. Early cotton is doing fairly well. Late cotton, which is three-fourths of crop, is very small, just shaped and not flattering.

From Arkadelphia, Ark.: Weather good and condition of cotton plant improved.

From Van Buren, Ark.: Weather has been favorable and cotton plant is in good condition but late.

From Helena, Ark.: Frequent rains and scarcity of labor allowed weeds and grass to gain good headway; however, cotton plant is reasonably progressing. The Mississippi river threatens some damage from overflow.

From Murfreesboro, Tenn.: Weather has been favorable. Cotton forming well where clean, but good portion of cotton is grassy, owing to frequent rains.

WOOL.

The wool trade has continued very quiet during the past week, but considering the imminent changes in the tariff and the many uncertainties of the situation the volume of business has been probably as large as could have been reasonably expected. The future of the market hinges upon the effect of the new tariff law upon the trade in yarns and fabrics, and as the period for a practical test is so near at hand it is useless to speculate on the probable result. It is worth noting however that the more conservative dealers incline to the belief that the hazard of the situation has been largely overestimated and that the worst effect of the reduction in duties has been already pretty well discounted so far as wool values are concerned. At the same time there are so many inequalities and obscurities in the new schedule that an underlying feeling of doubt and tendency to caution are noticable in all branches of the trade. Temporarily the consumption of wool will be reduced about one-fourth by the large curtailment of production that has already taken place and is in contemplation in the New England and middle states; and as the supply available to buyers is daily increasing it is not improbable that lower prices may prevail in a few weeks as the result of these influences, independently of the effect of foreign competition on the markets for woolen productions. On the other hand however the general scarcity of stock in the hands of consumers may stimulate more active buying that will hold in check the downward trend of values, especially if the developments of the next two or three weeks should restore confidence by showing that competition from the other side of the ocean is likely to be less serious than has been feared. Concerning the new clip there is nothing new to be said. Interior markets rule quiet, but growers are generally firm in their views. Transactions have been reported in Ohio at 33@35c., and many lots are held 2@5c. higher, although buyers are indifferent about operating to any extent above 32@33c.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Business has ruled quiet, but sales have exceeded 600,000 pounds, and in view of the general doubt and uncertainty as to the future of values this is a fair showing for the week, though it is small in comparison with former years. Prices have ruled steady.

From Cincinnati, Ohio: Wool and woolen goods are active, and, aside from few orders for future delivery, command no attention. Hemp is firm and active.

From Louisville, Ky.: Receipts small, demand fair, and prices steady.

From Baltimore, Md.: Offerings have been free, and favor buyers.

From Savannah, Ga.: Hides and wool are exceedingly dull, with little demand and dull prospects.

From Boston, Mass.: The wool market has been more active and prices are unchanged. The sales of the week have been 1,500,000 pounds, and include all grades and qualities. Ohio and Pennsylvania fleeces have been sold at 37@38c. for X, and 35@40c. for XX, with choice selections higher. In Michigan fair and Wisconsin X fleeces the sales have been 90,000 pounds at 35@37c. per pound, and this is a fair quotation. Combing and delaine have been quiet at 39@45c. for fine delaine and No. 1 combing. Coarse combing has been sold at 32@35c., and a lot of Kentucky at 27½c. per pound. Unwashed wools have been selling more freely, and the sales of Texas have been 204,000 pounds at 19@28c., and considerable portion at 23@28c. for fine up to 30@33c. for choice medium. A lot of Georgia sold at 27½c. California wool is quiet and stock here quite small. Pulled wool more active, and sales at 43@44c. for choice eastern and Maine supers, and 25@40c. for common and good. Foreign wool is quiet. A lot of 12,000 pounds Australian sold at 40c. Carpet wools dull.

IRON.

For the first time in many weeks we have to chronicle a pronounced firmness in the pig iron market. There seems finally to have been a check to the ebbing of the tide in this market, and, while it is yet too early to note a counter movement, there is that degree of added firmness in its present position which looks remarkably like the beginning of a substantial improvement. Our special dispatches from various leading iron markets, given below, show that this quality is not local, but that it is quite general, even while not revealed at all points covered by the telegrams given. Quotations are still, nominally, $22 for No. 1 foundry, $20 for No. 2, and $19 for forge. But best grades of American No. 1 are even now commanding fancy prices, and there are several which sell for $22.50 and for $23. The pig iron market has been a long time in reaching the turning point, if, indeed, it has at last gained that goal. In case the advantage within reach is retained but a short time, the usual increased consumption occurring in the later summer and following months will be very likely to add stability to the situation. Steel rails present no change in quotations. Philadelphia and Pittsburgh mills have orders sufficient to keep them busy nearly if not quite the remainder of the year. A recent order for 20,000 tons was taken at $38. Bar iron continues dull at nominal quotations heretofore given. A number of mills will remain idle for the usual term during the summer months, for repairs, etc. After that, in view of a probable revival in the iron trade in the fall, the belief is warranted that a better market will be found. Scrap iron continues dull, with little demand. Scotch pig is firmer, at unchanged quotations, on account of advanced freights from Glasgow to this side. The arrivals at New York for the week will aggregate about 1,000 tons, and the sales to arrive, which are very light, are probably not more than 600 tons.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Pittsburgh, Pa.: The iron trade remains in about the same condition as stated last week. The demand is limited and the situation generally unsatisfactory.

From Philadelphia, Pa.: The more active products this week have been No. 1 foundry and nails, on which prices have ruled firm. No. 2 pig and forge iron have continued dull and irregular in price. Merchant bar has been moving fairly at $2.10@$2.20. Construction iron is under good inquiry, and large orders will probably be placed next month. Steel rails are selling in small lots at $38@38.50, and good inquiries for larger lots come to hand at $37@37.50, but no business is reported.

From Cleveland, Ohio: The iron situation presents no new features, and its condition and tone about as reported for the past few weeks.

From Detroit, Mich.: In iron the market continues dull, but the prospects are somewhat improved and the demand is slightly increased.

From Baltimore, Md.: The tone of the pig iron market is reported better and prices are quoted firm.

From Nashville, Tenn.: Iron is quiet and dull.

From Cincinnati, Ohio: The iron market is dull, with considerable indecision about accepting contracts for future delivery at present prices. Manufactured iron is easy and demand light.

From Louisville, Ky.: Iron quiet and easy. The hardware movement fair, but prices unsatisfactory and declining.

From St. Louis, Mo.: The demand for pig iron continues to improve and prices are firmer, though quotations are unchanged. Manufactured iron is duller than last week and no better demand is expected till after harvest.

COAL.

There is a noticeable improvement in the anthracite coal trade. Shipments east and south have increased, and the advance in prices for July has been very generally agreed to. The schedule as proposed has not, however, been adopted by all companies. The advance made ranges from 10c. to 25c. per ton, according to size. Three days out of each of the first two weeks in July will witness no work at the mines, but it is stated by leading operators that after July 15 a steady production on full time may be looked for until December 1. There has been, as may be inferred, considerable disagreement in the trade concerning the advisability of the July advance in prices, on the full list as proposed. The result, consequently, does not appear to satisfy those who believe that the time for an increased demand to assert itself has come. The bituminous coal tonnage to date is fair, and prices are moderate.

The production of anthracite coal in Pennsylvania is steadily increasing. In the first five months of 1883, according to Mr. John H. Jones, 11,340,185 gross tons were mined, which is an increase of 1,397,373 tons over the corresponding period of 1882. Since June 1 the output of anthracite has been as follows:

	Tons.	
	1883.	1882.
Week ending June 9	481,067	619,136
Week ending June 16	696,089	694,990
Week ending June 23	722,439	679,908
Total three weeks June	1,900,195	1,994,043
Decrease three weeks June, 1883 agst. 1882	93,848	
Net increase production in 1883, to June 23	1,303,525	

After July 1, 1883, a drawback of 75 cents per ton shall be allowed on all bituminous coal imported into the United States, which is afterwards used for fuel on board of steamers which are engaged in the coasting trade of the United States or in the trade with foreign countries.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Coal firm at barges but retailers manifest tendency to cut prices. Jobbers are agitating the question of consolidation of interests, which it is thought will secure more satisfactory margins than the present exchange.

From Providence, R. I.: The coal market is a trifle firmer than last week, owing to a possible advance in New York July 1. Prices are the same as last week, and sales are more active. The stock on hand is about the same as last week.

PETROLEUM.

The speculative petroleum market during the past week has been very dull indeed. Prices in the New York Exchange opened at $1.16½ on Saturday last, and closed at $1.15⅝. On Wednesday the opening and closing figures were respectively $1.15⅝ and $1.15½. At no time during the week had the quotations of crude certificates gone below the latter figure, and the highest point touched was $1.16¾ This sort of business, on a long dragging market, induced some free selling by outside holders of oil. On Thursday, however, more interest was manifested. A preliminary (partial) report of operations in the producing regions during the month of a decidedly bullish nature gave the market an impetus and renewed orders to buy advanced prices 2c. on the day. While there is no news from the oil fields which in any way alters the statistical position of petroleum, and while there are, therefore, no reasons of that nature to warrant any counter-movement in prices, still, the next onslaught on the market—when it comes—is quite as uncertain as to the probable effect on quotations as the solely manipulative character of advances and declines in oil would indicate.

Friday the market opened at $1.18⅜, and trading was fairly active during the morning session, although during that time a decline of ¼c. took place, the close at mid-day registering $1.18⅛ bid. At 1.30 P. M. the opening was $1.18⅛, and from that time on until 2 P. M. the tendency was downward. The June report of operations in the regions, as telegraphed here on Friday, was, together with comparisons from the May exhibit, as follows:

End of	No. wells completed.	No. wells drilling.	Rigs up and building.	New production.	Av. new prod'n per well.
June	228	230	145	3,435	15
May	235	197	176	3,676	15⅜

At the close on Friday the quotation for pipe-line certificates was $1.18 bid against $1.16⅝ at the close on Friday, June 22, a gain of 1⅜c. on the week. The market continued quiet until near the close, when heavy selling orders came in and prices closed at the lowest point of the day.

The daily average pipe-line runs during June to the 27th were 65,417 barrels, against a daily average in May of 69,084 barrels. The average daily shipments in June to the 27th have been 59,009 barrels, against 63,963 barrels. Average daily exports in June to the 27th were 46,563 barrels (crude equivalent), and in May 45,700 barrels.

The following shows the fluctuations in pipe-line certificates of crude petroleum during the week ended last evening:

	Opening.	Highest.	Lowest	Closing.
Saturday, June 23	1.16½	1.16¾	1.15⅝	1.15⅝
Monday, June 25	1.16	1.16¾	1.15⅝	1.16⅛
Tuesday, June 26	1.16	1.16⅜	1.15¾	1.15¾
Wednesday, June 27	1.15⅝	1.16⅛	1.14¼	1.15¼
Thursday, June 28	1.15¾	1.17¾	1.15⅝	1.17¾
Friday, June 29	1.18⅜	1.18¾	1.18	1.18

Refined has been firmly held at quotations last given. Exporters have not met with any special demand, as foreign buyers still appear disinclined to buy. Crude and naphtha have not been active.

The quotations for certificates of crude petroleum and of petroleum products last evening, as against those at the close of the four preceding weeks, are as follows:

	June 1.	June 7.	June 15.	June 22.	June 29
Certifi's, crude	1.19¾	1.15¾	1.19½	1.16⅜	1 18
Refined, 110°	8	7¾	7¼	7¾	7¾
Refined, 70°	8⅛	7⅞	7⅞	7⅞	7⅞
Crude, in bbls	7⅜@⅝	7¼@7⅞	7¼@7⅞	7@7¾	7@7¾
Case, plain	9½	9½	9½	9½	9⅜
Naphtha	5¾	5¾	5¾	5¾	5¼

The stock of petroleum at the seven principal continental ports, afloat, and loading in the United States therefor, amounted June 8 to 1,910,298 barrels, against 1,561,917 barrels June 8, 1882. At London the total was 448,660 barrels, against 330,631 June 1, 1882. And in both cases the receipts since January 8 last have exceeded the deliveries at the ports indicated.

OCEAN FREIGHTS.

The market for ocean freights has declined during the week. The tone on Saturday last was very firm. The tonnage offering was moderate and the demand was noticeably active. Petroleum vessels for long voyages were in request, as well as several for grain. General merchandise for Australia and South American ports was waiting for room, and these circumstances conspired to hold the rates well up. This stiffness was continued on Monday and an advance amounting to 1½d. was made in the rates on petroleum from this port to the continent. From that time on during the week the demand for vessels declined. The supply was not materially decreased or enlarged, and the market weakened solely through lack of urgent freight. Grain per steam in the berth has gone abroad but sparingly.

OCEAN FREIGHTS.

[By telegraph to BRADSTREET'S.[

From Philadelphia, Pa.: Grain tonnage has ruled dull. Sailing vessels are scarce, but "tramp" steamers and the regular line to Liverpool have offered ample capacity for the moderate business available. Oil tonnage has been in comparatively fair demand at steady rates.

From Wilmington, N. C.: Ocean freights here are steady.

From New Orleans, La.: Ocean freights are dull and unchanged.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: There has been a fair trade, and the market continues in a satisfactory condition. Some forty buyers are here, representing the various sections of the country, but they are small operators compared with those here earlier in the season. Manufacturers in all lines are fully employed and prices are on a steady basis. Sales for the week 46,559 cases.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Lumber in active demand for consumption. Stocks liberal and prices satisfactory.

From Baltimore, Md.: Dealers and manufacturers of building material of all kinds are doing a very brisk business.

From Wilmington, N. C.: Timber and shingles firm. Lumber quiet.

SPECIAL LOUISIANA CROP REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Sugar continues dull. Molasses and rice are quiet. Coffee is dull at 9¼@9½c. for fair. The burning of the Planters' Crescent Oil Co. and its large stock of oil, one quarter of the supply here, strengthened the crude cottonseed oil market, which is now quoted at 34@34½c.

NORTH CAROLINA NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Spirits of turpentine sells promptly. Rosins are firm. Tar and crude turpentines are steady,

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Whisky—straight goods are unchanged. Dealers in highwines are considering the question of still further limiting production. The Scott license law having been declared constitutional retailers are especially active, some hundred thousand dollars having already been paid in for license for this county alone.

From Louisville, Ky.: Whiskies quiet and unchanged; some special brands are quoted firmer.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: There is an active demand for tobacco, which brings full prices, offerings of higher grades being more liberal than any other kinds.

From Louisville, Ky.: Leaf tobacco movement liberal; offerings mostly good grades; demand well supported, and prices steady to fair. Manufactured tobaccos are in continued active request.

From St. Louis, Mo.: Hope of tobacco planting is almost abandoned; yet the market is dull and weak.

From Baltimore, Md.: The tobacco market is very active, and sales for France and filling of orders of other shippers are very liberal. Prices of Maryland are firm, and for better grades favor sellers. Holders of Ohio stock are firm in their views.

From Savannah, Ga.: The tobacco market is firm, with moderately active sales.

THE CHICAGO TRADE SITUATION.

[Special Correspondence of BRADSTREET'S.]

Chicago, June 27.—The flurry created by the recent failures on 'change is rapidly subsiding. In fact they were scarcely felt outside of the board and the few banks who had advanced money to those who were engineering the corner in lard, and, fortunately for the banks, they had been conservative in advancing and had sufficient margin to protect them from losses by the depreciation in the value of the property held as security. There was no derangment of the money market, and at no time were desirable borrowers refused accommodations. A few country banks drew down their balances, but this was a relief rather than a detriment, as the banks held more money than they could use to advantage, and as they were allowing a low rate of interest on current balances to interior bankers they were glad to see the money go out, and equally sorry when it came back, as the most of it has since done. The loan market to-day is easy to desirable borrowers at 5@6 per cent., and the funds available for such purposes materially above the supply of first-class paper seeking loans, although the latter is larger than usual at this season of the year. This is attributable to the fact that the stock of grain here is larger than ever before at this season of the year, aggregating 10,427,000 bushels, against 3,263,000 bushels at this date in 1882, and 9,513,000 in 1881. The present stock includes 6,100,000 bushels of wheat, valued at $6,400,000. Stocks of provisions are also heavy and are absorbing more funds than are usually employed in carrying such property during the summer. In addition to the increase in the above class of paper there is a full average call for money from merchants who are buying fall stocks and borrowing funds for the purpose of availing themselves of the discounts allowed to cash buyers. New York exchange is in moderate supply and quoted at 70@75c. premium per $1,000 between bankers. The heavy shipments of lard and other property, since the failure of McGeoch & Co. brought prices down to an exportable limit, has thrown an unusual amount of shippers' sterling and other foreign exchange on the market. The supply however has been greatly overstated by the daily papers, some of which placed it at $12,000,000, when in reality the entire amount has not exceeded $2,000,000. It has however relieved the market of that much surplus property and untied an equal amount of cash that can now be employed in other channels.

The following statement shows the condition of the Chicago national banks on June 22, 1883, in comparison with their reports for July 1, 1882:

	June 22, '83.	July 1, '82.
Loans	$47,103,388	$37,234,756
Deposited with U. S. Treasurer	970,500	1,083,500
United States bonds on hand	2,435,100	3,415,250
Other stocks on hand	1,415,093	1,563,111
Cash and exchange	28,778,076	34,052,339
Real estate and fixtures	413,727	920,350
Deposits	67,890,168	65,709,974
Capital and surplus	13,105,009	9,000,000
Undivided profits	1,470,983	906,627
Circulation	866,150	674,150

Business with the jobbing houses is undergoing the usual June quietude. The dry goods and millinery houses are having more than their usual summer trade, and the same may be said of the hardware establishments, and the general average sales in other lines is quite as good as at any corresponding period in former years. It is also conceded that the entire volume of goods sold for the past six months will exceed the same time in 1882, and collections are far better. The wheat market continues weak, the decline since the date of my last letter, June 20, being fully 5 cents per bushel. All now agree that prices are too high in view of the improved crop outlook, and that nothing like a healthy market can be looked for until the present large stock here begins to move freely to markets where it is wanted for consumption. Corn remains steady, under a fair demand from shippers. The damp, cool weather of the past few days has also proved a strong support to prices, which close the same as on the 20th inst. Oats are weak and 4@5c. lower under free receipts and decreasing demand, the latter being largely due to the fine crop prospect. The provisions trade is even more demoralized than at this date last week. Dealers are not only discouraged at the prospect of a large increase in the receipts of hogs in the near future, but have learned, and not without good cause, to distrust each other. No one seems willing to take the property and hold it, and the indications are all in favor of lower prices. It was thought that the heavy shipments of the past ten days would give the market a fair degree of support, and enable holders to work off their stocks, but the closing sales to-day show a depreciation of 55c. per barrel on pork, and 40c. per 100 pounds on lard from last Wednesday, and the feeling panicky. The following shows the stocks of grain in Chicago on dates named:

	June 23, 1883.	June 24, 1882.	June 25, 1881.	June 25, 1880.
Wheat, bushels	6,100,000	1,366,000	4,188,000	3,967,000
Corn, bushels	3,937,000	1,697,000	2,197,000	4,717,000
Oats, bushels	691,000	99,000	3,000,000	543,000
Rye, bushels	696,000	79,000	37,000	41,000
Barley, bushels	32,000	23,000	31,000	123,000

MICHIGAN CROP REPORT.

[Special Correspondence to BRADSTREET'S.]

Grand Rapids, Mich., June 22.—Reports from 24 counties in the central and western part of the state show that the corn crop, although planted late, has grown rapidly during the past three weeks, and is in a most promising condition. The only drawback feared by farmers is that a continuance of wet weather may interfere with the proper cultivation. During these three weeks 4.5 inches of rain have fallen. The hay crop this year will be the largest ever gathered in the state if weather for harvesting is at all favorable. The increase in acreage is about 10 per cent. Wheat, except in bare spots here and there, is looking in excellent condition, and the crop, under favorable conditions, will be above the average. Potatoes and all small crops look well, and a heavy crop of berries is ripening. Fruit prospects are also good.

The variety of crops raised in this state is so large that, barring disaster such as has never hitherto befallen the state, a prosperous season is assured. Trade continues slow and moderate in volume, but not dull. The situation is explained by the fact that buyers are generally uncertain of the future and are consequently giving only such small orders as immediate necessities require, and are constantly decreasing their stocks. It follows from this that business is constantly tending toward a safer basis, and if trade becomes dull dealers will be in the best possible shape to tide over a season of small trade.

ADDITIONAL MEMORANDA FROM THE JUNE COTTON REPORTS.

TEXAS.

From Austin county: Cotton is clean and has a good stand; prospects for a full crop are fair.

From Bell county: While cool nights early in the season somewhat retarded the growth of the plant, recent rains and warm nights have set it ahead, and the prospect is fully up to last year, if not better.

From Bosque county: We have had good, seasonable rains. Cultivation is good, cotton clean with a good stand, and farmers are well up with their work.

From Camp county: The plant has been checked by cool weather and injured by too much rain. Cultivation is moderately good, but the plant in the lowlands is grassy and lousy. Labor is very good.

From Colorado county: The stand of cotton is good and the farms have been well worked, but owing to excessive drouth from April 10 to June 15 the plant is very small and badly fruited. The present outlook is not favorable, but with a good season free from the ravages of the caterpillar we will have time to make a full crop, but it is the impression now that the crop will be 20 per cent. short.

TRADE EMBARRASSMENTS.

There were 165 failures in the United States reported to BRADSTREET'S during the past week, 13 less than the preceding week, 12 more than the corresponding week of 1882, and 62 more than the same week of 1881. Compared with the previous week the middle states had 42, an increase of 4; New England states 28, an increase of 8; southern states 25, a decrease of 6; western states 51, a decrease of 10; Pacific states and territories 19, a decrease of 9; Canada and the Provinces 27, a decrease of 1. The failures of importance were Odio & Perozo, shipping and commission, New York city; Samuel Semple & Sons, manufacturers of spool cotton, Mount Holly, N. J.; L. B. Day & Co., wholesale carpets, Milwaukee, Wis.; Hoglen Brothers Pulp Company, Dayton, Ohio. In the principal trades they were as follows: General traders 32; grocers 25; liquors 15; manufacturers 12; millinery 8; shoes 7; hotels and restaurants 7; hardware 5; butchers 4; fancy goods 4; clothing 3; tobacco and cigars 3; produce, grain, etc., 3; iron 3; lumber 2; jewelry 2; dry goods 2.

ALABAMA.

LANGSTON.—N. M. Grantham & Son, general store, are reported financially embarrassed.

ARKANSAS.

HOPE.—Bateman & Davis, grocers, have failed and gone out of business. Liabilities about $2,000.

CALIFORNIA.

HOPETON.—Isaac Cohn, general store, is reported to have failed.

LODI.—Thomas A. Wilson, hotel, has filed a petition in insolvency. Liabilities $6,700; assets $3,600.

NEVADA CITY.—A. J. Zekind, cigars, has filed a petition in insolvency. Liabilities $3,400; assets $2,700.

OAKLAND.—W. T. Gibbs, blacksmith, is in insolvency. Liabilities $2,209; assets $350.

OAKLAND.—H. C. Newby, carriage maker, who has assigned, owes $2,630; assets $5,769.

REDWOOD CITY.—C. T. Eikerenkotter, saloon, has been attached. Liabilities $800.

SAN FRANCISCO.—Josiah Bender, harness and saloon, is reported to have failed and gone out of business. Liabilities about $300.

SAN FRANCISCO.—W. R. Boree, real estate, has filed a petition in insolvency.

SAN FRANCISCO.—James Buchan, shoes, has filed a petition in insolvency. Liabilities $3,281; assets $1,162.

SAN FRANCISCO.—D. M. Costillo & Son, grocers, have been attached. Liabilities $1,240; assets $892.

SAN FRANCISCO.—Application has been made to force J. D Culp & Co., cigars, into insolvency.

SAN FRANCISCO.—A. Larson, saloon, is reported to have failed.

SAN FRANCISCO.—Charles Lularne, fruits, has been attached.

SAN FRANCISCO.—L. Reichsrath, saloon, is reported to have failed.

SAWYER'S BAR.—H. P. Robinson, saloon, is reported to have failed.

WESTMINSTER.—T. C. Hull, general store, has been attached and called a meeting of creditors. Liabilities about $8,000.

COLORADO.

GOLDEN.—Russell & Zugelda, brick, are advertised to be sold out by the assignee.

RED CLIFF.—M. Miller, general store, has been closed by attachment.

RED CLIFF.—James S. Parker, general store, has been attached for $1,900.

SILVERTON.—M. F. Driscoll, market, has been attached.

CONNECTICUT.

BRIDGEPORT.—J. B. Secor, toys, owes $12,000; assets $4,000.

NEW HAVEN.—Mrs. F. Bodlander, millinery, has assigned to Isaac Ullman.

PUTNAM.—J. B. Vetue, shoes, has been closed by attachment. Liabilities about $1,500; assets $450.

DAKOTA.

DICKINSON.—Auld & Moore, general store, have failed and been attached.

HOWARD.—F. M. Lighthizer, general store, has assigned to George R. Farmer.

DELAWARE.

WILMINGTON.—Wilson & King, slate quarry, have assigned and offer 50 cents. Liabilities $5,000.

FLORIDA.

PALATKA.—B. L Lillienthal, general store, has assigned to S. J. Kennedy. Liabilities about $12,000; actual assets $10,000.

GEORGIA.

ATLANTA.—A receiver has been appointed for Peeples & Wilson, sewing machines.

CARROLLTON.—A. F. Sharp, general store, who recently failed, owes about $5,500; preferred claims $2,900; actual assets $3,000.

MARIETTA.—L. S. Northcutt & Son, dry goods, have had a chattel mortgage foreclosed. Liabilities about $4,000; assets $2,000.

MILLER'S STATION.—S. J. Faris, general store, has assigned Liabilities about $1,000; actual assets $400.

IDAHO.

DEER CREEK.—C. E Bolton, hotel, has assigned. Liabilities $9,000; assets unknown.

ILLINOIS.

CENTRALIA.—V. P. Grubb, grocer, has failed.

CHICAGO.—Mrs. Ida Geik, millinery, has been closed by the sheriff. Liabilities $858.

CHICAGO.—The affairs of M. S. Nichols & Co., grain and provisions, are in a much poorer shape than expected, and it is thought now that the firm will not pay over 25 cents.

MOLINE.—The Moline Malleable Iron Company has given a chattel mortgage for about $50,000 to indorser.

PARIS.—Wooley & Lane, hardware, have been attached.

INDIANA.

INDIANAPOLIS.—John T. Woodward, cigars, has assigned and offers to compromise at 25 cents.

MISHAWAKA.—George Kuhn, miller, has failed.

NEW LEBANON.—M. M. Eaton & Son, general store, have assigned.

RIDGEVILLE.—George W. Cook & Co., grocers, have compromised.

RUSHVILLE.—William Klee, tailor, has been closed up.

WINCHESTER.—Gilligan & Love, harness, have dissolved and failed.

IOWA.

AFTON.—Charles Bothe, harness, has assigned to W. H. Van Nostrand.

BOONE.—C. M. Dawes, general store, has been closed on attachments. Liabilities $13,891; assets about $10,000.

CRESSON.—Samuel L. Morrison, grocer, has been attached.

DES MOINES.—The liabilities of B. W. Morrison, grocer, are $19,920; assets $12,820.

LAPORTE CITY.—Bair & Beverly, grocers, have been closed by creditors and gone out of business. Liabilities about $800; assets $500.

WASHINGTON.—J. M. Stickler, woolen mill, has failed.

KENTUCKY.

EDDYVILLE.—The liabilities of A. Hunter & Son, general store, are reported to be about $3,000; preferred claims $600.

GREENVILLE.—N. B. Kingsley, drugs, has been attached for $3,000.

LOUISVILLE.—The creditors of F. D. Barnum, jewelry, have agreed to accept 25 cents. Liabilities $35,000; assets $11,000.

LOUISIANA.

COUSHATTA CHUTE.—George Scherer, general store, has been sold out by the sheriff. Liabilities about $1,000; assets $200.

NEW ORLEANS.—Forcheimer Brothers, wholesale grocers, have failed. Liabilities $40,000; assets $31,000. The house was an old one, having been established before the late war.

MAINE.

BOOTHBAY.—Luther Maddocks, fertilizers, has been attached.

DEER ISLE.—E. F. Collins, granite, has been attached.

DEER ISLE.—M. S. Joyce, sewing machines, is reported to have failed. Liabilities $4,000. The assets consist of a dwelling house, mortgaged.

FLAGSTAFF.—Miles Standish, general store and lumber, has been attached.

SKOWHEGAN.—Robert W. Haines, hotel, has been attached for $800, and he conveyed real estate $5,000.

MARYLAND.

BALTIMORE.—Henry Knell & Sons, butchers, have assigned to Charles E. Wilcox. Liabilities estimated at $25,000; assets about the same.

MASSACHUSETTS.

BOSTON.—Creditors of the Boston Diamond Cutting Company have filed a petition for a stay of proceedings in insolvency.

BOSTON.—George W. Dean & Co., wholesale fruits, offer 15 cents. Liabilities about $22,000; nominal assets $4,000.

BOSTON.—Fickett & Beal, teas, coffees and spices, have failed. Liabilities about $15,000. Creditors have accepted 50 cents.

BOSTON.—The Hotel Gazette Publishing & Engraving Company has been attached. Liabilities about $3,000; no unencumbered assets.

BOSTON.—Murphy & McCarthy, publishers, have failed.

BOSTON.—J. A. Rothschild, laces, offers 25 cents cash, which has been generally accepted. Liabilities $9,000; nominal assets $10,000.

BOSTON.—Mrs. A. C. Webster, hats, is in insolvency. Liabilities $3,044. The assets consist of stock mortgaged for $200.

BROCKTON.—H. A. Copeland & Co., shoe manufacturers, owe $11,000; assets $2,500. They have gone out of business.

BROCKTON.—A. M. Niles & Co., shoe importers, owe $11,000; nominal assets $3,500.

CLINTON.—Day & Folger, stoves, are in insolvency.

EAST SOMERVILLE.—J. Henry Skinner, grocer, has sold out and is reported to have failed.

FALL RIVER.—Thomas P. Murray, fancy goods, owes about $12,000; nominal assets $5,000; actual assets $3,500.

FOXBORO.—William T. Cook & Co., straw goods manufacturers, have contingent liabilities of $300,000, as indorsers for the Union & Bay State Manufacturing Company. They hold the property at Fenton as security, but it cannot be realized upon.

HOLYOKE.—Thomas F. Kilbride, plumber, has filed a petition in insolvency.

LAWRENCE.—George S. Armstrong has filed a petition in insolvency.

LAWRENCE.—Fulton Brothers, fancy goods, have been attached.

LOWELL.—L. W. Godin, shoes, offers 40 cents.

LOWELL.—A. J. Paradis, tea and crockery, is reported to have failed. Liabilities $1,000; nominal assets $800.

LOWELL.—Henry R. Wood, carpenter, has filed a petition in insolvency.

NEW BEDFORD.—Mrs. R. B. Baldwin, millinery, has been attached.

SOUTHWICK.—S. E. Thayer, grocer, offers 60 cents. Liabilities $5,000; assets $4,500.

SUMMERVILLE.—Joseph McDonald, plumber, is in insolvency.

TAUNTON.—Creditors of William H. Flagg, millinery, have filed a petition in insolvency against him.

WEBSTER.—J. D. Kingsbury, market, has been attached.

MICHIGAN.

DETROIT.—Walker, Hopkins & Co., commission grain, are reported financially embarrassed.

LUTHER.—Howard Daniels, saw mill, is reported to have failed.

NASHVILLE.—Prindle & Chipman, general store, have been attached. Liabilities about $5,000.

MINNESOTA.

ATWATER.—H. Troup, fruits, etc., has been closed by the sheriff.

MINNEAPOLIS.—Paul West, cigars and stationery, has assigned to Fred. H. Snyder. Assets about $900.

MOORHEAD.—Judgment for $4,810 has been entered against Richardson Brothers & Co., lumber.

ST. PAUL.—T. H. Darling, restaurant, has been attached for $830.

ST. PAUL.—C. E. Thayer, grocer, has assigned.

MISSISSIPPI.

HARPERSVILLE.—B. K Harralson & Co., general store, have assigned. Liabilities $2,000; assets $1,500.

MISSOURI.

HANNIBAL.—The reported assignment of the Hannibal Printing Company was premature. Its affairs are reported in an unsatisfactory condition. Liabilities $15,000; preferred claims $8,000.

KANSAS CITY.—P. J. Kennedy, saloon, has been closed by attachments.

KIRKSVILLE.—E. L. Spotts, hotel, has failed and gone out of business.

ST. JOSEPH.—C. J. McClelland, grocer, has failed. Liabilities $800; assets $500.

ST. LOUIS.—P. J. Stephens, wall paper, has assigned to C. M. Whitney. Assets $1,550.

NEBRASKA.

CENTRAL CITY.—C. J. Cooper, hardware, has mortgaged his stock.

LINCOLN.—Mrs I. Oppenheimer, millinery, has failed.

OMAHA.—H. H. Marhoff, trunks, has mortgaged his stock.

NEVADA.

MASON VALLEY.—J. Daniel, general store, has assigned.

SHERIDAN.—M. Jacob, general store, has been attached, sold out, and called a meeting of creditors. Liabilities $4,000; assets $1,500.

NEW HAMPSHIRE.

MANCHESTER.—George C. Bunton, fancy goods, has been attached.

OSSIPEE.—Moulton & Livingstone, lumber, owe about $8,000. It is thought there is property enough to pay all the indebtedness if properly managed.

SANDOWN.—Charles Sanborn & Brother, lumber, have failed. Liabilities about $13,000. Their property has been sold out by the sheriff on attachments for $25,000.

NEW JERSEY.

ASBURY PARK.—Redden & Applegate, builders, have failed.

MOUNT HOLLY.—Samuel Semple & Sons, manufacturers of spool cotton, were attached on the 26th inst. for $140,000 and work was suspended. John Semple, a silent partner, has a mortgage of $40,000 on the works. The business was established over thirty years ago. Samuel Semple, the founder of the firm, died in September, 1881.

NEW MEXICO.

DEMING.—W. M. Borden, hardware, has been attached.

LAS VEGAS.—A. Danziger, grocer, has assigned.

NEW YORK.

BROOKLYN.—William Maupai, brewer, assigned on the 26th inst. to Henry F. W. Kiehm, giving preferences for $74,000.

JAMESTOWN.—Wells & Gourley, machinists, have assigned to Porter Sheldon.

MALDEN.—Herbert M. Hover, general store, has assigned to C. Rockefeller, giving preferences for $958.

NEW YORK CITY.—Herman Busse, paints, assigned on the 23d inst. to William E. Lucas, giving the latter a preference for $388.

NEW YORK CITY.—Richard M. Cooney, flavoring essences, assigned on the 23d inst. to George W. Cooney, giving preferences for $1,246.

NEW YORK CITY.—The schedules of Patrick N. Fleming, poultry, show liabilities $14,400; nominal assets $7,010; actual assets $3,216.

NEW YORK CITY.—Alex. Kyle and Henry R. Cudlipp, proprietors of the Murray Hill Soap Company, assigned on the 28th inst. to E. S. Kuh.

NEW YORK CITY.—Adolph Neuendorff, manager of the Germania Theatre, assigned on the 27th inst. to Randolph Guggenheimer, without preference. Liabilities $61,200; actual assets $5,753.

NEW YORK CITY.—Odio & Perozo, shipping and commission, assigned on the 27th inst. to F. G. Pieria, giving five preferences for $1,576. They have not been acting in harmony for some time and application was made for a receiver. They owe $14,000 for merchandise, and their friends say they will probably pay 25 cents. They lost their own capital, and the borrowed capital is said to have been withdrawn. In November last they claimed cash capital of $125,000, of which $55,000 was borrowed, and they estimated the profits for the year 1882 at $20,000 in addition.

NEW YORK CITY.—R. H. Parks & Co., stock and grain brokers, assigned on the 26th inst. to James A. Patterson, giving preferences to Mrs. Frances M. Munger $5,000; Belle E. Parks $5,000; Bank of the State of New York $18,000. The latter preference is conditional that the bank abandon all suits against the firm in Chicago or elsewhere.

NEW YORK CITY.—Moritz A. Pollock, crockery, assigned on the 26th inst. to Joseph Kohn, giving eight preferences for $1,354.

NEW YORK CITY.—I. Procktor & M. Schwartz, jewelers, assigned on the 25th inst. to Louis Krulewitch.

NEW YORK CITY.—Dennis Sullivan, grocer, assigned on the 25th inst. to Daniel Sullivan, giving three preferences for $770.

NEW YORK CITY.—The schedules of Vanderhoof, Morrison & Co., stock brokers, show liabilities $119,908, of which there are unsecured $19,758; partly secured $55,634; wholly secured $22,171; preferred $22,345. The total nominal assets are $147,398, of which $83,398 have come into the possession of the assignee, the actual value being $32,493. The other nominal assets, $64,000, are held by creditors as collateral security.

NEW YORK CITY.—Henry K. White, manufacturer of straw goods, assigned on the 26th inst. at Stamford, Conn.

ROCHESTER.—R. D. Hall & Co., produce, have been sold out by the sheriff on execution for $1,075.

SARDINIA.—A. J. Adams, wagon maker, has assigned.

SYRACUSE.—A. W. Blye & Co., manufacturers of oil tanks, have failed and transferred the entire business and assets to William E. Hopkins, a creditor, for $6,800. Liabilities about $12,000; assets $2,410.

SYRACUSE.—Thomas W. Green, saloon, is reported to have left town without paying his bills.

UTICA.—Frederick L. Tallman, groceries and saloon, is reported to have left town.

NORTH CAROLINA.

HENDERSON.—J. G. Vaughan, liquors, has assigned.

MONROE.—G. R. Sowell, general store, who recently assigned, owes about $2,000; assets $1,800.

WINDSOR.—Mrs. O. A. Whitley, millinery, is reported to have failed and left town.

OHIO.

AKRON.—Beck & Johnston, shoes, have assigned to L. D. Walters and J. M. Meane.

AKRON.—Philip Schumacher & Co., manufacturers of stoneware, have assigned. Liabilities estimated at $7,000.

CARTHAGE.—Henry Suing, contractor, has assigned. Liabilities estimated at $15,000.

CINCINNATI.—John Doll, shoes, has assigned.

CINCINNATI.—Mrs. Mary A. Middeke, shoes, has assigned to John Webb, Jr.

CLEVELAND.—Parkin & Ryan, galvanized iron, have been attached.

CLEVELAND.—L. B. Yanker, saloon, has assigned to M. C. Hart.

COLUMBUS.—The Capital City Electrotype Company has assigned to J. H. Vercoe.

CONNEAUT.—G. A. Carson, clothing, has assigned. Liabilities estimated at $1,000.

DAYTON.—Hoglen Brothers Pulp Company has assigned. The company was incorporated in January, 1881, succeeding the business of Hoglen Brothers and The Dayton Wood Pulp Company, with an authorized capital stock of $100,000, of which $90,000 was paid in by property of the business. The company had two mills—one for straw pulp, at Midway, and the other for wood pulp, in Dayton. The latter was not successful.

DELPHOS.—Fred. Beyer, merchant tailor, offers 35 cents.

WILLSHIRE.—H. G. Banta & Son, general store, have failed.

ZANESVILLE.—Fred. Ehrman, confectioner, has assigned. Liabilities about $6,000.

PENNSYLVANIA.

BRADFORD.—E. Sweetland, produce, has been closed by the sheriff.

CHESTER.—E. D. Sparks & Co., hardware and manufacturers' supplies, ask an extension of six, twelve and eighteen months, without security. Liabilities $22,574, of which $15,000 is to the father of Mr. Sparks.

CONNELLSVILLE.—J. S. Bryner, general store, is advertised to be sold out by the constable.

HARRISBURG.—J. H. Keller & Co., laundry, have been sold out by the sheriff.

HUNTINGDON.—Simon Bialostosky, general store, is in the hands of the sheriff.

KINGSTON.—M. C. Gregory, grocer, has been closed by the sheriff. Liabilities estimated at $2,000.

NEWPORT.—Executions for $1,200 are in the hands of the sheriff against R. H. Wingert, shoes.

PHILADELPHIA.—Albert J. Bilhartz, house furnishings, has been sold out by the sheriff, realizing $398. Liabilities $995.

PHILADELPHIA.—Mrs. Johanna Boser, shoes, is reported to have been sold out by the sheriff. Liabilities $500.

PHILADELPHIA.—John J. Cook, grocer, has had execution issued against him for $3,612.

PHILADELPHIA.—M. Elkin & Co., manufacturers of umbrella sticks, have been sold out by the sheriff. Liabilities about $5,000. The sale realized about $350.

PHILADELPHIA.—Mrs. Mary A. Fury, trimmings, has been closed by the sheriff.

PHILADELPHIA.—M. S. Gerstle & Co., artificial flowers, were sold out by the sheriff on execution for $1,054 in favor of L. Bamberger.

PHILADELPHIA.—Judgment for $311 has recently been entered against Maurice Hayes, undertaker, upon which execution has been issued. During the present year judgments aggregating $1,967 have been entered against him.

PHILADELPHIA.—Execution has been issued on judgment for $430 against Daniel Hughes, grocer, in favor of E. Mulligan.

PHILADELPHIA.—Execution has been issued against Joseph J. Lippincott, trading as J. J. Lippincott & Co., scrap iron, metals, etc.

PHILADELPHIA.—Fileppo Longo, saloon, has been closed by the sheriff.

PHILADELPHIA.—The sheriff's sale of Orr, Hess & Morgan, machinists, realized $21,000.

ST. HYACINTHE.—O. Bergeron & Frere, dry goods, are offering to compromise. Liabilities $5,805; actual assets about $3,000.

IMPORTANT NOTICE.

SCIENCE.

The undersigned begs leave to state a specimen copy of SCIENCE—the new weekly illustrated paper—will be sent to any address on receipt of ten cents. It should be borne in mind that SCIENCE is the only periodical of its class in America, and every reading American can well afford to have it regularly sent to his home, in order to get concisely the scientific news, in all departments of science, from all parts of the world. SCIENCE is owned by The Science Company, whose directors are Daniel C. Gilman, of Baltimore, President; Alex. Graham Bell, of Washington, Vice-President; Gardiner G. Hubbard, of Washington; O. C. Marsh, of Yale College; and Samuel H. Scudder, of Cambridge, Editor and Treasurer. The price of SCIENCE by the year is $5. (52 numbers, two volumes, 1,500 quarto pages, neatly printed and well illustrated.) By single numbers, 15 cents each.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.
Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.
The synopses of recent legal decisions constitute an exceedingly valuable feature.
As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.
THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

SATURDAY, JULY 7, 1883.

NOTES OF THE WEEK.

With the week broken in half by a holiday, there has been little disposition to do business manifested by the brokers of Wall street. Transactions on the exchange have been exceedingly limited, but not more so than might be expected at this time. Such movement as the market has had has been upward, so that prices have recovered to about the level they had attained on Friday of last week, before the general drop of Saturday knocked them back. It was a short "turn" which the market had, made by Mr. Keene, who seems to have drawn off again to let the bull combination, consisting of Messrs. H. U. Smith, D. P. Morgan, D. O. Mills and the junior Vanderbilts, do what it can to advance prices. Though the effort to bull the market in June turned out a failure, there seems to be a general hope that July will have a better story to tell.

The Anti-Monopoly Convention at Chicago, during the week, has drawn attention to the extent of the anti-monopoly movement and to the aims of its promoters. Some idea of the extent of the general movement may be gathered from the fact that in the Chicago convention delegates were present from thirteen states, not including the territory of Dakota and the District of Columbia. The movement appears to be most general in the west, most of the states represented being situated in that section. Only two eastern states were represented, namely, New Hampshire and New York. The latter state, however, possesses much the most efficient organization, and has apparently been correspondingly influential in the convention, a New Yorker having been elected president of the conference. The platform submitted by the Committee on Resolutions advocates a postal telegraph system, the abolishment of the national banking system, the establishment of a graduated income tax and of postal savings banks, amendment of the patent laws to secure more perfect protection of inventors and the imposition of taxes for the necessary expenses of the government only. It also denounces gambling in the necessaries of life.

The discussions before the convention developed the fact that there was not that unanimity of sentiment among the members that was to have been expected. The original call declared as the purpose of the convention the organization of a new political party, but as the proceedings progressed it became clear that widely different views were held by the delegates upon matters of capital importance (though not germane to the purposes of the convention), such as the tariff and the currency. This would not have been a circumstance of particular moment ordinarily, but the differences assumed so much prominence as to indicate either that there was no very clear agreement upon specific questions within the range of the expressed aims of the convention or that those aims were so vague and general as to allow the seeming agreement of persons holding in reality different opinions. This seems, in fact, to be the difficulty with the anti-monopoly movement, taken as a whole, though it is not to be denied that in particular instances there has been an approach to clearness and definiteness in the statement of principles.

Nor is the existence of the drawbacks indicated to be wondered at. The growing sentiment in favor of limiting the power of corporations is, for the most part, wisdom after the event. Corporate power has grown largely by indirection. Its great strides were made under the stimulus of popular and official approbation. Persons still in middle life can recollect when the construction of a railroad to the Pacific was urged in the platforms of political parties differing widely on almost every other question. The immense material benefits derivable from corporate activity were early understood, but in the first flush of enthusiasm it was forgotten that the administration of great properties is seldom or never free from great abuses. Corporate management is peculiarly liable to abuses for the reason that under it the check of individual responsibility is wanting. At the rate at which corporate enterprise was developed in this country it was not to be expected that the evils referred to would be at all lessened in extent. On the contrary, they grew correspondingly, and the result is that the public is now confronted with abuses which have excited the alarm of conservative men at the same time that they have given a handle to the demagogue. Under the circumstances, it is not strange that now, as in all similar conjunctures, the public feeling should be manifested more by vague and general denunciation than by the proposal of judicious and practical measures of reform.

But, in the nature of things, this condition of affairs cannot continue, and before long the Anti-Monopoly party will be called upon to justify its existence by some substantial work beyond that of criticism. And here some pertinent considerations suggest themselves which are well worth the attention of the promoters of the anti-monopoly movement. It will not do, under the cover of well-sounding generalities, to open the way immediately for extensive and possibly destructive changes in the law and in governmental policy in particulars in which they bear on corporate interests. Nor is it by such means that the adhesion of intelligent and conservative men can be gained. Let the anti-monopoly leaders and those in sympathy with them propose in detail specific measures of reform. Some such measures, which would bring others in their train, we have heretofore suggested. Much good may be done by the enforcing of increased publicity in the matter of gross earnings, etc. At all events, it should be remembered that it is not by discriminating against corporations through unequal taxation or otherwise that corporate abuses can be corrected. The true remedy will be found to consist not in crippling the power of corporations, but in making their responsibility to the public commensurate with their power.

A London correspondent elsewhere in this issue dwells upon the extent to which cash payments are obtaining in the retail trade of England. As was previously pointed out in these columns, the work of the coöperative stores gave the death-blow to the pernicious credit system of the English shopkeepers. It is well that such progress is making in England toward the enforcement of the sound doctrine that the consumer should pay cash. As we have frequently insisted, the weak point in the mercantile credit system of the United States is the comparatively small extent to which cash payments obtain in the retail trades. The worst phase of the difficulty is in the southern states. In mining and industrial communities generally the people as a class are usually a month behind with their payments for household supplies. As western society becomes more stable it is believed that credits will have less and less to do with retail transactions. This is already evidenced by the way in which cash payments are obtaining in the retail trades of the leading American cities.

The Portland (Me.) *Press* advocates the abolition of the Kittery Navy Yard, for the reason that there is no work for it, that it has for years been a vote factory, and that its removal will have a beneficial influence on the politics of western Maine. These reasons, which commend themselves readily to the average man of common sense and with an economical turn, are not, however, of the kind to be appreciated by the average politician. For these very reasons the advice of the Portland journal should be seriously considered by the government. It is not improbable that the situation of the Kittery Navy Yard is an illustration, perhaps an exaggerated one, of many offices and departments under the general government. The yard was used as a vote factory while the Democrats were in power, and has been so used since the Republicans came in. A change of administration makes a difference of 500 votes in Kittery and its vicinity. Hundreds of men look to the yard for little work and good pay, and in return offer the ballot as a consideration. The existence of the state of affairs described by the Portland journal is at once an indication of the need of reform in the government service generally, and an evidence of the fact that reform principles have as yet made but little headway.

There has been very little exciting news in the European dispatches during the week. Some slight commotion has been caused in France by the illness of the Count de Chambord, but it is not clear that his demise will have any effect on the fortunes of the republic. In Ireland a somewhat better state of public feeling than has been prevalent for a long time is noticeable. Mr. Parnell's speech at the opening of the Industrial Exhibition in Cork was non-political in tone. He said that in the exhibition he saw a hopeful sign of the revival of Irish industries. Judge O'Brien, in addressing the grand jury at Limerick, declared that the diminution in the number of outrages since the last assizes amounted to a social revolution. In Parliament the Chief Secretary, Mr. Trevelyan, said that accounts of the state of the country were hopeful, and that there was no reason to expect exceptional distress. The ravages of the cholera at Damietta continue apparently unabated. A sanitary cordon now stretches around Damietta for fifteen miles, and Sir William Gull, the physician, states in a dispatch to Earl Granville that in his opinion the cholera in Egypt will subside without spreading to Europe. In Tonquin matters are at a standstill.

THE WHEAT CROP OF 1883.

In collating the data for and preparing this its third annual wheat crop report of the United States, BRADSTREET'S has delayed the work until after many contemporaries have made exhaustive inquiries, for reasons which, in the light of recently received crop advices, make themselves apparent. The late winter proved an exceptionally severe one for the wheat sown last fall. In many portions of the great central western wheat-growing states the ground was without snow at times, covered again, and then again bared. This alternate freezing and thawing process was attended with disastrous results. Naturally enough, the earlier reports from those localities were very discouraging. Winter weather lingered along well into the spring months, and considerably retarded the sprouting grain. May was cold and wet, and during that month very discouraging views of the prospects for an average crop were taken by many experienced crop reporters and others. The farmers themselves, fresh from an experience with an exceptionally bountiful crop, were very generally cast down as to the outlook, and the various state and the National Agricultural Bureau returns during April and May bore the unmistakable impress of the outgivings of their views as described. There were, of course, other drawbacks incidental to various localities and which increased the gloom which overspread the hundred and one peculiarly commercial crop reports which were given out for the particular benefit of a would-be speculative public. But at home, as well as abroad, the month of June brought radically differing influences to bear upon the situation. The weather for the greater portion of the month was bright and warm, and the wheat crop, as a whole, grew far beyond expectations. Rain had visited the Pacific coast in time to prevent thousands of acres sown to wheat from burning up.

For these reasons it will be perceived that comparatively late reports from the wheat fields, based on returns received after a degree of settled and favoring weather had had time to have effect, are here given. The mail advices to BRADSTREET'S from the larger winter-wheat-growing states are fairly complete, and bear a nearly uniform date of June 16. These are supplemented with special telegrams received yesterday from the principal winter and spring wheat-growing states, and which dwell particularly upon the weather since the middle of June, its effect on the growing wheat, the existing weather, the outlook, and the improvement, if any, in the plant since the date of mail advices. From an examination of the replies by mail it appears that the chinch bug, Hessian fly and rust have added their efforts to those of the severe winter, while in Illinois, Indiana and Ohio many fields of apparently good grain are found to be filled with "cheat." The reports from Kansas and Missouri, as well as the states just named, cover the regions which were flooded in the early spring as well as within the past month.

The points rendered conspicuous from a careful examination of the replies, reveal (1) that the past two and the present week constitute a critical period in the life of the growing wheat plant; that continuous favoring, even forcing, weather will do very much to increase the output, although the gain in June will continue to count in any event [on this point our dispatches, summarized below, have a direct bearing], and (2) that not enough stress has been laid upon the repairing effects of the weather during the past thirty days.

The more vital points given by our correspondents, under the head of remarks on the blanks which were sent them, are summarized as follows:

NEW YORK.

In a number of counties in New York state the winter wheat suffered severely, while the spring wheat did not. From our reports it is believed that earlier statements in reference to the widespread damage done the wheat crop have been exaggerated or based on incomplete data.

PENNSYLVANIA.

Fairly complete returns from Pennsylvania indicate that the wheat crop in that state will prove, with favoring weather during harvesting, to be a fair to full average according to locality. The drawbacks which have appeared in other states in the east have been felt there to a less extent, and in quite a number of counties the prospective gain in yield is so large as to much more than offset the losses noted elsewhere.

OHIO.

The ravages of water, an open winter and the Hessian fly are also common to the replies received from Ohio. The northern counties have suffered least, however, and in some an increased acreage is reported, while an average yield is promised. The extremely unfavorable reports quite equal the worst from Indiana and Illinois, as, for instance, Champaign county, Ohio, which raised 800,000 bushels of wheat in 1882, promises not over 350,000 bushels this year with the most favorable weather. Fulton, Lucas and Williams counties, so far as can be learned, are about the only Ohio counties which were covered uninterruptedly with snow from November till April, thus protecting the seed in ground. For the past four years these counties have averaged 15 to 18 bushels per acre, and the outlook now is for 15 bushels. The condition of the wheat in Washington county is reported to be a full crop where bonedust or phosphite has been used, and near at hand where "fertilizer" was used there will not be a third of an average crop. In Williams county the best crop ever promised by the middle of June in thirty years is reported, with an increase over the average of 80 per cent. In Wood county wheat was in excellent condition until the middle of February. After that wheat on clay and gravelly soil (heretofore the best) has been killed. On the black, murky soil and sand it is better than usual.

INDIANA.

Considerable of the early-sown Indiana wheat was winter-killed, and the land where planted has since been plowed up and turned to other uses. The middle season grain, however, has in a majority of instances done fairly, but that planted last fall is light and thin. The "second wheat county" in the state, Shelby, claimed on June 25 a prospective yield of but a little below the average, depending on the weather until harvest. While the wheat did not stand thick it had large heads. The river and creek bottoms suffered from the floods in the early spring, and several well informed Indiana correspondents state that, while the farmers tell very contradictory stories about the wheat outlook, that with farming weather until and through harvest time that the talked of shortage will be largely curtailed. From several large counties come farmers' reports with word that wheat has made unexpected strides during the two weeks ended June 22. Still there are replies from some counties where an average yield of from 16 to 20 bushels per acre is believed to have been reduced to 3@4 bushels per acre through the ravages of the fly and the open winter. The quality is fair in those regions where an excess of production or a like output with last year is promised. The average of the harvest will not prove as high a grade as last year.

ILLINOIS.

Fly and rust have held high carnival here. Considerable land sowed to wheat has been plowed up. The plant left standing in many counties is thin and patchy. There are many counties, however, which report little damage from the unfavorable weather in the winter and spring. In a number of heavy wheat counties the damage done by a snowless winter and a cold spring, fly and rust, will amount to from 60 to 70 per cent. of an average crop. In those localities farmers will be slow to sell any remaining surplus of old wheat, as they are not likely to raise enough this season for seed and consumption. The harvest will be later than last year, probably an average of two weeks. In some of those counties, where 70 to 80 per cent. of an average wheat crod is expected, the outlook on April 1, and in others on May 1, was very discouraging. The favoring weather of the past two months appears to have worked surprising changes for the better, even to the farmers themselves. The irregularity of the growth of the wheat plant in the same or adjoining counties is remarkable. Many farmers claim that the damage done has been by the severe winter, and others, near by, that the Hessian fly is at the bottom. Many theories are advanced to account for this. The most plausible appears to be that the inclement winter season had a different effect, according to the nature of the soil, whether high or low lands, and in other respects. Much surprise has been expressed at the prevalence of "cheat" in the wheat fields, it being exceptionally frequent.

MICHIGAN.

The wheat crop in Michigan has suffered largely from too much rain and has run to straw in many localities. It is added, however, that much that is threatened in this way will improve greatly with continued warm weather from the date of report on to harvest time. There are also a number of reports which show that much of the growing grain which sixty days ago was believed to be from 10 to 25 per cent. damaged, as compared with last year at the corresponding date, has already shown a great improvement owing to favorable weather. The most striking gain in prospective crop at the close of June, as against last year at the same time, is in Mason county, where the increase is reported at fully 100 per cent., although the total of the county is not large. The crop has been delayed in various localities from one to three weeks, as in other states, but less so than in portions of Illinois and Indiana. In Lenawee county the wheat had improved unexpectedly in the first half of June. The ground has barren spots, but the plant was thick all about, the inference being that the ultimate yield would not vary much from that of last year.

KENTUCKY.

Stormy weather in June, added to the earlier ravages of the weather, did a great deal of damage in Kentucky. In some localities while the probable decrease in production will range from 10 to 20 per cent., as compared with 1882, the quality of the grain is said to be better from 2 to 10 per cent. In other localities the heads of the wheatstalks are said to be well filled, the straw short, strong and not easily beaten down. From other regions it is reported that the early-sown wheat will yield a fair average, while the damage done has been to that sown later, which promises not much over one-half a crop. There was a vast gain in many Kentucky counties during May and to the middle of June, the main drawback at the latter date being the thinness of the stalks in the ground. Grain was being cut south of Paducah, Ky., and the berry was said to be excellent. A number of heavy wheat counties will yield considerably in excess of last year.

MISSOURI.

The frost and rains in Missouri during the winter and early spring played sad havoc with the wheat crops in some counties. The fly hurt wheat badly in many places, and "a small white worm" is reported in Shannon and other counties to have cut the stalk off above the ground. There was considerable wheat plowed up on the first indications of damage from drouth and winter-killing. There is considerable cheat in the fields this season. On the medium quality land wheat has grown wide apart, but the extra bulk of the berry encourages many to believe that the yield will not be so materially affected as had been supposed. The bottom land in the southeastern portion of the state will yield far better than other sections, some in Genevieve county being placed as high as 25 bushels to the acre. In the western portion of the state the wet weather has interfered with the growth of the plant for six weeks, but hot and showery weather has of late prevailed. Throughout the state corn is suffering for want of cultivation, and the weeds were getting very numerous.

IOWA.

The mail advices from Iowa somewhat preceded the critical period of the spring wheat in this state. The outlook by the middle of June, and during the succeeding week, was, in the main, excellent for a fair average crop. In many reports the correspondents state that, so far as can be judged at the time of writing, the outlook is the best that has been observed at any corresponding date for years, and a gain in production was believed probable. In some counties heavy rains have so damaged the growing crop as to materially reduce the probabilities of an average yield, but these appear to be the exception. There is a remarkably uniform report from the majority of counties covered of a gain in acreage and probable yield. Still, as the time of mailing the reports was prior to the period when the plant is likely to be most critically placed, the outcome will have to be judged largely upon the basis of telegrams received, and which we give elsewhere.

WISCONSIN.

The replies from principal wheat-growing counties of Wisconsin do not bear out the early reports of serious damage to the crop. There is a decrease in the winter wheat acreage there, the total of which is not large; but the land sown to spring wheat in many localities promises a full acreage. An increase of from 1 to 3 bushels per acre in probable output is frequently reported. Very little of the grain has been winter-killed, comparatively speaking. Despite the early cold and wet season many correspondents say that the growing wheat and oats are looking finely. The rolling land has been washed some but the ground is in fair condition. With favorable weather the result was expected to be favorable. There are counties in Wisconsin, however, which report damage from early spring severe weather, but they are not conspicuously frequent.

MINNESOTA.

The wheat crop in the Red river valley is more uniformly promising than ever before, with a good color and stand. There is some delay in the growth of the plant elsewhere through the state, but not a serious one. In some sections, where the grain is looking well the corn is reported backward, but beginning to improve. In a majority of counties correspondents say that the prospects for the harvest of wheat (the middle to the 20th of June) were for a larger yield than at the corresponding time last year. The weather was beginning to be very generally favorable. Until very recently it was thought that the wheat acreage had been reduced about 5 per cent., and that this land had been utilized by the dairying interests. Nevertheless the reports indicate a very full acreage throughout the state.

DAKOTA.

The reports from Dakota fully corroborate the statements current of late respecting the heavy gain in acreage in that territory. There are a number of counties which are relatively large wheat producers which fully anticipate 100 per cent. gain in yield as compared with last year, several which expect 300 per cent. increase, and few which go below 25 per cent. gain. The exceptionally unfavorable report from Grant county states: "While wheat is a little behind at the present date on account of the cold weather, it is nevertheless well stooled, and prospects for a good average crop were never better."

NEBRASKA.

From a number of counties in Nebraska reports come of an excess yield per acre as compared with last year, and the outlook bright for an exceptionally bountiful harvest. The less favorable reports are confined to winter wheat, being slightly under the average, while the spring crop is still above it. The acreage in Nebraska appears to have been noticeably increased.

KANSAS.

Harvesting has been steadily progressing in Kansas for some days. Farmers have been surprised in a number of counties at the wheat growing better than they expected, the quality in many cases being full No. 1. In some of the Kansas counties the shortage reported is due in part to the dry season last fall, resulting in less seeding. In the northeastern portion of the state the floods did considerable damage. In a number of counties the prospective yield is placed far ahead of that at the corresponding time last year. The ravages of the chinch bug in 1882 in those localities have not been duplicated this year. In the same region corn, oats and rye are looking excellent. The quality of Kansas wheat promises to be better than in several of the nearer wheat-growing states. The wet weather in northern counties has prevented the operations of the chinch bug, and in this respect favored the outturn.

VIRGINIA.

Severe weather in the winter and a dry season in the spring appears to be largely responsible for most of the damage done to the wheat in Virginia, which according to our mail advices of about the middle of June was not very great. Recent good weather in many localities in Virginia has, however, greatly stimulated the growing grain, and a fair average is reported probable in many places where a decrease was previously expected.

TENNESSEE.

Considerable damage in Tennessee has been done by rust, owing to the dry spell in May. The early sowing will not amount to much, but later planting promises a fair yield. In quality the plant is below that of last year. Many localities report the crop not more than one-half as good, the berries

being smaller, while others have a gain of from 5 to 10 per cent. to report in acreage and prospective yield.

Our telegraphic advices, which we give complete in our regular commercial columns, together with other special dispatches, are, to a certain extent, contradictory as to the gain actually achieved by the wheat plant. The excellent growing-weather has, however, been continued. The threatened drouth in the northern portion of Minnesota has in part disappeared under the influence of rain. The spring-wheat states, as a rule, are a little behind, but it is believed that harvesting in the northwest will be pretty general by about August 1, a delay say of two weeks.

Special advices by wire from the Pacific coast say that on June 30 there were on hand 50,000 tons of old wheat available for shipment, and considerable flour, but no more than last year. Threshers' returns from the valley counties of California exceed farmers' estimates in all cases, both as to condition and quality of wheat. The shrinkage caused by the hot spell is not so great as anticipated, and the yield promises to exceed that of 1880 considerably. The probable wheat surplus for export this season is 1,500,000 short tons. Telegrams from the northwest show that the critical period for spring wheat has not passed yet, and also throw some doubt on previous high estimates of the probable northern Minnesota and Dakota yields.

Below we present BRADSTREET'S estimate of the wheat crop of the United States for 1883 somewhat in detail. It is exhibited in comparison with the final statement of the National Agricultural Bureau as to the output of wheat in 1882, and increases or decreases are given (in the third column) on the basis of that comparison. It should not be overlooked that BRADSTREET'S figures are based to a large extent on gains actually reported, but in part on the probable improvement succeeding our detailed reports in view of the state of the weather. The estimate must be regarded as preliminary only, in view of the explanation just made, and will be subject to later and more detailed returns to be made public in a subsequent report. The situation July 1, as reported to this journal, pointed to the following:

Winter wheat states.	*Bradstreet's estimate, 1883.*	*Agricult'l Departm't (final), 1882.*	*Per cent. Inc. or dec. in 1883. (approx'e)*
New York	9,100,000	12,145,200	Dec. 25
Pennsylvania	20,000,000	20,300,700	
New Jersey and Delaware	3,000,000	3,299,300	
Twelve southern states including West Virginia	45,000,000	40,556,550	
California, Oregon & Washington Territory	65,000,000	50,525,900	
Indiana	31,820,000	45,461,800	Dec. 30
Ohio	26,000,000	43,453,600	" 40
Illinois	25,000,000	52,302,900	" 51
Michigan	27,500,000	32,415,400	" 15
Kansas	25,000,000	31,245,000	" 20
Missouri	19,200,000	27,538,600	" 30
Kentucky	12,800,000	17,250,000	" 22
Tennessee	7,500,000	9,971,200	" 25
Total winter	316,920,000	386,366,150	
Spring-wheat states.			
Minnesota	33,000,000	33,030,500	
Iowa	25,500,000	25,487,200	
Wisconsin	23,840,000	23,145,400	
Nebraska	18,000,000	18,300,000	
Dakota	18,000,000	11,500,000	Inc. 50
Col., Nev., Idaho, Mont., Wy., Utah, Ariz. & N. M.	7,000,000	5,290,200	" 33
New England states	1,100,000	1,103,020	
Total spring	126,440,000	117,856,320	

	Bradstreet's, 1883.	*Agricult'l Depart., 1882.*	*Per cent.*
Total (estimated) production (1883) spring and winter, compared with 1882	443,360,000	501,222,470	Dec. about 12
Decrease winter wheat, in 1883, according to comparison	69,440,150	.....	Dec. over 18
Increase spring wheat, in 1883	8,583,680	.....	Inc. over 7
Net decrease wheat, 1883.	60,866,470	.....	Dec. about 12

The damage done to wheat in New York, concerning which reports in the western part of the state have been very discouraging, are not confirmed by our advices, as shown by a decline of but 25 per cent. as against 50 per cent. reported elsewhere. Pennsylvania appears to have raised a full average crop, and New Jersey and Delaware will have a fair harvest. The decline in the total yield of wheat in the southern states has been very slight, if any has taken place. It is our impression, based on reports received, that the National Bureau reports the aggregate quantity of southern wheat grown in 1882 nearly 20 per cent. below that actually raised.

The decreases in yield in the various western winter and spring wheat-growing states, with percentages calculated on a comparison with the figures given in the second column, sufficiently explain themselves. It is highly probable that the total yield of wheat in Colorado, Nevada and the territories named in connection therewith will aggregate between 8,000,000 and 9,000,000 bushels, rather than the total given. Sufficiently detailed statistics from those localities, however, are not at hand. Montana, Wyoming and Utah have witnessed notable strides in wheat-raising within the year. The exhibit shows a probable decrease in the current year of over 69,000,000 bushels of winter and an increase of over 8,000,000 bushels of spring wheat as compared with the output of 1882, a loss of over 18 per cent. of winter and a gain of over 7 per cent. of spring wheat, or a net decline of about 61,000,000 bushels in production, or over 12 per cent. This, with the surplus of about 60,000,000 carried over from the crop year ending July 1, 1883, will leave the country quite as well prepared to supply its domestic requirements, besides meeting the demand abroad, as it was a year ago, after a short crop and with a light surplus.

PROTECTION AS A PERMANENT POLICY.

The extreme advocates of protection, forgetful of the fact that the restrictive system was entered into upon the plea that it was to be a temporary expedient, are now arguing in favor of the adoption of protection as a permanent policy. The advanced position assumed by them is hinted at in the following paragraph, evidently from the pen of Professor Robert E. Thompson, which appeared in the last number of the Philadelphia *American:*

It is remarkable how fast mythical statements begin to grow around the memories of great men. Mr. Henry C. Carey is not long dead; the manufacturers of Philadelphia have not had time to put up a monument to his memory. Yet the *Times* of New York says of him: "He regarded protection as a temporary expedient, to be used to promote the establishment of industries which would not otherwise, or very tardily, get established, and to be withdrawn when once that purpose was accomplished. He would hardly have defended high protective taxation as a permanent system." We certainly do not yield to the *Times* in acquaintance with Mr. Carey's teachings as set forth in his books, and we enjoyed for years the privilege of discussing with him economic questions, not excepting all the bearings of the protective policy. But we never found in his books or heard from his lips a statement which indicated that he regarded protection as a temporary expedient. He even regarded the abolition of protective duties in England, after some of them had continued for a quarter of a millenium, as a fatal mistake.

The interest of the above paragraph lies, of course, not in the inquiry as to whether Mr. Carey at any time expressed the opinion that protection should be regarded as a temporary expedient, but in the fact that his professed disciples, and those whose interests incline them to adopt the views of these, are in favor of making the protective policy a permanent one.

A suggestive commentary on the aims of the extreme protectionists will be found in an article by Mr. David A. Wells in the current number of the *Princeton Review*, in which the author deals with the most recent phases of the tariff question. He finds an instance of the unfavorable operation of the protective system in the case of the woolen industry, which, although it has received more protection during recent years than any other, with the exception of the manufacture of iron and steel, has yet seen more periods of extreme fluctuation and has paid a smaller average of profit on the total capital invested than any other of the domestic industries, while at present the general opinion among the trade is that the production of woolens in the United States is very far in excess of existing market requirements. Under circumstances such as those existing at present the only alternative to be adopted by the manufacturers is to suspend the work of production until the elasticity of the market is again recovered, and this is being done to some extent. There are other industries in a state similar to that of the woolen manufacture, and an understanding of the tendency of the protective system to induce over production and consequent commercial and industrial disturbance Mr. Wells counts among the influences which must eventually bring about a modification of our existing economic policy.

Another influence upon which Mr. Wells lays stress is one which was brought sharply into prominence during the tariff discussion before the Commission and in Congress, namely, the antagonism of different interests under the protective policy, an antagonism which he says bids fair to evolve more of bitterness and hatred than has ever been manifested by protectionists, as a whole, against the free traders. This antagonism must, according to the writer, sooner or later divide the protective party into hostile factions and inevitably wreck the whole system which it advocates. Some of these differences are still fresh in the public memory, such as those between the iron and steel manufacturers and the iron ore producers, between the woolen manufacturers and the wool growers, etc. The extremes to which these conflicts of interest might lead were indicated in the attitude of the senators representing the lumber interests at the last session of Congress. When the Senate voted to reduce the duties on lumber notice was served that, unless that vote was rescinded, active opposition would be made to the whole protective system, and more particularly to the maintenance of those duties in which New England was specially interested. This threat had the effect of securing a substantial restoration of the duties taken off in the first instance, nearly every senator from New England concurring. One of the senators afterward stated to Mr. Wells, in explanation of his action, that without such a change of votes the interests of New England would have been slaughtered. In the light of these facts the writer's conclusion will not seem unreasonable that if, with a view of promoting the greater institutions of the country—those which employ the largest amounts of capital and the largest number of laborers—the old policy of attempting to protect everything shall be abandoned, the smaller interests deprived of protection will unite against the system from whose benefits they have been excluded and will endeavor by every means in their power to destroy it.

THE WEATHER BUREAU AND COMMERCE.

Though our National Weather Bureau has been in active operation since 1870, and the circle of its useful observations has been steadily widening, many business men have never had leisure to acquaint themselves with its practical working and to learn just how to make its daily telegraphic reports most helpful to them in conducting their ordinary pursuits. To aid such in acquiring clear ideas of the mode of making up the daily weather-forecasts, and of how they may be utilized, it may be well to point out here the salient features of the government's weather system.

If we could suppose the atmosphere to be fluid like the sea and the great moving air masses to be so colored as to be distinguishable by the eye, observers in almost every part of the United States could detect the ceaseless flow of a vast atmospheric current the year round from our Pacific coast to the Atlantic seaboard, in a direction from west to east. It is this physical fact which makes it so clearly practicable to carry out in the United States a system of weather-forecasts. For, in such a current, there would be visible large eddies and waves of air, each borne along at varying intervals and with varying velocities, by the general stream-like motion of the air. In order to ascertain, therefore, the position, rate of progress and size of these eddies and waves (which are simply cyclones and anti-cyclones or "cold waves"), the Weather Bureau plants its stations over the whole country. These stations, from ninety to one hundred in number, are distributed at proper intervals for the observation of storms and waves of air marked by fine weather, from the Pacific to the Atlantic and from the Gulf of Mexico to Manitoba and Canada, and are in telegraphic connection with the Washington signal office. The observers at all the stations, three times every day and simultaneously, read their instruments—barometer, thermometer, hygrometer, wind and rain gauges, note the condition of the sky and make up their reports which are instantly telegraphed to the Washington office for comparison and study, preliminary to the preparation of the tri-daily bulletins and forecasts, known as "Indications," issued by the bureau and published by the newspapers.

It is true the rotary storms and great waves of dry air, which travel from west to east over the country in ceaseless round, cannot be traced except by their cloud-forms, the direction of the winds around their respective borders and the oscillations of the mercury in the barometer as they approach a station. But ample observations are made to determine the presence, area and intensity of each cyclone or anti-cyclone when it nears any one of the stations; and, as all the stations observe and report telegraphically to Washington, at intervals of about eight hours only, the data they furnish the central signal office enable that office to draw three weather-maps every twenty-four hours, showing graphically the position and energy of each moving area of storm or sunshine in the country, as well as its rate and path of movement. The forecasts are thus made possible. For each "weather-map" presents a *bird's-eye* view of the state of the atmosphere over the entire country; every storm-centre is delineated on the map, and all the aërial currents which control the storm's motion and progressive direction appear, while the waves of heat and cold, of fine weather, rain and frost are represented on the map just as they are relatively situated at the hour of observing in the atmospheric ocean itself. By the "law of storms," established by the researches of Redfield, Dove and other investigators years ago, the winds will always blow around a geographical area in which the barometer reads low, in a direction *contrary to that of the hands of a clock;* but around an area in which the barometer reads high (say above 30.00 inches), they blow in the opposite way—from *left to right.* Without any guess-work, therefore, it is clear that, with sufficient telegraphic information as to the position and progress of the moving areas of high and low barometer, the meteorologist can safely predict the weather of places in their tracks far ahead of their arrival at such places. It has been well said: "As soon as observations collected by telegraphy were laid down on charts, an entirely new light was thrown upon the complex phenomena included under the simple term "weather"; and by the publication of the charts so prepared the public were admitted to the study of the processes of weather production by the mutual action of cyclones and anti-cyclones."

Without, however, attempting in our limited space to unfold these physical processes, we may point out some practical uses that may be made of the Signal Service daily synchronous reports and monthly weather summaries, especially by merchants and farmers. In 1872 Commodore

Maury proposed a plan for obtaining early knowledge of the weather conditions affecting the growing crops. "A few days' foreknowledge of the weather at particular stages of the crops would be worth millions," he said, and would "lift the public from under the heels of the speculator, and place merchant, producer and consumer, planter and factor, side by side in this knowledge." By this system, which would serve to show at short intervals the actual state of the weather over the country, it would be possible, he urged, to tell "when to expect a drouth—when a wet season—whether the next winter is to be mild or severe—whether it is to be such as to favor abundant harvests or short crops." Now, while such predictions may not be always feasible, even when undertaken by skilled meteorologists, the data at present published by the Signal Service afford the means of obtaining close approximations to this invaluable "foreknowledge." When, for instance, last March, the California wheat crop had reached a most critical stage, through the abnormal winter drouth, and gloomy forebodings of its future were indulged in, the daily weather bulletins from Washington announcing heavy rains on the Pacific coast, carrying the precipitation above the average for the month, any eastern merchant could at once determine the true wheat outlook in that section. Since it is known that Indian corn cannot thrive and mature without a mean temperature of 65 degrees continued for at least two and a-half months, in any backward season, like the present, a protracted "cold spell" in the northwest in June or July would almost certainly curtail the crop, and frosts from Manitoba would overtake it before it was fully ripened. Should the isothermal of 65 in June advance beyond its ordinary limit for this month (the 47th parallel in the Missouri valley), supposing the season is anything like normal, the result of the September harvest would be assured beyond a reasonable doubt, and the country could confidently count upon an exceptionally abundant yield of this cereal two months before it was gathered. In either case, the numerical temperature and rainfall data furnished by the Weather Bureau will suffice for any intelligent merchant or farmer, enabling him to forecast for himself the general agricultural returns, as also to ascertain whether prevailing reports of good or bad crop prospects rest on a solid basis or upon exaggerated estimates. The data requisite for such forecasts can be best gathered from the monthly publication of the Signal Service, entitled the *Weather Review*, which exhibits numerically, and by colored charts, the monthly march of the seasons, the areas of drouth and abundant rain, departures from the normal temperature, etc., in each section of the country. Especially useful will the data contained in the *Weather Review* prove for the prevision of the crops when compared with those published by the Agricultural Bureau.

We have only hinted at one of the many ways in which the weather observations can be practically and economically utilized by the commercial public. Cyclones, or revolving storms, in which the barometer reads low, bring with them much rain, long spells of warm weather, with northeasterly gales on the Atlantic coasts, followed by northwesters and cold weather. Anti-cyclones, marked by high air pressure, bring long, dry and cold spells, and covering often more than half of the United States, creep slowly from the Rocky mountains to the Atlantic seaboard, throwing in their front vast volumes of cold air into the warm, moist region of the Gulf Stream. The anti-clyclonic type of weather is known to be peculiarly permanent, and hence when the weather bulletins announce a "high-pressure" wave of great extent entering the northwest the attentive reader may at once infer what kind of weather is in store for his section for several days. Shippers interested in the movements of vessels from Europe and the West Indies may also foresee that, as this vast, heavy wave rolls eastwardly over the Atlantic, causing high westerly and northwesterly gales, all ships bound to our Atlantic ports will be seriously delayed by head winds. If the Washington reports show, on the contrary, the presence of a large trough of low pressure in the interior of the country, causing an indraught of air from the Atlantic, business men can infer that all ships, steam and sailing, then approaching our eastern coasts will be speeded into port by easterly winds.

Upon the announcement from Havana of the appearance of a great hurricane in the West Indian waters, the Signal Office barometer observations in the upper Mississippi valley may be turned to excellent account by merchants and all business men in the lake-bordering western and Atlantic states. The tropical hurricanes, after entering the Gulf of Mexico, as is well known by meteorologists, recurve to the northeastward, passing over Florida and up our eastern seacoast, or ascend the Mississippi valley, recurving over the great lakes toward Newfoundland, according as the pressure conditions over our central states are unusually high or low. If, on the arrival of a hurricane in the northern part of the gulf, therefore, the Washington weather bulletins announce the simultaneous arrival of a large high pressure area in the northwest, since it is known that such an area will advance southeastwardly and crowd the oncoming hurricane out of the gulf states, forcing it to find a path nearly parallel with the Gulf Stream, shipping on the lakes may feel secure against its assaults. If the reported conditions are such as to draw the hurricane-center inland, so that its indicated track will cut the Atlantic coast-line north of Sandy Hook — as the ocean-born tempest, after traversing the continent, is hastening to regain its native element—the coastwise shipping at this and other eastern ports may so improve the weather telegrams as to both avoid running into its vortex and also avoid unnecessary delay in port, while sailing ships especially about to go to sea may so time their departure as to get the benefit of the harmless westerly winds in the storm's rear.

We thus refer explicitly to these possible utilizations of the Signal Service reports, not to discuss their scientific bearings, nor yet to urge their economic value to the public, but to point out to business men generally how, with a little systematic study of these reports, they may make them far more serviceable in furthering their own private interests and the commerce of the country than seems now done. At the yearly meeting of the Great Western Railway Company, in London, in 1881, the chairman stated that when the memorable English snow-storm of the previous January occurred "we had fifty-one passenger trains and thirteen goods trains buried in the snow." He added, this snow-storm "wiped off something like £56,000 of the amount available for dividend."* Sir E. W. Watkins, M. P., in 1876, stated to the Southeastern Railway shareholders that the difference to them between a fine week and a wet week was not far from £3,000, while "a year with more than the average of sunshine and a year with less than the average of sunshine makes a difference to you of £100,000." These facts, which could be supplemented by others illustrating like losses by reason of exceptional weather on American railroads, emphasize the importance of the suggestions we have made for a better and more intelligent utilization of our meteorological reports and forecasts by the public, especially by such corporations. If it is objected that unscientific men cannot interpret these data supplied by the government, and cannot put them to a better use than they now do, we cannot reply with the old saying ascribed to Sir David Brewster: "Every man is by nature a meteorologist." Railroad companies cannot be weatherwise, but they can invoke enough scientific aid to enable them to correctly interpret the government's general weather bulletins, and to so put them to the best and most timely use that they may often measurably anticipate local disturbances along their lines and guard against washouts, bridge accidents, obstructions to travel and disasters to trains. Especially hopeful would such an attempt be if the great lines would institute a plan for the daily collection of special weather telegrams from their principal stations, to be supplementary to the government weather telegrams, from both of which special and "local" railroad forecasts could be made by a meteorologist charged with this duty alone.

What degree of efficiency has been already attained by the Weather Bureau in the work of forecasting may be inferred from its more recent official publications. The Chief Signal Officer's report for the year ending June 30, 1881, states that the percentage of verifications of forecasts of "changes of barometric pressure, temperature, wind direction and character of weather expected" was 85.2. Of the "forecasts of the character of the weather only," 88.7 per cent., it states, were verified. Predictions of the changes of barometric pressures, temperatures, etc., are more difficult to make than those relating to the future conditions of the weather alone, and hence it might have been expected that the latter forecasts would have been more generally fulfilled. In addition to these regular daily predictions the service has also issued, as circumstances required, special "frost warnings" for the benefit of the southern sugar interests, special flood warnings for the benefit of commerce on the western rivers, and also special hurricane warnings for the benefit of shipping on the Atlantic and Gulf coasts. All the daily bulletins marked "special" contain forecasts extending over twenty-four hours. Of the total number of "cautionary—off shore and northwest—signals" displayed by order of the service on the seacoasts and lakes, the report for the year mentioned states that 83.3 per cent. were reported as justified; while of the storm signals proper, hoisted in anticipation of dangerous storms, 83.1 per cent. were afterward "reported as justified." The annual report for 1882 has not yet appeared, but the monthly "reviews" show that these percentages have been sustained, and since the beginning of 1883 (during the stormy months from January to April inclusive) the percentage of all the signals, "reported as fully justified," was 86.7. We may learn how these results in weather forecasting and storm warning, attained by the United States Weather Bureau, compare with like results reached by foreign weather services from a statement publicly made by R. H. Scott, secretary of the British Meteorological Council, on the 4th of May last—that all European offices claim officially a success of about 80 per cent. in weather forecasts.

Our limits forbid more than a glance at other features of the Signal Service weather system, as its cotton reports, reports on the stages of rivers, its coast marine reports, its gradual accumulation of data for constructing an accurate climatology of the United States, which is greatly needed by agricultural interests in our vast trans-Mississippi domain, and its ocean-meteorology reports, based on observations of sea-going vessels, and forming a large link or series of links in the chain of international weather research which aims at tracking the cyclone in its long circuit across oceans and continents, determining the ocean routes on which ships will meet with the fairest winds, the fewest storms and the least fog and ice, and solving some still obscure problems of weather science. But we have said enough to show that this system of weather telegraphy affords the commercial world a supply of practical knowledge of the elements of sea and air, which, if put to the uses of which it is capable, would prove to be of incalculable economic value.

* "Our Iron Roads." London. By Frederick S. Williams. Pp. 435.

THE RETAIL TRADE OF ENGLAND.

A London correspondent writes as follows: When Napoleon sneered at the English for being a nation of shopkeepers the shopocracy was a governing, and perhaps the dominant political, force. The territorial lords were supreme in the counties, and the pocket boroughs belonged to retired East Indians and other men who were rich enough to buy seats, but the large boroughs were supposed to represent the current of that public opinion which the Tories feared and the Whigs courted, and in the large boroughs the shopkeepers were masters of the position. In those days shopkeeping was easy and lucrative; the shopkeepers completely controlled local government; they imposed and spent the local rates, and they constituted the main and deciding electoral body of the borough. As the shopkeeper was well-to-do, he paid heavy taxes cheerfully, boasted of his patriotism, and regarded the retail counter as the bulwark of the prosperity, might and majesty of the British empire. Shopkeepers large and small adopted the credit system, and those who chose to pay cash and those who were compelled to do so because they had no credit were charged precisely the same prices as the credit customers. I was lately talking to a gentleman who was a London shopkeeper when William the Fourth was king, and who not very long ago retired from business, and he told me about the beginning of what he is pleased to describe as the ruinous revolution in the retail trade. About forty years ago it became usual, except with what my friend called old and respectable tradesmen, to offer 5 per cent. discount for cash. At first the reform was jeered at, and it was one of the jokes of the period that the 5 per cent. was put on to the price before it was taken off. The next blow at the retail credit system was the abolition of imprisonment for debt. The abolition is only partial, since imprisonment has been retained for small debts under the designation of imprisonment for contempt of court. From a report just issued it appears that during 1882 there were entered in the county courts of England and Wales no less than 1,009,185 complaints for sums not exceeding £20, and that shows that the credit system flourishes luxuriantly among the working classes and in the lower and ever struggling middle class. But when imprisonment for debt was virtually abolished for "respectable" amounts the tradesman was compelled to refuse credit to those who would not pay unless they were forced, and who could no longer be forced by physical pressure to pay their debts. Thus a great number of persons who had incomes, and were only impecunious because they were recklessly extravagant, were obliged, *nolens volens*, to pay cash; and the retail cash system at its commencement was mainly supported by those who were denied credit. It is said that the coöperative store system was begun not, as is generally supposed, by a combination of civil-service clerks, but by half a dozen men resident in the same neighborhood who were refused credit by the tradesmen, and who resolved that, since the shopkeeper would not give them trust, they would not give the shopkeeper any profit. Anyhow the co-operative stores gave the *coup de grace* to the dear old credit system, and the reason that coöperative stores are not now spreading is that their work is accomplished. Large cash firms are now selling at what may be called coöperative-store prices, and it is just as economical and more convenient to deal with them. These large concerns make large incomes, but the lucrative result is only due to the vastness of their turnover. The average shopkeeper is now sorely pressed to pay his way and live. The people who can pay cash go to the stores or to the big firms, and no wonder, for the difference in prices is remarkable. Not only has the shopkeeper who gives credit to charge an extra percentage to compensate him for waiting for his money, but he also needs a large net profit because his transactions are not sufficiently extensive to enable him to pay his way with a small profit, and above all he cannot buy nearly so well as the big store or the big firm which buys a great quantity and for cash. The best customers—that is, the customers whose money is sure—are now cash buyers and go to the stores and the big firms; and further—this is a most unkind cut—people who take credit very often, instead of paying their debts take their cash to the store or to the store-price establishment. The palmy days of the British shopkeeper are gone forever; the big stores and the big firms are doing well, but the average shopkeeper is doing badly. Formerly the average shopkeeper could retire from business with a little fortune, or if he died in harness he left a nice little property to his family. Nowadays the average shopkeeper does not save money, but he deems himself lucky if he does not drift into hopeless insolvency.

At this moment the shopkeepers, especially those in the suburbs and in the country towns, are alarmed by the forthcoming parcels post; and though the alarm is not unfounded, the apprehension of the shopkeeper is probably exaggerated. No doubt the large stores and establishments will, in respect to goods that can be retailed through the post office, be able to outsell the local tradesmen and yet pay the cost of postal carriage. No doubt the new agency for delivery will be a great boon to the big retail dealers, but the local shopkeeper will not be suddenly and completely ruined, for there are many people who pay more for their goods rather than be at the pains of writing an order and remitting the money; for of course the big retailers would soon find their business did not pay if they sold at cash prices and yet sent off goods per parcels post without having first received payment for the same. These, however, are matters of detail, and the important fact is that the retail trade of England has been wonderfully changed in a few years, and that it is being rapidly and completely revolutionized in character and incidents, and that revolution must be fraught with great social, political and internal trade results.

THE SEWING MACHINE TRADE.

The "change of front" that has taken place in the sewing machine trade the past few years, owing to the expiry of patents held in common by a combination to which other manufacturers were tributary, has had the very decided effect not only of cheapening machines but of improving construction through the stimulus given by more free competition to inventive genius. There were four houses holding four patents, none of which could make a sewing machine without infringing on the other. Originally they had no choice but to come to a dead stop unless they reconciled their conflicting interests, and the plan was found in an agreement by which each paid into a common fund a royalty of $3 for each machine sold—the amount, at stated times, being equally divided among the parties. With the expiry, some four years since, of the last of these patents—that of the four-feed motion—the bond of union being dissolved, prices were promptly cut down. Machines that had been disposed of, wholesale, at $75 being cut down to $35, and at $50 to $30, a reduction which compelled a number of manufacturers to quit the field or reduce their working force. With the monopoly possessed by the companies the stimulus to improvement was by no means so great as at present. In view of the important advances made by other parties, and in their own interests, they have been for some time experimenting to

bring out easier running, more noiseless and more rapid-working machines. At the present time the machines patented by other manufacturers are, as a rule, better protected than their own. Throughout the past fifteen years there has been a steady advance in construction. The previous machines have become antiquated and unmarketable. It is affirmed that manufacturers now realize only a moderate profit on each machine, so that a company to make money must do a large volume of business. As a consequence of reduction of price, and the operating influence of valuable patents taken out in various quarters, there are now actually fewer sewing machine manufacturers than during the combination, and a number of these have been compelled to reduce their force. Still there are always new accessions to the ranks. When the combination drove everything before it, the most glowing and exaggerated representations prevailed as to the profits to be made in the business—representations which gave confidence to capital, and multiplied the newcomers, a good proportion of whom in time succumbed, either from want of sufficient means for manufacturing on a large scale or through the custom of two and three years' credit to dealers established by the combination, and the failure of many of these dealers, with the want, in many cases, of the business qualities required, including unlimited push. Through the royalties exacted the combination profited by the increase of newcomers, who imagined the sewing machine business a sure pathway to fortune.

That the trade did not develop to a larger extent in earlier times—times associated with the discovery of the machine—is due to the fact that, contrary to the general impression, its practical development is quite recent. Thirty years ago the sewing machine business was just beginning to start. Personal efforts to make sewing machines had previously been put forth, but failed of practical results. Howe, years and years ago, tried to make sewing machines, but the sewing was slower than by hand, his only patent of value being the eye in the point of the needle. Then a manufacturer of linen goods, Bachelder, made goods, needle and apparatus to run round a large cylinder in order to hold these in connection. The concentration of the actual work done, with the necessary correctness and rapidity, within the limited space necessary for a really useful machine, was as yet but a bare possibility. This was in the main accomplished by the combined features of the eye in point of needle, the carrying goods on a plain surface, the four-motion feed, and the pressure foot patent, the patents of the combination, and which had been severally secured by Howe, Grover & Baker, Wheeler & Wilson, Singer & Co., in the order named. That there is room for improvement is undoubted, as the mechanism of leading machines in the market still contains the old-fashioned cogs, which make most of the rattle, and the equally ancient crank for carrying the shuttle back and forth, and necessitating a number of pieces, whereas, by a process which the Patent Office, for want of a more accurate term, has designated a new principle in mechanics, from twenty to twenty-six pieces can be dispensed with, the shuttle being driven in parallel line without a crank.

More time and money is devoted to examine machinery and produce perfect articles than ever before, but, with all the capital invested, enough machines to meet demand cannot be turned out. We may add that the style of modern mechanism is an important advance on the old. To bring out and develop this style has necessitated skill of the highest order.

The business to-day is in a healthier condition and in a more mercantile shape than during the patent combination, and the demand for machines is greater than ever.

The annual value of the sewing machines made in this country and exported may be placed at $20,000,000. (The largest sales are made in the northwest, Chicago being the chief distributing point.) An important element in the demand is the wearing out of machines, particularly in factories, where rapid wear ensues from the speed at which they are run, say 1,500 stitches a minute. Indeed, it is with many manufacturers a point of economy to kill off their machines in a year. It is only within the past five years that the factory business in sewing machines has been well developed, the lowering of price and the greater exigencies of trade having contributed to this result. The scale which our export trade has assumed, averaging several thousand machines per week, is due to the universal recognition of their excellence, customers being found in all civilized countries, these including Siam, Japan and China. Two sewing-machine manufactories have been established in Great Britain by American houses, the largest of these being in Glasgow, but they only partially supply the orders thence received. In Europe competition is somewhat sharp, especially that of Germany, whose machines are for the most part poor and cheap; and that of England, where machines are less ingeniously constructed and of decidedly inferior workmanship. This country is the largest consumer in sewing machines, and the rapid increase of our population, which is relatively greater than that of any other country, assures a higher rate of sales in the future. The sewing machine has become at last, through improvements of the past twelve years, a necessity for families and for the factories in which textile fabrics are pieced together.

Whilst no further combination such as that which has ceased, is to be apprehended, there are those who argue that the tendency of the business is such that it must eventually concentrate itself in the hands of a few powerful corporations, but there appears good ground to hold that it affords ample scope to individual skill and business qualifications of a special order, and that there is no reason why numerous houses should not be built up in the future from comparatively small beginnings, having their leading claim in valuable patents and distinctive merits.

OCCASIONAL NOTES.

The action taken by business men generally in regard to the obnoxious trade dollar, and the prospect of its speedy elimination from the currency, naturally recall the checkered history of this short-lived coin. It was authorized to be coined by the act of February 12, 1873, and was intended not for circulation in the United States, but for export to China, that empire possessing no mint for the coinage of gold or silver, and depending upon foreign coins for its domestic circulation. It was designed to compete with the Mexican dollars, which, until the institution of the trade dollar, had constituted the principal shipments of coin to China. For this purpose it was made a little more valuable. At the time the coinage of this piece was authorized it was worth in London a little over $1.03 in gold. In July, 1876, the price of silver having fallen heavily, the bullion value of a trade dollar was 80.7 cents in gold. On the 22d of July, 1876, Congress, by a joint resolution, abrogated the legal tender quality of this coin and restricted further coinage to the actual export demand. This restriction, however, was evaded by persons who made affidavit that the coin was actually needed for export. These persons shipped the coin first to China and then back again to the United States, where it was put into circulation. Under the act authorizing the coinage of these dollars they were coined for depositors of silver bullion at the mints, and a charge was imposed for coinage at a rate not to exceed the actual cost to the government of manufacture. The standard silver dollars and the silver fractional coins, however, are coined from silver bullion purchased by the government for that purpose and on its own account, and are not coined for depositors.

The total value of the production of the fisheries of Canada in 1882 was $16,824,092.34, an increase over that of the preceding year of $1,006,929.70, exclusive of the catch in Manitoba and the Northwest territories, of which there are no returns. The province of Nova Scotia led with a production valued at $7,131,416, and was followed by New Brunswick with a production valued at $3,192,338. Quebec, Prince Edward Island and British Columbia followed in order, each with a production the value of which was somewhat less than $2,000,000. It is estimated that fish to the value of $4,885,000 was consumed by the Indian population. The total value of fish exported was $7,697,608, of which all but $15,529 was made up of fish produced in Canada. The largest share of these exports came to the United States, which received $2,454,323 worth. Great Britain took fish valued at $2,130,232. The next largest consumers were the British West Indies, which took fish to the value of $1,188,819. The total value of fish imported into Canada in 1882 was $1,231,917. Upon dutiable fish imported the duty paid amounted to $24,056. Of the total imports $672,517 came from the United States. An increased product from the province of British Columbia is reported. The total number of cases of canned salmon produced there amounted to 255,061. A little over 5,000 barrels of salted salmon were also packed there. For this latter kind of fish there is said to be a rapidly increasing demand, and, less capital being required in salmon packing than in the canning business, the British Columbia inspector expresses the opinion that a broad field is opened therein for the industrious fishermen of moderate means.

The debt reduction for June was unusually large, amounting to $18,098,201.43. This is attributable for the most part to a very large increase over May in customs receipts, and to a large reduction in disbursements. The receipts from customs during the month amounted to $20,600,000, an increase over those for the preceding month of about $7,000,000. The disbursements for pensions were only about $1,000,000, against several millions during May. The debt reduction for the year amounted to $137,823,253.24. The available cash balance, July 2, amounted to $151,118,346.54, an increase since June 1 of nearly $20,000,000. The standard silver dollars continue to be returned to the Treasury, the net increase for the month amounting to about $2,000,000. The total increase to the government stock of silver dollars for the year amounts to about $25,000,000. The whole amount of silver dollars now in the Treasury is within a fraction of $112,000,000, against which there is outstanding in silver certificates $72,620,686. The whole number of silver dollars now in the Treasury, reduced to bulk, represents about 4,032 tons of 2,000 pounds to the ton. If to this be added the weight of the fractional silver in the Treasury the weight will be increased to about 5,040 tons. The aggregate receipts for the year show a slight decrease as compared with last year, being $403,525,250 in 1882, and $398,338,520 in 1883. An increase in the expenditures is noticeable, those for 1882 amounting to $257,981,439, and those for 1883 to $265,568,087.

Through the courtesy of Mr. W. Dunham, of the London *Miller*, we are in receipt of a complete account of the proceedings of the National Association of British and Irish Millers, which meeting was held in London May 23. The attendance was large, among those present being Major Craigie, of the Central and Associated Chambers of Agriculture; the Hon. George Bain, president of the American Millers' Association, Cincinnati, and Mr. John Ross, late president of the London Corn Trade Association. From a careful report of the proceedings it appears that considerable interest was taken in the subject of uniform weights and measures for the control of the United Kingdom, and a resolution was adopted urging upon Parliament the passage of a bill to that end, which has already been introduced. Inasmuch as the existing milling system has become largely if not almost entirely of the roller variety it was decided that a re classification of flour-mill insurance rates had become necessary, and measures were discussed looking to a conference between the British millers and insurance company representatives to that end. This association appears to favor the cental as the unit of measure in the corn trade, but considerable difference exists among the members, some of them taking quite strong grounds in favor of the quarter.

SPECIAL CORRESPONDENCE.

THE PRESENT CONDITION OF TRADE IN GREAT BRITAIN.

London, June 21.—People have at times hazarded conjectures respecting the relative proportions of the home and foreign trade of this country—that is, the amount of employment found for the population from foreign sources and the amount of the national income derived therefrom. If we can accept Professor Leoni Levi's estimate of the national income at £1,000,000,000 annually, and take the value of last year's exports as returned at £241,500,000, we arrive at a proportion of 24½ per cent. as the value received for work done in this country for foreign consumers—a percentage which, it may be at once pronounced, is altogether inadequate. Probably a good deal more than half the manufactures carried on in Great Britain are for exportation. In the cotton trade seventh-eighths of the goods turned out are sent abroad. In wool and iron manufactures probably the exports are considerably more than one-half of the country's production, and the same may be said of linens and jute goods. Of coal the quantity recorded as exported is only about 14 per cent. of the entire quantity brought to bank, but if to that be added the enormous quantity of fuel consumed in the production of iron and other merchandise exported, and the tonnage taken for steamers engaged in foreign trade, we may be very sure that this 14 per cent. would be a good deal more than doubled. Besides which, there are many articles of export not recorded in the Board of Trade returns—ships being one of them—and we must also include within the national trade the amount earned by British ships engaged in all parts of the world. Then there is the "International Market" trade, the re-exports last year amounting to £65,000,000, which is profitable to the country in various ways; and beyond this there is a large amount of colonial and foreign trade carried on by British merchants which never comes to this country at all. For instance, if the United States buy jute from an English house in Calcutta the profits upon that transaction are for the greater part spent in England. Even now we have not arrived at anything like a full list of the foreign sources of profit which go to make up the national income. Within the national income must be included the large amount annually derived from British investments abroad, an amount which was estimated a couple of years ago at no less a figure than £70,000,000 annually, such an estimate being in a measure corroborated by the constant large excess of imports over exports. If, for instance, last year the imports of this country were £412,000,000 and the exports and re-exports £312,000,000 (allowing £5,000,000 for unenumerated exports), there would remain a balance of £100,000,000 to be mainly represented by interest on investments and the earnings of the British mercantile marine. In reality this £100,000,000 is understated to an extent of about another £20,000,000 because Great Britain invested fully that additional sum in new foreign and colonial securities last year and yet was enabled to make both ends meet in the matter of her international payments. If, therefore, we said that one-half the income of this country was derived from foreign sources, we should be a good deal nearer the mark than the proportion of 24½ per cent. with which we set out. Of course it is quite impossible to arrive at any close approximation upon the subject, but enough has been said to show the great place which England's external trade fills in the national economy.

In considering the state of trade in this country at the present time it is natural for people here to look first to the Board of Trade returns. If trade is brisk or trade is dull it is always apparent therein. They show at once the mass of goods which foreigners are taking, and they set a value thereon which, though not always accurate, is nevertheless moderately effective in the mass. In almost all directions there have been complaints this year respecting the unprofitableness of trade—that is to the shipper and manufacturer, not to the retailer. Yet when we turn to the Board of Trade returns for the first five months of this year we find the exports are set down at as high a figure as £97,000,000, which is only £1,200,000 short of the figures recorded in the first five months of 1882, while they are much in excess of the same periods of 1881, 1880, or many previous years. It is therefore at first sight not a little difficult to reconcile this with the complaints so generally indulged in at the present time. Going deeper, however, into the trade and navigation statistics it is found that even the slight reduction in values may be said to disappear when quantities alone are considered, and it is found that the exports have not diminished, but that as a rule they stand at a lower market value. If, for instance, taking railroad iron as an example, the country exported 13 per cent. more in quantity but received 5 per cent. less money than for the corresponding period when the smaller quantity was shipped, it stands to reason that the labor involved must have been greater and its remuneration less. Wages to workpeople, however, have not been very materially or generally cut down, and the result is that manufacturers have found their profits particularly small in proportion to the amount of work done. In most trades there is still a very fair average of employment for labor, and though the United States have not been such good customers in British markets other countries have been better. Altogether, therefore, considering the heavy fall in prices of merchandise in America last autumn and the check given prior to the introduction of the new United States tariff, we think English merchants have fared as well as the gloomy prospects at the commencement of the year entitled them to expect.

As a rule merchants and manufacturers have been helped by lower quotations for foreign raw materials, and there are, in considering the different leading industries, some trades which have fared better than the rest. The coal trade, for example, is as brisk as it ever was, and it cannot be said that prices and profits show material abatement. The exports to most European countries—Russia being the exception—have increased. In contrasting the cotton exports this year and last it is necessary to bear in mind that a year ago cotton shipments were considerably reduced, owing to prices here being above the range of eastern markets. Now, raw cotton, yarns, prints, shirtings and cloth of all description is very cheap, too cheap, indeed, for Indian mills to compete successfully, and the result is that Bombay, Calcutta, the Straits and Dutch East Indies, are buying a good deal

more than they did last year, though not so much as they did two or three years ago. The export trade of China is, however, so greatly depressed that the Chinese are, perforce, smaller buyers. The steel and iron trades are always a little difficult to summarize effectively. It is all very well to point to the value exported during the first five months of this year—£11,800,000, as compared with £12,600,000 last year and £10,200,000 the year before—and to say we have retrograded as compared with 1872. Iron and steel, however, enter largely into other categories of our exports. As an instance, the machinery shipments in these months were £5,300,000, against £4,600,000 last year, and £3,500,000 the year before, while the most active department of the iron industry, the manufacture of ships, is entirely unrepresented in these returns. Perhaps the most genuine depression of all is to be found in the ready-made clothing industries, covering such items as apparel, haberdashery, boots and shoes, hats, etc. But these are trades which have expanded very much in recent years, and production has at length outstripped consumption. The Board of Trade returns do not furnish us with a record of quantities exported in the leading articles of this description. The woolen trade, which last year showed a very marked increase, is now almost as strikingly curtailed, the reason for both the expansion and the present falling off being in part to be found in the introduction of the new French tariff at this time last year. Altogether the amount of work turned out this year and shipped appears quite up to the average of last year, though the return to manufacturers is doubtless less.

EXTENSION OF THE BRITISH POSSESSIONS.

Sydney, May 15.—The colonial policy of England has truly become an imperial policy, and the mother country must either go forward with her children at the antipodes or "cut the painter." That she will not sever her connection with the Australasian colonies if she can possibly avoid it is a point which every one here concedes, but she is by no means willing to assume the responsibility imposed upon her by her young and vigorous Australasian offspring. Assume it she must, however, or allow Australia to go its own way. The Liberal government is opposed, "on principle," to any territorial extension of the empire, while pursuing a policy which naturally leads up to it. The Tories are more consistent, and make no scruple of "extending the empire."

The latest case in which this conflict of principle and expediency has arisen is in the so-called annexation of New Guinea, the largest island in the world outside the Australian mainland. Some seven or eight years ago the Australian colonies requested the mother country to annex New Guinea to prevent its occupation by a foreign and possibly hostile power, but the imperial government turned a deaf ear to their prayer. The home government would not incur the responsibility. The terrible British taxpayer stood like "a lion in the path," and the responsible ministers of the crown would not imperil their position even to consolidate the empire. Their vision, political and patriotic, was bounded by the four seas of Britain, and they neither knew nor cared for anything beyond.

But the necessities of the case impelled Queensland, the great northeastern colonial division of Australia, to take action upon its own account. Its public men clearly perceived that the peace and independence of Queensland, and perhaps of Australia also, depended upon assuming the sovereignty of the contiguous island of New Guinea, from which a hostile descent might at any time be made upon its unguarded coast. With New Guinea in the hands of a foreign power there was neither peace nor security for Australia. These points had been pressed upon the home authorities without avail. So long as England could sell its shoddy and control the trade of Australia without incurring any risk or expenditure, so long it was content to let Australia lie exposed to surprise and possible ruin on its account. But the colonists were not like minded. Breathing the bracing air of freedom, and having national aspirations quite apart from the sentimental loyalty of Englishmen, they determined upon a policy of self-protection, and accordingly proclaimed the sovereignty of England over the unclaimed division of the great island lying contiguous to them. On the 4th of May, Mr. H. M. Chester, resident magistrate at Thursday Island, Torres Straits, acting under instructions from the Queensland government, and in the presence of about two hundred natives and thirteen Europeans, took formal possession "of all that portion of New Guinea and the islands and islets adjacent thereto, lying between the 141st and 155th meridian of east longitude, in the name and on behalf of Her Most Gracious Majesty Queen Victoria, her heirs and successors." The formality of saluting the British flag at Port Moresby was then observed, and Boe Vagi was recognized as head chief of the district, the flag being entrusted to his keeping until such time as a duly authorized representative of the government should arrive. A short but impressive prayer by Mr. Lawes concluded the proceedings, after which about $250 worth of trade was distributed among the heads of families by one of the native teachers under missionary influence. This is about all the payment the natives will ever get for their usurped sovereignty, but a vast field for commercial enterprise is now opened.

The annexation was condemned by Lord Derby, the colonial minister, who thought that Queensland should have waited until permission was granted, especially as such permission was as good as asked. But Queensland had its own ends to serve, and being sustained by other Australian governments it virtually commands the imperial policy. At present the crown neither approves nor disavows. It is in doubt; but the pressure of the Anglo-Saxon trading instincts will ultimately carry the day in favor of annexation.

The part of New Guinea annexed by Queensland in this off-hand way is the eastern and larger portion of the island. Most of the western part is claimed by the Dutch, it having been tributary to the Sultan of Tidore—one of the Moluccas—which potentate was a dependent of the sovereigns of Holland. The population of the annexed territory is estimated at 200,000, or one-fourth the entire population of the island. This is a very considerable accession of numbers and territory to Australia, but it is not without its dangers. The natives are warlike and independent, and the Queensland planters want to reduce them to absolute slavery, of the character described by me in BRADSTREET'S in an article on the labor question in Australia. This ulterior object is brought out very pointedly by the comments of the Australian press. The Queensland squatters want cheap labor, and the recently appointed imperial commission to inquire into the South Sea labor question blocks their supply from the islands. This point is openly confessed by the Queensland planters, to whom the labor question is assuming greater prominence every day. They contend that white men cannot do the work. The supply of Kanaka (islands) labor is not adequate to the demand, and arrangements are being made for the introduction of Chinese labor, although the bulk of the white settlers are strongly opposed to it. The labor question in Queensland is the "burning" one of the future. The planters naturally look to New Guinea for a fresh supply, and already one labor vessel has sailed for that country.

The annexation of New Guinea was advocated by Captain Moresby, of the royal navy, who was sent to Torres Straits six or seven years ago to suppress kidnapping. He wrote: "I urge upon my country to annex New Guinea and the islands, and thus to have it in her power to start right with the aborigines from the first, to prevent the first occasions of mistrust, disgust and anger, which would at once and forever stamp an image of greed, perfidy and cruelty as our likeness on the native heart." This wise suggestion was not acted upon, and we have now made a false start. The Rev. W. G. Lawes, the well-known New Guinea missionary who participated in the annexation proceedings, states most emphatically that labor can only be procured at New Guinea by force of deceit. But the Queensland sugar planters are not to be deterred by any moral arguments. They want cheap contract labor, and they will kidnap slaves as often as they can.

Since New Guinea was annexed a cry has gone up from Australia for England to proclaim its sovereignty over all unclaimed South Pacific islands. This, perhaps, would be the best thing that could happen to the natives.

THE MUNICIPAL MUDDLE AT SAN FRANCISCO.

San Francisco, June 20.—This city is still suffering acutely from congestive legislative chills and constitutional derangement generally, and none of the wiseacres can find a remedy. It is a case of too much coddling. In former years the supervisors treated the law covering expenditure, known as the one-twelfth act, as a dead letter, the consequence being that the expenditure of one year was carried over to the next, being usually included in the new tax levy. But when the democracy carried the last election it occurred to the late city auditor to test the legality of this practice, with the result that the Supreme Court ruled that debts contracted in one year cannot be paid out of the tax-levy of the year following; and by a decision just rendered it is further affirmed that the supervisors cannot include any amount in the tax levy other than what is needed for the actual requirements of the year. This is hard upon contractors and others having honest demands upon the city. The practical effect is to repudiate all past obligations outside the public debt, which is trifling in amount. Clearly this is an abuse of legal caution which was not contemplated by the legislature when it enacted the law in question, the policy of which was to prevent an outgoing board of supervisors embarrassing their successors by largely anticipating the revenue, as had frequently been done. It was not intended to cheat every one having dealings with the city government who were not fortunate enough to be paid out of current revenue, month by month, or at least within the fiscal year. But this is now the practical effect of the law, and it may be carried to an unbearable extent, because the supervisors have made an insufficient levy, in accordance with a pledge before election that the tax should not exceed 1 per cent. plus the interest and sinking fund on the public debt.

The situation is still further complicated by reason of the refusal of the gas and water companies to pay their taxes pending settlement of their claims against the city. These cases are before the courts, and, with the proverbial delays of the law, there they are likely to remain for some time to come.

We are thus testing the pay-as-you-go policy under unnecessary drawbacks, and people are beginning to get quite tired of it. All public departments have been reduced to a starvation scale, and the educational system will be seriously impaired by reason of insufficient funds. The streets are unlighted by gas, and are becoming almost impassable in places—they certainly would be so were it the wet season. The sewers are choked, and there is no money to flush them. The trade wind carries clouds of dust and dirt in the air, to the great inconvenience and discomfort of people who must go out of doors, while goods exposed for sale in stores are seriously depreciated in value if at all of a perishable kind. No one at a distance can form any adequate idea of the inconvenience and discomfort of this city in this season of high winds.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

A proceeding before arbitrators is not a "trial" within the meaning of the act of Congress providing that a petition for the removal of a cause from the state to the federal courts shall be filed "before or at the term at which said cause could be first tried, and before the trial thereof." Thorne vs. Towanda Tanning Company, decided by the United States Circuit Court, for the Western District of Pennsylvania.

In a suit on an award made by arbitrators in pursuance of a written submission of all matters in controversy between plaintiff and defendant, where it appeared that the arbitrators failed to require the witnesses to testify under oath, and that the necessity of an oath had not been waived, the Supreme Court of Missouri held (Wolf vs. Hyatt) that the award was a nullity, and that no action could be maintained upon it.

Where a statute makes it the duty of a sheriff selling stock of a corporation to transfer it when sold to the purchaser, the transfer can only be made on the books of the bank, and the statute by implication makes it the duty of the officers of the bank to give the sheriff access to the transfer books, and in case of refusal they may be compelled by the courts to permit such transfer. State vs. First National Bank of Jeffersonville, decided by the Indiana Supreme Court, on June 25.

An infant who has formed a copartnership agreement cannot interpose the plea of infancy as a bar to the dissolution of the partnership, according to the recent decision of the Maryland Court of Appeals in Bush vs. Linthicum. Such partnerships must be dissolvable like any other, and the partnership assets must be assignable to partnership creditors.

The same court, in the recent case of Gould vs. The Mayor of Baltimore, held that an assessment made upon the owner of adjoining property to defray the expense of a street pavement is not a tax levied for state or city purposes, and that the word taxes, whether used in an act of the legislature or in the charter of a company exempting them from taxation, does not embrace such local assessments unless there be something in the statute or charter to indicate such an intention.

In the case of Brune vs. Lanahan, the Maryland Court of Appeals, on the 21st inst., decided that an attorney has no right, in his own name and on his own motion, to appeal from an order or judgment of the court below affecting the interests of his client.

A national bank, incorporated under the laws of Congress, and against which a suit is brought in a state court, has the right to remove such suit to the Federal Court. This right is clearly conferred by the Removal act of 1875, according to the opinion of Judge Wallace, in the case of Cruikshank vs. The Fourth National Bank, decided in the United States Circuit Court for the Southern District of New York, on the 23d ult.

The proprietor of a drug store in Indiana sold whisky which, in order to evade a statute against the sale of intoxicating liquors under certain circumstances, he medicated by putting ginger in it. Upon a criminal prosecution for the unlawful sale of the liquor, Hottendorf vs. The State, the Supreme Court of Indiana held that these facts were sufficient to justify a finding that the liquor was unlawfully sold, and not sold for medical purposes.

Where an action was instituted in a state court against a defendant and he before judgment filed his petition in bankruptcy but did not set up his bankruptcy in defense of the action, the Supreme Court of Indiana decided that a judgment obtained therein against him was valid and binding, and was not discharged by his discharge in bankruptcy. Brown vs. Eichel, decided June 28.

Where it appeared that the plaintiff and appellee sowed certain wheat as tenant under a contract which gave one-half of the wheat to him and the right to the possession of the whole of it for the purpose of harvesting, threshing and dividing it, and that the defendant and appellant took possession of the growing wheat, excluded the appellee from it, and harvested and threshed it and refused to deliver any part of it, the Supreme Court of Indiana held that the acts of the appellant amounted to a conversion of the wheat. Gordon vs. Stockdale, decided June 21.

Where the owner of coal consigned to him sold it to defendants, and gave defendants an order on the carrier who had possession of the coal to deliver it to them, and they took the coal which was delivered to them by the carrier, they knowing that the carrier claimed a lien upon the coal for the freight, and did not intend to deliver it to the defendants unless they paid such freight, the Supreme Court of Massachusetts recently held—New York & New England Railroad Company vs. Saunders—that the defendants were not conclusively presumed, as matter of law, to have promised to pay such freight from the mere fact of taking the coal.

Land was deeded to a railroad company for depot purposes with a condition that if it should fail to erect buildings and occupy the land for such purpose the same was to revert to the grantor. No time was fixed within which it was to erect the buildings and occupy the land as a depot. The railroad took possession at once under the deed, erected the buildings and occupied the ground for depot purposes for thirty years. The Supreme Court of Indiana in the case of the J. M. & I. Railroad Company vs. Barbour, decided June 21, held that the company had substantially complied with the condition in the deed, and that it was not bound to use the land for depot purposes for all time to come.

In the case of Martin vs. Witherspoon et. al., decided on the 22d inst., the Supreme Court of Massachusetts reached a conclusion similar to that arrived at by the South Carolina Supreme Court in the case of the State vs. Penny, of which a note appeared in BRADSTREET'S recently. The case was heard upon agreed facts, and the question presented was whether a pilot was entitled to pilotage fees when he offered his services to a vessel bound out of the harbor of Boston and his services were refused. The plaintiff had judgment in the Superior Court and the Supreme Court of the State affirmed the judgment for the reason that the regulation by order of governor and council imposing compulsory pilotage on outward bound vessels was within the power of the legislature to authorize and was made in conformity with the law.

In a written contract between a railroad company and a shipper, it was provided that the company should transport a certain number of cattle from Kansas City to Norborne at an agreed price, and that the shipper should take off the cattle while on the trip, and load and unload the same at his own risk and expense. It was further agreed that the company should not be responsible for any loss, damage or injury which might happen to the cattle in loading, forwarding or unloading, and that any claim for damages should be made in writing to the general freight agent within five days after the cattle arrived at the place of destination. In a suit by the railroad company for the amount of the freight upon the cattle, the shipper set up by way of defense and counterclaim that the written agreement was presented to him just as the cars were starting, that for want of time he signed the same without reading it, that it differed from previous parol negotiations, and that his cattle were injured by delays caused by the negligence of the company. The railroad company had judgment in the court of first instance, and upon appeal the decision of the lower court was affirmed by the Supreme Court of Missouri—Clary vs. St. Louis etc., Railroad Company—which held that the railroad company had the right to determine its liability by special contract, and further declared that as a general rule when goods are delivered by a carrier for transportation, and a bill of lading or receipt is delivered to the shipper, he is bound to examine it so as to ascertain its contents, and that if he accepts its terms a resort cannot be had to prior parol negotiations to vary them.

In a recent case in Massachusetts the word "store" was judicially construed. It appeared that one Hittinger was an inhabitant of Belmont, where he voted and paid taxes upon his poll and all his personal property. His business was that of cutting and storing ice at wholesale, chiefly in large quantities for export or for use in Massachusetts and other states. He sold only such ice as he cut and stored himself, and neither cut, stored nor sold ice at Belmont. He owned large icehouses in the city of Cambridge and in Westford, and had his machinery and ice tools in those places. His business was principally transacted in Boston, in which latter place, however, he had no ice stored. No business was transacted at Cambridge or Westford except such as was essential to the cutting, storage and delivery of the ice pursuant to the orders from the office in Boston. The city of Cambridge and the town of Westford assessed the ice and machinery of Hittinger within their respective jurisdictions, the authorities of each claiming that the ice was taxable under the provisions of the General Statutes, for the reason that Hittinger occupied stores or shops there. Hittinger paid the tax under protest and brought suit to recover it back. On appeal to the Supreme Court of Massachusetts that tribunal expressed the opinion that the natural import and common use of the word "store," when applied to a building, was to designate a place where traffic was carried on in goods, wares or merchandise, and held that, though Hittinger had his stock in trade in Cambridge and Westford, he had no store there within the meaning of the statute, and that neither his ice nor his machinery was taxable at Cambridge or Westford.

BUSINESS NOTES.

The total number of failures in the United Kingdom reported to *Kemp's Mercantile Gazette* for the week ended June 16, was 262, against 255 in the corresponding week in 1882, and 197 in 1881. England and Wales had 234 against 225 and 177 respectively in like weeks of 1882 and 1881; Scotland 22, against 24 and 17, and Ireland 6 against 6 in the week ending June 16, 1882, and 3 in the corresponding week 1881. The grocery and provisions trades had the greatest number of failures during the week. Merchants, brokers and agents came second, liquor sellers third, and cloth and clothing dealers next in order.

The Denver *Republican* publishes a revised report of the production of coal in Colorado in 1882, together with a report of the output in six months of 1883, by a mining expert in the employ of the United States geological survey. The summary for 1882 shows a total production of Colorado coal amounting to 1,061,479 tons against reports made early in the year of 1,821,743 and 1,588,000 tons, respectively, by other authorities. The total production of coal in Colorado in the first six months of 1883 is given at 595,479 (net) tons, and of coke 74,208 tons. The production of coal in Wyoming in six months of 1883 is also given, the total being 328,161 tons, and of New Mexico, 117,745 tons.

It will be readily recalled that the earlier crop reports published by various journals, boards of trade and other bureaus of information inclined almost uniformly to low totals. This was to be expected until after the reviving and forcing effects of June were felt. A few of the estimates were as follows: Published by Chicago wheat dealers (first week in in June) 393,000,000 bushels; Millers' National Association (at Milwaukee early in June), 373,000,000 bushels; the *Tribune*, Minneapolis, Minn., June 5, 393,000,000 bushels; Cincinnati *Price Current*, about July 1, 440,000,000 bushels. S. W. Tallmadge, Milwaukee, telegraphs this journal, under date July 4, that he sees no reason to alter his original estimate of about 400,000,000 bushels.

Notwithstanding eastern Siberia is a long way off, and that it does not figure largely in tables giving facts in reference to the commerce of nations, yet it appears to be exciting some attention among English exporters. The reason is that eastern Siberian importations are now made almost exclusively through Hamburg firms, although some of the goods sent are of English make, from Birmingham, Sheffield and Manchester. The total value of imported goods in Vladivostock amounted in 1882 to 3,389,602 silver roubles (about $2,500,000), of which more than two-thirds were on account of eight Hamburg firms, and in their own ships. This trade is said to be increasing, and as English commerce is not represented in that part of the world, and as the profit in the trade is said to be attractive, British merchants are looking into the matter.

It appears that the American, British & Continental, or "A. B. C." Cable Company, as surmised by BRADSTREET'S last week, will connect on this side of the Atlantic ocean with the Postal Telegraph Company. The laying of the two new cables, as described last Saturday, is expected to begin next September. A rigid contract (including heavy penalties) has been signed tending to prevent consolidation or coöperation with the Western Union Telegraph Company or the cable companies controlled by it. The Postal people are said to be about to extend a wire from New York to Bangor, Me., via Boston and intermediate points, and telegraph men here think this combination (The Postal and new Cable companies) promises to be a stronger competition to the Western Union than even the late lamented Mutual Union. The new A. B. C. Cable Company will enjoy the advantage over the older cable companies of obtaining two cables for one-third the cost of older cables; paying but one set of officers and keeping up but one executive office, instead of four. The four existing or joint companies have to pay for obtaining their continental business, while the new company, with its own continental cables, can retain the extra tolls, which will average 2½d. per word. A large increase in the volume of business is also expected naturally to follow the adoption of a sixpence per word rate.

In its issue of June 20 the London *Labour News* says that the British labor market, while unsettled in various localities, is on the whole satisfactory. The file-trade strike at Sheffield, which has interrupted that industry for three months, terminated June 18. The men were worsted and accepted the proposed 10 per cent. reduction. The textile trades were generally active. Haymaking and other agricultural pursuits were being very briskly carried on. Emigration continued good. In the colliery districts labor was particularly active. The iron trade was more active, but a strike among the engineers was expected. Tin-plate industry was improving in the west; most of the works were fairly supplied with orders which will last some time. At Sunderland the bricklayers have struck for ¼d. per hour advance, but the masters refuse more than ½d., and the men remain idle. The telegraph brings word of recent extensive strikes in the English iron trade.

Since 1882 commercial transactions between Asiatic Turkey and Europe have measurably increased. British merchants have naturally prospected this new field of trade, and with profitable results to themselves, as well as to their Jaffa correspondents. The produce of the country is transported on camels from the interior to the coast, each camel carrying two bags of cereals weighing 550 pounds gross weight, the cost of transport being always regulated in proportion to the distance from which the goods are brought. The most distant place from which the produce is brought to Jaffa does not exceed forty miles, and the native merchant cannot hire a camel to carry a load of goods that distance at less cost than 8s. per load; nor can they transport their goods a greater distance than this on account of the difficulty connected with their transit, and to defray carriage expenses would leave them no pecuniary benefit. Improved means of internal communication are greatly needed, and it is stated that a railway system could be made remunerative.

Baltimore continues to feel keenly the loss of a large share of its petroleum export trade and refining industry, and attributes this misfortune to the fact of that city not having heretofore enjoyed the advantages of a pipe line direct from the regions. It is asserted—as reported in the Baltimore *Journal of Commerce*—that this system of transporting crude oil is ¼c. per gallon cheaper than rail rates for crude from say Pittsburgh to the seaboard. For the reason given above, then, it has been alleged that Baltimore has lost her refining interests and therefore her petroleum exporting trade, because of the ¼c. per gallon discrimination against that port, owing to a lack of pipe-line facilities. On the other hand Pittsburgh has lost a share of its refining interests because of the better facilities for a system of refining at the seaboard. Formerly Pittsburgh exported a good deal of oil via Baltimore. This suggests the suggestion made in the paper named that, inasmuch as Pittsburgh will continue to lose her refining industry, "why do not her refiners pull up stakes and locate at Baltimore their refineries, and aid in obtaining an independent pipe line for the receipt of their crude? To such refiners," adds the journal referred to, "not only the export trade but the entire home southern trade would be open and untrammeled."

In discussing the exports of British iron and steel during the five months ended May 31, as compared with a like period in 1882, the London *Coal and Iron Trades Review* believes that England has good reason to be satisfied with the business done with all countries to which such products were sent, except the United States, Germany (for iron sent to Holland was largely destined for German works) and Brazil, but their decreases swamp the numerous increases and leave 124,786 tons on the wrong side of the account. It is noticeable that Belgium has become a good customer for British iron and steel and France a better, owing to the larger quantities of pig iron they are taking. After the United States, Germany is the most profitable customer; then follow India, Australia, France, British North America, Belgium and Italy in the order named. To India Great Britain mostly sends steel rails, for out of 165,308 tons of iron and steel dispatched to that quarter during the last five months, 95,377 tons were in the shape of rails and the rest manufactured iron, while Australia's 139,120 tons consisted of 53,792 tons of rails and 85,328 tons manufactured iron. To Germany nearly all was pig iron, and to Belgium every ton was pig iron, while to France all but 8,109 tons was likewise in the form of pig, and two-thirds of the exports to Russia were in that shape. Italy mostly had steel rails. The detailed report of exportations of British iron and steel during the first five months of 1883 and 1882, with gains and losses this year as against last, is as follows:

	Total exports 1882, tons.	*Total exports 1883, tons.*	*Increase upon 1882, tons.*	*Decrease upon 1882, tons.*
United States	533,764	283,361	.....	250,403
British North America	58,869	58,359	.....	510
India	131,194	165,308	34,114	.....
Australia	120,294	139,120	18,826	.....
British South Africa	21,905	29,037	7,132	.....
Russia	23,544	32,264	8,720	.....
Germany	139,810	128,324	.....	11,486
Holland	141,903	94,502	.....	47,401
Belgium	28,521	51,478	22,957	.....
France	89,488	96,166	6,678	.....
Italy	39,143	42,989	3,846	.....
Turkey	3,254	4,742	1,488	.....
Sweden and Norway	2,346	7,690	5,344	.....
Spain and Canaries	12,476	15,729	3,253	.....

Chili	1,714	3,374	1,660	.....
Other countries	321,957	399,772	77,815	.....
Totals	1,716,629	1,591,873	194,019	318,775
				194,019
Net decrease upon last year				124,756

The largest falling away was in pig iron, 87,000 tons, and of manufactured iron, 79,000 tons. Notwithstanding the decline in exports of steel rails to the United States (73,100 tons less in past five months) the total export of the same have exceeded that in a like period in any preceding year, being 409,399 tons, against 367,465 tons in 1882.

The foreign commerce of the United States for May declined considerably when considered in bulk. Exclusive of specie there was a gain of $8,722,626 in exports and a decrease of $12,084,627 in the value of imports. The sustaining force of the imports during the past three months has been the tariff changes to go into effect July 1. The decline in exports is easily explained. The foreign shipments of cotton during the past few months naturally fell away very rapidly. Breadstuffs, wheat and corn, under the influence of speculative holdings at the west, prevented foreign buyers from coming into the market here. The collapse of the attempted corner, or what looked very much like one, should soon show itself in increasing exports. Provisions went abroad in smaller quantities for similar reasons. The exports for the eleven months of the fiscal year ending May 31 are as follows:

	1882–83.	1881–82.
Merchandise	$769,325,165	$699,464,291
Specie	29,306,733	42,518,326
Totals	$798,631,898	$741,982,617

The following furnishes a comparison of exports and imports, including specie, during the same period:

	1882–83.	1881–82.
Imports	$685,764,429	$703,348,492
Exports	798,631,898	741,982,617
Excess of exports	$112,867,469	$38,634,125

Exclusive of the movement of coin and bullion the eleven months foreign trade was:

	1882–83.	1881–82.
Imports	$668,378,833	$661,949,925
Exports	769,325,165	699,404,291
Excess of exports	$110,946,332	$37,514,366

M. de Lesseps has declared officially at the French Academy of Science the intention of the Suez Company to open a new canal. During the work the maritime way will be lighted by electricity, and an appeal has been addressed to physicists to present their several systems. The work will begin as soon as possible. It is of special interest to note in this connection that Earl Granville has been memorialized by British shipowners and traders doing business in the East, presenting the signers' deep concern at the possibilities of any further concessions being granted to the administrators of the present canal for the purpose of cutting a new canal, "feeling satisfied from past experience that the vesting of any additional rights or power for such purposes in other than British hands will be prejudicial to British interests and injurious to trade." They also state that four-fifths of the tonnage passing through the present Suez canal is British, and that there is no prospect of a reduction in tolls levied as by a monopoly; that the claim of the existing canal company to an exclusive privilege for ninety-nine years to own maritime communication between the Gulf of Pelusuim and the Bay of Suez is not based on good grounds, and that the rights granted M. de Lesseps by the Egyptian government was simply "to form a company and cut a canal." In brief, then, the British shipowners and others respectfully submit that the dissatisfaction prevailing among British shipowners and others immediately concerned in the use of the present canal, coupled with the attitude of the Suez Canal Company in seeking to claim the right to a power which must become increasingly oppressive to commerce in proportion as the tonnage using the canal increases, demonstrates the necessity which exists for the creation of a new canal, which should be constructed by English capital and enterprise and managed in the general interests of navigation and commerce. In other words they want Earl Granville to secure another concession from Egypt permitting Englishmen to cut and own a canal across the Isthmus of Suez.

The late Secretary of the Interior, Mr. Columbus Delano, has been devoting his attention to the rearing of fine-wool sheep and cattle, and took occasion at a recent meeting of Ohio wool-growers at Mount Vernon, Ohio, to present his views of the probable effect of the revised tariff upon the wool industry. After pointing out that, according to the census, there are 1,000,000 flockmasters in the United States, who annually raise 200,000,000 pounds of wool, and that in Ohio alone 30,000,000 pounds, or 15 per cent. of the whole, is grown, he continued: "A reduction of five cents a pound in the price of wool this year, which the present market prices indicate, will amount to a loss of no less than $1,500,000 to Ohio wool-growers. Prior to 1867 no tariff existed upon raw wool. Through the efforts of Mr. Randall and of myself the tariff was then placed at three cents per pound. From 1850 to 1860 the increase in the number of sheep was but 3 per cent.; from 1860 to 1870, under three years of protection, the increase was 27 per cent. From 1870 to 1880, under ten years of protection, the increase was about 70 per cent., or the increase of the number of sheep was from 28,000,000 to 43,000,000 head, and in pounds from 100,000,000 to over twice that amount. In 1867 the price of wool was 50 cents a pound; to-day, by the removal of the tariff of 1867, the price in Ohio will not be over 32 to 33 cents per pound."

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

The rise of Thursday and Friday week proved to be due to manipulation. On Saturday there was a general drop in the list, every stock which had been most active in the advance falling back quickly to nearly the lowest figures it had touched on any preceding day. The traders who had bought stocks expecting that the movement would run on possibly till after the holidays were much disappointed and disgusted, and hastened to drop their holdings. It was seen that the market had been "milked" to the extent of about 2 per cent. It was the action on Saturday which supplied the key for its movements for the week, and it closed up the month and the fizzle of the "great June rise" in general disgust. The past week has been chiefly remarkable for its dearth of business. This was to have been expected. The Fourth came in the middle of it. The Wall street men did not care to do much before Wednesday, and Thursday only a comparatively few of them had returned to town. Tuesday last the business done on the Exchange was nominal. The brokers who were on the floor were there with supporting orders for particular stocks, and therefore on guard, as it may be described. They had to be there, but beyond these there was scarcely a corporal's guard of men in the room. Speculative stocks have to be watched, for on a dull day, with principals off in yachts or at the seaside, or in other country places remote from tickers and telegraph, a large operator could organize a splendid raid on the bear side, and unless guards were left with supporting orders the greatest demoralization of prices could be effected. There is one case on record where a certain stock having a mainly speculative value was broken down in price 40 points in one day through the great operator who had supported it being accidentally detained in the country and having failed to give his brokers orders what to do. The first attack on it found the stock without support on the floor, and thereupon the whole room rushed in to sell, under which the price sunk like a stone in water. It must not be supposed, however, that all stocks are of this character.

So far as the market has moved this week it has improved, and notwithstanding the speedy failure of the June rise there is a very general expectation that July will really give us a substantial one. The June affair is declared to have been a false start. Wall street is always disposed to be hopeful if there be anything to hang a hope upon, and it thinks it sees a good many things at this time. First, generally a rise in July, and there was quite a surprising one last year, which ran well into August. It was based on the large winter wheat crop—the largest ever grown in the country. This year we shall, according to all estimates, fall considerably short of last year's crop. But it is claimed, in the street, that these estimates are too low, and that the increase in the yield of spring wheat will make up for the shortage in the winter wheat, and that anyway we have so large a surplus left over from last season that a little shortage this year will only even up things. Then the troubles in Chicago, it is said, are all over; the banks will come out with no loss to speak of, and the McGeoch estate will after all pay 50 cents on the dollar, one of the partners in the now famous "deal" having been discovered who can be made to pay 80 per cent. of the amount necessary to pay off the claims at the rate mentioned. As to the banks, they are understood to have advanced on the lard which they were left with 10c. a pound, and it is claimed they can sell it all at 9c., or 8½c. per pound at the lowest. The corn crop promises well, the hot weather we have been getting lately having forced the plant along wonderfully, and the price of the grain in the market has fallen correspondingly. There is, too, the cholera epidemic in Egypt, which, though a terrible calamity to that country, is expected to benefit us to the extent of considerably checking the receipts of wheat from India and making English markets more dependent upon us for their supplies. As the prices of our products have been brought down by the recent break to an exporting basis, it is expected that our foreign trade will soon revive and bring with it the usual increase of wealth. In addition to these various causes for a rise in the stock market it is argued that prices are certainly down to a hard-pan basis, and there is good margin for an advance even if conditions were less favorable than they are. The bull arguments, as presented by a well-known broker, are worth quoting. He says: "The general situation has, in my judgment, materially improved. The iron trade is unmistakably better. When iron is declining, the bears make a great handle of the fact and declare that the country is going to ruin. It is a poor rule that don't work both ways. The coal trade is in good condition—good enough to permit an advance in prices by all the companies on July 1. Railroad earnings for June show surprisingly large gains. I have advised buying St. Paul, Northwest, Northern Pacific, Omaha, Rock Island, and Burlington and Quincy—that is, the Granger stocks. I select them because the prospects for spring wheat are admitted to be as good as the country has ever seen. Then these are dividend-paying stocks, and the dividends enable them to be carried without much cost for interest. I think well of Missouri Pacific, because it is a dividend stock, and because the company controls other roads, so that if its own earnings decline it could make them up through other roads. Wabash, Kansas and Texas, and Texas Pacific look to me like less certain properties. Without saying it in an objectionable sense, there is too much one-man power in them. I am not certain that Mr. Gould's control over Texas Pacific is as absolute as is generally supposed. General Dodge exerts a very strong influence in that property. But, in regard to Wabash and Kansas and Texas, you have to take the chances not only on the properties themselves, but on what Mr. Gould may think it wise to do."

It would be easy to present arguments on the other side, which mostly turn on the enormous amount of new securities which have come upon the market in the past twelve months, while the ability of the public to buy has been diminished by the poor state of business during that period, and the very small percentage of profit at which it has been done; but the dark side of the picture is always unpopular. The more truthfully it is presented the more unpopular it is; the presenter is set down as a prophet of evil and therefore a disagreeable person. It is not worth while to expatiate on the bear arguments; and if the bulls in the stock market can get up a real lively movement in prices they will confer a boon on many innocent "lambs" who are carrying stocks they have been unfortunate enough to get, and who would be highly pleased to have the chance to sell them to somebody else at something near the prices they bought at. In short, there are a large number of people who "want to get out." It would be most satisfactory if the large operators who are trying so hard to bull this market would give them the chance.

The loan market continues in a state of summer stagnation, call loans ruling at 2½ to 3 per cent., as before. A great deal of money is paid out this month by the government and private corporations for half-yearly interest and dividends, and this is another circumstance in favor of the bulls. There is no business doing in London. Complete stagnation rules the stock market there. "Everybody is asleep," says one cable dispatch. The Bank lost gold during the week, and considerably reduced its reserve, but it is only temporary and incident to the half-yearly settlements. The Bank rate of discount remains at 4 per cent., and it is said that a tight money market is anticipated in the fall. Foreign exchange remains very dull and steady at $4.85¼ and $4.89, posted rates.

Business in the government bond market has been very light. The following were the closing quotations yesterday:

	June 29, bid.	July 6, bid.	July 6, asked.
U. S. 5s extended (3½ p. c.)	103⅜	102½	—
U. S. 4½s 1891, registered	112¾	112⅞	113⅛
U. S. coupon	112¾	112¾	113
U. S. 4s 1907, registered	118⅞	119	119¼
U. S. 4s 1907, coupon	119⅞	119	119¼

The bank statement of Saturday showed another expansion of over $2,000,000 in the loans, but there was also a slight increase in the surplus reserve, bringing it up to $9,239,925, against $5,431,025 for the same week last year. The following are the comparative totals of the statements of June 23 and June 30:

	June 23.	June 30.	Differences.
Loans	$326,044,400	$328,083,200	Inc. $2,038,800
Specie	63,233,800	64,189,600	Inc. 955,800
Legal-tenders	26,525,700	26,122,800	Dec. 402,900
Deposits	323,106,400	324,289,900	Inc. 1,183,500
Circulation	15,799,200	15,642,600	Dec. 156,600

The proportion of total reserve to liabilities is now 26.77 per cent., against 27.85 per cent. for the same week of 1882.

THE BRITISH STOCK MARKET.

[By Cable to BRADSTREET'S.]

From London: American securities are quiet.

From New Orleans, La.: The tone of financial circles has improved. Securities are more in request and better held. Money is hardening, but has not quotably changed.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

SUMMARY.

The various elements of strength in the general businesss situation last week are shown by special telegrams to BRADSTREET'S yesterday to have continued in full force. The customary mid-summer dullness is reported from many points, but the reports tell likewise of a full movement of cereals, general merchandise and coal, increased strength in the position of the iron market, and the dissipation of corners in breadstuffs and provisions, together with continued improvement in crop prospects. The wheat markets declined during the earlier days of the week, prior to (at several cities) the two days interval over the Fourth. It subsequently advanced, principally at the west, owing, as is alleged, to manipulations of holders to enable them to dispose of stocks in hand. Indian corn has acted in sympathy with wheat, but has not exhibited the elasticity of the latter. The export demand for corn has been moderately fair, while that for wheat has been very small. Foreign buyers, in the face of heavy supplies abroad, still consider prices on this side several cents too high. Provisions declined during the early half of the week, but advanced again after the mid-week holiday in response to the efforts of the bull clique at the west. The volume of trade for the week has, of course, been restricted on account of the occurrence of the national holiday. Country traders, however, very generally declare that with fair crops the outlook for the autumn's trade is excellent. Except in the north Minnesota and Dakota regions the weather during the past week has very generally favored the growing grain crops. In the district specified there is still some doubt as to the outturn. BRADSTREET'S preliminary report of the wheat crop of the United States for 1883, published in this issue, foreshadows a total crop of about 444,000,000 bushels, based on mail replies to June 16 and supplementary telegrams received yesterday from important grain-growing centers. The speculative petroleum market has declined on the week, owing to the removal of a part of the bull support—that recently derived from Wall street—and to other causes. The anthracite coal market has been more active. The production to July 1 is estimated at 1,300,000 tons only in excess of that in the corresponding portion of 1882. Ocean freights present no new features. There has been a little better demand for wool for consumption, but trade has not been active. Values have ruled steady. There were 136 failures in the United States reported during the past week, 29 less than the preceding week, 37 more than the corresponding week of 1882, and 91 more than the same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: General trade quiet and little doing except in groceries, which continue active and in excess of previous years.

From Boston, Mass.: Business in all branches during the past week has been restricted by the observance of the Fourth of July, and there are very few new features to note. In raw materials the most noticeable feature is the improvement which has taken place in pig iron. It has not had too much activity here as yet, but it has a favorable influence, and dealers are confident that it will induce consumers to operate more largely in a short time. Sales of wool for the week foot up well, considering that there were only five business days, but prices are still settling down, and bottom has not yet been touched. The low price of grain and provisions has led to more activity in the export trade, and shipments of corn and lard are on a pretty large scale. The money market continues easy at 5 to 5½ per cent. for regular bank discounts, and 4@4½ per cent. for factory paper. For bank balances the rate is down to 2½@3 per cent.

From Buffalo, N. Y.: The general trade movement is undergoing the customary between-seasons lull and is devoid of any special features. Staples and necessaries continue to move freely, but the prevailing tone is quiet. The business of the first half of this year, while less in the aggregate than last year, has in the main been a satisfactory one, and a strengthened feeling of confidence regarding the outlook is noticeable. Collections in nearly all departments are reported very fair.

From Rochester, N. Y.: Trade in general is dull at present.

From Cincinnati, Ohio: General trade is without change.

From Cleveland, Ohio: General wholesale trade for the week has been quiet, as is usual at this season.

From Indianapolis, Ind.: Trade presents no new features, but is somewhat dull.

From Chicago, Ill.: Trade is moderate. Money easy, 5@6; demand fair for season. Exchange, 50c. premium; collections fair.

From Detroit, Mich.: Merchandise trade quite satisfactory. Collections are much better than was anticipated thirty days ago. With a good harvest, as now seems probable, an excellent fall trade will be assured.

From Louisville, Ky.: The general merchandise trade is well supported for the summer season and preparations are being made for a large fall business. Money active, comfortable and firm.

From St. Louis, Mo.: General trade moderate. Money is more active than for weeks past and rates are firm at 6@8 per cent. Prime commercial bills at par. New York exchange 80c. premium.

From Kansas City, Mo.: The general wholesale trade shows some improvement, though quiet is still the rule. June trade in most lines has been better than last year, and in all branches sales for the first six months of the year greatly exceeded those of the corresponding period last year.

From Burlington, Iowa: Business is fair for the season. Some lines are fairly active, the hot weather creating quite a noticeable demand. Jobbers are looking after fall trade and filling some good orders. Reports from the country are favorable for fall business.

From Minneapolis, Minn.: Jobbing trade quiet. Collections only moderate. Money in demand at 8@10 per cent. Eastern exchange active and steady.

From Topeka, Kan.: Trade presents no new feature and is rather quiet. Collections are fair and money easy.

From San Francisco, Cal.: The holiday broke into the week's business, but made little difference on the uniform dullness all around. The export trade is brisk. Hops promise a good fall business, founded on the very favorable harvest. The outlook for this year's vintage promises well.

From Baltimore, Md.: General trade quiet.

From Richmond, Va.: Slightly improved, with a tendency to increase.

From Norfolk, Va.: Very little change. Collections moderately good.

From Savannah, Ga.: There is some falling off in trade, and there are no large buyers in the market to enliven it. Real estate advancing, and many buildings in progress of erection.

From Galveston, Tex.: The general trade movement is but fair.

From Memphis, Tenn.: Traffic has been inactive throughout the past week. The shipping movement continues brisk, but prices have dropped to 60c. per barrel for potatoes. Onions are going freely; shippers pay $2@$2.25 per barrel. Oats plentiful and weak, though the kind offering mainly inferior in quality. Bran scarce and prices firm; no change in hay.

INDUSTRIAL.

The most significant feature of the industrial branch of general business during the past week was the settlement of the wages dispute between the Pittsburgh district railroad pit coal owners and their employés by a resort to arbitration, under the provisions of the act recently passed by the Pennsylvania legislature to be voluntarily applied in such cases. The operators offered 3c. per bushel, and the men struck for 3½c., from May 21 to October 1. After several ineffectual attempts to arbitrate, an umpire was selected in the person of Mr. John R. McCune, a well-known banker. His decision, rendered July 3, is that the price paid for mining in the Pittsburgh district railroad coal mines from May 21 to October 1 shall be 3¼c. per bushel of 76 pounds over an inch and a half screen. The miners appear satisfied with the result, and say they will accept it. The operators will probably do so also, but have not expressed themselves. The employment of arbitration in the settlement of trade disputes is thus happily introduced into the United States for the first time in an instance where large interests were ranged on either side. It is to be hoped that like disagreements will in the future find an equally equitable and satisfactory mode of settlement.

INDUSTRIAL FEATURES.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Manufacturing interests continue prosperous.

From Boston, Mass.: In leading manufactures nothing of consequence has been done the past three or four days, but the outlook is favorable for an early start, and prices appear to be on a steady basis.

From Philadelphia, Pa.: The shipyards, car and locomotive works and large machine shops are well employed, and there is a fair degree of activity in the soap, paper and other manufacturing establishments in and around the city. Builders are very busy. The textile mills are mostly running, but the situation is unsatisfactory.

BREADSTUFFS ABROAD.

Cable advices of late show that the London grain trade during the past week has been unusually dull, quotations being low and the demand restricted. Supplies of foreign wheat in British markets continue heavy. There has been little or no inquiry for flour, and Indian corn has been easier. In commenting upon the fact that for the week ended June 18 the receipts of American wheat in the United Kingdom amounted to but 5 per cent. of the total arriving, the London *Miller* states that nearly one-half the receipts were Russian and Australian, and that Indian wheat was likewise in such free arrival that the practical disappearance of American was not noticed. The more favorable advices from the wheat-growing regions in Europe are from Russia. It is learned that Russian Poland presents a very favorable appearance, and expects an over-average crop. The southwest, bordering on Austria and the Danubian principalities, are also of good promise, and Bessarabia expects a good crop. The important wheat-growing districts to the north of the Black sea from Odessa to the Azov have been refreshed by rains, so that a good yield of wheat is anticipated. As regards the Russian grain markets, Taganrog is very quiet, and wheat prices tend in buyers' favor. Odessa is inactive, and price without change. From the Baltic wheat and oats continue to be exported in large quantities. In Germany the wheat crop was still behind hand, but no alarm has been felt there, and prices have steadily ruled in buyers' favor in the south German and Prussian markets. Berlin and Hamburg quote steadier prices. In France prices have declined, with imports in excess of demand. Stocks in Chili, in the south, are reported lighter than at the corresponding time last year.

The exporting of wheat naturally continues slow in the face of orders to agents on this side not to buy unless at figures which are 3d. below the current market rates here. The fact is that foreigners do not need any wheat at present, supplies abroad being excessive, and stocks large.

The quantity of wheat and maize on passage as per Beerbohm's cablegram of the 5th inst. was:

	Wheat, quarters.	*Maize, quarters.*
To the United Kingdom	1,825,000	380,000
Continent	470,000	120,000
Total quarters	2,295,000	500,000
Equal bushels	18,360,000	4,000,000
Compared with the previous week:		
To the United Kingdom	1,900,000	310,000
Continent	360,000	60,000
Total quarters	2,260,000	370,000
Equal bushels	18,080,000	2,960,000
Increase	280,000	1,040,000

AMERICAN WHEAT MARKET.

The holiday interruption this week greatly decreased the volume of trading done in wheat, as the leading exchanges remained closed during Wednesday and Thursday. On Saturday last there was a slight reaction in the speculative market for July, and cash wheat advanced 1c. to keep pace. This had no special significance, as exporters claimed not to be able to do business over $1.05, and orders from abroad were consequently few and far between. The gain in strength was principally due to manipulation by the long interest at the west and the buying of shorts to cover. On Monday trading was active and the variations in prices were more noticeable. The day's business revealed an average decline of about 1@1½c. from Saturday's close. The reports concerning the weather at the west continued excellent, particularly from the spring-wheat regions. Harvesting has been going briskly forward in the southern part of western and in southwestern wheat-growing states, and the quality of samples which have found their way east have in several instances graded higher than anticipated. There was a further decrease on Tuesday, which, on the day, amounted to about ½c. Chicago felt the effect first and was followed by New York. The partial recovery at the former city was quickly made and less so at the east Large stocks abroad, the indifference of exporters and the steady forcing weather at the west in this country contributed to the weakness manifested. On Friday the tone of the market was irregular, but firmer at the close.

The receipts of wheat at tide-water for the week ending June 30 decreased from 846,964 bushels on June 23 to 638,810 bushels. The exports from the Atlantic ports for the week ended June 30 amounted to 966,346 bushels, against 683,562 bushels June 23. From September 1, 1882, to June 30 the exports of wheat from the Atlantic ports were 60,349,191 bushels, against 39,216,259 bushels in a corresponding portion of the preceding year, a gain of 21,132,932 bushels.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended June 30 amounted to 524,061 bushels, against 733,693 bushels in the preceding week, and the shipments to 574,655 bushels, against 595,260 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) June 30, as against the preceding week, showed a decrease of 821,519 bushels.

The course of the wheat market at New York, Chicago and Milwaukee, during the past week, has been as follows:

	AT NEW YORK.				
	July.	*Aug*	*Sept.*	*Oct*	*Nov.*
June 30	$1.13	$1.15¾	$1.18⅞	$1.19⅛	$1.21¾
July 2	1.11½	1.14⅛	1.16⅛	1.18⅛	1.20¼
July 3	1.10¾	1.13⅜	1.15¾	1.17⅜	1.19⅝
July 6	1.10⅝	1.12⅞	1.15	1.16¼	1.18⅜
	—AT CHICAGO.—		—AT MILWAUKEE.—		
	July.	*August.*	*July*	*August.*	
June 30	$1.01⅛	$1.03⅝	$ .99¾	$1.02½	
July 2	1.00	1.02⅞	.98¾	1.01¾	
July 3	.98½	1.01⅛	.96⅞	.99¾	
July 6	.99¼	1.01⅜	.98	1.00½	

The New York market for wheat flour ranged from 5@10c. lower on Saturday, when it was weak and irregular. On Monday and Tuesday it was tame and inactive. Inquiries were of the shopping order (from exporters), and sales were light. In its issue of July 6 the Minneapolis *Northwestern Miller* said: "On the first of the week there were thirteen mills in operation, and the production will probably not average over 7,500 barrels per day, against 13,500 barrels a week ago. There is practically no flour in the market, business being pretty much suspended pending some turn in the wheat market to settle values."

Special dispatches from San Francisco state that preparations are making to ship large quantities of Pacific coast wheat to New Orleans by the Southern Pacific Railroad. BRADSTREET'S preliminary wheat crop report for the United States for 1883 is given in the editorial columns of this issue. The special telegrams supplementing the same will be found below.

INDIAN CORN.

This cereal has been more firmly held during the few business days of the past week than has wheat. It advanced in sympathy with the latter about ½@¾c. on Saturday, and fell away again on Monday and Tuesday correspondingly. The export demand has been better than for wheat, but at best only moderate. The past few days have witnessed excellent growing weather at the west and the corn has been forced rapidly forward. As with wheat, the speculative market for corn on Tuesday veered rather to the bear side and for similar reasons. The receipts of Indian corn at the Atlantic ports for the week ended June 30 were 2,282,183 bushels, against 2,078,524 in the preceding week, while the exports from the same points amounted to 914,124 against 1,105,735 bushels. From September 1 last to June 30 the exports of Indian corn were 38,090,445 bushels, against 25,225,642 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, June 30, had decreased 1,565,593 bushels as compared with June 23. The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending June 30, were 1,673,690 bushels, against 2,030,617 the week preceding, and the shipments were 1,573,167 bushels, against 1,820,336 in the preceding week. Corn was firmer here at the close on Friday.

The closing prices of Indian corn at New York and Chicago for the past week were:

	—At New York.—				—At Chicago.—	
	July.	*Aug.*	*Sept.*	*Oct*	*July.*	*Aug.*
June 30	.59¼	.61¼	.62½	.63⅜	.50⅞	.51¾
July 2	.57⅜	.59½	.60⅞	.62⅛	.49	.49⅜
July 3	.57½	.58¾	.60⅛	.61¼	.48	.49⅜
July 6	.58	.59¼	.60½	.61½	.49¼	.49¾

The closing prices of breadstuffs in New York last evening, as against those of the Friday preceding and the corresponding date last year, were as follows:

CLOSING PRICES OF BREADSTUFFS IN NEW YORK.

	June 29.	*July 6.*
No. 2 flour	$2.60 @3.40	$2.60 @3.40

THE BREADSTUFFS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: The grain markets have further declined without attracting much attention from foreign buyers, who are evidently waiting for settled prices. Speculation has continued tame. Flour has ruled dull, but the light stocks of desirable grades have enabled sellers to maintain prices in the face of the sharp decline in wheat.

From Cincinnati, Ohio: Cereals are without much demand. Flour is dull.

From Chicago, Ill.: Grain is higher; very nervous. The advance is due to the manipulations of the bulls, who wish to get out, and are advancing prices to sell on.

From Minneapolis, Minn.: Old wheat is coming forward in fair quantities, but meets a dull and lower market. Receipts at Minneapolis for the week are 378,000 bushels. Flour is dull and weak. The production of mills for the week was 71,000 barrels.

From Baltimore, Md.: Transactions on the corn and flour and other exchanges were very limited, owing to the holidays.

From Wilmington, N. C.: Breadstuffs are steady at the decline.

From New Orleans, La.: Grain receipts and exports each about 100,000 bushels. The market is nominal. Flour is a little lower.

From Memphis, Tenn.: Receipts here very limited, and demand appears equally so. Very little corn on market, 1,000 sacks or such a matter. Meal also scarce, local mills having suspended operations for lack of corn, but full shipments are under way and numerous sales to arrive are reported at $2.55 @ $2.60 per barrel.

THE GROWING WHEAT CROP.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: The news from the country grows more favorable.

From Columbus, Ohio: The weather is hot and dry—fine for wheat; has been for a fortnight. Harvesting is progressing finely. There has been an improvement in the last thirty days.

From Indianapolis, Ind.: Wheat crop is turning out much better than anticipated, and corn promises an excellent crop.

From Elkhart, Ind.: The wheat prospect is unusually good; will commence cutting about the middle of next week.

From Carlyle, Ill.: The weather is good. Wheat is all harvested; 15 per cent. of crop. Quality poor in this and adjoining counties.

From Chicago, Ill,: Crop reports as a rule are favorable.

From Peoria, Ill.: Harvesting has very generally commenced through the winter-wheat sections. The weather has been very hot and favorable, and is likely to continue so. The yield of wheat is light and very uneven, no better than the state estimates. The quality of wheat that has been threshed is poor.

From Peoria, Ill.: The weather for the past week has been very favorable to the growing crops.

From Pittsfield, Ill.: The weather has been fine for the past fortnight; the prospects are still good. Harvesting is progressing finely. Quite improvement has been sustained. Estimated yield ten bushels per acre.

From Detroit, Mich.: The weather is hot and showery, and not favorable for the wheat to mature. Harvest is three weeks late. Must have the most favorable weather if we would secure 80 per cent. of a crop.

From Detroit, Mich.: The crop prospects continue to improve.

From Grand Rapids, Mich.: After two weeks almost constant rains the weather is clear, very warm and apparently settled. The hay harvest is well under way and the crop will be an immense one. Wheat is damaged only on the low river bottom. Elsewhere the condition has improved constantly since June 1, and although about ten to fifteen days late the prospects are favorable for more than an average crop on about an average acreage. The growth of vegetation in three weeks with warm nights and a rainfall of twelve inches has been unprecedented. The condition of other crops is fully up to the average, except that all are late.

From Marshall, Mich.: The weather has been wet for the last two weeks. Is fine now, and wheat is looking well. Will not be fit to cut under two weeks, and bids fair to become a first-rate crop of 25 bushels per acre, unless it should rust.

From Louisville, Ky.: Wheat harvesting is nearly completed in Kentucky. All cut, except in northeastern portion of the state. Threshing has begun in the southern counties, and the yield is disappointing, the berry being small and shrunken and grading only No. 3. In the central counties the grain is better and may give a fair yield. Threshing will commence next week. Farmers are not satisfied with ruling prices, as the shipping margin fixes the price in the country at about 90c. At present prices considerable will be stored and not sold from the threshers, as is the custom in Kentucky. Corn is backward, but has a good stand. It has been well cultivated, and the prospects are for a good crop. Weather hot, clear and seasonable.

From St. Louis, Mo.: Harvesting is nearly over through most of Missouri, and the quality of wheat is considered satisfactory, and the yield fully as good as was expected. The weather of the week has been excellent for corn; cultivation has progressed finely and the fields are as clean as last year except in low wet grounds.

From Kansas City, Mo.: Weather now highly favorable for harvesting wheat and growing corn. Crop advices are generally encouraging.

From Princeton, Mo.: The weather for the last fortnight has been dry and hot. Harvesting progressing well. The acreage is small. The yield will be about the same as last year.

From St. Charles, Mo.: The weather has been and promises to be excellent and harvest progresses finely. The crop will be from one-half to three-fourths of an average.

From Warrensburg, Mo.: The wheat harvest progressing finely, over half being cut; wheat here looks favorable and the yield will probably be about eighteen to twenty bushels to the acre on an average.

From Brownsville, Mo.: Wheat all harvested. The prospect is not as good for a large yield as two weeks ago. The weather is good for taking care of the crop. Oats good and corn backward, not an average crop.

From Des Moines, Iowa: Weather favorable for wheat. The prospect is good. Will harvest about the middle of this month.

From Cedar Falls, Iowa: The weather is suitry and wet. Wheat is not far enough advanced to be damaged.

From Iowa City, Iowa: The acreage of wheat is small. The weather is favorable. The prospect for a yield is good; about the same as last year. No improvement in the last two weeks.

From Milwaukee, Wis.: Latest advices from the winter-wheat sections show no improvement in condition. Spring wheat in Wisconsin, Minnesota, Iowa and Dakota promises a fair yield, but it has yet to pass a critical period. Dakota reports a heavy growth of straw, which generally proves disappointing in yield. The weather has been excessively hot for the past week, with heavy showers, which is disastrous to spring wheat. No spring wheat will be cut before August 1, fully two weeks late.

From London, Wis.: To-day is clear and warm. It has been very wet and continues so. There is prospect of more rain. The weather is warm. Harvesting has not been commenced yet. There are prospects of a large yield of barley, and oats not so much. The wheat sown looks well. Corn has improved in the past two weeks.

From Watertown, Wis.: The weather during the past week has been extremely hot, sultry and showery, causing rust. The harvest of red and white winter wheat begins about the middle of this month. The acreage is large and the yield will be heavy if not injured by the present weather. Spring is just heading. The acreage is light. The crop is two weeks late and needs steadier weather.

From Minneapolis, Minn.: The weather has been extremely hot through the northwest during the last two weeks, the mercury showing a higher temperature than at any previous corresponding date in thirteen years. No rain has fallen during that time until the last three days, during which there has been some showers but no general rain. The temperature has been lower since the 2d inst. The growing wheat has been more or less injured by heat and drouth, especially in northern Minnesota and Dakota in many localities. It is heading very low with short heads, and unless there are copious rains and lower temperature from this until harvest a short crop will be the rule; at best only a fair average yield can be expected, and at present it looks as if this expectation will not be realized. It is a most critical time with the crop in the northwest. Other small grains are unfavorably affected by same causes, but not to so great an extent. The weather has been favorable for corn and the plant has pushed forward rapidly, but is backward with a poor stand in many cases and wants rain. An average yield is not expected.

From Nebraska City, Neb.: The weather for the past ten days has been hot and dry. There was a good shower last night; there is a prospect for rain to-night. There is very little winter wheat here. Spring and winter are both good; ten to fifteen bushels per acre. No harvesting yet.

From Beatrice, Neb.: Weather favorable for harvesting. Wheat promises a good yield. All small grains are heavy, but not as much was sown as last year.

From Topeka, Kan.: The wheat crop is good, not so heavy as last year but better filled. The oat crop is very good, and the prospects for corn are flattering.

From Atchison, Kan.: The weather has been favorable. Harvesting is progressing finely and the bulk will be cut this week. Yield probably about two-thirds of last year.

From San Francisco, Cal.: Advices from Oregon and Washington concur that on account of the largely increased local requirements and the unfavorable season the available surplus will not exceed last year's. Barley will be an exceptionally large crop on the Pacific coast.

From Savannah, Ga.: The growing crops of grain and vegetables have been benefited by recent rains and are healthy and fruiting well.

From Norfolk, Va.: Weather continues warm and favorable to the growing crops.

PROVISIONS.

Pork and lard sold off on Saturday and again on Monday and Tuesday. There were evident efforts making to hold the market up, alleged to be made by a Chicago house for the purpose of working off some stocks at higher prices. There is, however, a large short interest, and those who have so sold do not appear to have enough respect for possible manipulations for a rise to induce them to buy to cover to sufficient extent to strengthen prices much. The home demand has continued very moderate indeed, but it is reported that legitimate trading is slowly getting into shape once more. The export demand was light, but under the circumstances fair. Several large deliveries of lard, sold previously, have recently been made to exporters, which will go to swell shipments. Receipts of hogs at the west continue large and packing exceeds deliveries. Prices abroad have declined on the week.

Prices of western steam lard and spot mess pork at New York during the week closed as follows:

	June 30.	July 2.	July 3.	July 6.
Lard	$9.55@$9.60	$9.60@$9.65	$9.40	....
Pork	$17.75@$17 87½	$17.75	$17.50@$17.75	....

The number of hogs packed from March 1 to dates mentioned, with comparisons, is as follows:

March 1 to July 4.	1883.	1882.
Chicago	930,000	1,065,000
Kansas City	320,000	197,500
Indianapolis	97,750	83,000
Cincinnati	55,000	30,500
St. Louis	140,000	122,000
Cedar Rapids	85,616	102,532
Cleveland, O	59,000	91,500
Milwaukee	49,000	65,500
Above and all other places	1,935,000	1,960,000

The exports of provisions for the week ended June 30 were:

	Pork, barrels.	Bacon, pounds.	Lard, pounds.
New York	3,504	2,316,506	4,376,733
Boston	461	654,132	327,650
Portland	..	....	....
Montreal	465	1,129,500	29,700
Philadelphia	..	1,190,000	87,500
Baltimore	5	19,129	176,214
New Orleans	63	4,000	235
Totals	4,498	5,313,,267	4,997,432
Previous week	2,261	5,404,921	3,041,851
Two weeks ago	3,245	3,062,747	3,114,962
Corresponding week in 1882	2,613	5,972,014	5,245,207

Comparative summary of aggregate exports from November 1 to June 30:

	1882-83, pounds.	1881-82, pounds.	Dec. '82-83, pounds.
Pork	31,624,000	37,523,200	5,899,200
Bacon	284,699,039	297,134,835	12,435,796
Lard	159,618,520	176,079,115	16,400,595
Totals	475,941,559	510,737,150	34,795,591

It appears quite clear, although some western speculators in lard have sustained severe losses of late, that the majority of the packers of hog products have realized a fair profit as well as the farmers themselves, who furnish what constitutes the packers' raw material. Illustrative of the latter point we present the following comparison:

	No. hogs packed.	Am't paid farmers for hogs.
Season 1882-83, from Nov. 1 to March 1	6,126,816	$102,917,518
Season 1878-79, from Nov. 1 to March 1	7,480,648	57,000,000

From this it appears that the packers last season paid the farmers nearly $46,000,000 more money for 6,126,816 hogs than they were paid for 7,480,668 hogs in the winter season of 1878-79. With respect to the packers' profits, late figures from Chicago furnish some data:

	Hogs, number.	Hogs, cost (estimated).
From Nov. 1 to March 1, 1882-83	2,557,823	$43,000,000
From March 1 to July 1, 1883 (estimated)	920,000	15,000,000
Total		$58,000,000

The Chicago packers paid for raw material, from November 1 to July 1, about $60,000,000, which warrants the belief that they realized good profits from November 1, 1882, to June 16, 1883. During this seven and one-half months they must have sold 75 per cent. of their whole packing, as shown by the report of stocks held in the city of Chicago July 1, as follows:

		Est'd value.
Lard, tierces	115,227	$3,500,000
Pork, barrels	204,340	3,500,000
Meat, pounds	71,693,457	6,000,000
Total		$13,000,000

On the basis of this estimate the quantity of hog products packed and unsold is only about 21 7/10 per cent. of the total first cost of the hogs, and not 18 per cent. of what it cost, including expenses.

PROVISIONS.

[By Telegraph to BRADSTREET'S.]

From Buffalo, N. Y.: Provisions are moving freely in response to a liberal consumptive demand, and prices are steady at last week's quotations.

From Philadelphia, Pa.: There has been a very fair jobbing trade in hog products, but no movement worth noting in round lots. The general drift of values has continued downward. Butter has ruled firm and fairly active. Cheese is weaker and quiet. Jersey vegetables are arriving more freely, and are rapidly taking the place of southern shipments, which are now falling off.

From Cincinnati, Ohio: The provision market continues depressed.

From St. Louis, Mo.: Provisions continue demoralized. Hogs lower and slow. Cattle somewhat active, owing to small receipts. Most exchanges are closed for the holiday, and general trade has suffered the usual interruption and is quiet.

From Topeka, Kan.: The provision market is unchanged.

From New Orleans, La.: Provisions are easy.

From Wilmington, N. C.: Provisions unsteady at the decline.

From Chicago, Ill.: Pork has advanced 20c. per barrel; trading is purely speculative. Lard is quiet and a shade higher, influenced by pork; the shipments are by holders who wish to prevent an accumulation. Meats are in strong demand, speculatively. Prospects are good for a large return of hogs and cattle for July, in fine condition.

From Memphis, Tenn.: All cut grades white mess pork is 65c. per barrel cheaper.

THE NEW YORK DRY GOODS MARKET.

The week has been a very quiet one in all branches of the dry goods trade, with the exception possibly of the importing houses, who have been kept busy, now that the tariff is settled, with receiving goods from bond; they are the only ones who report trade good for the week, as they had many back orders to charge up, and, unlike the domestic commission houses, they only closed on the Fourth. Many merchants and buyers went out of the city last Saturday not to return till the 5th and 6th, and quite a number left on Tuesday not to return till Monday, the 9th. This, with the closing of the commission houses on the 4th and 5th, made it a dull week with first hands. They will no doubt be full of activity and push next week, however, to make up for their holiday recreation. Jobbers are doing nothing but making their preparations for the fall trade.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

London, July 6.—At Manchester in cotton there is a small business in piece goods at lower prices to obtain orders for export. Yarns are in fair demand for China, Japan and the continent, but prices are rather lower. At Liverpool there is a fair demand for American, which is quoted 1/16d. lower.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The dry goods commission and jobbing house trade has been of very small

proportions, as usual during Fourth of July week, and there is apparently no change in anything since last week. Some little irregularities still show themselves in cottons, but the general tone of the market is steady. Woolens have not been called for to any extent, but there is more disposition to operate at the current low prices, and we look for some activity in a week or two.

From Buffalo, N. Y.: The jobbing dry goods trade is experiencing the usual summer lull, assisted by a broken week, and the volume of business is light. The first six months of the year show a considerable gain over corresponding period of last year, and the feeling in the trade is a very satisfactory one. Retail departments are busy.

From Rochester, N. Y.: Dry goods jobbers report sales very light. The season being veritably over with, retail trade in this line is also quiet, but no more so than in previous midsummer seasons.

From Cleveland, Ohio: In dry goods there is a fair summer demand.

From Cincinnati, Ohio: The dry goods trade is quiet. A few are preparing to take inventory, and have called in their travelers for the purpose. Values are without change.

From Dayton, Ohio: The dry goods market is dull.

From Indianapolis, Ind.: In dry goods trade is rather light.

From Chicago, Ill.: Dry goods are quiet. There is a fairly satisfactory trade in light fabrics and staples. Millinery, notions and furnishing goods are in light request.

From Peoria, Ill.: In dry goods trade is averaging well.

From Louisville, Ky.: Dry goods fair movement and tolerably good collections. Orders for jeans are coming in freely.

From St. Louis, Mo.: Dry goods dull, with tendency to lower prices in some lines.

From Burlington, Iowa: Dry goods show no special activity, though there is a moderate line of orders being filled.

From Detroit, Mich.: In dry goods the volume of business is good for the season, but purchases are only to keep up the assortment.

From Minneapolis, Minn.: Sales of dry goods for June were large.

From Topeka, Kan.: Dry goods are in fair demand, but a shade quieter than last week.

From San Francisco, Cal.: The dry goods trade, beyond meeting the pressing local requirements, is doing nothing. There is no activity expected until demands of the fall trade begin.

From Memphis, Tenn.: Dull and unchanged.

From Baltimore, Md.: In the dry goods market jobbers are busy assorting fall stocks, but have been buying cautiously, and do not anticipate a very brisk trade. Retail dealers have had a good season, and no complaints are heard among them. The cloth business is very inactive, and some complaints are heard among commission men handling woolens. The prospects in this line do not look very bright.

From Richmond, Va.: Dry goods trade is fair with a tendency to improve.

From Wilmington, N. C.: Dry goods are inactive.

From Savannah, Ga.: Dry goods are steady without increased activity in movement.

THE CLOTHING MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Manufacturers are preparing for the fall trade, but aside from this there is nothing doing. The hot weather has made more calls for thin garments, but these goods have been nearly all distributed.

COTTON.

The week just passed has been one of extreme dullness as regards the spot cotton market at New York, and trading continues very slow. The cotton week is three days shorter than usual, the Cotton Exchange closing on the 3d, 4th and 5th insts. The sales have been for export 175 bales, for consumption 379, and for speculation 182 bales. The total sales sum up 736 bales, against 3,823 last week. Deliveries on contract amount to 461 bales. Quotations for spot middling uplands have remained unchanged since Friday last until last evening when they dropped one point, closing at 10¼c.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week.*	*Last year.*
Ordinary	7 5-16c.	7⅜c.	10 3-16c.
Strict ordinary	7⅜	7 13-16	10¾
Good ordinary	8 6-16	8⅝	11 9-16
Strict good ordinary	9¼	9 5-16	12
Low middling	9¾	9 13-16	12 7-16
Strict low middling	10 1-16	10⅛	12 11-16
Middling	10¼	10 5-16	12⅞
Good middling	10⅜	10 11-16	13¼
Strict good middling	10⅞	10 15-16	13½
Middling fair	11⅜	11 7-16	14
Fair	12⅛	12 3-16	14¾

STAINED.

	This week.	*Last week.*	*Last year.*
Good ordinary	6¾	6 13-16	9¾
Strictly good ordinary	7 9-16	7⅝	10¾
Low middling	8⅛	8 5 16	11 7 16
Middling	9⅜	9 7-16	12 1 16

The market for spot cotton closed dull and easy.

The New York market for futures shows no material change, the same conditions governing it as have been manifested during the several preceding weeks. Dealings have been light and confined almost entirely to inside operators, there being scarcely any outside speculation. The sales for the week aggregate 199,800 bales, against 313,200 last year. Prices have been lower, having dropped an average of 24 points for near months and 19 points for later ones.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
July	10.06	10.33	12.89
August	10.16	10.44	12.90
September	10.01	10.24	12.54
October	9.80	10.	11 85
November	9 70	9.90	11 70
December	9.73	9.92	11.70
January	9.81	10.	11.80
February	9.93	10 11	11.92
March	10.03	10.23	12.05
April	....	....	12.17

The market for futures closed steady.

The southern markets have been dull and quiet. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales	*To-day.*	*Last year.*
Galveston	430	9 15-16	12⅜
New Orleans	1,200	9¾	12⅜
Mobile	693	9¾	12⅜
Savannah	250	9¾	12
Charleston	470	10	12¼
Norfolk	309	9⅞	12⅜
Baltimore	580	10⅛	12⅞

The total receipts of cotton at the ports since September 1 are 5,885,947 bales, an increase of 1,278,709 bales over the receipts of last year for the same time. The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	828,398	422,453
New Orleans	1,653,767	1,170,775
Mobile	310,686	262,071
Savannah	808,924	723,871
Charleston	565,387	495,218
Wilmington	128,719	133,183
Norfolk	793,594	604,174
Baltimore	78,834	35,637
New York	151,616	168,112
Boston	189,636	227,200
Philadelphia	95,809	79,183

Below will be found the receipts for each day of the week ending Friday, July 6, at eleven leading ports, as compared with last week and the same week one year ago:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	711	670	217	986	319	35
New Orleans	183	1,175	1,155	446	71	1,250
Mobile	18	47	6	12	2	7
Savannah	7	328	77	59	154	18
Charleston	19	158	110	25	17	27
Wilmington	6	....	3	....	3	4
Norfolk	78	299	389	57	40	112
Baltimore	....	5	....	....	223	268
New York	....	....	70	....	....	89
Boston	133	128	80	134	....	39
Philadelphia	....	362	180	....	....	583
Totals	1,155	3,190	2,287	1,719	829	2,432
This day last week	1,472	2,133	2,318	1,837	1,034	2,325
This day last year	2,405	1,749	1,236	494	1,395	594

The total receipts at the ports for the week were 11,839 bales, against 11,419 last week and 8,461 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were about 2,362 bales, against 2,967 bales last week and 1,827 bales for the corresponding week last year. The shipments for the week were 7,018 bales, against 10,687 bales last week and 7,591 bales for the corresponding week last year. The stocks for the week were 66,579 bales, against 71,410 last week and 38,848 for the same week last year.

At Liverpool the market for prompt delivery uplands shows no change from the several preceding weeks, being dull and easy with a moderate inquiry, which was freely supplied. The quotations were lower, closing at 5½d. for middling uplands.

The market for futures has been barely steady with lower prices, the closing quotations last night being about 9 points off for near months and 5 points for later ones from one week ago.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year*
June-July	....	5 40-64d.	6 62-64d
July-August	5 31-64d.	5 40-64	6 62-64
August-September	5 35-64	5 41-64	6 63-64
September-October	5 36-64	5 43-64	6 55-64
October-November	5 34-64	5 39-64	6 42-64
November-December	5 33-64	5 37-64	6 38-64
December-January	5 34-64	....	....

The sales for the week at Liverpool were 47,000 bales (of which 35,000 were American), against 65,000 (of which 41,000 were American) last year. The sales for export were 2,600 bales, against 8,300 bales last year. The sales for speculation were 1,050 bales, against 6,700 bales last year. The amount forwarded was 16,000 bales, against 12,000 bales last year. The stock in port is 1,007,700 bales (of which 749,000 are American), against 842,000 bales (of which 492,000 were American) last year. The total imports for the week were 79,000 bales (of which 54,000 were American), against 29,500 bales (of which 16,000 were American) last year, and the amount afloat 207,000 bales (of which 54,000 are American), against 294,000 bales (of which 74,000 were American) last year.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Memphis, Tenn.: The cotton market is very quiet.

From Cincinnati, Ohio: Trade in cotton is light with fair receipts.

From Louisville, Ky.: Cotton is very dull and in buyer's favor. Bagging is in heavy demand at regular prices.

From Philadelphia, Pa.: The movement is slow and unsatisfactory, but there is no change to note in values.

From New Orleans, La.: The Fourth of July holiday interrupted the cotton movement, which was small. Spots are unchanged; futures here showed little variation. Prices are the lowest during the summer since 1854.

From Savannah, Ga.: There are no new features in the cotton market. The crop has received too much rain, and the plant is small and backward for the season.

COTTON CROP REPORTS.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: The growing crop is doing well. The market is quiet and receipts small. The weather is hot in the day time, but pleasant at night.

From Galveston, Tex.: Weather during past week continues very warm with good rains. Crop outlook continues favorable.

WOOL.

A moderate increase in the volume of business in wool is noted for the past week. The demand, however, has not been active, but stocks are increasing, and with better assortments available at comparatively low prices manufacturers have been meeting near requirements with a little more freedom. The enforcement of the new tariff schedule has had no appreciable effect on the trade. There is no doubt but that the decline that has already taken place has fully offset the reductions in duty on wool, and if this was the only way in which the new law could affect the market its recovery from the recent dullness and depression might soon be announced. Wool, however, has to await the slower development of the effect of tariff reductions on yarns and fabrics, and if foreign spinners and manufacturers can be shut out of American markets by no other means than a further cheapening of the cost of production in this country it is probable that consumers will try to force a further concession from growers and dealers in wool. It will take some little time to determine the position of spinners under the revised law, and meantime there must be a good deal of uncertainty as to the future of wool values. The general sentiment of the trade, however, is becoming more pronounced against making the raw material bear the whole brunt of the tariff reduction, and there is a disposition in some quarters to make a stand at present rates, which are already low enough to prevent profitable competition from foreign holders of wool. The outlook is favorable for an improving trade this month, as manufacturers are carrying very light stocks, and in spite of the curtailment of production will need a good deal of wool. The country markets hold firm, but prices are so high relative to seaboard values that there is very little acivity in the demand from eastern operators.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: There has been a fair business doing in wool the past week, when we consider that the weather has been hot and that business was entirely suspended on Wednesday last. The sales of the week have been 1,842,500 pounds of all kinds, and prices of washed fleeces are again a shade easier. Considerable new Michigan has been sold at 34c.—about 250,000 pounds—and new Ohio has also settled down to 36@37c. for X and 37½@38c. for XX. Holders are free sellers, but buyers do not respond. New wool is now arriving more freely from Michigan and Ohio, and in a week or two there will be a good assortment on the market. The sales of washed fleeces this week have been about 40,000 pounds. In combing and delaine fleeces the sales have been at 40@41c. for fine Ohio delaine, and 42@43c. for fine and No. 1 combing, and a lot of 54,000 pounds Kentucky combing sold at 27½c. per pound. Unwashed wools have been in most demand, and sales of 630,000 pounds, including Texas at 17@28c., including low and choice, territory 18½@26c., Georgia 27@27½c., Missouri at 25@27c., and unwashed western principally from 23@30c. for fine and medium. The sales of pulled have been in the range of 25@44c. for common and choice supers, choice and fancy lots of eastern and Maine selling at 40@44c. per pound. In foreign wool very little has been done. Some 25,000 pounds Australian has been sold, part as high as 44c. per pound. Carpet wools have been arriving freely, and are dull and unsettled.

From Philadelphia, Pa.: The market has been a little more active, and the feeling as to values is steadier. A fairly good trade is anticipated during the latter part of the month.

From Baltimore, Md.: Wool is in fair demand at steady prices.

IRON.

The pronounced firmness reported in iron last Saturday has not only been steadily maintained during the week, but has shown itself at other iron centers than those mentioned one week ago. Southern irons are now appreciating the gain made. The prices of No. 1 and No. 2 American, which had been "firming up" strongly for some days, were definitely announced as having readvanced to $22 and $20, respectively, and rest there now, with all the advantage in favor of the holder. Inquiries for pig iron have been more numerous during the week, but sales have not been as large as might have been expected, owing to the unwillingness of makers and their agents to contract for future delivery at the existing schedule of prices. This is a very healthful sign, and quite confirms the assertion that the ebbing trade in the iron industry has finally turned. A side-light may be turned onto the sudden change of front from bad to better by a knowledge of the fact that a great many of the smaller furnaces were frightened by the summary proceedings on the part of the Thomas Iron Company in cutting under the market, and thus driving weak or inefficient competitors out of the field. It was also believed that a good deal of pig was sold at the very low prices touched. Such is not the case. Only regular customers obtained advantage of the $20 and $19 rates for Nos 1 and 2, and the quantity so sold was not, relatively speaking, large. But the result was that a number of small concerns have been frightened out of competing—have closed for repairs or other reasons, and the market was so cleared of excessive disturbing elements, of excessive production and competition, that the early advance in rates was not only justified but made. Scotch iron is firmly held at full figures and holders are unwilling to contract for future delivery at current rates. This is a decided improvement. Sales to arrive have consequently been very small. Arrivals have not amounted to over 1,000 tons. Bar iron is dull and rules in buyers' favor, owing to production being still heavy both east and west and demand comparatively restricted. Ten thousand tons of steel rails were recently contracted for here at $38, which is about the price quoted for several months. The condition of the steel rail industry must be classed as healthful. The prices received are low, but they will permit of a good advance without encountering the dreaded figure at which importations can be made at a like rate. In fact the iron trade in general is in better shape to-day than it has been before during the year.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

From London: At Glasgow pig iron closes strong with a good business. Cleveland stocks decreased 13,700 tons in June. Finished iron is better and prices have somewhat stiffened.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Standard brands of foundry pig are in better request. Makers have advanced quotations 50c.@$1, but buyers do not respond, anticipating a relapse. Forge continues dull with excessive stocks. Bar is weak, owing to the heavy output over the country. Pennsylvania

mills are closing down for repairs. The Bessemer steel mills have abundance of business in hand.

From Cincinnati, Ohio: Immediate consumptive demand for pig iron is light, but there have been some large sales for near futures. Furnaces are unwilling to accept offers at present prices. Manufactured iron is quiet and steady.

From Cleveland, Ohio: In iron the situation remains unchanged. The demand is lifeless and prices continue low, with virtually nothing new to note.

From Chicago, Ill.: Hardware is quiet and sales restricted to small orders. Bar iron is dull. Building iron and steel used in railroad construction are in fair request. Nails are jobbing slow. Pig iron is without improvement; workers buy as wants require, but reduced production and the fact that manufacturers are without stocks renders holders less anxious to sell.

From Louisville, Ky.: Southern pig irons are in better demand and a trifle higher.

From St. Louis, Mo.: Manufactured iron continues quiet at unchanged rates. Pig iron in good demand and firm, with concessions very rare.

From Detroit, Mich.: In iron the demand is increasing. Considerable inquiry is made for prices.

COAL.

The publication of the July schedule of prices for anthracite has been followed by a decided advance in the general movement of that product. This is especially true with dealers and companies not depending largely on the coastwise trade. Our special dispatches given below show the continued heavy movement west by the lake route. It is believed to be doubtful whether the July production will equal that for July in 1882. The question as to the advisability of ordering another three-days' stoppage has been decided, this presumably to be the last during the season. The outlook is for a brisk trade for the remainder of the season. The estimated output of anthracite for June is given at 2,529,248, against 2,625,039 tons in June, 1882. The increased production in 1883, to June 1, was 1,397,393 tons, The figures previously given indicate a net increase, July 1, of about 1,300,000 tons. Bituminous coal remains without special features.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Coal meets with the usual season demand. Stocks on hand good. Prices satisfactory.

From Buffalo, N. Y.: The movement of anthracite coal continues of liberal proportions, there being no accumulations of stocks. Lake shipments to date 442,308 tons, as compared with 387,245 in 1882, and 240,202 in 1881. Prices are fairly well maintained, the tone of the market being firm and healthy.

PETROLEUM.

The speculative market for certificates of crude petroleum has been an almost steadily declining one based on rumors of discoveries of very productive deposits of oil in Ohio and other "new" territory—which has been worked on a moderate scale for a number of years. Not much confirmatory of these reports has been received, and the opinion is freely expressed that the "syndicate" or bull clique which has been operating so actively for higher prices for about a month past has made its point, unloaded and quietly withdrawn. There are other so-called bull cliques, however, and these have steadied the market against a rapid decline, which is supposed to be what the Standard Oil brokers are trying to bring about. No doubt the capitalists who lately held up oil with the weight of large sums of money look upon the efforts of those trying to stem the current of bear manipulation much the same as they do upon the backwoodsmen who are supposed to be still voting for Andrew Jackson. The oil market was not bulled on the strength of its statistical position alone, and there were, and are still, powerful efforts making to depress prices. A new "syndicate well," on the Cooper tract, came in on Saturday and broke the market 2c. The decline was felt again on Monday and Tuesday. There was a visible reaction on Thursday.

On Friday the market opened at $1.13 and declined steadily until noon, when sales were made at $1.11¼. No news respecting additional production came to hand, but dispatches were received telling of the destruction by fire of three large tanks of oil at Oil City, and two at Tiona, Pa., last night. The tanks were struck by lightning, burned and proved a total loss. Telegraph wires were broken also, and news from the regions was very intermittent during the day. The loss of oil by the fire must have been very heavy as it is estimated that an assessment of 1 per cent. on the total of oil in stocks will be required to make it good. The market opened at $1.11½ in the afternoon, and at 2 P.M. had gained ½c. Shortly after that hour a rally was made and prices ran rapidly up to $1.12⅛. At the close the offer was $1.14⅜ against $1.18 on Friday evening a week ago, a loss of 3⅜ on the week. The market closed very excited and strong at the highest point bid.

The following shows the fluctuations of certificates of crude petroleum during the week ended last evening:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday, June 30	1.18¼	1.18½	1.16¼	1.16¾
Monday, July 2	1.16¾	1.16¾	1.15	1.15
Tuesday, July 3	1.14¾	1.15	1.14⅛	1.14⅜
Thursday, July 5	1.14⅛	1.14¼	1.11⅛	1.12¾
Friday, July 6	1.13	1.14⅜	1.11	1.14⅜

Refined has been in the same dull and uninteresting condition throughout the week as has been reported pretty much all the time since the beginning of the late rise in prices. There is no foreign demand. Petroleum products for export share in the general dullness.

The quotations for certificates of crude petroleum and of petroleum products last evening, as against those at the close of the four preceding weeks, are as follows:

	June 7.	*June 15.*	*June 22.*	*June 29*	*July 6*
Certifi's, crude	1.15¾	1.19½	1.16⅜	1.18	1.14⅜
Refined, 110°	7¾	7¾	7¾	7¾	7¾
Refined, 70°	7⅞	7⅞	7⅞	7⅞	7⅞
Crude, in bbls	7¼@7⅞	7¼@7⅞	7@7¾	7@7¾	7@7¾
Case, plain	9½	9½	9½	9⅞	9⅜
Naphtha	5¾	5¾	5¾	5¼	5¼

The exports of petroleum from the United States, crude equivalent, for the week ending June 30, was 6,524,168 gallons; from New York city alone 5,915,298 gallons. The total exported from the United States since January 1 was 299,414,577 gallons, against 319,601,447 gallons in the corresponding portion of 1882, a decline in the current year of 20,186,870 gallons. New York city sent abroad in the six months named of the total given 250,254,149 gallons, against 258,310,793 gallons in six months of 1882, a decline in shipments of petroleum from this port (in crude equivalent) of 8,056,644 gallons.

The National Bureau of Statistics' report of exports of petroleum and petroleum products for five months ending May 31 (actual gallons) shows 458,008,552 gallons sent abroad, valued at $40,607,993, against 505,888,296 gallons in a like portion of 1882, valued at $46,563,142.

The volume of speculative transactions in pipeline certificates throughout the United States during the first half of 1883 was the largest ever recorded in a like period of time. The total at Pittsburgh is given at 280,610,000 barrels, or nearly ten times the quantity of oil in the tanks of the United Pipe Line Company. While the statistics from all the exchanges are not at hand a Pittsburgh journal estimates that the average total of the weekly transactions in pipe-line certificates at the various exchanges of the country represents about 75,000,000 barrels, or over twice the total oil in stock in the regions.

OCEAN FREIGHTS.

On Saturday and Monday the market was quite dull. Demand for rates for room on the berth was limited and the disposition seemed to be against doing any business until after the holidays. There was however some request for charters for petroleum. On Tuesday more animation was observed and there were several shipments of grain per steam. The petroleum shippers per charter were also conspicuous and rates were fairly firm. On Thursday but little business was done. Rates however were about steady for on berth and firm on charters. There was only a moderate degree of activity toward the close. There have been no features of special import since that time.

OCEAN FREIGHTS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Transatlantic charters have been few and unimportant, the freights market reflecting the dullness in the export market for grain and oil. Rates have undergone little or no change.

From Baltimore, Md.: In the freights market a fair number of grain charters for July and August have been made, and rates to Liverpool are quoted firmer at 4½d. on grain.

From New Orleans, La.: Ocean freight charters, steamer to Bremen, tobacco, 45s. and primage per hogshead. Two small vessels to Trieste, cottonseed oil, 8s. per round barrel.

From Savannah, Ga.: Produce is being shipped owing to slim prices and backward northern market. There is some demand for lumber and naval store charters. Freights have declined.

From Wilmington, N. C.: Ocean freights are firm. Tonnage wanted.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Savannah, Ga.: Boots and shoes still quiet, yet the trade deemed healthy with good prospects for active fall trade.

From Boston, Mass.: The Fourth of July week is always a dull one in the boot and shoe trade, and there is really nothing to report. The few buyers that remain here are cooling off at the beaches, and will not probably have much disposition for business while the thermometer indicates over 90 in the shade. Shipments for the week 59,800 cases.

HIDES AND LEATHER.

[By Telegraph to BRADSTREET'S.]

From Chicago, Ill.: Leather goods in dull demand.

From Buffalo, N. Y.: The tone of the leather market is firm and improving.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Whiskies quiet and steady. Internal revenue collections in this district for the year ending June 30 were $7,550,000, showing an increase of more than $3,000,000 over the previous year.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Tobacco fairly active and unchanged. Crop situation generally favorable.

From St. Louis, Mo.: Tobacco very slow, and the export demand has died away.

From Wilmington, N. C.: North Carolina tobacco crop reports good.

From Baltimore, Md.: The demand for Maryland tobacco continues active, but receipts have fallen off some. Holders of Ohio stock are very firm in their views.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: Receipts of lumber continue large, and prices of yellow pine are on the decline.

From Cincinnati, Ohio: Lumber is active and stocks fair.

From Wilmington, N. C.: Timber is advancing. Lumber is steady and shingles firm. The demand is fair.

From Buffalo, N. Y.: Indications are that the general lumber trade is improving. Dealers who have held off in anticipation of a decline in values at producing points are beginning to see that there is little probability of such decline. Yards are largely depleted of the better grades, but dealers are now buying freely to stock up for late summer and early fall trade.

NORTH CAROLINA NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Spirits of turpentine are firm and advancing. Rosins, tar and crude turpentine are also steady.

SPECIAL LOUISIANA CROP REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Sugar is quiet. Molasses is dull. Continued rains have materially injured the cane crop in some sections. Rice is steady. Coffee is steady. The stock of unsold crude cottonseed oil here and in the country is very large. Crude is nominal at 35c. asked, but prices and qualities are unsteady.

THE JAPANESE TRADE SITUATION.

[By Telegraph to BRADSTREET'S.]

From San Francisco, Cal.: Japanese advices state that the silk crop is abundant and new hanks are expected about the end of July. Domestic trade in the interior of Japan is demoralized. Bankruptcies are numerous and exchange and money stationary.

THE CHICAGO TRADE SITUATION.

Chicago, July 3.—The observance of the nation's anniversary and attention given to closing up of the half-yearly accounts has materially interrupted the jobbing and general trade of the city, and there are no changes to note in any leading article. The general verdict is that, while the volume of goods has been larger than for the first half of last year, the profits have not been any better. The grain and provisions markets are weak and depressed by excessive stocks and increased desire to realize, and the prospect is that prices will touch a lower figure.

The following table shows the amount of grain in Chicago on the dates named:

	June 30, 1883, bush.	*June 23, 1882, bush.*	*July 1, 1880, bush.*	*July 3, 1880, bush.*
Wheat	6,079,000	1,053,000	4,285,000	5,071,000
Corn	2,631,000	1,245,000	2,235,000	2,380,000
Oats	714,000	150,000	3,615,000	481,000
Rye	617,000	70,000	33,000	10,000
Barley	28,000	17,000	31,000	89,000

The following table exhibits the stocks of hog products on hand in Chicago on the dates named, as reported to the Board of Trade:

	July 1, 1883.	*June 1, 1883.*	*June 30, 1882.*	*June 15 1881.*
Mess pork, bbls	193,898	219,558	228,389	191,149
Mess pork, old, bbls	.....	.....	.....	1,250
Mess p'k, summer, bbls.	.....	.....	.....	15,[illegible]
Other pork, bbls	10,452	10,418	4,360	4,[illegible]
Lard, prime contract	109,406	132,105	132,582	3[illegible]024
Lard, other kinds	5,827	8,204	8,435	12,485
S. P. hams, tcs	74,615	75,004	55,563	61,720
S. P. shoulders, tcs	27,615	36,152	10,992	6,420
D. S. shoulders, lbs	7,679,657	5,421,872	3,102,729	7,154,[illegible]74
Long clear sides, lbs	5,030,332	3,760,812	2,363,350	6,2[illegible]024
Short clear sides, lbs	5,036,394	3,738,599	1,989,723	3,666,823
Short rib sides, lbs	38,572,311	39,108,334	16,890,551	39,442,[illegible]73
Other sides & hams, lbs	10,732,089	12,081,009	13,681,493	18,2[illegible]964

The total amount of product on hand is about 174,000,000 pounds, against about 186,000,000 pounds one month ago and 150,000,000 pounds one year ago.

THE LOUISVILLE EXPOSITION.

The *Courier-Journal* has the following regarding the exposition: In less than a month the doors of the Southern Exposition in this city will be thrown open to the world. As every step so far taken in this great enterprise has been successful, so every thing augurs well for its future prosperity. No mistakes appear to have been made. Clear-sighted men mapped out a course to be pursued; able management, free from disturbing dissensions, has justified the wisdom of that course, and only the most flattering prospects lie in advance of the greatest industrial enterprise that has taken a place in the history of the south since the war. The country at large has responded most favorably to the overtures of Louisville, and the exposition, while southern in name, will be purely national in character. The south is being fully aroused to the performance of its duty in the premises. Other sections needed only the opportunity to at once seize it.

Gentlemen just returned from a tour through east Tennessee and western North Carolina report a gratifying interest in each section, which is constantly growing, owing to the facilities afforded by the opening of the new Jellico route to Knoxville and the Western North Carolina road, which opens the latter state through to the seaboard. All the natural products of east Tennessee will be fully represented, a commissioner who has the matter in charge having already done much looking to that end. In western North Carolina a feeling has been awakened by recent timely publications in leading newspapers which has already resulted in individual promises to make displays of the rare ores found in such profusion there. In addition to these the tobacco men of the Old North State, who did so much to make the Atlanta Exposition a success, appreciating the value of their opportunity, are coming to Louisville in full force to reap the rich reward so generously offered them. A single North Carolina firm, dealing in cigarettes and smoking tobacco, spent $35,000 in advertising at Atlanta and have said that the outlay has been justified. This firm will be represented at the Southern Exposition, and its advertising outlay will probably be not less that $50,000. The experience of this firm will lead others equally enterprising to follow its example, and the consequent outlay can easier be imagined than stated in dollars and cents.

And the President is coming to lend his presence to the opening ceremonies, and the man who says politics to him during his stay will be quietly taken around the corner of the building and shot by the special police without the benefit of clergy.

The Exposition means business, good-fellowship, the uniting of the sections and general prosperity, while politics—well we will discuss that subject somewhat during the campaign of 1884.

THE IRON TRADE OF SCOTLAND.

In the April number of State Department reports the following interesting information is supplied by Consul Leonard, of Leith, under date of February 2, 1883:

"In the Scotch iron trade the amount of business done during the year 1882 has been very great, and in several departments without a parallel in its history. From the end of 1874 to the beginning of

1882 the reaction from the previous inflation was felt severely, and during that period the stock of pig iron in Scotland increased from 96,000 to 940,000 tons. That quantity was the largest ever held, being nearly equal to the ordinary requirements of both the home and foreign markets for a period of twelve months. Although this was discouraging, there was a feeling of confidence in the market, attributable among other causes to an expectation that ere long the restricted production (12½ per cent.) would exhibit its influence in the reduction of stock, and to the belief that the development of trade and of railway and other enterprises in the United States was certain to bring an increase of business to the market of this country. Eventually there was unmistakable evidence that restriction in the output had begun to tell in the direction so much desired, and the foreign exports of pig iron were seen to be increasing. The stock has been reduced 104,000 tons during 1882, and it amounted to 836,000 tons at the end of December. The turning point, therefore, has now been attained, and throughout the various districts demand appears to have fairly overtaken supply. Prices have ruled comparatively low, and profits have borne no comparison with what they were a few years ago; nevertheless, labor has been cheap, and the cost of fuel and of production generally moderate throughout the whole year.

"In January, 1882, the price of Scotch pig iron was $12.91, the highest point of the year, from which it declined until April, when $11.36, the lowest rate, was reached. By this time the improvement in trade had begun to manifest itself, but comparatively little advance occurred in the price, which rose to $12.68 on July 21, and to the end of December fluctuated between that figure and $11.74. The production by the Scotch ironmasters during nine months of the year has been 1,126,000 tons, from an average of 108 furnaces, making about 200 tons per furnace per week. In 1881 the production was 1,176,000 tons, the number of furnaces 116, the weekly output per furnace being 195 tons. The consumption of pig iron in Scotland exhibits the unprecedented total of 930,000 tons, composed of 585,000 tons Scotch iron and 345,000 tons English iron, being, as compared with the year 1881, an increase of 188,000 tons in the former and a decrease of 75,000 tons in the latter. Shipments during 1882, although less than during some former years, amounted to 645,000 tons, 67,000 tons more than in 1881, and exhibit a good, steady demand from all parts of the world. Of the shipments there were 146,518 tons forwarded to the United States, an increase of 39,747 tons over the quantity shipped thither in the previous year, but less than in 1880 by 87,825 tons.

"The production of malleable iron in Scotland in 1882 was 474,000 tons, an increase of 113,000 tons over the quantity produced in 1881 and 182,000 tons above the production in 1880. But the exports of malleable iron have not increased proportionately with the great increase in the production of that article. The quantity exported in 1882 was 26,805 tons, or 5,755 tons in excess of the total in 1881 and 1,896 tons more than the quantity exported in 1880. In 1873 the exports were 25,830 tons, only 975 tons below those of 1882. They declined to 14,489 tons in 1876, and have steadily risen since then. Of these exports of malleable iron in 1882, 3,900 tons went to the United States."

PETROLEUM PRODUCTION.

Mr. John F. Carll, of Pleasantville, has furnished the Philadelphia *Press* with some statistics showing the yearly and total production of the several oil districts of Pennsylvania and New York from 1863 to and including 1882. He shows that the daily production of the Bradford and Allegany fields for the year ending April, 1883, was 22,974 barrels less than the production of the previous year, a decrease of over 32 per cent., and arrives at the following conclusions:

1. Four out of the five great districts composing the oil fields of the present time have passed their periods of maximum production and are unmistakably on the decline. 2. The Warren and Forest district, although not yet so fully developed as the others, undoubtedly reached the maximum production in August, 1882. 3. No great accumulation of stocks could have taken place without the discovery of a widespread and uniformly productive sand rock like that of Bradford. 4. That this great repository of oil is now thoroughly developed and so far reduced in producing capacity that it cannot furnish more than half the requirements of the trade in 1883. 5. That its brown sand ally, Allegany, is fully tested, and likewise so decidedly on the decline that Bradford and Allegany together cannot produce as much oil in 1883 as Bradford did alone in 1882. 6. That the old fields of Venango, Butler and Clarion are in a decline which no amount of drilling is likely to permanently arrest. 7. That the production of Warren and Forest is too evanescent to be counted upon to compensate the decrease in other districts. 8. That there are not at present any reasonable grounds for anticipating the discovery of new fields which will add enough to the declining products of the old to enable the output to keep pace with the shipments or consumption during the remainder of 1883.

THE EADS SHIP RAILWAY.

There are many who will be surprised to learn that the much-talked-of ship railway across the Isthmus of Tehuantepec has been begun. That indefatigable worker, Capt. J. B. Eads, it appears, was not to be discouraged by the failure of the United States Congress to "assist" the project. Having secured ample grants from the Mexican government he has gone to work, and on the 20th of May broke ground at the Atlantic terminus of the "Isthmian Ship Railway," about 150 miles southeast along the Mexican coast from Vera Cruz, on the Bay of Campeachy, almost directly south of Galveston, and a little west of south of New Orleans. The New Orleans *Times-Democrat* of late date acknowledges the receipt of two photographic views taken at the moment of "the inauguration of the ship railway enterprise." The proposed route of this great undertaking is about 150 miles long, and leads in a direction nearly north and south, or from the Pacific side north to the Gulf coast. As there are two rivers flowing along the line, Mr. Eads will utilize them for some 50 miles, so that the actual length of the proposed railway will not be more than 100 miles. On the Pacific side the water is sufficiently deep to admit the approach of vessels of any draught, while on the Gulf coast a fine port may be easily constructed "with but little expense to the company." If Capt. Eads has really gone to work to build this railway without expecting possible future subventions from the United States government he is to be congratulated on his recovery from the view he formerly took of the project. If it cannot be made a success as a private business enterprise, there are still many citizens who will not object to its lying down and drawing its last breath. As a commercial venture let it stand on its own legs and success to it. But it is nearly time that engineers of gigantic operations ceased to act on the basis that every project of that sort must enjoy the questionable favoritism once shown some of our pioneer western railroads.

TRADE EMBARRASSMENTS.

There were 136 failures in the United States reported to BRADSTREET'S during the past week, 29 less than the preceding week, 37 more than the corresponding week of 1882, and 91 more than the same week of 1881. Compared with the preceding week the middle states had 29, a decrease of 13; New England states 6, a decrease of 22; southern states 17, a decrease of 8; western states 53, an increase of 2; Pacific states and territories 31, an increase of 12; Canada and the Provinces 16, a decrease of 11. The failures generally were of minor importance. In the principal trades they were as follows: Grocers 29; general traders 18; liquors 12; hotels and restaurants 9; clothing 8; shoes 5; manufacturers 5; dry goods 4; fancy goods 4; hardware 4; tobacco and cigars 4; lumber 4; drugs 4; furniture 4; coal 3; hats 2; crockery 2; produce and provisions 2.

CALIFORNIA.

AUBURN.—J. Granger, grocer, is reported financially embarrassed.

BAKERSFIELD.—Alonzo Coons, stationer, has filed a petition in insolvency.

COLFAX.—Application has been made to force Bernard Murphy, saloon, into insolvency.

EUREKA MILLS.—James Coyle, hotel, has been attached.

GRASS VALLEY.—A. Cohen, varieties, is reported to have failed.

JACKSON.—T. W. Kelly, saloon, has been attached.

LOMPOC.—W. H. Lambert, furniture, has assigned.

LOS ANGELES.—John Osborne, express, is reported to have failed.

MOKELUMNE HILL.—D. C. Lamphear, saloon, has been attached.

OAKLAND.—P. J. Gerhardy, butcher, has been attached.

OAKLAND.—Hansen Brothers, saloon, have been attached.

OAKLAND.—Joseph Lambert, saloon, has been attached.

OAKLAND.—Lynch, Maloney & Co., wood and coal, have been attached.

OAKLAND.—Sand & Co., wood and coal, have been attached.

OAKLAND.—The liabilities of Scoville & Co., foundry, are $17,500; assets $41,000. They have been granted an extension of four months.

PIKE CITY.—L. F. Dick, saloon, has been attached.

SAN FRANCISCO.—H. Hoesch, restaurant, has assigned.

SAN FRANCISCO.—J. Kelly & Son, hotel, are reported to have failed.

SAN FRANCISCO.—M. Lavin, grocer, has been attached.

SAN FRANCISCO.—Robert McCone, machinist, has filed a petition in insolvency.

SAN FRANCISCO.—R. White, crockery, has been attached and offers to compromise.

SAN FRANCISCO.—H. F. Wiegmann, grocer, is reported to have failed.

ST. HELENA.—H. E. Alden, clothing, has been attached.

COLORADO.

BOULDER.—The assignment of Herman Brothers, clothing, has been set aside.

FORT COLLINS.—Conroy & Co., grocers, who recently assigned, have resumed, all claims being reported as settled.

GEORGETOWN.—David Fountain, saloon, has been attached.

PUEBLO.—Coffee & Farrow, grocers, have been closed by attachment.

RED CLIFF.—J. S. Parker, general store, has assigned to H. Carl.

CONNECTICUT.

GUILFORD.—John B. Hubbard, of the Guilford Canning Company, has assigned.

DAKOTA.

BARTLETT.—Ferris & Palmer, general store, have assigned.

GEORGIA.

COLUMBUS.—Liefrank & Slade, paints, have assigned.

COLUMBUS.—Smith & Smith, printers, have been closed by the sheriff.

CUTHBERT.—H. J. Gortotowsky, jeweler, has been closed by the sheriff and offers 25 cents.

GRIFFIN.—J. C. Bridge, saloon, is reported to have failed.

OWENSBYVILLE.—Application has been made for a receiver for Owensby & Jones, general store.

ILLINOIS.

CHARLESTON.—W. B. Dodds, grocer, has failed and gone out of business.

CHICAGO.—Max Alexander, shoes, has been closed by the sheriff on confessed judgments for $1,279.

CHICAGO.—H. O. Kenyon & Co., commission grain, have suspended.

CHICAGO.—At a meeting of the creditors of McGeoch, Everingham & Co., grain and provisions, held on the 2d inst., the receiver submitted a statement showing the amount due banks to be $3,950,000, against which they hold collateral valued at $3,800,000; amount due the trade over and above margins $1,194,911; total unsecured liabilities $1,344,911, exclusive of country accounts, which will take care of themselves. The receiver had cash assets $200,000. Mr. McGeoch's friends were to advance $450,000 to him, provided he could obtain a full release from all suits and a compromise at 50 cents, and the firm accordingly offered to pay 50 cents cash, provided the above terms were complied with by the creditors.

CHICAGO.—Swett, Pickard & Co., pickle manufacturers, have assigned to Edward R. Swett.

CHICAGO.—Whitcomb & Kendall, wholesale meats, are reported to have failed, with liabilities estimated at $110,000. They confessed judgment to Armour & Co. for $27,442.

QUINCY.—J. W. Skinner, printer, has been closed on a chattel mortgage.

VERONA.—Thomas S. Green, restaurant, has failed.

INDIANA.

LAFAYETTE.—J. H. & W. L. Ward, carpets, have called a meeting of creditors. It is said they were interested in Jenkins & Co., grain, of Delphi, who have failed.

LOGANSPORT.—J. C. Bridge, music, etc., offers to compromise. Liabilities about $8,000. The assets are nominally about $8,000, which he is willing to turn over to the creditors for a settlement in full.

PETERSBURG.—J. M. Shandy, general store, has failed.

SANDBORN.—S. M. McGinnis & Co., general store, have suspended.

VINCENNES.—L. Gimbel, clothing, has assigned to J. Keith. Liabilities $3,014.

IOWA.

ADEL.—A. F. Russell, general store, has assigned all book accounts to W. H. H. Dart.

CARROLL.—William Goodyear, restaurant, has failed.

DAVENPORT.—Stephen Miller, grocer, has failed and been attached for $500; preferred claims $1,000.

ELDORA.—St. John & Van Schaick, grocers, have been closed by the sheriff.

MEDERVILLE.—William Brinkhause, furniture, has been attached.

KANSAS.

CHANUTE.—S. Winfield, agricultural implements and grain, has assigned.

HUNNEWELL.—Avery & McDowell, grocers, have been attached.

KENTUCKY.

HENDERSON.—Stapp & Sugg, hotel, have assigned to James McLaughlin. Liabilities $1,300; nominal assets $1,800.

LOUISVILLE.—F. S. Stoddard, stencil manufacturer, has been attached.

LOUISIANA.

SHREVEPORT.—Francis Jarriet, grocer, is reported to have failed.

MAINE.

COLUMBIA FALLS.—Allen, Puffer & Co., lumber, are reported offering 25 cents.

NEW PORTLAND.—Orlando Quint, hotel, is in insolvency.

PORTLAND.—Newell B. Lowell, grocer, is in insolvency.

SKOWHEGAN.—R. W. Haines, hotel, who was recently attached, says if creditors will wait he will work out. There are no unencumbered assets and he owes about $4,000, unsecured.

MARYLAND.

BALTIMORE.—Elisha Harrington, Jr., house furnishing goods, has assigned to J. A. Preston.

MASSACHUSETTS.

BOSTON.—Thomas W. Gould, dry goods, is in insolvency. Liabilities $9,118, of which $2,994 is secured. The assets consist of pledged stock, the equity in which is valued at $450, and accounts $125.

BOSTON.—Knight & Frost have gone into insolvency.

BOSTON.—Murphy & McCarthy, publishers, owe $15,030, of which $6,540 is bills payable, $7,820 accommodation paper, and $670 other debts. The assets aggregate $18,663, consisting of stock $1,920; sheets $1,000; plates and wood cuts $5,000; outstanding leases $4,000; ledger accounts $220; bills receivable $323; Hartford office, stock $1,700; outstanding bills $3,000; Providence office, stock $500; outstanding bills $1,000.

TAUNTON.—The Taunton Copper Company has sold its New York property for $85,000 cash, and will soon pay 25 per cent. of the indebtedness.

WEBSTER.—J. D. Kingsbury, market, owes about $6,000. The assets consist of $1,200 in personal property, and equity in real estate nominally $2,000.

WORCESTER.—Mrs. E. H. Chaffee, woolen manufacturer, asks an extension of twelve months without security.

MICHIGAN.

HARBOR SPRINGS.—E. H. Martindale, hardware, has assigned. Liabilities, unsecured, about $8,000; secured, $3,000.

PONTIAC.—J. T. Smith, cigars, has been closed by creditors.

SOUTH BOARDMAN.—Doyle & Rowe, general store, have been attached. Liabilities estimated at $3,000. There is said to be sufficient assets to pay in full. They have been quarreling between themselves.

MINNESOTA.

MOORHEAD.—Richardson Brothers & Co., lumber, have assigned. Liabilities $50,000; assets $15,000.

WABASHA.—J. H. Toussaint, drugs, has assigned to F. Talbot.

MISSISSIPPI.

LEXINGTON.—D. G. McCaleb, saloon, has assigned.

MISSOURI.

KANSAS CITY.—Anson Brothers, second-hand store, have been closed by the sheriff.

KANSAS CITY.—Hambrook Brothers, plumbers, have given a bill of sale.

MARYSVILLE.—J. M. True & Co., lumber, have assigned. Liabilities about $30,000; assets small.

PLATTSBURG.—F. & C. Kennedy, grocers, have been closed by the sheriff.

ST. LOUIS.—J. B. Batsch, grocer, etc., has been attached.

ST. LOUIS.—E. W. Greene, merchant tailor, has been attached for $2,657.

ST. LOUIS.—Charles Steding, grocer, has sold out and failed.

ST. LOUIS.—Woerheide & Stibel, box manufacturers, have assigned to John Q. Stewart.

WARREN.—T. T. Rhodes, general store, has assigned.

NEBRASKA.

BENNETT.—John Crane, general store, has failed.

OAKLAND.—Lemmon & Mogul, agricultural implements, have been attached and are being closed out by a creditor for $1,600.

SOUTH AUBURN.—B. Saunders, printer, has failed.

NEVADA.

HAWTHORNE.—F. A. Angell & Co., general store, have been attached.

TUSCARORA.—C. A. Wood, restaurant, has failed.

NEW JERSEY.

CAMDEN.—Henry H. Groff, planing mill, is advertised to be sold out by the sheriff on the 15th inst.

ELIZABETH.—Miss Beatrice Wren, baker, is advertised to be sold out by a creditor.

NEWARK.—Harris & Skillman, saloon, are reported to have been sold out by creditors. They dissolved on the 2d inst. and Skillman continues.

NEW MEXICO.

ALBUQUERQUE.—Brown & Lawson, restaurant, have been attached.

CARBONATEVILLE.—Rogers & Cottle, general store, have called a meeting of creditors.

NEW YORK.

ALBANY.—M. L. Sachs, furniture, gave a bill of sale to Eugene L. Pelier for $1,384 and assigned to John Kaufman. Judgments for $2,930 were entered against him.

BALDWINSVILLE.—C. W. Rice, fancy goods, has assigned to F. A. Marvin.

BUFFALO.—The schedules of William H. Carney, gents' furnishing goods, show liabilities $14,679; nominal assets $10,571; actual assets $5,929; preferences $4,903.

HORNELLSVILLE.—Sawyer & Lyons, drugs, have assigned to F. D. Sherwood.

HUDSON.—William F. Forrester, of Peck & Forrester, dry goods, has assigned to Perrin Converse. Liabilities $9,000.

NEW YORK CITY.—The schedules of Sophie L. Auerbach, neckwear, show liabilities $5,213; nominal assets $4,288; actual assets $3,407.

NEW YORK CITY.—The schedules of William Cockroft, Jr., manufacturer of baseballs, show liabilities $8,994; nominal assets $3,229; actual assets, $2,514.

NEW YORK CITY.—The schedules of Joseph W. Frazier, guns, etc., show liabilities $225,873; nominal assets $179,648; actual assets $105,250.

NEW YORK CITY.—Solomon Goetz, commission and exporter, assigned on the 2d inst. to Sigmund Klingstein, giving preferences for $16,072, the largest being as follows: Theresa Goetz $2,158; Henry Klingstein $10,570; Philip Strauss $1,038; Samuel Behr $1,142; Nathan Zimmer $269; Joseph O. Kimmetsteil $654. Liabilities $58,256; nominal assets $60,125; actual assets $38,768.

NEW YORK CITY.—Thomas Knox, shoes, assigned on the 5th inst. to W. H. Buxton, giving a preference for $638 to Luella Knox.

NEW YORK CITY.—The schedules of Joseph Nicholas, straw goods, show liabilities $28,631; nominal assets $24,032; actual assets $14,473.

NEW YORK CITY.—The schedules of Moritz A. Pollock, crockery, show liabilities $2,662; nominal assets $1,457; actual assets $986.

NEW YORK CITY.—William C. Rogers, liquors, assigned on the 6th inst. to Joseph Shannon without preference. Liabilities about $80,000; good assets said to be about $50,000. The failure is attributed by him to doing too large a business for his capital.

NEW YORK CITY.—George Schaffer, leather and findings, assigned on the 30th ult. to Newton Squire, giving a preference to Mrs. Catharine Schaffer for $5,250.

NEW YORK CITY.—C. P. Washburn & Co., wholesale ribbons and buttons, offer to compromise at 50 cents in notes at six and nine months, secured.

OSWEGO.—Mills & Cullen, grocers, have assigned.

POUGHKEEPSIE.—Henry B. Gellert, clothing, has assigned to Maurice Levy, giving preferences for $8,472.

SYRACUSE.—Pixley & Snyder, grocers, have failed.

NORTH CAROLINA.

CAMERON.—Monger, McPherson & Co., general store have assigned.

OHIO.

ASHLAND.—W. H. Smith, Jr., jeweler, has assigned.

CINCINNATI.—Mrs. Frances M. Carr, of Carr & Co., wholesale liquors, has assigned to Robert Andrew.

CLEVELAND.—H. C. Quigley, coal and sewer pipe, has assigned to J. M. Wilcox. Liabilities estimated at about $55,000; assets about $40,000.

COLUMBUS.—William Haupt, box manufacturer, has been closed by the constable.
DELAWARE.—John W. Wharton, drugs and liquors, has assigned.
LANCASTER.—Samuel H. Tong, shoes, has been sold out by the sheriff for $5,950. Liabilities about $25,000.
LEIPSIC.—W. P. Ludwig, dry goods, has assigned to John Davis.
MORRISVILLE.—H. G. Bates, general store, has assigned.
NEW VIENNA.—G. A. Gravalt, drugs, has assigned.
PIQUA.—A. A. McCandless, lumber, has assigned.
PORTSMOUTH.—Fisher & Co., grocers, have assigned.
TOLEDO.—Bateman & Smith, hats, have failed and been closed by the sheriff. Liabilities $15,000; assets $2,500.

OREGON.

CORVALLIS.—M. Stock, general store, has failed.
TURNER.—I. B. Kaufman, hardware, has been attached.

PENNSYLVANIA.

BRADDOCK.—Max Altman, clothing, has been closed by the sheriff.
FREDERICKTOWN.—Weaver & Baldwin, general store, have been closed by the sheriff.
HIGHSPIRE.—Execution has been issued against M. J. Stoner, dry goods, etc.
PHILADELPHIA.—Joseph H. Baude, glass, was sold out by the sheriff on judgment for $3,000 said to be in favor of his mother.
PHILADELPHIA.—Judgment for $9,300 was recently entered against George S. Burger, trading as Burger & Co., furniture, upon which execution was issued.
PHILADELPHIA.—Charles H. Crewe, manufacturer of cigars, was advertised to be sold out by the sheriff.
PHILADELPHIA.—Execution has been issued against Abram Hasenclever, fancy cotton dyer.
PHILADELPHIA.—Heilman & Konold, cigar manufacturers, were advertised to be sold out by the sheriff.

A MOST CONVENIENT AND DURABLE DEVICE FOR HOLDING CURRENT NUMBERS.
Papers easily and neatly adjusted.
Sent postpaid on receipt of $1.25.
ADDRESS PUBLISHER OF BRADSTREET'S, NEW YORK.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.
SINGLE COPIES, TEN CENTS.
SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.
Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.
The synopses of recent legal decisions constitute an exceedingly valuable feature.
As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

BRADSTREET'S MINIATURE POCKET ATLAS
OF THE UNITED STATES AND CANADAS.

New special edition just published exclusively for the undersigned, by whom orders will be received and executed.
Single copies, 75 cents; eight copies to one address for $5.00

SENT BY MAIL, POSTAGE PAID.

MACULLAR, PARKER & COMPANY,
400 Washington Street, Boston, Mass.

COLUMBIA BICYCLES AND TRICYCLES.
Illustrated (86 page) Catalogue sent for 3 cent stamp.
THE POPE MFG. CO.,
No. 597 WASHINGTON STREET, BOSTON, MASS.

WORSTED YARNS.
THE TRACY WORSTED MILLS CO. (Limited.)
OFFICE AND MILLS,
2500 SPRUCE ST., PHILADELPHIA.

Fine Worsted Yarns, suitable for Cassimeres, Coatings, Dress Goods, etc.; also Knitting and fine Zephyr Yarns, for hand and machine work.

BRADSTREET PRESS AND BINDERY.
We are now prepared to execute orders for every description of
FINE BINDING
IN LEATHER.
THE BRADSTREET COMPANY,
Nos. 279, 281, 283 Broadway,
NEW YORK.

MAVERICK NATIONAL BANK
COR. WATER AND CONGRESS STS.,
BOSTON.

CAPITAL, - - - - $400,000
SURPLUS, - - - - 400,000

Transacts a general Banking business. Receives the accounts of Banks, Bankers and others. Draws Foreign Exchange and makes Cable Transfers in Europe and Telegraphic Transfers of money throughout the United States. Buys and sells Government and other Investment Securities, and executes any business for its Correspondents in the line of Banking.

ASA P. POTTER, PRESIDENT.
J. J. EDDY, CASHIER.
J. W. WORK, ASS'T CASHIER.

J. R. LEESON & CO.,
LINEN THREAD IMPORTERS.
Selling Agents in U. S. A. for FINLAYSON, BOUSFIELD & CO., Johnstone, Scotland; and THE FLAX MILLS, Grafton, Mass.
298 DEVONSHIRE STREET, - - BOSTON.

The only Prize Medal of the London Exhibition, 1851; at Northampton Exhibition of Leather Work, 1873; at Cincinnati Exposition, 1879-'80; The Gold Medal Leather Exhibition at Frankfort-on-Main, Germany, 1881, etc., etc. Adopted by every machine on exhibition at New England Manufacturers' and Mechanics' Institute Fair, 1881 (Boston), to show the quality of work the machines would do. Did not exhibit at Paris, Philadelphia, or Charitable Mechanics' Fair, Boston, 1881.

JOHN P. SQUIRE & CO.,
Packers of
PORK, LARD, HAMS,
AND MANUFACTURERS OF EXTRA LARD OIL,
21, 23 & 25 FANEUIL HALL MARKET, AND 30 NORTH MARKET STREET, } BOSTON.

BRADSTREET'S

A JOURNAL OF

TRADE, FINANCE, AND PUBLIC ECONOMY.

PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 279, 281 & 283 BROADWAY, NEW YORK.

London Office, 84 Newgate Street, E. C.

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, JULY 14, 1883.

NOTES OF THE WEEK.

A great deal of hammering has been done on the stock market during the past week, and the decline of prices has been considerable. About half a dozen stocks have had to bear the brunt of the attack, the trading in the general list outside of these being quite inconsiderable. At the same time the decline has been desperately resisted by the Smith–Morgan combination, whose stocks were those over which most of the fighting was done. While New York Central has sold down to 116⅞ and Lake Shore to 107⅛, the most determined attack was made on Lackawanna, which is held very largely by Mr. Smith, and by him employed as an instrument for sustaining the market as much as possible. To weaken its influence in this direction some very large blocks were thrown in quick succession on the market Thursday afternoon, and the same tactics were repeated within a few minutes of the close of business yesterday. The price of the stock was forced down nearly 2 per cent., but the full effect of these operations is yet to be shown.

After other futile attempts to bring forth the truth regarding the defalcation in the Comptroller's office, a committee of the city aldermen has reported thereon at great length. The practical result, however, is no more than to make the darkness visible. The degree of confusion existing will be understood when it is considered that there is a wide difference of opinion as to the true amount of the stealings. The committee agrees with the Comptroller that the total loss is $148,630. But the Commissioners of Accounts, who are charged with the duty of inspecting the books of the Finance Department, report a total loss of $169,460. The daily newspapers have been energetic in demanding more light, but have done little or nothing themselves by way of illumination. Their comments abound in assertions that the conduct of the Comptroller's office is unbusiness-like; that no responsibility exists, with other like reflections. The simple truth is that no real and immediate responsibility has existed in relation to the management of New York city's finances since before the majority of these papers were started. The only thing which has prevented the direction of the city's affairs from breaking down at the treasury, time and again, is the fact that the city officials have had back of them the usually unfailing bank of public credit.

New York city has not had an intelligent balance-sheet struck for fifty years. The loan market has been, and continues to be, the primary resort for funds. This system finds its logical outcome in the situation of to-day, when the city is, say, three-quarters of a year behindhand in its current expenditures. Through the vicious system of issuing revenue bonds by way of anticipating the current tax levy, the Board of Apportionment need not care much whether the tax levy equals the yearly expenditures or not. An issue of bonds in excess of the tax levy causes no comment, as the board is not supposed to make ends meet. It has been possible to renew the city's promises at will. Given such conditions, is it surprising that great carelessness and confusion should exist in the direction of the city's affairs; that Ed. Gale should have been able for a period of years to collect delinquent personal taxes and pocket the proceeds; that one Carroll should have been able to sell uncanceled coupons at pleasure, only to be discovered after his death, and that in general, owing to the plethora of cash which comes from the free use of public credit, the proceeds of taxes are not needed to an extent which makes the loss of a good part of them a serious inconvenience? The exposure of the Carroll frauds compels for a time a spirit of inquiry; but so long as a loose credit system, which is the prime cause, remains like stealing may, as a matter of course, be expected in the future.

It was not, of course, to be expected that the Republican State Convention in Pennsylvania should sound any uncertain note upon the tariff issue. Accordingly it will occasion no surprise that the members of the convention "unqualifiedly approve and demand the continuance of that system of protection to home industry which has proved itself to be the basis of national independence, the incentive to industrial skill and development, and the guarantee of a just and adequate scale of wages for labor," and that they "denounce all attempts to reduce the rates of the tariff below the level which will accomplish these objects." In this declaration the Pennsylvania Republicans take up unequivocally the extreme protectionist side of the issue. In order to do away with any inconvenient plethora in the public treasury arising from a redundant revenue, the convention advocates the adoption of Mr. Wharton Barker's scheme for the distribution of the surplus among the several states. The only recommendation in favor of this project, of course, is that it will effectually prevent any reduction of duties. We have heretofore pointed out that the scheme cannot be supported on grounds of economy, and that its adoption will open a wide field for extravagant expenditure.

Civil-service examinations have been held at Washington during the week for the purpose of creating a list of eligible persons from which vacancies hereafter occurring in executive departments are to be filled. The board of local examiners to be appointed is to consist of two persons each from the Treasury, Interior and Post Office departments, and one each from the departments of Justice, State, War and the Navy. Three members of this board will act with the commission in each examination. Examinations are to be made by means of printed questions, to which replies are to be made in writing. Applicants who have submitted papers are to be informed by letter of their standing as soon as their papers can be passed upon. The departmental service at Washington appears to retain its attractions for persons seeking employment, about three hundred applications for positions having been placed on file by the commission. Notwithstanding the smallness of the appropriation made for the support of the commission, it is believed to be sufficient to meet all immediate demands.

The light in which a large class of the officeholders view the operations of the Civil Service Commission is seen in a letter recently addressed by a postmaster of a leading city to the Postmaster-General, in which the former complained that the Civil Service Commissioners were communicating directly with the members of the local examining board, who were employés in his office. This practice was, he thought, detrimental to the discipline of his office and contrary to the custom which required official communications to go first to the head of the department. The reply of the Postmaster-General would seem to indicate that he is not in sympathy with any attempts to embarrass the work of the commission. Postmaster-General Gresham in reply said that, while the employés referred to were subordinates of the postmaster in an official sense, yet in respect of the duties devolved upon them by the civil-service law and rules as members of the local board of examiners they were, and should be, independent of any authority save that created and conferred by the law. He added that the very object and spirit of the law required that they should be entirely free from any supervision or interference on the part of the head of the office in matters relating to their civil service duties; and that, in this view of the case, he thought it entirely proper that the Civil Service Commission should communicate directly with them in matters relating to their duties as members of the board.

Our correspondent at Winnipeg, Manitoba, sets forth elsewhere the progress of that region of country to the present year. In the customary manner the speculation consequent upon the rapid advance of the country was overdone, and this year a severe reaction has come. Wages have declined, and as a relief the surplus people are compelled to seek a living by tilling the soil. Happily, the demand for farm labor is apparently sufficient to absorb the surplus of the town. Our corrrespondent is touched with the enthusiasm of the country, and is evidently prepared to welcome any number of people from overcrowded Europe.

M. Challemel-Lacour, the French Minister of Foreign Affairs, in a recent speech in the Chamber of Deputies made a statement of the position of France with regard to matters in Tonquin. He said that in his opinion the French force in Tonquin was sufficient for any opposition it was likely to encounter, but that in the event of unexpected difficulties during the parliamentary recess the government would immediately convoke the Chambers. France, he said, would occupy only the Tonquin Delta; she had no intention of conquering Annam. The reports of Chinese aggression he declared to be unfounded; he felt able to state that pacific relations would be maintained with China. France's policy, he said, was to insure respect for her treaties. China had at first objected to the occupation of Tonquin, but after the Hanoi affair she recognized France's right to chastise Tuduc. But even China's objections would not stop the course of France, who was powerful enough to execute her projects in regard to Tonquin without waging war on China. France, he said, demanded that China should not embarrass her action. She proposed subsequently to conclude a convention with China with the view of insuring respect for their respective frontiers, but if China, contrary to indications, should follow disastrous advice, the interests of the country would be energetically defended.

THE WHEAT CROP.

As pointed out in BRADSTREET'S preliminary report on the wheat crop of the United States for 1883, last Saturday, the past week has been one of critical importance to the growing plant in several localities in the wheat belt, but principally in the northwest. The celebrated Red river valley, in northern Minnesota and Dakota, has suffered from a prolonged drouth, and a practical failure of the growing crop in that region was confidently predicted in the event of a longer continuance of the dry spell. There have also been very contradictory reports from Wisconsin, Nebraska, Iowa, and from other portions of Minnesota and Dakota than those just mentioned. Comprehensive and reliable information from the northern Dakota and Minnesota wheat regions is somewhat difficult to obtain quickly, but the subjoined telegrams to BRADSTREET'S are from residents of the towns named, who, with unusual facilities to gain information, have taken exceptional pains to convey in brief compass the situation throughout the entire region tributary. The result shows that needed rains have fallen. While the exact extent and duration of the rain there remain undetermined, the fact is made clear that there has been a radical change for the better. Our telegram from Minneapolis, from an unusually well-informed correspondent, was dated late Thursday afternoon, and foreshadows the result in case the then threatening rain failed to fall. It is especially valuable in that, while the worst seemed at hand, it gauges the outcome in either event. The following special telegrams to BRADSTREET'S, in most cases representing the substance of exhaustive inquiry throughout a large region, were filed at the telegraph offices on Thursday evening:

From Watertown, Dak.: Wheat doing excellently; never better. The weather is favorable for the crops, with plenty of rain.

From Fargo, Dak.: Wheat has suffered for rain, but the recent showers have insured at least two-thirds of a crop.

From Grand Forks, Dak.: The prospect is a little better for a fair crop. Have had rain in some sections. The wheat looks better on the high lands than on the low. It is heading out well. The straw is short but looks healthy. Think we shall have nearly as good a crop as last year.

From Milwaukee, Wis.: Crop reports from the northwest, including the entire spring-wheat territory of Wisconsin, Iowa, Minnesota, Nebraska and Dakota, are as favorable as could be expected. Iowa especially is favorable, and throughout Wisconsin hardly less so. Good authorities estimate this state 4,000,000 bushels larger than in 1882. Minnesota reports are somewhat mixed, but generally favorable, except from low grounds. Nebraska reports some blight, but nothing serious. The crop along lines of the St. Paul railroad look well, Dakota included. The northern part of Dakota, however, complains of drouth, having had no rain for upwards of one month.

From Pembina, Man.: A glorious rain to-day. The crop is not materially damaged here; 15 per cent. will cover it.

From Breckenridge, Minn.: The prospect for wheat is fair. The weather is dry. Heading will average about twelve bushels per acre. The plant has improved greatly during the last five days.

From Minneapolis, Minn.: The condition of the growing wheat in northern Minnesota and Dakota is less favorable than last week. Little or no rain has fallen in that locality for nearly a month, and there is no prospect of over one-half or two-thirds crop. Unless rain falls immediately wheat on the rolling land will be a failure. Southern and central Minnesota and Dakota were visited by a copious rain on Friday and Saturday, which put the crop in that section in good shape, and the yield promises to be the largest for some years. The aggregate crop for Minnesota and Dakota, however, will not come up to the average from present appearances. A little rain was reported in the north this morning, and the weather there is thick and cloudy this evening, with strong indications of rain.

From Mount Vernon, Ohio: Wheat about three-fifths of last year; somewhat affected with rust; one-half in shock. The weather is fine. All other crops will yield more than an average.

From Circleville, Ohio: Good weather for harvesting. The crop is estimated at two-thirds. Corn prospect excellent.

From Pekin, Ill.: The weather is fine. Wheat is in better condition than last year at corresponding time. The outlook is very favorable.

From Evansville, Ind.: The crops are looking well. The weather is favorable. Wheat threshing has begun, and an average crop is predicted.

From New Castle, Ind.: The past ten days have lessened the prospects 50 per cent. Rust and premature drying up.

From Lawrence, Kan.: The wheat harvest has about finished, with excellent crops.

No more striking evidence can be gathered of the change for the better in the northwest than by a comparison of the following dispatches received by BRADSTREET'S from S. W. Tallmadge, Milwaukee. On Friday, July 6, that gentleman's advices were: "Spring wheat in Wisconsin, Minnesota, Iowa and Dakota promises a fair yield, but it has yet to pass a critical period. Dakota reports a heavy growth of straw, which generally proves disappointing in yield." Yesterday word came by wire that "Wisconsin, Iowa and Minnesota report favorably for the spring wheat crop. Dakota to-night reports heavy rains throughout the territory, with prospects improved." From Columbus, Ohio, W. J. Chamberlain, secretary of the State Agricultural Bureau, wires us as follows: "Wheat is half in shock; the weather is showery but no damage has been done to wheat from the rain yet. Shocks stand very thin on the ground. The total product in Ohio is not over 55 per cent. of last year. Corn is weedy from wet weather but is now improving. The prospect is for 70 per cent. of a full crop. Oats and hay excellent."

There is, therefore, no evidence yet at hand upon which BRADSTREET'S would feel warranted in materially changing the figures of the preliminary estimate of the yield of wheat in 1883, published June 7.

THE ENGLISH BANKRUPTCY BILL.

The bankrupt bill, which had been under consideration for some time by the Grand Committee on Trade, was reported to the House of Commons the last week in June. The *Pall Mall Gazette* speaks of the result as "a very difficult piece of work efficiently done." The measure is very long and complicated, containing some hundred and fifty clauses, with more than one of these having numerous sub-sections. Mr. G. J. Goschen was chairman of the Grand Committee on Trade. Mr. Chamberlain, the author of the bill, is reported as saying that the measure has been greatly improved and amended for the better. A bill of so great length cannot be anything less than an attempt at minute direction as regards the disposal of a bankrupt's estate. The avowed object of the framers of the bill was to provide in future for the due collection, custody and distribution of the assets, so that as much as possible should reach the general creditors. It is admitted that in the past the estates of English bankrupts have been so appropriated and wasted that little or nothing reached the general creditors in the shape of dividends. Our London exchanges give us a fairly clear idea of the action of the committee as to this central point. It appears that whenever a question arose between the general estate and some privileged claimant the general decision of the committee was against the estate and in favor of the privilege. Thus the bill originally proposed to abolish the priorities hitherto given to the landlord's claim for rent, the queen's claim for taxes and the claims of local authorities for rates, but the committee restored all these priorities. It was attempted to do away with marriage settlements as a means of withdrawing estates from the just claims of creditors, but the committee has left the advantage against the creditors. As regards the case of "secured creditors," the outcome is no better, as here the perfected bill rather favors the preferred creditors. The *Pall Mall Gazette* characterizes the action of the committee on those points as "the steady leaning of an unusually fair and competent body of men in favor of special and particular as opposed to more general interests." Our contemporary finds the proximate cause of this to be the deeplying tendency of human nature "to be far more moved by a single concrete case of hardship or injustice than by a large number of such cases included under some general term." The *Gazette* adds: "The imagination of ordinary men takes in the one; it can make nothing of the other. The landlord defrauded of his rent; the collector calling in vain for his rates; the wife and children sitting destitute in the ruined home; the father who finds his daughter a pauper when he expected her to be a millionaire; the local banker deprived of his account; the mortgagee puzzled how best to realize his security—these all appeal, as it were, in vivid pictures to the imagination and the feelings, while the general creditor—who is less able to protect himself than any of these, and who is very likely much more to be pitied than any of them—loses shape and outline and reality under the haze of an abstract term. If this is so, it suggests a serious lesson both to philosophers and statesmen. It shows us how it is that vested interests flourish—by what sort of weapons they can best be attacked. It explains how things obviously contrary to the general weal continue to exist in spite of reason and proof; and how fallacies such as that of protection prevail with mankind."

Whether the perfected bill passes Parliament or not the work of the committee cannot fail to be full of instruction and example for the men of business in the United States who are endeavoring to induce Congress to pass a general bankrupt law. It does not appear that much real headway has yet been made. Word comes, however, that at some western points the local prejudice against a general law has been sensibly lessening. This being true, the opposition in Congress should be less difficult to overcome. One thing is certain, however, if the men of brains who are engaged in urging the matter upon the attention of Congress wish to insure success they must make their propagandizing far more systematic and far-reaching.

NEW YORK CITY AND THE RAILROADS.

A Baltimore paper publishes a long interview with Mr. Garrett, of the Baltimore & Ohio Railroad, in which that gentleman replies on behalf of the company to the criticisms made by some prominent Baltimoreans upon the policy of the company in endeavoring to secure an independent line to New York city. The criticisms referred to have been to the effect that the construction of the Philadelphia branch of the Baltimore & Ohio would lead to the weakening of the company's position in maintaining the claim to differential rates in favor of Baltimore as against Philadelphia and New York, and further, that upon the completion of such a line it would be to the interest of the railroad company to ignore the traffic of the city of Baltimore in order to gain traffic to Philadelphia and New York. In answer to these suggestions, Mr. Garrett urges some considerations of much weight. He says at the outset that a railroad company is not likely to sacrifice the traffic of a city of which it gets the major part for the traffic of another city which it must divide with three or four other lines. The apprehension that the securing an independent line to New York will deprive Baltimore of the advantage secured to it by the present differential rates in its favor, he pronounces entirely groundless. The Baltimore & Ohio Railroad Company, he says, has sacrificed a vast amount of revenue in the wars of rates in order to establish the principle that distance from the seaboard should have a determining effect in fixing the rate to be charged for the transportation of freight, and to maintain its right to carry to and from Baltimore at a less rate than the New York lines carried to and from New York city. No reason, he says, has been suggested for imagining that the company, after having spent millions in the rate wars to maintain a principle, should, when it has secured an independent outlet to New York, give up the principle of differential rates in favor of Baltimore, where its chief traffic lies, in order to transport traffic to New York over its Philadelphia line for nothing. On the contrary, the possession of that line would strengthen its position so that it would be the better able to protect itself in the wars of rates which may be waged in the future.

In the next place Mr. Garrett points out that the merchants of Baltimore will not reap any benefit from the Baltimore & Ohio Company refusing to take traffic from St. Louis or Cincinnati or any other western city to New York. If the Baltimore & Ohio decline to transport the freight intended for the great cities of the seaboard the other lines whose chief interests center in Philadelphia and New York will be enriched while the Baltimore & Ohio will be the loser; but in what way, he asks, does the city of Baltimore gain by the Baltimore & Ohio becoming the loser of the revenue derived from such traffic. The Pennsylvania Company, Mr. Garrett continues, maintains differential rates in favor of Philadelphia, although it has its line to New York, and yet no one can truthfully say that the city of Philadelphia has been injured by the Pennsylvania Company acquiring a New York connection and improving the facilities for communication between the two cities. In addition to this the fact is referred to that Baltimore is becoming more and more a manufacturing city. With liberal action on the part of the city there is no reason why its manufacturing interests should not be largely increased in importance. This, however, would necessitate on the part of the city the reaching out for trade relations with all parts of the country. It seems not a little singular, to say the least, that Mr. Garrett should have found it necessary to defend publicly the policy of his company. The action of the Baltimore & Ohio Railroad is simply a practical recognition of the existence of New York and of its importance as being the commercial metropolis of the

country. As is clearly perceived by the managers of the company, no railroad can achieve or maintain a commanding position among its competitors without having an independent connection with New York. A fresh indication that the importance of the latter city is by no means on the wane (as has been sometimes supposed) is furnished by the fact that the Pennsylvania Railroad Company is contemplating a line which will shorten the distance over its route from Chicago to New York by about seventy miles, leaving Philadelphia on the south.

COMMERCIAL TREATIES OF THE UNITED STATES.

The United States has recently been at great expense in sending a war vessel from one of the South American ports to the Panama isthmus to carry a prisoner, for the reason that the fact that an extradition treaty existed with the country was overlooked. It was subsequently found in a pigeon-hole at the State Department. There is, probably, less general public information as to our treaty relations than as to any other subject of general interest.

The United States has some three hundred treaties with foreign countries. The first treaty was one of amity and commerce with France, negotiated, prior to the organization under the Constitution, on February 6, 1778. The last treaty is one just ratified with Corea.

Treaties have been negotiated as follows: Prior to the organization under the Constitution, 1778 to March 4, 1789, 17; President Washington's administration, April 30, 1789 to March 4, 1797, 6; President Adams' administration, March 4, 1797, to March 4, 1801, 4; President Jefferson's administration, March 4, 1801, to March 4, 1809, 6; President Madison's administration, March 4, 1809, to March 4, 1817, 6; President Monroe's administration, March 4, 1817, to March 4, 1825, 12; President John Quincy Adams' administration, March 4, 1825, to March 4, 1829, 13; President Jackson's administration, March 4, 1829, to March 4, 1837, 19; President Van Buren's administration, March 4, 1837, to March 4, 1841, 10; President Tyler's administration, April 4, 1841, to March 4, 1845, 8; President Polk's administration, March 4, 1845, to March 4, 1849, 15; President Taylor's administration, March 4, 1849, to July 9, 1850, 5; President Filmore's administration, July 9, 1850, to March 4, 1853, 11; President Pierce's administration, March 4, 1853, to March 4, 1857, 25; President Buchanan's administration, March 4, 1857, to March 4, 1861, 18; President Lincoln's administration, March 4, 1861, to April 15, 1865, 18; President Johnson's administration, April 15, 1865, to March 4, 1869, 25; President Grant's administration, 36. From Presi-Hayes' administration until now the number of treaties negotiated is about 20.

The United States now has treaties with each one of the following countries, and with some of the countries named it has a great many—the number of treaties with Great Britain, for instance, exceeds 40: Algiers, Argentine Confederation, Austria and Austria-Hungary, Baden, Bavaria, Belgium, Bolivia, Borneo, Brazil, Bremen, Brunswick and Luneburg; Central America, Chili, China, Colombia, Republic of United States of Colombia, Costa Rica, Denmark, Dominican Republic, Ecuador, France, German Empire, Great Britain, Greece, Guatemala, Hanover, Hanseatic Republics, Hawaiian Islands, Hayti, Hesse, Honduras, Italy, Japan, Lew Chew, Liberia, Madagascar, Mecklenburg-Schwerin, Mecklenberg-Strelitz, Mexico, Morocco, Muscat, Nassau, Netherlands, New Granada, Nicaragua, North German Union, Oldenburg, Orange Free State, Ottoman Empire, Paraguay, Persia, Peru, Bolivia, Portugal, Prussia, Russia, San Salvador, Sardinia, Saxony, Schaumburg-Lippe, Siam, Spain, Sweden, Norway, Swiss Confederation, Tripoli, Tunis, Two Sicilies, Venezuela, Wurtemberg, Cairo and Samoan Islands.

These treaties relate to a great variety of subjects. The features which have the greatest commercial interest are the reciprocal and commercial agreements. An analysis of this vast mass of treaties, which covers some 1,500 printed pages, shows that the following general commercial principles are established between the United States and various countries:

All favors in navigation or commerce which have been or shall be granted by one party to any other nation shall immediately be common to the other party, if granted for compensation, on yielding the same compensation. These agreements exists between the United States and the following countries: Argentine Confederation, Belgium, Costa Rica, Bolivia, Hawaiian Islands, Hayti, Honduras, Liberia, Mexico, Muscat, Nicaragua, Paraguay, Italy, Belgium, Peru and San Salvador.

The coasting trade of each party is exempted from the operations of all reciprocal agreements, and as to Great Britain there is a concession as to trade via Canada, where the carriage is partly by land transit. This provision applies to the following countries:

Austria, Bolivia, Colombia (New Grenada), Costa Rica, Denmark, Dominican Republic, Greece, Hawaiian Islands, Hayti, Honduras, Italy, Mecklenburg-Schwerin, Oldenburg, Mexico, Netherlands, Nicaragua, Prussia, Portugal, Russia, Sardinia, Sweden and Norway, Peru and San Salvador.

Whatever may be imported or exported in national vessels may be imported or exported in vessels of the other party. This provision is contained in the treaties with the following countries:

Austria, Bolivia, Colombia (New Grenada), Denmark, Dominican Republic, Ecuador, Greece, Hanseatic Republics, Hayti, Italy, Mecklenburg-Schwerin, Oldenburg, Portugal, Prussia, Russia, Sardinia, Sweden and Norway, Peru and San Salvador.

The following provisions are contained in our commercial treaties with nearly every country:

Each party shall have free access to all the ports of the other which are open to foreign countries; articles the growth, produce or manufacture of one party, imported in its own vessels to the ports of the other party, are subject to the same duties as if imported in the vessels of the other party; articles the growth, produce or manufacture of the one party, imported into the territories of the other, are to be subject to no other or higher duties than those imposed on like articles of any other foreign country; no higher duty or charge shall be imposed by one party on exports to the other than is imposed on exports of like articles to any other foreign country; prohibition of exports or imports of articles the growth, produce or manufacture of one party in the territories of the other party shall extend to like articles of all other nations; duties or charges on imports are to be the same, whether made in the vessels of one party or of the other.

Vessels of each party, in the ports of the other party, are to be on the same footing as national vessels with respect to dues, charges, or allowances, in the following cases:

Anchorage. Two Sicilies and Belgium.

Average. Argentine Confederation.

Brokerage. Belgium.

Buoys. Belgium.

Clearance. Belgium.

Drawbacks and bounties. Argentine Confederation, Austria, Bolivia, Colombia (New Grenada), Costa Rica, Denmark, Dominican Republic, Ecuador, Great Britain, Greece, Hanseatic Republics, Hawaiian Islands, Hayti, Honduras, Italy, Mecklenburg-Schwerin, Mexico, Netherlands, Portugal, Two Sicilies and Belgium.

Harbor. Argentine Confederation, Costa Rica, Hawaiian Islands, Honduras, Mexico, Netherlands, Nicaragua, Paraguay and Peru.

Lighthouse. Argentine Confederation, Austria, Costa Rica, Greece, Hawaiian Islands, Honduras, Mexico, Netherlands, Nicaragua, Paraguay, Portugal, Prussia, Sardinia, Sweden and Norway, Two Sicilies, Belgium and Peru.

Local charges. Argentine Confederation, Austria, Costa Rica, Greece, Honduras, Mexico, Nicaragua, Paraguay, Portugal, Prussia, Sardinia, Sweden and Norway, Two Sicilies, Belgium and Peru.

Pilotage. Argentine Confederation, Austria, Costa Rica, Greece, Hawaiian Islands, Honduras, Mexico, Netherlands, Nicaragua, Paraguay, Portugal, Prussia, Sardinia, Sweden and Norway, Two Sicilies, Belgium and Peru.

Port dues. Austria, Bolivia, Dominican Republic, Greece, Netherlands, Portugal, Prussia, Sardinia, Sweden and Norway, and Two Sicilies.

Quarantine. Hawaiian Islands, Netherlands, Two Sicilies and Peru.

Salvage. Argentine Confederation, Costa Rica, Germany, Greece, Honduras, Mecklenburg-Schwerin, Oldenburg, Mexico, Netherlands, Nicaragua, Paraguay, Prussia, Sardinia and Peru.

Tonnage. Argentine Confederation, Austria, Bolivia, Colombia (New Grenada), Costa Rica, Dominican Republic, Ecuador, Greece, Hanseatic Republics, Hawaiian Islands, Honduras, Italy, Liberia, Mecklenburg-Schwerin, Oldenburg, Mexico, Netherlands, Nicaragua, Paraguay, Portugal, Prussia, Russia, Sardinia, Sweden and Norway, Two Sicilies, Belgium and Peru.

Warehouse (to be confined to watch and storage). Belgium.

Wrecks. Austria, Argentine Confederation, Bolivia, Colombia (New Grenada), Dominican Republic, Ecuador, Germany, Greece, Hawaiian Islands, Hayti, Mecklenburg-Schwerin, Oldenburg, Mexico, Spain, Sweden and Norway, Two Sicilies, Belgium, Peru and San Salvador.

The foregoing are some of the general reciprocal agreements as to commerce secured by the mass of the treaties. The subjects covered by treaties are very numerous and affect American citizens in very many relations.

One question which has been discussed since the foundation of the government is the right of the Senate, as the treaty-making power, to legislate on tariff questions. The Senate has always maintained and exercised that right. As the popular branch of the national legislature gets stronger, it seems more disposed to deny that. The subject promises to be an active one in the next Congress in connection with the discussion of the proposed treaty with Mexico.

Claims between citizens of different governments are settled by treaty. There are several treaty commissions now in session in Washington. The vast question of citizenship and of personal protection of the citizens of one country in foreign territory is in great measure dependent upon treaties.

The treaty questions that arise between nations in the event of wars are very complicated and occupy a large space in our treaty correspondence. Commerce has secured great advantage by treaties. Several commercial treaties are now under consideration by our government.

THE OIL-CLOTH TRADES.

The oil-cloth business extends into several leading branches with special descriptions of makes, the buyers for which are found respectively among carpet and dry goods houses, carriage makers and upholsterers. The manufacture, a modern one, assimilates in one respect to primitive industries in that although machinery, much of it costly, is employed, a large amount of hand labor is called into requisition in the various processes. The progress made has been in the direction of producing more elastic material with variety of patterns, for which there is the widest artistic scope, even Persian rugs, which defy imitation by the loom, being reproduced. The trade with upholsterers is in dark patterns—imitations of leather and semblances of valuable woods, also veined marbles.

Floor-cloths constitute the bulk of the trade. The manufacture of these cloths commenced in Maine forty-five years ago, at a time when goods made here and in England were of a heavy character, liable to lose consistence under extreme heat and to crack in the cold of winter. Improvements, however, came apace. Maine continues to furnish the largest supply of any state of the Union, being followed by New York and New Jersey. The pioneers of the trade in this section, but who no longer figure in it, were John Jewett & Son, who established in 1850 extensive works at Elizabethtown, N. J., Albro & Hoyt and Edward Harvey, of New York city. At that time England had commenced the production of fine and extremely flexible table goods in various designs, chiefly imitative of valuable woods, and in this line our manufacturers followed.

The progress of the business of manufacture may be judged of by the fact that there are now between forty and fifty designers of oil-cloth patterns in New York city alone. A constant succession of designs is called for. Interior decoration has been carried to a point which necessitates even in oil-cloths harmonizing or contrasting effects such as will please the taste. A new wall-paper for hall or stairway, or a new pattern of carpet to be protected, will require for artistic purposes a change in floor-cloth. Even the hue and pattern of a table-cover is a matter of consideration, so that it may consort with its surroundings. The choice patterns in which oil-cloths are brought out have led to their use as dados, thus constituting another important source of demand. The patterns of floor-cloths, as a rule, are characterized by pronounced features, such as plain or involved geometrical figures, designs of the bouquet sort, trellis work with leaves or flat flowers, or

other shaped ornament half hiding other lines. As to general color and grouping care is taken to follow the fashion of carpets in some of the goods, and thus we find the ecru ground and subdued hues now so fashionable in the carpets repeated in oil floor-cloths, serving purposes for which carpets will not answer, and being superior to carpets of inferior grade, giving a special brightness to interiors, their moderate prices, attractive appearance and good wear being in their favor.

The annual wholesale value of floor oil-cloths manufactured in this country, including linoleum, may be placed at $7,000,000, and that of table-goods, which embrace all descriptions of oil-cloth consisting of enameled linen, at somewhat less than $2,000,000.

Linoleum, which consists of finely-ground cork, oxydized linseed oil and kauri gum, the latter dug up with spears by the natives of New Zealand from sandy plains where forests grew centuries ago, has been manufactured here eight or nine years, and finds sale on account of its durability as well as elasticity and comfort.

From the date of the manufacture of oil floor-cloths in this country English importations commenced steadily to decline, until now they are merely nominal, such importations as take place consisting of the finer goods, particularly such as are adapted to upholstery purposes. The high duty renders these more costly than any produced here. The importation from England of oil and floor cloth (the latter being linoleum) was in 1872 of the value of $143,000, a value that had declined by nearly one-fourth in 1882.

Carriage makers take for top linings oil-cloth closely resembling patent leather, and which answers its purpose so well that there is a prospect of a more extensive adoption in this line. The sale of table-cloths, owing to the improved styles and the more desirable nature of the goods as compared with those formerly put out, is rapidly developing. The enameling on these goods is more exquisite than ever; their borders are more elaborate, and in their extreme flexibility they rival soft woolen goods. A new departure has recently been taken in these goods, in the way not only of achieving greater fineness and suppleness, but in the pictured and figured designs, termed mosaics and brocatelles. Jobbers and country dealers rejoice in novelties, and hence these goods, so suited to their purpose and so perfect in make, are having a good run. The success that has attended the production of table and shelf goods is largely due to a liberal expenditure of money in perfecting the drying process, by which, at a high temperature, the surface ingredients are rendered chemically homogeneous, thenceforth being unaffected by any change of temperature, a circumstance which allows of their universal adoption. The three largest manufactories for the making of these and other fine goods, known to the trade as shelf goods, are in Philadelphia and Newark.

The trade in oil-cloths is distributed over the Union and some moderate shipments are made to Cuba, Mexico, the West Indies and South America. The western trade in oil-cloths increases more rapidly than that of any part of the country. Southern trade is improving just in the proportion that people have the ability to buy. Oil floor-cloths are especially adapted to the south, even for use in sitting rooms, owing to their coolness. Their suitableness for seaside cottages, as preferable to matting, makes an appreciable pressure on demand.

Jobbers lay in stock in spring and fall. The prospect is for a very large fall trade, for which due preparations have been made. There exists nothing like combination among oil-cloth manufacturers. Several efforts have been made to this end, but have not succeeded. It is to this comparative isolation that jobbers attribute the low prices ruling, but under any circumstances the profits of former days are no longer to be looked for. The business follows the course of other industries, progressive economy in manufacture and enlargement of the product necessitating cheaper goods in order to excite and maintain the expanding demand.

COMMERCIAL POSSIBILITIES OF ALASKA.

Our Alaskan possessions, which constitute about one-fifth of the whole territory of the United States, are inhabited by 33,426 people, of whom only 430 are white. It will probably surprise a good many to learn that in that region, under the dominion of the general government, there are 6,763 Thlinket and 788 Hyda! Yet the names of some of the Alaskan Indian tribes are not more unknown than are the material resources and conditions of one-fifth of the national area to the people and the legislators of the country.

It was the theory of Mr. Seward, through whose influence the purchase of Alaska was made, that the contests of the future are to be around the shores of the Pacific seas; that the nation of the future is the nation that holds the key to these western waters; that the purchase of Alaska would give our republic a foothold on both sides of that sea. It is a geographical impossibility that any other nation can occupy a position in its own territory upon both sides of the Pacific. For this the United States paid $7,000,000. The purchase has not proved to be a bad investment. To the 30th of last June the United States had received in revenues from that country $3,609,170, mainly from the Alaska Fur Seal Company. The contract with that company continues for some years. It is easy to see that the United States will soon have an equivalent for its purchase money.

Aside from this fact the government knows little about its new possession. It has neither made surveys of the unknown land nor provided a government for any portion of the territory. The little strip of land which stretches from the Vancouver Islands, 30 miles in width, to Mount St. Elias, bounded on the one side by British Columbia and on the other by the ocean, with the two islands from which the Alaska Fur Seal Company takes its seals, are the only portions of this vast domain of which the United States has any practical knowledge.

The government, after having made its purchase, did not look at its bargain. The territory is practically undefended and abandoned. The income which the government receives is sufficient to pay a large percentage on the original purchase. Yet there is no organized government, and there is no protection by the courts. The provision of the revenue laws, that suits may be brought in the United States courts in California and Washington Territory, is grossly inadequate. Recent decisions have cast doubt upon the authority even of these courts to take jurisdiction of certain cases in that remote quarter. The dealings of the government in this territory are without precedent. Alaska is not even a territory, although called so for convenience of nomenclature. Congress has refused, perhaps wisely, to organize Alaska into a territory. At most this vast domain is a Treasury collection district. Two departments of the government, the Treasury and the Navy, have had some conflict of jurisdiction as to their respective authority. The Treasury has a revenue cutter there, and the Navy Department has stationed there what is called a war vessel. Yet neither department is anxious to assume responsibility for the conduct of affairs. Both, in fact, wish to be relieved of the burden. Yet no one makes any question that the people of this region are as much entitled to protection as the citizens of any part of the United States. This is not only a duty which the government owes alike to all its citizens, but it is one of the stipulations of the treaty of cession. The treaty provides that the people "shall be protected in the enjoyment of their liberty, property and religion." National honor and good faith are involved in this. The best information is that the resources of Alaska are of more importance than the country at first was led to believe. One of the latest communications to Congress upon this subject was from General Raum, Commissioner of Internal Revenue. His report is based upon detailed information from the collector there. He says: "The forests and fisheries are of vast importance and value. The deposits of precious metals are believed to be large and are already attracting many enterprising miners. The seal fisheries are the greatest in the world, and the fur product, from the sea otter and other fur-bearing animals, is large and valuable. The revenues of the government since the purchase of Alaska from the rental of the seal fisheries and from other sources in that territory, to June 30, 1882, amount to $3,609,170, which has been collected at an expense of $429,818, being a net revenue of $3,179,352.

"In my opinion some simple form of government for the territory of Alaska should, as soon as practicable, be devised and enacted by Congress, wherein provision should be made for the full enforcement of the internal revenue as well as other laws of the United States in a regular and orderly manner."

From other sources the information comes that, aside from the fisheries, there are unquestionably mineral deposits of value. Gold and silver have already been found. How extensive or how important these deposits may prove to be can only be determined by investigation. The most enthusiastic on this subject—among them some of the government agents—say that placer mining will already pay, and that there are inviting fields for the quartz mills. Gouvernor Morris, one of the government agents, pictures the the country as a *New Eldorado*. His reports have generally been considered too enthusiastic. Pioneers in search of gold have, in some instances, been turned back by the Indians.

The rapid destruction of American forests is a subject which is attracting the attention of our economists. Some startling figures upon this subject were submitted to the people in the recent discussion of the tariff bill in Congress. All authorities agree that Alaska could furnish timber for the world. Norway pine, spruce, hemlock and cedar predominate. Possibly the eyes of our great lumber barons will be turned to Alaska when the forests of the northwest and the Rockies shall have disappeared before the rapidly advancing and ruthless ax of the pioneer.

The most valuable wood of the coast is the yellow cedar peculiar to that country. It closely resembles hickory. It is recommended for ship-building, and the forests of Maine and the south will soon be denuded of their ship timber. This wood is also susceptible of a high polish, and is adapted to fine furniture. William H. Seward was so much impressed with it that he had book-cases made of it and his library paneled with it. Moths are said to shun it more than they do camphor. These vast tracts of timber lands are not in the market. They are part of the public domain of the United States which has not yet been surveyed. The Public Lands Commission recommended that the government make a survey by competent persons, and considered that the timber resources of Alaska would be likely to prove a source of great wealth.

Alaska has an area of 577,390 square miles, estimated to be 369,529,600 acres. This is all subject to the control of Congress, except certain grants made by the Russian government. The land laws of the United States have not yet extended over Alaska, nor have any of the lands been surveyed. Probably one of the next steps of the speculators will be to urge upon Congress that these lands may be surveyed. Undoubtedly there are great fortunes for those who first obtain a valid title to the vast tracts of timber which are immediately accessible to the ocean. Navigation to San Francisco, or to the western terminus of the Northern Pacific road, is easy. The exact cost to the United States of the territory of Alaska was $1^{19}/_{20}$c. per acre.

The Public Lands Commission, from what information they could obtain as to the mineral wealth of Alaska, said: "The unorganized territory of Alaska in the future may form no unimportant portion of our precious-metal-bearing country." There has as yet been no legislation with respect to private land claims in Alaska.

The wealth of Alaska in fur seals it is almost unnecessary to mention. The vast business of the Alaska Commercial Company and its profits are a sufficient answer to any inquiries on that subject. The present limit to the number of skins which this company is allowed to take from the St. George and St. Paul islands is 100,000 annually. The value of these skins when dressed is probably not far from $20 each. The company is required to pay each year to the United States $55,000 for the lease, $2 upon each seal skin, and 55 cents per gallon for each gallon of oil. The company allows the catchers about 40 cents for each sound skin captured. For damaged skins they give them 20 cents, and for sea lion skins 60 cents. There are said to be large quantities of valuable marble in the territory. Pioneers are believed to have withheld information as to many of the resources in order that when the public lands shall be opened to settlement they will have the "first chance" for good locations. The fisheries are believed to be inexhaustible.

The subject of some form of government has been brought before many congresses. It will, unquestionably, be presented to the coming Congress with renewed earnestness. There are those who believe that the Alaska Fur Company is an incubus on the country. Opinions greatly differ on this subject. However, the lease of this company will expire within a few years, and it is very probable that no administration will be willing to renew it. Then at least it will be necessary for Congress to do something to discharge its obligations with regard to this unexplored country. Meanwhile, the interests of the people there, and the demands of commerce, require that some form of government and some method of administering justice shall be established. Congress will need to be very judicious, however, in this matter. It will not do to forget that the population is not like that of our territories. Ivan Petroff, the government agent who furnished the census material for Alaska, says of some of the natives: "Of the nature of a constitutional government and our republican institutions they are profoundly ignorant, and at any time would obey a mandate of the Emperor of Russia, transmitted through the priesthood, before paying any attention to the laws of the United States. In their churches, supported at the expense of the Imperial government now as they were previous to the purchase, the Russian priests pray for the Emporer of Russia at length before saying a few words in behalf of our President, and, while the sympathy aroused by the news of Alexander's assassination was universal and heartfelt, the subsequent announcement of the shooting and death of President Garfield excited but little comment or interest."

OCCASIONAL NOTES.

Professor G. Brown Goode, of the United States National Museum, recently gave the Fishery Congress at South Kensington an interesting account of the growth of the fishing industries of the United States. He said that but little progress had been made in this and the allied industries until after the war of the rebellion, since which time (especially within the last decade) the fisheries have increased in extent and value at an unprecedented rate. Professor Goode's statement of the present position of the industry was very striking, and must have been in a high degree interesting to his audience. He said that great freezing houses have been built on the great lakes, on the Pacific coast and in the cities of the east; that refrigerator cars are running on all the trunk lines of railway, and carry unfrozen fish from sea and lake inland, and that Columbia salmon, lake whitefish, cod, bass, Spanish mackerel and other choice fishes are frozen stiff and packed up in heaps like cordwood, and can be had at any season of the year. Smelts and trout, packed in snow in the north, he said, are received in New York by the car-load daily throughout the winter. Halibut are brought from the distant oceanic banks in refrigerators built in the holds of vessels, and 12,000,000 to 14,000,000 pounds are distributed, packed in ice, to the cities of the interior. Tinned fish, especially salmon, lobsters and sardines and mackerel are extensively consumed, and value to at least $3,000,000 is annually exported. In 1880, 2,153,000 salmon were received by the establishments of the Pacific slope, and were packed in 31,453,000 one-pound cans, worth at the the factories $3,255,000. "Sardines" to the value of $825,000 were packed in Maine, these being simply young herrings, mostly in cottonseed oil of domestic manufacture; 4,178,000 pound-cans of lobsters were also packed in the factories owned by Maine and Massachusetts.

The lecturer described the various devices for sea, river and lake fishing as exhibited in the American section, and showed that a remarkable degree of perfection had been attained in every branch of the industry, especially in the propagation and acclimatization of useful fishes. The different varieties of fishes of the United States waters are estimated by Professor Goode at 1,400, of which 300 have a recognized economic value. The forty-seven recognized fishing industries of the country were divided by him into four general classes; 1

ocean fisheries, conducted by small sea-going vessels; 2, coast fisheries, conducted chiefly from small boats; 3, river and lake fisheries which produce shad, alewife, salmon, whitefish, smelt and sturgeon; 4, strand fisheries and shore industries, including seal, turtle, terrapin, clam, quahog, abalone, moss, salt and seaweed trades. The whale fishery, it was said, has decreased in value of late years, owing to the introduction of mineral oils and over-fishing. Toward the close of the paper the aims, methods and achievements of the United States Fish Commission were set forth, and a series of diagrams, illustrating the excellent hatching and refrigerating apparatus in use in this country, were exhibited and explained. At the close of the lecture Professor Huxley, in seconding a vote of thanks to Professor Goode, said that no other country in the world had taken up the question of fish culture in so scientific a spirit and with such successful results as the United States.

Major E. Willis, of Charleston, S. C., has just published his annual circular showing the business transactions in crude and manufactured phosphates for the year ending May 31, 1883. According to this circular the amount of crude rock mined up to January 31, last, was 236,000 tons. The low prices prevailing in the early part of the year checked the mining operations of a number of companies, and, notwithstanding some improvement in the price as well as in the quality of the article, crude rock is still too low to warrant any extended outlay to increase production. One encouraging feature remarked upon by Major Willis is the regular annual increase in the use of the crude rock. The native material is said to be finding favor with manufacturers everywhere over its competing rivals, partly because its cost of production is relatively lower and partly because it is more accessible to transportation. The demand for higher grades appears to be constantly on the increase and careful preparation has become more than ever one of the vital elements of success with all engaged in the trade. The organization of a "Phosphate Exchange" for the convenience and protection of those engaged in the trade is noted with gratification by Major Willis. From statistics accompanying the circular it appears that while in 1871 the total shipments of fertilizers amounted to only 22,589 tons, in 1883, on the other hand, the shipments amounted to 130,000 tons, being 27,475 tons in excess of any previous year. The tables relating to the trade in crude phosphates show that while in 1876 the total shipments were 132,626 tons, in 1883 the total shipments amounted to 355,333 tons, being 23,256 tons in excess of the largest shipment of any previous year. Of the total shipments for this year $123,040 tons were to foreign ports and 189,673 tons were for domestic ports. The local consumption of crude phosphates for this year was slightly less than that for 1882, which was the largest from 1876 to that year.

Recent accounts from California regarding the growth of the vine are of a very satisfactory character. At the present writing it is, of course, difficult to make even an approximate estimate of the growing crop, but taking account of the increase in the acreage a considerable augmentation over last year's production is not unreasonably expected. The difficulty of arriving at an estimate of the crop is increased, says the San Francisco *Chronicle*, by the circumstance that many vineyards are now coming to maturity for the first time, while others have been plowed up and planted with foreign varieties more fitted for wine, table and raisin purposes than the native growths. Advices from the leading wine-producing districts are to the effect that the vines are in excellent condition and that the yield is likely to be the best yet had. The facilities of the wine-makers for handling a large crop have been largely increased. The expectations of an increased yield have operated in some degree to restrict transactions in native wines, though good qualities command fair prices. Freer offerings are also induced by the circumstance that the demand for vats, casks and barrels in the vineyard districts is greater than the supply, though this want will probably be remedied by the time of vintage. Great attention is being paid, it is said, to the proper preparation of the foreign species of grapes, the product of these being considered valuable not only in the making of the higher grades, but also for blending with the cheaper varieties. There has been an earnest endeavor on the part of the wine-makers to surpass the qualities of the European wines which have been so much in vogue in this country, and it is said that so far as demand at the east is concerned the result has been satisfactory. Complaint is made, however, that the wines are mostly sold under foreign labels. It is proposed to hold an exhibition at San Francisco in August, when all the California wines will be classed and the process of their manufacture elucidated by a series of addresses intended to popularize the native wines throughout the country.

Not unnaturally, a good deal of public interest has centered about the person of M. Clémenceau, who seems to be regarded as the probable successor of Gambetta in political influence in France. A discriminating estimate of his character appeared recently in the London *Daily News*, from which some points of general interest may be gathered. It seems that, while Clémenceau is regarded as a revolutionist in England, in some quarters of France he is considered a reactionary, though he is everywhere regarded as a man for the responsible work of leadership when the time comes. In the Chamber of Deputies he is always listened to with attention, for though somewhat "advanced" in ideas he is always within the sphere of practical politics. His success as a parliamentary orator is in itself an indication of the change which is gradually coming over parliamentary methods in France. He is an eminently practical statesman; his speeches are for the most part made up of facts, though they are delivered with animation and eloquence. He depends very little for effect upon artificial graces. His residence in the United States produced an abiding impression upon him. He has now set his hand to the great work of revising the constitution. His methods in conducting the agitation of the question afford a good view of the practical type of his mind. He has formed a "league of revision;" in some sort an imitation of the English Anti-Corn Law League. The agitation is directed by a central committee, with branches, and the propaganda is carried on by pamphlet and lecture in all the great towns. A much less picturesque character than Gambetta, Clémenceau is apparently a more practical man, and one more likely, perhaps, to address himself with effect to the questions of internal administration which are crowding upon the republic for solution.

In a recent letter to the New York *Evening Post*, Mr. A. V. Dicey dwells upon the significance of the speech delivered by John Bright, at Birmingham, on the 14th of June last. Referring to that part of the speech in which Mr. Bright condemned the action of those members of the House of Commons who were "found in alliance with an Irish rebel party," and appealed to the great constituencies to "suppress the power and close the era of the men who insult the majesty of the British people," the writer remarks that no words more worthy of note have ever been addressed to the English nation by an English orator. In what Mr. Dicey sets forth by way of pointing the significance of these passages, there are to be found the materials for a clear insight into some very interesting phases of English political life. The speech itself is a defiance hurled by the leader of the English democracy against politicians who, in his opinion, are disloyal to the country. The fact that it was received with applause in an assembly of democrats in the most democratic town in England would seem to indicate, Mr. Dicey thinks, that the English democracy are at one with Mr. Bright, particularly in his position in regard to the Irish question. Some people will be inclined to think that Mr. Dicey lays overmuch stress upon the applause of a gathering brought together for the express purpose of honoring their distinguished representative. Such occasions are not the ones upon which the judicial qualities of the people are called on for exercise, and it may be that much of the "loud and long-continued cheering" was for the speaker, and not for what he said.

What Mr. Dicey has to say concerning the relations of the electors to the House of Commons and the change which has come over those relations of late is, however, of deep interest. Observers of every shade of political opinion have, of late years, noted a decline in the prestige and influence of the House of Commons. On the other hand the conviction has become general that the electors are now, far more truly than fifty or even twenty years ago, the rulers of England. Still, from the force of circumstances, the House of Commons has concentrated in itself all the powers of the state. Under these conditions it is natural that the people should regard the action of the House with something of the care and jealousy which was formerly devoted to watching the action of the sovereign or of the executive. From this view of the present relative positions of the House, and of the electorate, one can readily understand the significance of Mr. Bright's appeal to the constituencies to see that England should not be ruined by Parliament. According to the writer of the letter referred to, there are signs that the House of Commons is beginning to recognize the change in the relations between itself and the electors, and, in his view, the majority who acquitted Mr. Bright on the charge of breach of privilege, in so doing, tacitly admitted the sovereignty of the people.

It is said that no fewer than four hundred members of the House of Commons were pledged to vote for the bill legalizing marriage with a deceased wife's sister, which was thrown out by the House of Lords recently. The *Daily News* pointed out that it was the bishops who had nullified the votes of the lay peers, and showed that had the temporal lords alone been appealed to there would have still been a majority of twelve in favor of the measure which had the vast majority of the House of Commons on its side. The *Pall Mall Gazette* has been led by this circumstance to remark, in the following unequivocal manner, upon the feature in the British Constitution which rendered such a defeat of the popular will possible:

> The only really important thing, therefore, about the incident of yesterday is the attention that it draws to the most indefensible of our constitutional anomalies. An hereditary chamber in a popular government is in itself an anachronism. The theoretic absurdity of giving to an hereditary body the right of veto on the work of the elective body is too glaring to be missed. Its practical inconveniences have been lamentably demonstrated in small things and in great, in questions of high policy no less than in matters of particular detail, almost without cessation since the first reform bill. But if an hereditary chamber at all is an anachronism, still more gross an anachronism is it that the only non-hereditary element in it should be composed of some six-and-twenty clergymen taken from one special sect What can be more entirely ludicrous than that a measure which the great majority of the legislators of the country, peers and commoners, desire should be rejected because a couple of dozen ministers of religion, all taken from one particular church, vote against it? There is not so incongruous a state of things to be found in any constitution or government on the face of the earth. What should we think if the people of the United States were to plant a score of Wesleyan or Baptist preachers in the Senate? Why is it less laughable that the same number of Episcopalian preachers should be planted in our Senate, and invested with the privilege—only exercised upon occasions, it is true—of overruling the decisions of laymen and men of business?

SPECIAL CORRESPONDENCE.

CANADA'S PRAIRIE PROVINCE.

Winnipeg, July 5.—In the year 1812 a number of Scotch emigrants, under the direction of the Earl of Selkirk, reached the western part of the Red river valley and there fixed their homes. The Hudson's Bay Company, which up to a very recent date virtually owned the vast territory now known as the Canadian Northwest, had a post here for the trading of furs with the settlers and Indians. The company had such success that it soon brought a rival into the field, namely, the Northwestern Fur Company. There was great competition between the two companies, which finally resulted in much bitter feeling, culminating in the shooting of the Hudson's Bay governor, Robert Semple, by a party of Northwestern fur traders in 1816. This resulted in the destruction of the post and the settlement was practically broken up. In the following year Earl Selkirk returned with a force of British troops, and, order being restored, Fort Garry was built. The machinery of industry was soon set in motion, and for nine years uninterrupted prosperity was enjoyed. In 1826 a flood, which was general throughout the Red river valley, destroyed nearly the entire settlement; but the people, undaunted by their reverses, at once entered on the work of reconstruction, and prosperity again prevailed. From this time the progress of the settlement was unbroken until 1852, when another flood occurred, but it did less damage than that of 1826. No noteworthy events marked the history of the settlement for nine years more, until, in 1861, another, but still less destructive, flood occurred. The damage, however, was repaired, and prosperity kept increasing. From 1852 to 1857 there were several additions to the number of business concerns at Fort Garry, and in the latter year, when a detachment of the Royal Canadian Rifles arrived and were quartered in the settlement, the place around the fort bore the appearance of a prosperous frontier village. Large numbers of settlers also began to arrive about that time, and the village greatly grew in numbers and prosperity. Up to the year 1862 no means of transportation or freighting existed between the settlement and the outer world except by team or dog-train. In May of that year the steamer International made her first trip down the Red river to Fort Garry. The settlers were looking forward to a great increase in trade, and their hopes of a regular communication with the centers of civilization ran high. An outbreak of Sioux Indians in Minnesota put an end to those calculations, and the trade of Fort Garry received a heavy set-back. In the winter of 1869–70 the Red river rebellion brought the Red river district, and particularly the village of Winnipeg, before the notice of many in the old and new worlds, and its importance greatly increased. In October of 1870 the first move was made toward securing telegraphic communication with the United States, an undertaking which was completed the following year. The spring of 1871 opened up competition in the river freight tariff, when two lines entered into the business, managed by Hill, Griggs & Co., and Mr. M. W. Kittson, of St. Paul. Progress continued steady though not rapid, and in 1874, when the city of Winnipeg was incorporated, the number of buildings within its limits was 900. The population of the city was about 3,700, and the assessed value of property $2,076,018. Feeling ran very high upon railway matters, and the masses of the people looked south for a connection with the St. Paul, Minneapolis & Manitoba Railway, which had reached Crookston, Minn., ninety miles south of the boundary line. The panic of that year, however, stopped its further progress northward. In August, 1877, Lord Dufferin, the Governor-General of Canada, visited the city and drove the first spike of the Pembina branch of the Canadian Pacific Railway. The following year witnessed the completion of that branch, and railway connection was opened with St. Paul. Commerce and industry had made rapid strides during the year, and Winnipeg had now safely entered upon its career of rapid development. Its population that year was over 6,500, and the value of the property assessed, a little over $3,000,000. The year 1879 opened with lively times in Winnipeg, and eastern merchants began to pour into the place. In the month of April the first lot of immigrants, about 500 in number, arrived by rail, and quickly found cheap and good lands throughout the province. These were followed by batch after batch, until it seemed as if the province would soon become the most populous in the Dominion. Real estate men began to multiply and the price of city property kept rapidly advancing, while business institutions of every class were springing up in large numbers. Before the close of 1879 the number of dwelling houses reached about 1,000, the population was over 8,000, and the valuation of property within the city was $3,415,065.

During the summer and fall of 1880 the influx of immigration into the province was greater than ever before. New business houses multiplied with remarkable rapidity; three new banking institutions sprung into existence, and, through the agency of investment associations and agents for individual capitalists, capital from all parts of the eastern province and Great Britain, and a considerable amount from the United States, was seeking investment in real estate, mortgages and like securities. At the early date when the assessment was made the value of the city property had risen to over $4,000,000, while by midsummer the population had increased to nearly 12,000. The prospects of Winnipeg and Manitoba when the spring of 1881 opened were of the most roseate hue. The Canadian Pacific Railway, construction on which had been proceeding in a slow and intermittent manner, passed into the hands of a syndicate composed of Canadian, United States and English capitalists, and the completion of the great transcontinental route at an early date became a certainty. The rush of immigrants to the city and surrounding country in the spring confirmed the hopes that had been entertained, and when the city assessor fixed the value of taxable property at $9,196,430 the most incredulous were forced to the conclusion that Winnipeg was destined to be within a few years a great city.

The year 1882 was the most remarkable in the history of the Canadian Northwest. It will be ever memorable as the year in which the first great boom resulted from the appreciation by the world of the great advantages offered by this country. Immigrants began to pour into the country by thousands, and in the opening months of the year it really appeared as if the whole world would come here in the spring. Colonization companies by hundreds were formed in Great Britain and eastern Canada, mechanics and laborers got ready to start for the land of high wages, and keen speculators prepared to take advantage of the rush. Land jumped greatly in value both in Winnipeg and the rest of the province, and speculation became rife. Before March three hundred real estate offices were established, and the main street of Winnipeg was filled with crowds of operators. The citizens became crazy with speculative ideas, and unscrupulous persons flooded the market with valueless paper towns, which were disposed of to unsuspecting victims. Shortly after this the Red river valley was visited by a heavy flood,

which did great damage and stopped railway traffic. Money was thus prevented from entering the country, the excitement in real estate began to subside, and the boom collapsed. But while the real estate market became somewhat demoralized the country continued to make rapid progress. With the subsidence of the flood immigration was resumed, and before the close of the year the population of Winnipeg had increased to 25,000 and that of the province to about 100,000. Five millions were spent in the erection of new buildings in Winnipeg alone, and the trade done here during the year was estimated at $20,000,000. The year's real estate transactions aggregated $10,000,000, and the assessment of Winnipeg property rose in value to $40,000,000. The immigration statistics show that about 44,000 settlers came into the country during the year, bringing with them capital and personal property to the value of $10,000,000. The government lands were purchased largely, 103,200 acres being sold, while 503 free homestead and 243 preëmption entries, each representing 160 acres, were recorded. The land department of the Canadian Pacific Railway disposed of some 8,000,000 of acres of land, including 5,000,000 sold to the Canadian Northwest Land Company, of which the Duke of Manchester was president. Large sales were also made by the Hudson's Bay Company, and settlers spread over the fertile prairie to an extent with which the strenuous efforts of the survey parties could not cope.

This year may be called the year of reaction. The boom in real estate has spent itself; many firms, led away by the great business they transacted for a few months during the excitement, have gone the way of the majority who indulge in overtrading. There has also been a fall in wages, in consequence of the city being flooded with laborers and mechanics who were attracted by the glowing reports sent to the east last year, and as they have been unwilling to return east a glut in the labor market has been the result. Carpenters, who last year could command $3.50 and $4 per day, are now content to work for $2.50; bricklayers last season were paid $6 per day, but at the present time receive but $2.25 to $2.75, and so it is through the whole list of employments. Farm laborers are, however, in urgent demand. For these there is a wide and rapidly growing field, and they can count on constant employment at good wages. Those accustomed to desk and counter work had better remain away from here at present, for it is the case here as elsewhere that there are generally more applicants for such situations than there are situations to fill.

To the people of the over crowded countries of Europe, Manitoba and the Canadian Northwest offer advantages unsurpassed by any other land. On the broad and fertile prairies they secure free homesteads and make a comfortable living for themselves and families with but little labor. The fertility of the soil is remarkable. There is a generally accepted theory that this great fertility is due generally to three causes—first, the droppings of birds and animals on the plains; second, the ashes left by the annual prairie fires, and, third, the constant accumulation of decayed vegetable matter—and when the fact is considered that great herds of buffalo and other game have roamed for centuries over the prairies, that wild fowl to this day are found in vast numbers everywhere, and that prairie fires have raged every year for many generations in the Northwest, there is doubtless sound reason for this theory. But, whatever may have been the cause of the extreme richness of the land, there is one feature which is of great importance, and that is the depth of good soil in the prairie country. The statement that the depth of black loam in the Northwest will range from one to four feet, and in some instances even deeper, has been received with a great deal of doubt, but the testimony of farmers living in over one hundred and fifty different localities in Manitoba has demonstrated that the average depth of loam in this province is over three feet. Owing to the large proportion of silica which is contained in it, the soil is particularly well adapted to the growth of wheat. The black loam or mold rests on a tenacious clay for a depth of from one to four feet, and in some places the clay is as deep as ninety feet.

Manitoba has been declared to be one of the healthiest countries on the globe, and the most pleasant in which to live. There is no malaria and endemic diseases are unknown. The dryness of the air, the character of the soil, which retains no stagnant pools to send forth poisonous exhalations, the almost total absence of fog or mist, the brilliancy of its sunlight, the pleasing succession of its seasons, all conspire to make the Canadian Northwest a climate of unrivaled salubrity, and the home of a joyous, healthy, prosperous people.

The great product of the Canadian Northwest must be wheat. All indications point to the fact that it will be the future great wheat-growing region of the world. Here assuredly wheat will be king. The large number of settlers who came into the country last summer and fall will reap a golden harvest in the coming autumn. It is difficult to estimate the area of land which has been for the first time put under wheat this year, but a moderate calculation places it at 100,000 acres, which may be taken to represent at least 2,500,000 bushels of wheat that will be ready for the market in the coming fall. The Northwest settlers are everywhere sowing the best of seed, the Fyfe wheat, and their grain will be of the highest standard, No. 1 hard. In view of the fact that the yield in eastern Canada and the United States will be much short of that of last year, the farmers of the Northwest anticipate a good price, and there is no doubt that their hopes will be realized and many millions of dollars brought into this country in the fall. The effect will be visibly felt throughout this whole country. For years and years the settlers have been importing largely, and there has consequently been a heavy drain of money from the Northwest, with but little return. The coming wheat crop will change the order of things, and be the means of relieving the now almost depleted money market of the Northwest. The hope and salvation of the Northwest center in the wheat crop, for it is the backbone of the country. A failure of the crop would mean utter ruin, while the bountiful harvest which will doubtless reward the labors of the husbandman will prove a mine of wealth and prosperity.

In conclusion, it may be stated that business in Manitoba is very dull at present; it would be useless to deny it. The cause is readily apparent. When the people were carried away by the excitement of the real estate boom, and money was plentiful and business rushing, merchants prospered. They prospered to too great an extent, for they were misled by the great amount of business then done and imported too largely. Their stocks, or a great portion of them, now lie on their hands, while the money has gone to enrich eastern merchants. The drain of money from this country, to which reference has been already made, has rendered the people poor, and they are unable to purchase. The consequence is that many merchants find their immense stocks to be a white elephant which they cannot carry. Already several assignments in Winnipeg are reported, and others are certain to follow. No relief from the present depressed state of business can be anticipated until after harvest, when the money which will be brought westward in return for the grain cannot but have a beneficial effect on trade.

The great drawback to Winnipeg and other Northwestern towns is that the land immediately surrounding them is in the hands of speculators. They are holding their property for a rise in value and at such a price that settlement is hindered. Thus is the progress of the cities at present hampered, and how long that will last it is hard to tell. It is certain that many of these speculators will be badly bitten, There are millions of acres of as good land to be got further westward, and they are being rapidly placed in communication with the world's markets by the Canadian Pacific Railway. Consequently settlers will not pay extortionate rates for lands surrounding Winnipeg or Brandon when they can obtain as fertile land at $2.50 an acre elsewhere.

The prospect, however, is not one of darkness. On the contrary, the people of the Northwest have strong faith in the future prosperity of this country. As a wheat-raising region it cannot be surpassed, and all that is needed is that the farmers be provided with the proper facilities for shipping at a low cost to the markets. Then Manitoba and the Canadian Northwest will rise to the position they are destined to assume among the food-producing countries of the world.

LETTERS TO THE EDITOR.

WHEAT CROP ESTIMATES.

To the Editor of BRADSTREET'S.

SIR—There is considerable discussion on the Produce Exchange over the various estimates of the wheat crop of 1883, as follows:

	Wheat, bushels.
BRADSTREET'S estimate	443,360,000
Agricultural Department	425,000,000
Cincinnati *Price-Current*	440,000,000

Parties of experience think it best for the present to compare the winter wheat crop east of the Rocky mountains with that of the crop of 1882, leaving out for the present the Pacific wheat states (whose interest is to exaggerate their crops to attract freights) and the spring wheat states, as being too early to estimate that crop.

WINTER WHEAT CROP EAST OF ROCKY MOUNTAINS.

	1883, *bushels.*	1882, *Agr'l Bureau, bushels.*
BRADSTREET'S estimate	251,920,000	335,840,250
Agricultural Bureau estimate	235,000,000	
Cincinnati *Price-Current* estimate	245,000,000	

From this it appears that BRADSTREET'S makes the crop of winter wheat east of the Rocky mountains short, as compared with the crop of 1882, 83,920,250 bushels, the Agricultural Bureau 100,840,250 bushels and the Cincinnati *Price-Current* 90,840,250 bushels. Merchants on 'change think that calculations on spring wheat are too early yet to be of much consequence, and, for reasons already stated, it is too early to judge the crop of wheat on the Pacific.

An important question is: how much is our present surplus in excess of a normal one? It is said that the stock of wheat in sight is only 19,418,915 bushels, or 9,310,485 bushels in excess of this time last year, which was below an average. It is therefore generally thought that any surplus over a normal stock that will be carried into crop of 1883 will not be over 20,000,000 bushels.

The conclusions drawn by the most conservative thinkers are that, allowing BRADSTREET'S estimate to be correct, our exports for the year ending June 30, 1884, will be short if the Pacific and spring wheat crop are about the same as 1882, and after allowing 20,000,000 bushels as a surplus above what is normal, to be deducted, will be 64,000,000 bushels less for export than from the crop of 1882.

	Bushels.
The estimated export of wheat and wheat flour for year ending June 30, 1883, was	144,000,000
Estimated export of wheat and wheat flour for year ending June 30, 1884	80,000,000

Whether from better times causing a larger consumption of breadstuffs in this country, or gross exaggeration of the size of the crop of 1882, some respectable journals of this city estimated it at from 560,000,000 to 600,000,000 of bushels of wheat, with a surplus for export of 250,000,000 bushels, while our exports of wheat and wheat flour for the year ending June 30, 1883, was only about 144,000,000 bushels, proving how absurd were the crop estimates one year ago. OBSERVER.

New York, June 12.

MUTUAL INSURANCE IN THE SOUTH.

To the Editor of BRADSTREET'S.

SIR—Let me call your attention to the following from the *Courier-Journal* of Louisville regarding the People's Mutual Relief Association of Atlanta, Ga.:

The People's Mutual Relief Association of Atlanta, formerly of Mobile, Ala., is in a bad fix. At one time it had 5,000 members, the death rate was light, and everything worked smoothly, but suddenly it struck an unlucky period, deaths became frequent, and the company finally found it necessary to levy two assessments per month to meet the claims. Members immediately began to fall out, until now it finds itself with a membership of only 2,000, and is badly behind with its assessments, having only $10,000 to pay claims of $25,000 to $40,000. Mr. David E. Arbis, who committed suicide in Louisville some time ago, held two policies in the company aggregating $7,000. The claim was resisted on the ground of suicide, but a few days ago the company's bank account was garnisheed, and they compromised for $5,000. The usual settlement is now 30 to 50 per cent. of the full amount. The secretary of the association says the trouble lies in the original plan, which made no provision for an excessive death rate, causing, when the deaths became frequent, a postponement of payment until the rate became lighter. Meanwhile the policy-holders are indignant.

Are not associations of this kind, like the marriage associations of the past, becoming more and more disreputable and unreliable? Their agents will flood the country for a time, and tell the people how solvent their companies are, and what good, true and tried men they are officered by; but soon you may look out for a squall like the above—the company has failed, but the officers are entirely blameless. The query is with most people nowadays, Are not these companies gotten up and organized and officered by men, in the main, who have broken down at other pursuits, and who are failures in themselves, and who organize these various companies as subterfuges, out of which to draw a living for themselves and families, irrespective of the good or benefit of others?

POLICY-HOLDER.

Abbeville, Ala., July 2.

[There can be no doubt that the "mutual" insurance plan, under the management of incapable or irresponsible or perhaps unscrupulous persons, has given rise to a widespread system of swindling. This fact has been made plain in BRADSTREET'S from time to time. It is somewhat difficult to suggest a proper plan for the remedy of the abuses which have been introduced by the system. Much good might result from the energetic enforcement of laws giving insurance commissioners or superintendents full power to examine the books of such concerns and compelling them to annually report their condition to the department. A discretionary power might be lodged with the state executives authorizing them to withhold certificates of incorporation from associations composed of untrustworthy persons or whose objects appeared to be of palpably dishonest character. In this, however, as in so many other cases, the people cannot be completely protected by even the most thorough and judicious exercise of official discretion or supervision against the consequences of their own credulity and ignorance.—ED. BRADSTREET'S.]

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

A pension is property within the meaning of the bankrupt law, according to the decision of the English Court of Appeal in the recent case of Ex-parte Huggins.

When goods are made deliverable to the holder of a bill of lading on certain conditions being complied with (as for instance the payment of freight and demurrage if any) the act of demanding delivery is on the part of any holder of a bill of lading equivalent to an offer to comply with these conditions. Such was the conclusion arrived at by the English High Court of Justice in the recent case of Allen et al. vs. Colthart et al.

Where a plaintiff sues upon a lost note he assumes the burden of proving that the note with all the signatures upon it as alleged existed and that it is lost. He is not required to prove that all the defendants are bound in order to recover against a part, however, according to the opinion of the Supreme Court of Texas in the recent case of Keightley, administrator, vs. Seydell et al.

A railroad company cannot, without special legislative authority, alienate its franchise or property acquired under the right of eminent domain or essential to the performance of its duty to the public whether by sale, mortgage or lease, according to the decision of the Supreme Court of Georgia in the recent case of Singleton vs. The Southwestern Railroad Company.

B was indebted to A and C was indebted to B. By agreement of the three C assumed the debt of B to A on condition that B was to be released. The Supreme Court of Georgia, in the case of Sapp vs. Faircloth, held that this agreement was not within the statute of frauds and was therefore not required to be in writing, the promise of C being an original undertaking to pay, and not one to answer for the debt, default or miscarriage of another.

Where one partner pays his full share of the partnership indebtedness to his copartner and is afterward compelled to pay a claim of one of the creditors he has a right of action against the copartner, according to the opinion of the Supreme Court of Indiana in the case of Hill vs. Warring, decided on the 29th ult. The court said that the general rule was that one partner could not sue another on a claim growing out of the partnership business, but that where separate and distinct liabilities were created by the express agreement of the parties the general rule did not apply.

Under a written contract 510 car wheels, constituting a part of 1,100 wheels, were sold. At the time of the sale the wheels were in one common mass, and there was no separation or any designation of the wheels sold. After the execution of the contract the entire lot of wheels was seized on execution. The Supreme Court of Indiana, in the case of The Commercial National Bank vs. Gillett, decided on the 29th ult., held that the purchaser of the 510 wheels acquired no title, for the reason that the wheels purchased were not designated or separated from the common lot of wheels of which they formed a part.

One Tucker was employed by the Singer Manufacturing Company as an agent, he together with certain sureties becoming bound in the sum of $1,000 for the faithful discharge of his duties as such agent. Upon an examination of his accounts it was found that he was $697 short. Action was brought upon the bond in the United States Circuit Court at Chicago, Singer Manufacturing Company vs. Tucker et al. The sureties sought to evade payment of the amount missing on the ground that an agent of the company had said in a conversation with them that they would never be liable for more than $100. The court held, on the 12th inst., that such a promise could not invalidate a contract under seal, and gave judgment for the plaintiff for the full amount.

Upon the hearing of a petition for the extradition of a prisoner charged with the crime of forgery, it appeared that he had obtained in Norway the signatures of two of his friends to a note. The note was signed in blank, and, as indicated by figures on the margin, was for the sum of 200 crowns. The prisoner afterwards added a cipher, making the amount 2,000 crowns, and took the note to a bank, where it was filled in by an officer of the bank according to the figures in the margin. Upon obtaining the money upon the note the prisoner absconded. Judge Nelson, sitting in the United States District Court, at Boston, held that the acts of the prisoner set forth above amounted to forgery. Frostsein's case, decided July 5.

In the case of The Denver & New Orleans Railroad Company vs. The Atchison, Topeka & Santa Fe Railroad Company, decided in the United States Circuit Court for the District of Colorado on the 26th ult., Judge McCrary held that courts should not interfere for the purpose of preventing any reduction of rates which results from competition between rival railway lines, and that if as a result of the struggle between competing companies they voluntarily offered to carry, either for the public generally or for connecting lines, at less than a remunerative rate, it was their own business. Railroads are not obliged to carry for less than a fair and reasonable rate, and if they voluntarily do so for the purpose of outstripping a rival they cannot complain of those who avail themselves of the low rates offered. The defendant had done nothing more than to avail itself of the low rates offered to it as a result of the struggle for business between the complainant and the Denver & Rio Grande Company, and there was no cause for relief against defendant because of its action in that regard.

A swindler, assuming the name of a reputable business man in Saratoga, ordered a quantity of cigars from one Samuels, who forwarded the cigars by a common carrier and at the same time addressed a letter to the swindler under his assumed name notifying him that the goods had been sent. The carrier brought the goods safely to Saratoga and sent the goods to the merchant whose name had been assumed by the swindler. He, however, refused to receive them on the ground that he had ordered no cigars. The carrier thereupon sent the goods to a store which had sometime before been hired by the swindler who had his assumed name displayed on his signs. Here they were received by a person in charge of the store and a receipt was given for them under the assumed name. Samuels sued the carrier for the conversion of the goods, Samuels vs. Cheney, but the Supreme Court of Massachusetts, affirming the decision of the trial court, ordered judgment for the defendant, on the 5th inst., on the ground that the contract of a common carrier is not that he will ascertain the owner of the goods and deliver them to him, but that he will deliver the goods according to the directions.

The case of Phelps et al. vs. The Georges Creek & Cumberland Railroad Company, decided by the Maryland Court of Appeals on the 6th inst., was an action brought by the plaintiffs to recover damages because of alleged false and fraudulent representations and estimates made by the chief engineer and president of the defendant company concerning the cost of constructing and equipping defendant's railroad, whereby the plaintiffs claimed they were induced to contract with defendant to build and equip said road for a sum of money much less than the amount actually required, in consequence whereof they were subjected to great loss. The plaintiffs sought to introduce in evidence a declaration made by the chief engineer of the road five months after the work had begun, to the effect that if he had shown the plaintiffs that the road would cost $700,000 or $800,000 (a sum greater than that named in the contract) they would never have gone on with the building of the road. This evidence was excluded by the trial court for the reason that the declaration was not made in the course of the negotiations which culminated in the contract, and that it was only during that time that the chief engineer could be regarded as acting as the agent of the defendant company. The court also excluded evidence of the fact that the price of rails took a sudden rise while the plaintiffs were waiting for the defendant to procure a part of the right. This the court said had no bearing on the case, because the contract was not based on the specific prices at which any of the articles to be furnished could be gotten. Upon these and other points the opinion of the trial court was affirmed by the Court of Appeals.

BUSINESS NOTES.

The interests of the French and the British in the matter of the construction of a second Suez canal appear to have been satisfactorily arranged, and the British government is reported as agreeing to aid in securing an extension of the original term of the franchise and that it will lend the enterprise £8,000,000 for fifty years at 3½ per cent. interest.

At Wheeling, W. Va., the great nail manufacturing center, great interest at present attaches to the construction at Bellaire of the initial plant for the manufacture of steel nail plate. The prospects of the success of the enterprise are being eagerly discussed. It is stated by the *Intelligencer* that if it succeeds the future of the Wheeling nail trade is decided. Manufacturers who have carefully investigated the subject claim that steel nails can be made at a slight advance over iron, and their superior quality will render them popular even at a slightly advanced price. Some of the manufacturers express doubt as to whether they will not be able to make nails of steel at the price iron nails are now made, but in estimating the outcome of the experiment they allow a margin. It is expected that with the Wheeling mills in the lead as manufacturers of steel nails the old prestige and popularity of the Nail City as a nail-producing center will be outdone, and if natural gas is found in sufficient quantities to furnish fuel for the nail mills, as there seems to be little doubt it will be, a boom may be expected such as Wheeling and this region never before experienced.

The following national banks have been organized: The First National Bank of Fairbury, Neb.; capital $50,000; John A. Buckstaff president; Daniel B. Cropsey cashier. The First National Bank of Alexandria, Minn.; capital $60,000; F. B. Van Hoesen president; G. B. Ward cashier. The Owego National Bank, Owego, N. Y.; capital $50,000; George B. Goodrich president; Clarence A. Thompson cashier. The National Bank of El Paso, Ill.; capital $50,000; Abraham S. McKinney president; Samuel T. Rogers cashier. The First National Bank of Greenville, Tex.; capital $50,000; Thomas H. King president; George M. O'Neal cashier. The Bridgeton (N. J.) National Bank; capital $100,000; Thomas U. Harris president; James W. Frenchard cashier. The Anoka (Minn.) National Bank; capital $100,000; William D. Washburn president; C. S. Guderian cashier. The Planters' National Bank of Danville, Va., has elected W. F. Cheek president, in place of W. D. Bettrell. The First National Bank of Garnett, Kan., has elected W. H. Conover president. The First National Bank of Trinidad, Col., has elected Daniel L. Taylor president, in place of G. R. Swallow.

The introduction of the pipe-line method of transportation of crude oil has worked great changes in the petroleum industry. The saving in transportation charges to the seaboard is, of course, enormously reduced with attraction of gravitation as the prime motor in drawing the crude oil to the seaboard. As can be readily inferred, the continued use of the pipe-line suggests the removal of the refineries to the seaboard, for if the oil is refined in or near the producing regions it must come east by rail at charges naturally much greater than the expense of running it through the pipe-line. To this view of the situation, doubtless, is due the mammoth aggregation of refineries and tanks for the storage of crude oil which line the southwest shore of New York bay in New Jersey, as well as along the Kill von Kull. Late Pittsburgh advices state that the Standard Oil Company are preparing to withdraw a large portion if not all their enterprises from Pittsburgh. Some of the Pittsburgh officials of the company refuse to affirm or deny the report, while others again state that they cannot give full information on the subject, but know that at least two Standard refineries are still running in the vicinity. The company is understood to have removed its paraffin works to Cleveland, and, says the *Iron Age*, "will gradually remove its refineries to other ports, and in fact are doing so now."

The Philadelphia *Record* notes the expected arrival at that port within two weeks of nine vessels loaded each with from 1,800 to 2,000 tons of Bessemer ores from Spain. This is said to be an unusually large quantity, a considerable share of Philadelphia's former receipts of high grade foreign ores having been diverted to Baltimore of late years. The reasons for this are said to have been railway freight discrimination in favor of Baltimore in the matter of distributing the ores from that city, greater competition in purchasing cargoes received at Baltimore, and the greater probability of return cargoes of grain than from Philadelphia. It is added, however, that shipments of these ores to any port would be even smaller hereafter than now, as the present tariff makes a difference of at least 40 cents per ton in the cost of importation. The importation of African ores has ceased altogether, for reasons unknown, unless it be the tariff rates. It is added that Pittsburgh manufacturers who formerly used a great deal of Spanish ores now prefer native ores. The principal native or lake ore is the Republic, and the next in grade is the Menominee range ores. These are mostly used in Pittsburgh, where for some time they came in competition with the foreign ores. The native ores are put down in Pittsburgh from Cleveland, the point of distribution, at $9.50 per ton, against $8 per ton for a 60 per cent. Bessemer foreign ore. The advantage in paying higher prices for the native ores is that they can be purchased in quantities to suit, while foreign goes to consumers only in cargo lots.

The growth of Buffalo as a shipping point of exceptional importance has been commented upon in these columns. The transhipment of cereals and other commodities sent east via lakes and the Erie canal must of itself furnish a considerable amount of business at that city. But within the past few years a number of leading railways have been completed to Buffalo, which, in addition to those already there, must tend to greatly enlarge the importance of that city in the sphere of transportation and manufacturing industries. Added to the Central, Erie, Philadelphia, Southwestern, Canada Southern, Lake Shore, Grand Trunk and Great Western, the city is now an important terminal for the Lackawanna, Nickel Plate, Lehigh Valley, Northern Central and West Shore railroads. The movements of flour and grain at Buffalo for June and since the opening of navigation has been heavy. The receipts by lake in June were 271,370 barrels of flour and 8,382,570 bushels of grain, as against 277,180 barrels of flour and 5,148,860 bushels of grain in June, 1882. The shipments by canal in the same time were 436 barrels of flour and 6,832,996 bushels of grain, against 531 barrels of flour and 2,871,112 bushels of grain in June, 1882. Since the opening of navigation, which began a month later than last year, the receipts by lake were 505,750 barrels of flour and 17,794,600 bushels of grain, against 584,700 barrels of flour and 15,919,540 bushels of grain to the 1st of July, 1882; while the shipments by canal since the opening of navigation were 1,202 barrels of flour and 12,584,527 bushels of grain, against 2,273 barrels of flour and 9,011,861 bushels of grain in 1882. It appears, therefore, that in the present short season since the opening of navigation both the receipts and shipments of grain have been considerably larger than last year, when the season to the 1st of June was a month longer. The receipts of grain were nearly two million bushels more, and the shipments by canal about three and a half millions more. The large comparative movement is believed to have been stimulated by the removal of tolls from the canal.

The proposition to create an inland African sea by cutting a canal from the Mediterranean to the lowlands of the Saharan desert has excited a great amount of comment abroad. There are the defenders of the plan—mostly Frenchmen—and the critics, many of them Englishmen. From this it may be inferred that the project is one of French aggrandizement. The success of the plan, it is claimed, would give Algeria an interior water front and intimate communication by vessel and steamship with Soudan and the heart of the African continent. As has been pointed out previously, the French are building a railway from Fort Saint Louis, on the northwest coast of Africa, to the Senegal and Niger rivers, in order to open up trading relations with the nations in Soudan and surrounding country. The latest criticism of the inland sea project is from a correspondent of the London *Engineer*. This gentleman says that if the inland African sea were a possibility, from an engineering point of view, "it will certainly be a profitless and useless undertaking." In saying this he crosses the opinion of M. de Lesseps, who has been on the ground of the proposed canal, and declares the plan practicable and of profit. The criticism adds that, financially speaking, it is impossible to say from what source of revenue the supporters of the inland sea expect a return for their expenditure. Against the merely hypothetical advantage claimed for it, viz., that it would improve the fertility of the neighboring districts, may be set the hypothesis—surely a more likely one—that it will, by creating salt marshes under the intense heat of an African sun, make that part of the regency most unhealthy. Besides this, the correspondent adds, the following results are inevitable—"a large number of oases and date trees will be destroyed. Their present owners will have to be compensated at a heavy cost out of the pockets of Frenchmen, or sacrificed without any compensation at a still heavier cost to the honor and reputation of France."

It is a noticeable fact that the progress of the telephone has been far more rapid in the United States and on the continent than in the United Kingdom. The suggestion has been made by the London *Ironmonger* that this fact is due solely to the assumption by the British government of its exclusive right to use it, under the definition of the word telegraph (the government monopolizing the latter). The United States are now credited in the aggregate with over 30,000 miles of telephone wire and over 100,000 subscribers. In France, Germany, Belgium and Italy the telephone has been extensively introduced, and is rapidly growing in favor. There are telephone exchanges in twenty-one German cities and towns, including Berlin and the capitals of all the states in the empire, in Cologne, Frankfort, Barmen, Elberfeld, Mulhouse, Leipzig, Stettin and Breslau. The total number of "stations" in Germany is 4,196, with an aggregate length of wire exceeding 4,200 English miles. In Berlin alone there are 1,300 subscribers, and in Hamburg 850; the increase in Berlin last year was at the rate of 100 per cent. and in Hamburg 75 per cent. In some cases places contiguous to each other, such as Barmen and Elberfeld, Hamburg and Altona, Mulhouse and Gebweiler, Mannheim and Ludwigshaven, Cologne and Deutz, are thus connected, short lengths of cables under rivers being used without appreciable disadvantage. In many other German towns the system is being adopted with every prospect of success, and with the approval of the German post office authorities. The Cairo (Egypt) Telephone Exchange has been re-established and has 300 subscribers. Separate companies are established in the various India presidencies. There are 130 subscribers in Bombay, 120 in Calcutta, 23 in Madras (where the climate necessitates the substitution of phosphor-bronze tor iron wires), 54 at Rangoon, and a beginning has been made at Colombo and at Ceylon. Singapore has 60 telephone subscribers, Shanghai 66, and Hong Kong 30. In the Hawaiian Islands there are said to be 300 telephone subscribers.

The report of the Silk Association of America on the imports of silk manufactures at the port of New York during the month of June shows a decline in the aggregate value thereof as compared with that of June in any of the three preceding years, being $1,163,180, against $2,043,936 in June, 1882, $1,712,400 in June, 1881, $2,280,267 in June, 1880, and but $1,153,996 in June, 1879. The gradual increase in the importation of manufactured silk at the port of New York for the fiscal years ended June 30 has been as follows:

Silk manufactures.	1882-83.	1881-82.	1880-81.	1876-77.
Piece goods	$13,585,396	$19,429,606	$16,167,056	$12,647,212

Crapes	479,962	536,277	489,560	517,014
Pongees	30,938	8,651	16,477	2,431
Plushes	875,785	1,121,990	495,496	80,731
Velvets	1,940,015	1,402,663	1,575,715	1,398,737
Ribbons	2,229,226	2,707,693	3,103,564	1,524,724
Laces	3,126,597	4,073,891	1,883,230	1,033,228
Embroideries	.....	.....	.....	468
Shawls	6,810	7,790	17,466	5,650
Gloves	333,716	170,151	264,703	30,591
Cravats	69,455	60,341	69,914	41,066
Handkerchiefs	59,786	75,071	53,727	67,278
Vestings	.....	.....	.....	1,616
Hose	297,960	179,254	110,277	51,381
Threads and yarns	155,282	128,790	175,627	35,456
Braids and bind'gs	1,087,416	1,191,140	1,323,437	992,549
Silk and worsted	90,786	123,939	174,390	141,062
Silk and cotton	4,486,836	5,011,843	4,300,921	2,092,326
Silk and linen	1,039	2,253	1,641	7,555
Totals	$33,967,171	$36,432,706	$30,501,851	$20,709,585

The year ended June 30, 1878, showed a decline from the total given in the fourth column to $19,078,661. The gain in the succeeding year, 1878-79, was considerable, the total being $23,023,903, and in the following year it was $30,596,509. In the fiscal year ending June 30 last, the heaviest importations were in August, when they amounted to $5,032,381, against $1,163,130 in June last, the lightest month's receipts. During the months of April, May and June last the total value of silk manufactures entered at New York for consumption was $2,227,274 out of $4,549,024, the total value of receipts. The value of that entered for warehousing was $2,321,750, and that withdrawn from warehouse was valued at $1,194,489, thus leaving an increase in warehouse valued at $1,149,329, and a decrease valued at but $22,068. The value of stock placed in the market, therefore, was $3,421,763. These figures have been prepared by Mr. William C. Wyckoff, secretary of the Silk Association of America, in order to show the increase of warehoused goods during the past quarter to take advantage of the new tariff.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

The periods of dullness in the stock market have been rare. They have come only when prices rallied up a little after depressions, which is usually considered a bad sign. It means that a short upward turn having been effected, causing the room traders and other small professionals to cover and possibly buy a few stocks, all the buying force in the market is exhausted. A pause ensues. The small men will not buy more, and they wait to see what turn the market will get next from the big men, ready to jump over to the bull or bear side as the case may be. Usually these pauses are followed by quick reactions in prices. It has been so this week. The stock market has been in much the same position as the grain and provisions markets in Chicago. It has been in process of liquidation all the week. The cliques and combinations which have been so long sustaining it, or trying to, have had to lighten their loads of stocks, and prices in consequence have been on the down grade. There was scarcely an appreciable pause in the downward tendency until Thursday, when the market began to rally. It was time that some kind of a rally should come, and when the market stiffened up that morning it seemed to be doing only what people naturally expected after the almost constant shrinkage of prices on the preceding days. In the last hour of business, however, on that day, three or four brokers most prominently identified with operations on the bear side appeared on the floor with large offers to sell Lackawanna. In about ten minutes or something less some extraordinarily large blocks of this stock were sold, breaking the price down 1 per cent. There was one sale of 10,000 shares in a block. Of course, this caused the greatest excitement in the market and made a general break in prices, Lake Shore being conspicuous for its weakness. Yesterday there was another heavy lot of the stock thrown on the market just before the close, making the closing quotation 124½.

Opinions are considerably divided as to who was the author of the break in Lackawanna. Everybody in Wall street knows that the operator who succeeded the late George Osgood in the manipulation of the stock is Mr. Henry N. Smith. It is a good dividend-paying property, and has a great future; but it is quite possible to have too much of a good thing, and Mr. Smith seems to have laid in a heavier load of it than he could handle in so poor a market as we have had since the beginning of the year. Mr. Osgood, with his ample means, was able to drive the price of the stock up to 150—a feat he performed shortly before his death. Mr. Smith has been unable to maintain it at 130, and the daily transactions in this stock recorded on the tape have become a sort of standing joke in Wall street, so obviously were they the work of matched orders given out by some one who, of course, could be no other than Mr. Smith, since no one else in the street had a like interest in keeping the stock active and the quotations high. When the sudden break of Thursday took place, which was obviously effected by genuine sales of stock, there was a warm controversy whether it was an adroit move on the part of Mr. Smith to sell stock or whether it was an attack on it by Mr. Gould—the only other large operator in the street who was thought to be likely to make so bold an attack—supposing it to be an attack and not an unloading operation. Brokers who watched the transaction said that the buying and the selling was so contrived that Mr. Smith could have sold 25,000 shares of stock, while his orders on the floor to buy (put there to prevent a disastrous fall in the price) only brought him in about 5,000 shares, which would be a pretty good trading operation, seeing that the break was only 1 per cent. On the other hand, some brokers asserted that it was a characteristic move of Mr. Gould's, who controls the Lackawanna Company, and that it was done to break the market just when it appeared to be likely to have a good rally.

The importance of the transaction and the cause of the eager discussion will appear when it is considered that Lackawanna has been the leading bull card in the Smith-Morgan bull combination, which has so long and against so many adverse circumstances been trying to advance the market. If the price of the leading stock was broken down, it was important as an indication of the future under any circumstances. Supposing that it was by Mr. Smith's sales, it meant the virtual break-up of the bull combination; supposing it was by an attack from Mr. Gould, it discovered that the combination was too weak to resist him, while it discovered him definitely on the bear side of the market. Anyway, Wall street saw in the affair a circumstance of great moment for forecasting the immediate future. At the same moment that Lackawanna broke Lake Shore declined conspicuously, and of this stock Mr. Smith was also known to have some large holdings.

New York Central and Northern Pacific had been the principal subjects of attack from the bear side on the previous days of the week, and the first-named stock had been forced down to 117—a lower price than it has touched since Mr. Vanderbilt made his famous sale of the family holdings to a syndicate three or four years ago. Yesterday it was driven down to 116⅝. The opening of the West Shore road has been the chief argument used against the stock, but the knowledge that the Vanderbilt family have parted with nearly all they once owned of it, and refuse to buy it back at these prices, has been the main reliance of the operators who are forcing down the price.

A block of the stock was bought some time ago at higher prices by the bull clique for effect on the market, and this dose also has doubtless been dribbled out as the market would take it. Wall street seems to be quite convinced that President Rutter was put in to fight the West Shore road to the extreme; and it is sufficiently indicative of the attitude of the two corporations to each other that cut-rates on passenger fares have been made by the Central to every point that the West Shore has reached, and this has been done as fast as that road progressed to the competitive point. The reduced-rate tickets are not yet openly sold at the Forty-second street depot, but they are in the hands of every ticket scalper in the city. The real fight, however, will not begin until the new road is ready for freight traffic. Then we may expect the fur to fly. It is clear that with the advent of President Rutter to the control of affairs in the New York Central the policy of buying up opposition, as exhibited in the Nickel Plate purchase, was discarded. Undoubtedly the Central Company would buy the West Shore if opportunity offered, but it would be at its own price, and that would not be a high one. In respect to the Northern Pacific stocks the causes of their decline lie in apprehensions about the outcome of the crops along the line of the road. Mr. D. O. Mills, who was a large holder, is understood to have given orders to sell out his holdings when he started for California some days ago, and as he is known to be a bold and tenacious holder of stocks after he has once bought, the fact that he had given orders to sell when the market was extremely unfavorable for selling in was used with great effect on the bear side.

The utter failure of the expected June rise and the dismal condition of the market since the opening of July, when so many expected improvement, is awakening inquiry in all directions as to the causes which seem permanently affecting the stock market on the bear side in these times. The brief summary given by one writer in answer to a correspondent is worth quoting. The causes are given as follows:

First. Over-production.
Second. Over-speculation.
Third. Construction of new railways and extension of old ones into regions of barren waste, where the matter of earning fixed charges is impossible for years to come.
Fourth. Paralleling old and well-established railways.
Fifth. Distrust of railway management.
Sixth. The epidemic to float new, mysterious and technically named bonds.
Seventh. Caution on the part of conservative business men to watch the result of the new tariff.
Eighth. Probability of decrease in railway earnings.
Ninth. Uncertainty as to the crops.

These causes, like the symptoms of physical disease, were not and are not all operative at once. They worked in combinations. Several have already spent their force, others are doing so, and some are yet to come. The only remedy to put into practice is in the shape of patience and caution.

The loan market continues in its customary state of midsummer ease, call loans ruling at 2 to 2½ per cent. Time loans are nominally at 6 per cent., but there is little demand for them. Exchange shows a weakening tendency under small demand, and an increase of commercial bills due to freer movements of exports. Posted rates declined yesterday to $4.85 @$4.88½. The Bank of England discount rate is held steadily at 4 per cent., and it is significant of depressed feeling over there that consols have fallen below par.

The government bond market shows no changes. The following were the closing quotations yesterday:

	July 6, bid.	July 13, bid.	July 13, asked.
U. S. 5s extended (3½ p. c.)	102½	101	—
U. S. 4½s 1891, registered	112⅞	112¾	113
U. S. coupon	112¾	112¾	113
U. S. 4s 1907, registered	119	118⅞	119⅛
U. S. 4s 1907, coupon	119	118⅞	119⅛

The bank statement of Saturday was an unpleasant surprise to the street, for an increase in the surplus reserve had been anticipated, and instead of it there was a decrease of $2,595,775, bringing it down to $6,644,250, against $8,303,425 for the same week last year. The following are the comparative totals of the statements of June 30 and July 7:

	June 30.	July 7.	Differences.
Loans	$328,083,200	$328,653,200	Inc. $570,000
Specie	64,189,600	62,799,500	Dec. 1,390,100
Legal-tenders	26,122,800	24,431,700	Dec. 1,691,100
Deposits	324,289,900	322,348,200	Dec. 1,941,700
Circulation	15,642,600	15,612,300	Dec. 30,300

The proportion of total reserve to liabilities is now 27.06 per cent., against 27.61 per cent. for the corresponding week of 1882.

THE BRITISH STOCK MARKET.

[By Cable to BRADSTREET'S.]

From London, Eng.: American railroad securities are neglected but steady.

From Providence, R. I.: The rate of discount on prime commercial paper is 4¾ @5½ per cent. on the street, and 5 per cent. at bank. The rate of exchange on New York is at par.

From Baltimore, Md.: The money market rules easy. There is little doing in stocks. A firmer feeling is reported for all kinds of securities.

From New Orleans, La.: Securities of all kinds are very dull but well maintained. Money is in request and steady.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

SUMMARY.

Special telegrams to BRADSTREET'S from leading trade centers show that while the customary mid-summer dullness prevails in various departments of business, the gains heretofore noted have been well maintained. While there have been several notable disturbances in industrial lines, none of them have been sufficiently widespread to affect the situation as a whole. The distribution of dry goods, hats and caps, boots and shoes, clothing and notions has sustained a noticeable falling away, customary at this season of the year. Yet at the extreme east there are signs of the beginning of the autumn buying. In the wheat market an unusual amount of manipulation has taken place. Discouraging and in part unfounded rumors have been made public as coming from the Red river regions of Minnesota and Dakota. The locusts in Persia and the cholera along the line of the Suez canal further coöperated to induce a bull view of the wheat situation during a portion of the week. Indian corn has been firmer and the demand steadier. News from the corn belt points to a relatively better crop of Indian corn than of wheat, and estimates of the prospective crop vary from sixteen to eighteen hundred million bushels. The latest telegraphic news to BRADSTREET'S from the northwest encourages the belief in the prospect of a good crop, inasmuch as copious rains have set in and relieved the effect of a prolonged drouth. This is corroborated by other and independent advices since received. Provisions have declined during the week. The talk of yellow fever at the south, combined with the agitation in Germany relative to the export of lard from the United States to that country, has gone far to depress prices, but free selling and a failure at Chicago and rumors of others went further, and the week witnessed a material decline. This was of course assisted by free arrivals of hogs at the west. Petroleum has finally declined, owing to the withdrawal of the big bull clique from the exchanges, at the head of which was Mr. Keene. Its statistical position is unchanged. Iron retains its firmness with no change to note. Ocean freights are comparatively dull. There were 140 failures in the United States reported during the past week, 4 more than the preceding week, 16 more than the corresponding week of 1882, and 50 more than the same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Business is very quiet.

From Boston, Mass.: In one or two leading departments there are indications of the starting up of the fall trade, but the general movement continues light, and no very marked improvement is looked for during July. From present appearances the conservative policy will be continued, but the outlook is favorable for a full legitimate fall business, and a gradual increase may be expected from this time forward. The banks have stiffened up a little on discount rates, but the demand for money is light, and the supply is ample for all calls. The range on prime business paper is 5@6 per cent. and factory notes are nominally 4@4½.

From Rochester, N. Y.: Jobbers in all lines report business quiet.

From Cleveland, Ohio: The weather throughout the week has been hot, and the usual mid-summer dullness is the chief feature in the general jobbing trade, though in most lines the volume is fairly up with the July business of other years.

From Toledo, Ohio: Trade keeps up well in all lines and collections are better than thirty days ago. Money is easy; interest 6 to 7 per cent; exchange one-tenth of one per cent.

From Evansville, Ind.: Trade fair in wholesale lines; retail only medium.

From Indianapolis, Ind.: Trade presents no new features and is not very brisk. The weather is rather stormy. Interest is 7 to 8 per cent. and exchange at a slight premium.

From Louisville, Ky.: Trade generally is quiet, but good for this month. Salesmen are starting out and early fall orders are coming in in certain branches. The Southern Exposition buildings have been accepted as complete by the management, and exhibits are pouring in. All features are being successfully handled, and the enterprise is making a profound impression in business circles everywhere. August 1 is the opening day.

From St. Louis, Mo.: General trade is moderately active, with a noticeable increase of inquiry from the southwest. There is considerable mercantile demand for money to obtain cash discounts on eastern purchases, otherwise only routine business is doing at the banks. New York exchange is brisk at 80 to 90c. premium. Prime commercial bills are par.

From Chicago, Ill.: Money easy at 5@6 per cent. The supply largely exceeds the demand, and exchange is 60c. premium. Trade is quiet. There is a full average mid-summer demand for dry goods, furnishing goods, millinery and notions, and merchants say collections meet their expectations.

From Peoria, Ill.: With the exception of the implement dealers general trade here is quiet.

From Detroit, Mich.: In general lines of merchandise business is light. Collections are somewhat improved. Prospects for the fall trade are good.

From Burlington, Iowa: Retail trade is good for the season, and staples more steady. General trade movement has continued fair.

From Des Moines, Iowa: Retail trade in all lines quiet; wholesale trade improving.

From St. Paul, Minn.: In general trade there is a cautious feeling on the part of selling houses, though quietly manifested. Credits are kept within limits and purchases confined to actual needs. Collections are slow, especially in the Red river valley. The most prosperous section of the state is the southwest, but farmers there generally buy sparingly. Money is in light demand. Currency movements are limited. The mercantile demand for eastern exchange is moderate. Drugs are active. Standard groceries are moderately active and sales are less than anticipated a few months ago.

From Minneapolis, Minn.: A fair trade is reported, with moderate collections. Money active and firm at 10 per cent. Eastern exchange steady at 75c.@$1 per $1,000 premium.

From Lawrence, Kan.: Trade is quiet with no special features.

From Topeka, Kan. General trade rather quiet. Collections only fair.

From San Francisco, Cal.: General business is without special feature. Collections somewhat backward. Exchange is 7½c. premium.

From Baltimore, Md.: The usual quietness which characterizes the trade situation between seasons now prevails. No complaints are heard, and the volume of business appears equal to last year's at same period.

From Norfolk, Va.: Trade has somewhat improved. Wholesale grocers are quite active. Hats and caps and fancy goods dealers are replenishing for the fall trade. Large volumes of truck are daily shipped and prices rule low. Collections are moderately fair.

From Richmond, Va.: General business is slightly improving, with a favorable outlook.

From Savannah, Ga.: Quiet.

From New Orleans, La.: All lines are very dull. Coffee is dull.

From Jacksonville, Fla.: The health of the city is good. General trade is recuperating from stagnation and is more lively. The grocery trade is leading, and sales are steady.

From Nashville, Tenn.: Trade generally is better this week in all classes of business.

INDUSTRIAL.

The past week has witnessed several disturbances in industrial lines. Perhaps the most unfortunate was the refusal of some of the Pittsburgh railway coal-pit operators to accede to the rate of wages decided upon by arbitration under the new law recently passed by the Pennsylvania legislature. By some a renewal of the strike is feared. Only one-half of the operators have accepted the award of the tribunal, the rate being 3¼c. per bushel. In other pits work has been continued at 3c. Those operators who accepted the umpire's decision now want their miners to accept the 3c. rate also. Other pits are expected to shut down, and it is believed a general strike will be the result. Trouble has also been experienced in settling the wages question with the Springfield, Ill., bituminous coal miners. The basis of settlement is that 3c. per bushel shall be paid for mining and check weighing. The two mines which still hold out refuse to pay more than 2½c. per bushel, but it is expected that an amicable arrangement will be arrived at. The Bethlehem, Pa., Iron Company has shut down its works, which turns 2,600 men out of employment. This is meant to be a rebuke to the Amalgamated Association, the president of that body, as is asserted, having gone to the president of the company last week and demanded that a certain workman, who had been discharged for an offense he had given the company, be reinstated. This was refused and a strike ensued. The Bethlehem Company took this step believing that if overproduction is a cause of stagnation that the stoppage will improve the situation. The annual capacity of the works is 100,000 tons of Bessemer pig, made from local and foreign hematites and magnetic ores. The regular meeting of the Western Nail Association was held at Pittsburgh on June 4. It was decided to suspend operations in all factories for a month, beginning next Monday. The object of this move is to prevent any depression in prices. The card rate at present is $3.25 per keg.

INDUSTRIAL FEATURES.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: In industrial lines there is some activity, and foundries, machine shops and others in the department are working on full time. The can makers have had a dispute about wages, and a large number of hands are on a strike.

From Boston, Mass.: Labor in all the manufacturing districts is well employed, and the only real cause for complaint is the narrow margin of profits left for manufacturers and dealers. Aside from this, the situation is promising.

From Cleveland, Ohio: Mechanics generally are well employed.

BREADSTUFFS ABROAD.

There is not much that is new to report concerning the foreign breadstuffs market. The developments of the past week have, on the whole, favored a lower range of prices here, although strenuous efforts have been made by those receiving numerous private cables to bolster up values. The devastation of the locusts in southern Russia, the prevalence of cholera near the Suez canal, thus preventing the shipments of wheat from the far East to the United Kingdom, and the Red river (Minnesota and Dakota) region news bureau intelligence have all conspired to favor the bulls. The news from the agricultural regions abroad has, however, continued in favor of good crops in most European countries. The weather has remained favorable, and the supplies in London, Liverpool and elsewhere on the other side have been so plentiful that there has been no opportunity for any renewal of demand here. In the United Kingdom the weather has continued to benefit the crops. Business in breadstuffs has continued quiet and generally in favor of buyers. If anything, foreign wheats in the United Kingdom have been depressed, owing to the good supply. Best brands of flour are unchanged, but inferior grades are cheaper. English wheat is 5s. 3d. per quarter cheaper than at the corresponding time last year.

The London *Miller's Gazette and Corn Trade Journal* of June 25, states that the weather in Germany has been dull and wet, and there were complaints of rust in the wheat plant. There has not been much change on the week in wheat, but the tendency has been toward a decline. At Berlin wheat was unaltered on the spot, in spite of renewed purchases by Hungarian speculators. Only a small business appears to be doing. Hamburg is firm, but the South German and Rhineland exchanges tend in buyers' favor. In France the market deliveries of wheat have fallen off; no reduction in price has been made as a rule. Paris has admitted a fractional decline on flour. In Russia the northern ports continue to take liberal exportations of wheat and oats, England and the Netherlands purchasing rather freely, "owing" as the London *Miller* says, "to the excessive pretensions of American merchants." South Russian trade is freshening; Odessa, recently very dull, has been fairly active, especially as regards wheat shipments to the south of France. Increased deliveries are reported. The news from the continent is such that that from America remains discouraging to America, but has small influence on the course of British markets, which get supplies from other sources that make less and less the dependence of the United Kingdom on the United States. Those who have attended the British markets of the past week have found them very difficult to manage—foreign supply spoiling the home demand. English wheat samples are, however, scarce enough and heavy enough to be looked after, both condition and price, 44s. per 504 pounds, recommending them in competition with American and Russian. Confirmatory of this are the advices of the *Mark Lane Express* of June 25, which says, that "prices for south Russian, Indian and Persian wheats continue to decline, and have reached a low level as compared with other descriptions; otherwise quotations remain unaltered. Supply continues on an excessively large scale, the arrivals from Baltic ports being very heavy."

The amount of grain on passage as per Beerbohm's cable, July 12, 1883, was:

	Wheat, quarters.	*Maize, quarters.*
To the United Kingdom	1,775,000	390,000
Continent	450,000	83,000
Total quarters	2,225,000	470,000
Equal bushels	17,800,000	3,760,000

Compared with the previous week:

To the United Kingdom	1,825,000	380,000
Continent	470,000	120,000
Total quarters	2,295,000	500,000
Equal bushels	18,360,000	4,000,000
Increase bushels	.....	.....
Decrease bushels	560,000	240,000

AMERICAN WHEAT MARKETS.

The wheat markets since last Friday have in the main been unsettled and feverish. This was to be expected in view of the fact that the present week covers a very critical period in the life of the growing crop. There have been a number of causes of variation in prices, but conspicuously among them all has been manipulation by prominent speculating houses here and at Chicago. The surprisingly full and detailed information from southern Russia during the week would astonish any one at all familiar with the difficulty of getting information from that out-of-the-way region. Yet we have had very comprehensive reports of the damage done there by locusts to the growing crops, how the military was called out to help fight the pest and how whole tracts have been laid waste despite the efforts made to prevent it. This, together with the supposition that the British imports of Indian wheat would be stopped owing to the prevalence of cholera in Egypt and adjoining Asiatic countries have, conspired to infuse courage into the bulls on wheat in the New York and Chicago markets. But far-away Europe, Asia and African disturbances were not relied upon solely for support in an emergency of this kind. The Red river region in northern Minnesota and Dakota was brought to the rescue with a drift of dispatches as to the damage done by the prolonged drouth, the short, severe local rains, and the scalding effect of the hot sun. On this point special telegrams to BRADSTREET'S received yesterday, published elsewhere, do not confirm the speculative view made public. The preliminary report on the probable yield of wheat this year, published in BRADSTREET'S last Saturday, has attracted wide attention. In 1881, BRADSTREET'S preliminary estimate of the total wheat crop of the United States was close to 3 per cent. (short) of the final count (368,000,000 against 380,000,000 bushels), and in 1882 it was a little above 4 per cent. more than the Agricultural Bureau's final exhibit (525,000,000 against 504,000,000 bushels). The latter authority is unquestionably short about 8,000,000 bushels of the actual total in 1882 (principally owing to unaccounted gains in the south), which would make BRADSTREET'S estimate for 1882 less than 3 per cent. above the actual outturn—a degree of success (two years in succession) which is believed to be unequalled by any attempt heretofore made at crop reporting equally in advance of the harvest.

The receipts of wheat at tide-water for the week ending July 7 decreased from 407,828 bushels on June 30 to 846,964 bushels. The exports from the Atlantic ports for the week ended July 7 amounted to 837,709 bushels, against 966,346 bushels June 30. From September 1, 1882, to July 7, the exports of wheat from the Atlantic ports were 61,186,900 bushels, against 39,987,597 bushels in a corresponding portion of the preceding year, a gain of 21,199,303 bushels.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended July 7 amounted to 384,730 bushels, against 524,061 bushels in the preceding week, and the shipments to 444,761 bushels, against 574,655 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) July 7, as against the preceding week, showed a decrease of 820,422 bushels.

The course of the wheat market at New York, Chicago and Milwaukee, during the past week, has been as follows:

AT NEW YORK.	*July.*	*Aug*	*Sept.*	*Oct.*	*Nov.*
July 7	$1.12	$1.13½	$1.16	$1.18	$1.19¾
July 9	1.11	1.12½	1.15	1.16⅞	1.18¾
July 10	1.12	1.13¾	1.16¼	1.18	1.19⅞
July 11	1.12	1.13¼	1.15¾	1.17½	1.19¼
July 12	1.12	1.13⅜	1 16	1.17¾	1.19¾
July 13	1.12	1.13¾	1.16	1.17¼	1.19¾

1 P. M.	AT CHICAGO. *July.*	AT CHICAGO. *August.*	AT MILWAUKEE. *July*	AT MILWAUKEE. *August.*
July 7	$1.00	$1.02⅜	$ .99¼	$1.01⅜
July 9	.97⅜	.99¾	....	....
July 10	.99	1.00⅜	.97⅛	.99⅛
July 11	.98½	1.00⅛	.97¼	.99
July 12	.98⅜	1.00	....	....
July 13	.99¼	1.00¼	.98¼	1.00

INDIAN CORN.

The bull movement in wheat during the past week, aided by the agencies enumerated above (in addition to the reports of heated corn put in circulation here in New York), induced a certain amount of sympathy from corn, and during the first half of the week particularly prices varied rapidly, with a general tendency to a fractionally higher range. The Agricultural Bureau report given out during

the earlier part of the week was so favorable for corn as to heavily handicap this state of affairs, but for the time being the market was in the hands of a prominent bull clique, which has succeeded in having a marked effect on prices for several days past. The Agricultural Bureau report on Indian corn was not, however, so surprising as that concerning wheat, which was an unexpected jump ahead in the matter of an estimate as to the wheat yield, considering the preceding reports from that source, the total for wheat being 425,000,000 bushels. The statistical position of Indian corn during the week has been as follows:

The receipts of Indian corn at the Atlantic ports for the week ended July 7 were 1,154,960 bushels, against 2,282,183 in the preceding week, while the exports from the same points amounted to 986,181 against 914,124 bushels. From September 1 last to July 7 the exports of Indian corn were 39,076,626 bushels, against 25,283,672 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, July 7, had decreased 729,455 bushels as compared with June 30. The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending July 7, were 1,618,406 bushels, against 1,673,690 the week preceding, and the shipments were 2,143,592 bushels, against 1,573,167 in the preceding week.

The closing prices of Indian corn at New York and Chicago for the past week were:

	At New York.				Chicago, 1 p.m.	
	July.	Aug.	Sept.	Oct.	July.	Aug.
July 7	.60	.61	.61¼	.63	.51⅞	.51⅜
July 9	.58½	.59⅜	.60⅞	.62	.49¾	.50
July 10	.60	.60⅞	.62	.62½	.50¾	.51¼
July 11	.59¾	.60¼	.61⅜	.62⅜	.50⅛	.50⅜
July 12	.59¾	.61	.62	.63	.51⅜	.51⅜
July 13	.58¼	.60½	.61⅞	.62¾	.51¾	.52

The closing prices of breadstuffs in New York last evening, as against those of the Friday preceding and the corresponding date last year, were as follows:

CLOSING PRICES OF BREADSTUFFS IN NEW YORK.

	July 6.		July 13.	
No. 2 flour	$2.62	@3.40	$2.65	@3.40
Superfine flour	3.25	@3.50	2.25	@3.00
Com. extra flour	4.00	@4.05	3.85	@4.00
West India shipping flour	5.75	@5.80	5.70	@5.75
South American shipping flour	5.40	@6.10	5.35	@6.05
Winter wheat, family flour	5.10	@7.10	5.00	@7.00
Winter wheat, patent flour	6.30	@6.50	6.25	@6.45
Spring wheat, straight flour	5.65	@6.65	5.60	@6.65

The visible supply of grain in the United States and Canada on the dates named was as follows:

	July 7, 1883.	June 30, 1883.	July 8, 1882.	July 9, 1881.
Wheat, bushels	18,593,493	19,418,915	9,624,412	15,619,976
Corn, bushels	12,336,529	13,065,984	6,388,650	15,528,581
Oats, bushels	3,709,137	4,005,007	1,615,628	7,465,147
Barley, bushels	898,299	481,922	72,943	171,611
Rye, bushels	1,713,509	1,837,911	677,800	128,661

THE BREADSTUFFS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: The grain market is dull, but firmer.

From Minneapolis, Minn.: The wheat and flour markets are dull and easier. Receipts of wheat at Minneapolis for the week were 241,000 bushels; product of flour at mills, 47,000 barrels. The jobbing trade is quiet. City jobbers and country buyers act with caution, owing to the uncertainty as to the outcome of the wheat crop.

From St. Louis, Mo.: Wheat and corn are stronger, but not well settled. Oats slow and weak, and declined again. The market is badly overstocked, and there is only a local demand in the trade.

From Chicago, Ill.: Wheat opened weak and is now firm, due to local manipulations. Corn is in steady demand and offerings are moderate. Receipts are fair. Oats are weak and declining under large receipts and small demand.

From Baltimore, Md.: Business in wheat was fair and prices ruled easy. New southern grades were in demand at good figures. Receipts were rather slack. Transactions in corn were limited and confined mostly to small lots of white southern. The inquiry for flour is fair and prices easy.

From Wilmington, N. C.: Breadstuffs steady. Grain quiet.

From Savannah, Ga.: Grain is practically unchanged—steady.

From Jacksonville, Fla.: There are full stocks of grain on hand—enough to meet present wants. Demand increasing.

From New Orleans, La.: Grain is without notable feature; flour is quiet.

From Memphis, Tenn.: Inquiry for corn continues good, while the market is bare of round lots. Bran is firm, with very little on the market.

From Nashville, Tenn.: Wheat is active and in fair demand.

THE GROWING GRAIN CROPS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: The wheat harvest in Kentucky is developing a light yield, as heretofore estimated. Other crop reports are good. Weather favorable.

From Chicago, Ill.: Crop prospects are good for all grains except wheat, and that is better than generally reported.

From Peoria, Ill.: The corn crop harvesting is a good average. The hot weather has decidedly benefited corn, which, with the exception of that in a few western counties, is looking fine.

From Burlington, Iowa: Favorable weather has benefited crop prospects and dealers are feeling more confident.

From Des Moines, Iowa: Crops of all kinds promise an average yield. Weather seasonable.

From Minneapolis, Minn.: Oats and barley promise a large yield; grass crop very heavy; corn is coming forward rapidly, and with late frost may make a fair crop.

From Topeka, Kan.: But a small quantity of new wheat has been marketed. The crop is generally estimated to be two-thirds of that of last year.

From San Francisco, Cal.: Wheat shipments for Europe have begun over the Southern Pacific. New crop wheat turning out above farmers' anticipations and prices are weak and lower; speculation in barley is active, and hops are weak at lower rates.

PROVISIONS.

The past week's trading in the leading hog products will be called highly satisfactory to those who happened to come out of it on their feet; to others it will hardly be regarded so favorably. It began with a rapid decline. On Monday prices broke $1 on pork and about 30c. on lard at Chicago and proportionately as bad here. This was continued on Tuesday. About the only reason which can be assigned for this is an active onslaught on the part of the bears combined with free receipts of hogs at western packing centers. The latter fact comprises probably the only real cause. There were also rumors of yellow fever at the south, and the belief gained ground, as was intended it should, that the southern market for hog products would thus be curtailed. The effort was well planned, and the short interest should have realized handsomely. Subsequently the market recovered a good share of the decline, but the heavy receipts of hogs at the west prevented anything like firmness. The home demand has been fair, but somewhat restricted. Prices abroad have again declined on the week. Lard was firmer at the close on Friday at New York. In pork there was not much doing. The reported action of the British Parliament in restricting the importation of American cattle had much to do with the weakness shown in provisions during the week.

Prices of western steam lard and spot mess pork at New York during the week closed as follows:

	July 7.	July 9.	July 10.	July 11.	July 12.	July 13
Lard, July	$9.40	$9.25	$8.90	$8.90	$8.55	$8.60
Pork, spot mess	17.12½	16.75	16.00	15.25	15.50	15.25

The export of hog product from the following places for the week ending July 7, 1883:

	Pork, barrels.	Bacon, pounds.	Lard, pounds.
New York	2,970	2,803,524	3,825,536
Boston	307	1,019,240	1,514,889
Portland	..	....	....
Montreal	1,104	434,360	885,060
Philadelphia	..	900,000	5,000
Baltimore	..	....	219,120
New Orleans	..	....	....
Totals	4,381	5,157,131	6,449,605
Previous week	2,261	5,313,267	4,997,432

The total exports of hog product from the abovementioned places from November 1, 1882, to July 7, 1883, were as follows:

	1882–83, pounds.	1881–82. pounds.
Pork	32,500,200	37,966,800
Bacon	289,856,170	301,446,559
Lard	166,068,125	180,110,559
Totals	488,424,495	519,553,918

PROVISIONS.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: The provisions markets are dull, and prices generally lower. Additional activity is anticipated in freight at an early date.

From Louisville, Ky.: Provisions are dull and nominal.

From St. Louis, Mo.: Provisions are quiet, unsettled, and transactions light. Cattle and hog yards are crowded, and receipts continue unusually large. Prices are sharply downward, and the market is verging on demoralization.

From Chicago, Ill.: Hogs are weak and lower. Provisions opened unsettled and closed with better feeling. It is the impression that the worst is past, but no permanent reaction of consequence is looked for until consumers buy more freely.

From Des Moines, Iowa: Provisions are in good supply, and prices weak.

From Topeka, Kan.: Provisions unchanged.

From Wilmington, N. C.: Meats are declining.

From New Orleans, La.: Provisions are drooping, in sympathy with western markets.

From Memphis, Tenn.: Meats are a shade higher.

From Nashville, Tenn.: Cattle market active, with good prices.

PRODUCE MARKETS.

[By Telegraph to BRADSTREET'S.]

From Memphis, Tenn.: A slight change has been noted in potatoes. Dealers now pay 60c. to 75c. per barrel per wagon-load. Apple shipments are light, owing to a short and inferior crop.

From Louisville, Ky.: Produce is brisk with an active northern demand for potatoes, cabbages and onions. The supply is liberal and quality fine.

THE NEW YORK DRY GOODS MARKET.

There is some improvement shown during the past week in the demand from first hands, though trade cannot by any means be called active. There are quite a number of buyers in the market but they are proceeding very carefully in their purchases. It is generally believed that trade for the ensuing season will be good; it is argued that it ought to be on account of the crops being abundant. It must be borne in mind, however, that the retailers all over the country carried good stocks over from last fall, and that the spring trade has not been a very profitable one. Interior jobbers are believed to be low stocked and in good condition to purchase considerable goods if there should be sufficient demand made from the retailer to clear him of last fall's stock.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

From London, Eng.: Manchester cotton is doing a small business; cloths and yarns are rather better, but prices on both are but little changed. Liverpool much improved in tone early in the week. There has been good demand for American at slightly firmer rates, but the market is now weaker. Sales are pressed owing to reports from the United States.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The jobbing business in dry goods continues quiet, and no effort will be made to start trade until August. Agents have made the first start toward opening the fall trade. Prices of cotton flannels and dark prints have been fixed and some orders taken, but so far most of the business in these articles has been with a few large western buyers who are anxious to get early supplies for distribution. Boston jobbers are not yet stocking up. All kinds of woolen fabrics move slowly.

From Providence, R. I.: The print cloth market is very dull, the amount of sales being light; 64s are quoted at 3⅝c. less ½ of 1 per cent., and 56x60s at 3⅛c. There are about 160,000 pieces on hand.

From Rochester, N. Y.: Trade in dry good is reported very light both in jobbing and retail departments, and the same will in all probability not improve for six weeks or more.

From Pittsburgh, Pa.: The demand for dry goods continues fair for the season, but has slackened up somewhat. Collections reported satisfactory.

From Cleveland, Ohio: The dry goods trade is about as usual during July, a fair amount of business being done.

From Columbus, Ohio: The trade in dry goods is somewhat better than last week, and in excess of the like week in the previous year, although, as is always the case for this month, business is a little quiet. Collections fair.

From Louisville, Ky.: Some fall orders are being received for dry goods, and an active season is looked for.

From St. Louis, Mo.: Dry goods are in excellent summer sale, with no special break in values.

From Detroit, Mich.: In dry goods business is seasonably dull.

From Burlington, Iowa: The dry goods trade shows a fair improvement, and a good line of orders have been filled.

From St. Paul, Minn.: Dry goods is enjoying a fairly good trade on traveling men's orders for summer stuffs. Personal buying is limited. There is a little order trade in fall goods. The demand is mainly from the southwest. Mosquito netting is active and has advanced again. Notions sales are well sustained. General business is not equal to last season.

From San Francisco, Cal.: Country orders in dry goods are coming forward freely. The local demand is good for the season.

From Baltimore, Md.: Jobbers are filling a few orders, and looking forward to a fair fall trade Commission merchants have been holding their own, but think there is room for much improvement. Prices rule steady, and collections are reported fair.

From Memphis, Tenn.: The dry goods trade has somewhat improved.

From Norfolk, Va.: Jobbers are replenishing for the autumn trade.

From Galveston, Tex.: Dry goods and general jobbing fair for the season.

From Peoria, Ill.: In the dry goods trade it is reported only fair sales are made on orders.

From Topeka, Kan.: Dry goods are quiet, but in very fair demand for the time of the year.

From Jacksonville, Fla.: Dry goods have improved lately in wholesale and retail lines. Country buyers are now coming in to replenish stocks. The prospects for the fall trade are encouraging.

From Richmond, Va.: Dry goods trade has tendency to improve.

From Savannah, Ga.: No change.

From Wilmington, N. C.: Dry goods are fairly active.

THE CLOTHING MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: In the clothing business trade is at a standstill, and most of the salesmen are off on vacations. The workshops, however, are full of active hands and preparations are in progress for a large business in the autumn.

From St. Paul, Minn.: June sales of clothing were less than last year, but are now slightly increasing. The moderate demand is mostly for lighter weights. Buyers are cautious and sellers restricting credits in short-crop sections.

COTTON.

The market for spot cotton at New York for the week showed no material change, except on Thursday, when there was a stronger demand for home use, and it is said that some 2,500 bales were sold for export which were not reported to the exchange, but on Friday the market was again dull, with no demand to speak of. The sales for the week are as follows: For export 743 bales, for consumption 2,591 bales, and for speculation 51 bales. The total sales foot up 4,634 bales, against 736 last week. Deliveries on contract amount to 1,300 bales. Prices have been lower, middling uplands closing last night at 10 1/16c., against 10¼c. a week ago.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	Last week.	Last year.
Ordinary	7⅛c.	7 5-16c.	10 3-16c.
Strict ordinary	7 9-16	7¾	10¾
Good ordinary	8⅜	8 6-16	11 9-16
Strict good ordinary	9 1-16	9¼	12
Low middling	9 9-16	9¾	12 7-16
Strict low middling	9⅞	10 1-16	12 11-16
Middling	10 1-16	10¼	12⅞
Good middling	10 7-16	10⅝	13¼
Strict good middling	10 11-16	10⅞	13½
Middling fair	11 3-16	10⅞	14
Fair	11 15-16	12⅛	14¾

STAINED.

	This week.	Last week.	Last year.
Good ordinary	6 9-16	6¾	9¾
Strictly good ordinary	7⅜	7 9-16	10¼
Low middling	8 1-16	8¼	11 7-16
Middling	9 3-16	9⅜	12 7-16

The market for spot cotton closed dull.

The market for futures during the first part of the week was dull, with prices falling from day to day, but on Thursday a change for the better occurred and a more cheerful feeling prevailed. The ruling opinion seemed to be that prices had reached bottom and that a reaction must set in, but on Friday prices again fell back, the market closing steady. The sales for the week aggregated 470,200, against 573,000 for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	Last week.	Last year.
July	10.02	10.06	12.73
August	10.10	10.16	12.76
September	9.98	10.01	12.46
October	9.81	9.80	11 85
November	9 72	9.70	11.69
December	9.74	9.73	11.69
January	9.82	9.81	11.80
February	9.93	9 93	11.02
March	10.03	10.03	12.04
April	10.15	....	12.17

The market for futures closed steady.

The southern markets have been quiet. Below will be found the sales for the week and the closing quotations for middling uplands at seven leading ports as compared with last year's quotations:

	Week's sales	To-day.	Last year.
Galveston	506	9⅞	12½
New Orleans	4,605	9⅞	12⅛
Mobile	1,050	9⅞	12⅜
Savannah	400	9⅞	12
Charleston	30	10	12¼
Norfolk	1,275	9⅞	12⅜
Baltimore	1,090	10	12⅛

The total at each port since September 1 is as follows, compared with the total to the same date last year:

	This year.	*Last year.*
Galveston	831,498	422,676
New Orleans	1,657,894	171,830
Mobile	310,840	262,799
Savannah	809,562	724,533
Charleston	565,470	495,265
Wilmington	128,726	133,216
Norfolk	793,954	604,804
Baltimore	79,542	35,639
New York	151,629	168,545
Boston	190,027	228,245
Philadelphia	97,097	80,205

Below will be found the receipts for each day of the week ending Friday, July 13, at eleven leading ports, as compared with last week and the same week one year ago:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	559	256	919	225	229	912
New Orleans	651	281	1,536	271	692	696
Mobile	2	57	....	26	....	69
Savannah	77	136	45	24	227	129
Charleston	12	22	4	32	6	17
Wilmington	....	3	3	....	1	....
Norfolk	91	47	70	15	96	46
Baltimore	....	108	285	90	....	225
New York	....	....	....	13	....	....
Boston	92	23	24	....	....	252
Philadelphia	142	235	....	223	427	261
Totals	1,626	1,168	2,886	919	1,678	2,607
This day last week	1,155	3,190	2,287	1,719	829	2,432
This day last year	1,221	586	1,006	863	687	1,636

The total receipts at the ports for the week were 11,000 bales, against 11,839 last week and 6,771 for the corresponding week last year.

The receipts at the twenty-four interior towns usually reported were about 2,694 bales, against 2,009 bales last week and 1,657 bales for the corresponding week last year. The shipments for the week were 7,813 bales, against 6,595 bales last week and 7,081 bales for the corresponding week last year. The stocks for the week were 59,603 bales, against 66,444 last week and 33,804 for the same week last year.

At Liverpool the market for prompt delivery uplands has been dull and easy, with a moderate inquiry, which has been freely supplied. Quotations closed last night at 5½d., which was the closing price one week ago. The market for futures has been dull and fairly steady; prices closed a trifle lower than last week.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year*
July	5 27-64d.	....	6 57-64d
July-August	5 27-64	5 31-64d.	6 57-64
August-September	5 30-64	5 35-64	6 59-64
September-October	5 32-64	5 36-64	6 59-64
October-November	5 28-64	5 34-64	6 39-64
November-December	5 28-64	5 33-64	6 30-64
December-January	5 29-64	5 34-64	6 37-64

The sales for the week at Liverpool were 47,000 bales (of which 35,500 were American), against 72,000 (of which 42,000 were American) last year. The sales for export were 3,900 bales, against 9,000 bales last year. The sales for speculation were 1,800 bales, against 12,000 bales last year. The amount forwarded was 10,000 bales, against 11,500 bales last year. The stock in port is 995,000 bales (of which 742,000 are American), against 828,000 bales (of which 487,000 were American) last year. The total imports for the week were 43,500 bales (of which 35,000 were American), against 59,000 bales (of which 46,000 were American) last year, and the amount afloat 196,000 bales (of which 50,000 are American), against 238,000 bales (of which 35,000 were American) last year.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The cotton market is very quiet and sales are small. Middling uplands are worth 10⅝c. and middling gulfs 10⅞c. The stock on hand is about 6,000 bales.

From St. Louis, Mo.: Cotton is irregular and lower. Daily receipts better than last year. New cotton is expected here speedily.

From Baltimore, Md.: Only a few inquiries are making in the cotton market, and the demand continues small. Some 425 bales were lately sold at 9⅞@10c.

From Louisville, Ky.: Cotton is dull and weak.

From Wilmington, N. C.: The cotton market is inactive; receipts small.

From New Orleans, La.: Except to-day the movement in spots has been quite small and the market has declined ⅛c. since last Thursday. The sales of futures were moderate. The summer months continue to be manipulated and show a slight advance. The fall months are little changed.

COTTON CROP REPORTS.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: The weather is hot with occasional rains. The cotton plant is healthy, but there has been some trouble from grass.

From Columbia, S. C.: The past week has been very seasonable and well suited to the condition of crops of all kinds. There has been plenty of rain and a warm sun well suited to cotton, and the condition is as good as usual at this season of the year. In some sections the cotton may be a little backward, but not much. Upon the whole prospects are from fair to good.

From Savannah, Ga.: The outlook for the new cotton crop is reported encouraging.

From Galveston, Tex.: The weather continues warm with good rains, which have been pretty general during the past week. Crop prospects at this time are excellent.

WOOL.

The Boston wool market this week has been more active than for some time past, and in prices there is no change. The receipts of Ohio, Michigan and other western wools have been large, and receivers are free sellers. The transactions of the week have been 2,759,900 pounds of all kinds. Ohio fleeces have been sold to some extent at 36@37c. for X, and 38@39c. for XX, with some XX as low as 37@37½c. In Michigan wool there have been further considerable sales at 34@35c. for X, largely at 34c., which is all that buyers are willing to pay for good average lots. Combing and delaine fleeces have been in demand, and sales to some extent at 38@40c. for fine Michigan and Ohio delaine, and 42@43c. for No. 1 combing. Unwashed fleeces have been in demand and have been selling principally at 23@28c. per pound for fine and medium, with choice selections higher. In California spring sales of 300,000 pounds at 22@30c. per pound. Pulled wools have been in demand, and sales of common and good supers at 25@38c. per pound, and 40@44c. for choice and fancy lots. Foreign wool has been quiet, and no sales of any importance. Carpet wools, particularly, are very dull.

IRON.

The iron markets of the country fully maintain the firmness reported last week, but beyond this there is little to report. The pig iron market continues to favor holders, and the advanced rates for best grades of foundry are well held. The business transacted, however, has not been noticeably large. The jobbing orders usually received at this time of the year have been received punctually, but there has been no new spurt, excessive or unseasonably good demand. The latter half of the year in this department of trade is, however, very generally far in excess of that occurring in the first six months, and dealers confidently look ahead to a fall revival in transactions in pig. The turn has been made, the decline overcome, and with the making known of the autumn's naturally increased requirements it is believed that a fairly profitable business will result. Scotch pig irons have held the firm position noted last week. If anything prices on the whole have received a slight advance, more particularly noticed in inferior brands. The arrivals of Scotch iron at this port during the week have aggregated about 1,200 tons, and sales to arrive have amounted to about the same. There is no gain in bar iron, and nothing new to record concerning steel rails.

THE BRITISH IRON MARKET.

[By Cable to BRADSTREET'S.]

From London: At Glasgow and Cleveland pig is steadier; shipments are good. There is a fair continental demand expected.

IRON.

[By Telegraph to BRADSTREET'S.]

From Pittsburgh, Pa.: Trade in manufactured iron continues very dull, although manufacturers seem a trifle more hopeful as to the future. A reduction equal to $4 a ton on hoop and band iron was made July 10. Notwithstanding there is a continued good demand for nails the Western Nail Association has ordered a shut-down of thirty days, commencing July 15, in order to restrict the production. In pig iron the situation seems unchanged, and holders believe prices will be better and there is a disposition to wait for an advance. The ruling prices for gray forge iron are $17.50 to $18.50, four months, and foundry $20 to $21.

From Cleveland, Ohio: The iron markets are substantially the same as at the beginning of July, though in some quarters a better feeling regarding the outlook is noted and the tone of business a trifle stronger.

From Louisville, Ky.: Pig and bar iron in fair inquiry and moderate consumptive demand; prices steady and feeling firmer.

From St. Louis, Mo.: Manufactured iron is quiet and steady. Dealers feel confident of a good trade after harvesting. Pig iron is selling only for immediate use and is duller.

From Chicago, Ill.: Building and miscellaneous hardware is in moderate demand to fill small orders. Stocks are well cleaned up. Bar iron is slow; sales are restricted to small bills and the wants of the interior trade. Structural and especially all classes of wrought goods employed in railroad building are in fair demand. The trade in merchant bar is unsatisfactory. Nails are weak. Pig iron receives rather more attention from workers, who are without stock and compelled to buy to supply current wants.

From St. Paul, Minn.: Hardware is very lively and dealers are very busy day and night filling orders. Nails are lower. Bar iron is enjoying a moderate trade.

From Detroit, Mich.: Iron shows no special change. Prices are firm and the prospects are materially improved.

COAL.

Since the August advance comparatively little new business in anthracite has been transacted, as dealers had stocked well up with coal at preceding rates. This was to be expected. The anthracite coal trade on the whole is regarded as being in a very healthful condition, and stocks were moving into consumption with a fair degree of rapidity. In the east the coast line trade has fallen away somewhat since the close of June. The activity noted in that quarter during the concluding portion of that month was due, of course, to the expected advance and the consequent storage of coal. At the west the increased business in hard coal continues to be excellent, and prices realized are on an average about 25c. per ton in excess of those obtained in coal sent east. So long as this continues heavy shipments to the west may be expected. The last instalment of half time at the mines under the original agreement has taken place, and it is now regarded as extremely doubtful whether any more restriction will be ordered during July. There is, however, no good reason for supposing that an additional agreement may not be entered into which, late in the year, in case of necessity, may not result in restricted working time. The outlook, however, is for a good demand during the year, and leading operators believe that over 30,000,000 tons will be mined. It will be recalled that BRADSTREET'S some weeks ago made a careful estimate placing the probable production of Pennsylvania anthracite coal in 1883 at 30,500,000 tons. An associated press telegram received in New York yesterday morning states that it was reported that the Reading Coal & Iron Company had disposed of all its coal and is refusing orders. The supply at Port Richmond is 37,000 tons, against 52,000 tons at the same time last week. A canvass of the views of leading operators in New York yesterday did not find any who regarded favorably the intelligence conveyed in the dispatch. The source whence it came, as one well informed coal producer stated, of itself casts doubt upon the statement. As to the stocks at Port Richmond no views were offered in opposition to those given. But the idea that the Reading Coal Company is refusing orders is not believed here.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The coal market is quiet and steady, and sales are moderate. Prices remain unchanged. The stock on hand is small. Collections are reported fair.

From Chicago, Ill.: Hard coal firm; bituminous is steady.

PETROLEUM.

The consequence of the withdrawal of the big Wall street clique from the oil market, noted last week, has been shown in the course of prices of certificates of crude during the past few days. They have gone down. Saturday was about like the day preceding it—a dull featureless market. Monday and Tuesday were also lifeless. Variations were excessively fractional and the enforced calmness rather presaged the bear whirlwind which blew down quotations on Wednesday and Thursday. There has long been a very powerful combination operating for lower prices. For reasons heretofore stated in these columns this is currently believed to consist of the Standard Oil Company people. Their position with reference to refined oil just prior to the Wall street boom in oil was evidently without thought of a rise in prices of crude, and they fought the party from Wall street stubbornly. From various sources, however, it is learned that the excursion of Wall street speculators into the petroleum exchanges was a very successful affair. It is commonly reported, furthermore, that having oil sufficiently in control to hoist prices at will that that act was prevented only by the big bears calling on the big bulls and settling. The withdrawal of these so-called outsiders left the short interest in petroleum counterbalanced with the odds and ends of buyers at various cities. The turn has come. When some ease in the position of refined is obtained the present situation will have terminated and a new deal in oil will be in order. But there is no telling whether the so-called end is yet, or not.

As indicated above there was not on Friday, nor yet had there been previously during the week, anything in the statistical position of petroleum, nor in the way of bear "news" from the producing regions, to induce a lower range of prices; yet lower prices came. By many this was alleged to be due to free selling—to that and that alone. There is little if any doubt that this explanation is correct; yet it in no way conflicts with the explanation of the general speculative manipulation of the crude oil market during the past month or more—as shown above. The market at New York opened yesterday morning at $1.08¾; at noon it closed at $1.07¾, and opened again, at 1:30 P.M., at $1.07⅞. Within fifteen minutes it had advanced to $1.07⅝. At the close it registered $1.08, against $1.14⅜ at the close last week Friday, a decline of 6⅜c. on the week. The market at the close was very nervous and irregular. Wm. F. Sauer, of No. 43 New street, failed yesterday and 32,000 barrels were sold for him under the rules.

The following shows the fluctuations in prices of certificates of crude petroleum during the week ended last evening:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday, July 7	1.14⅜	1.14⅞	1.13⅛	1.14⅜
Monday, July 9	1.14⅜	1.14¾	1.13¼	1.14⅜
Tuesday, July 10	1.14⅛	1.14¼	1.13⅛	1.13⅞
Wednesday, July 11	1.13	1.13	1.11⅛	1.11⅞
Thursday, July 12	1.10¾	1.12⅛	1.08⅞	1.09
Friday, July 13	1.08¾	1.09½	1.06½	1.08

Refined continues dull. A cut of ⅛c. was made on Thursday, but resulted in no business. The foreign situation is not improved, and buyers are considerably behind holders in their views. There are no features to note in the various petroleum products.

The quotations for certificates of crude petroleum and of petroleum products last evening, as against those at the close of the four preceding weeks, are as follows:

	June 15.	*June 22.*	*June 29.*	*July 6.*	*July 13.*
Certifi's, crude	1.19½	1.16⅜	1 18	1.14⅜	1.08
Refined, 110°	7¼	7¼	7¾	7¾	7⅞
Refined, 70°	7⅞	7⅞	7⅞	7⅞	7½
Crude, in bbls	7¼@7⅞	7¼@7⅞	7@7¾	7@7¾	6¾@7½
Case, plain	9½	9½	9⅜	9⅜	9⅜
Naphtha	5¾	5¾	5¼	5¼	5¼

The exports of petroleum from the United States, crude equivalent, for the week ending July 7, was 17,740,881 gallons, all being from New York city. The total export from the United States since January 1 was 317,173,458 gallons, against 336,318,438 gallons in the corresponding portion of 1882, a decline in the current year of 19,144,981 gallons.

The total stocks of all pipe-line consignments June 30 aggregated 35,984,227 barrels, and on May 31, 35,642,285 barrels, an increase during June of $41,982 barrels.

OCEAN FREIGHTS.

[By Telegraph to BRADSTREET'S.]

There has been but a moderate business in ocean freights in any line during the week. In grain the transactions have been very light. Such as has gone abroad has been by regular steamship lines, and at rates averaging about 3½d. to Liverpool, and 4d.@4½d. to London. Petroleum, which has of late been the mainstay of the market, has fallen away, as the unsettled state of the market for crude has served to deter still further foreign buyers from competing for cargoes. The bids from houses from the other side for petroleum cargoes have been considerably below—at times over ¼c.—the quoted prices for refined, and not even that cut in quotations made on Thursday served to bring about any more business on foreign account. The outports are not doing any business in ocean freights to specify.

OCEAN FREIGHTS.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: There are no changes to report in ocean freights.

From Wilmington, N. C.: Freights: Foreign are firm and tonnage is wanted. Coastwise are quiet.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: Trade has improved since the holiday, and the movement is fully as large as usual at this season. Some manufacturers claim that the orders coming in are not as large as last year, but all are well employed and have all they can attend to for several weeks to come. In Lynn and Haverhill there is a scarcity of female help, and there is no surplus of labor in any of the shoe towns. The boot and shoe business, as a whole, is in a prosperous condition, though not yielding large profits. Shipments continue on a liberal scale, and for the week foot up 58,387 cases.

From St. Paul, Minn.: Boots and shoes are

quiet. Sellers are waiting for the crops to be harvested. Traveling men are now in, but preparing for an early start.

From Norfolk, Va.: Boot and shoe jobbers are engaged in filling up stocks for the fall trade.

From Memphis, Tenn.: The boot and shoe trade opened up a month earlier than last year, with large and increased sales.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Whiskies are dull and steady; the decision regarding the export feature has not affected the market.

From Peoria, Ill.: The distilling business is very light, with a very few cattle feeding.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: The tobacco market continues very active, but receipts are very small. Desirable samples find ready sale at firm prices.

From Louisville, Ky.: The leaf tobacco movement is very large and offerings are readily sold. Prices are generally firm. White burleys are somewhat higher than last week. Dark grades are steady for manufactured tobacco. The rush following the tax reduction is over and a small current of business is doing at steady figures.

From St. Louis, Mo.: Buyers and sellers are apart on tobacco and sales are trifling.

From Wilmington, N. C.: Tobacco crop reports are favorable, and the market is steady.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Cleveland, Ohio: There is much building in progress throughout the city. Lumber and building are in good demand.

From Minneapolis, Minn.: A large percentage of the logs cut last winter are hung up in small streams, and, unless there is an unusual amount of rainfall, will not come out in season for this season's manufacture; enough, however, are in sight to supply local mills. Higher grades of lumber rule firm; common, shade lower.

From St. Paul, Minn.: Lumber is comparatively slow. The country demand has been retarded by crop doubts. The city business is small for the season.

From Wilmington, N. C.: Timber firm; receipts light. Lumber quiet; shingles firm.

NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Savannah, Ga.: Market continues steady.

From Wilmington, N. C.: Spirits of turpentine are steady and the demand is good. Rosins and crude turpentine are steady. Tar easier.

ASIATIC AND AUSTRALIAN ADVICES.

[By Telegraph to BRADSTREET'S.]

From San Francisco, Cal.: China and Japan commercial advices are without special feature. Australian and New Zealand advices are favorable. Trade is active in the British colonies.

THE CHICAGO TRADE SITUATION.

[Special Correspondence BRADSTREET'S.]

Chicago, July 11.—Business may be said to be suffering from an annual attack of mid-summer dullness. There is, however, an average volume of general trade for the season, hence no complaint can be made as to aggregate footings, whatever may be said as to the profits, which are supposed to compare with the same time during the two preceding years. Yet this is not saying much, as the bulk of the business transacted during July seldom returns very large gains. The banks say the demand for money is much above the usual summer average, the increase in loans being chiefly due to large stocks of grain and provisions held on speculative account, the aggregate footings of the former being 9,394,000 bushels, against 2,249,000 at the same time in 1882. There is also a large amount of funds employed in miscellaneous lines of business, but the banks are well supplied with money, their deposit lines being large, and desirable paper is readily taken at 5@6 per cent. New York exchange is in demand; the amount being made by shippers is small, and rates firm at 70@75c. premium per $1,000. This condition is not likely to last more than a fortnight at least, as the new crops of small grain will soon begin to move in sufficient quantities to cause a flow of money from the city to the country, and reverse the position of the exchange market. The grain markets are nervous and values greatly unsettled, the position of the wheat market being the reverse of satisfactory to those who desire to do a legitimate trade. Prices are governed almost exclusively by advices regarding the growing crops, and they are so conflicting in character that it is difficult to form correct estimates as to the general result. But should the spring wheat crop in the northwest meet the early anticipations there is ample reason to think that the estimates in your last week's issue will prove more nearly correct than any that has yet been made. One of the most unfavorable features for an advance is the large stocks in store here, the aggregate being 6,000,000 bushels, nearly the entire amount being contract, or No. 2 and higher grades. Corn is arriving freely and the crop outlook is exceedingly encouraging for the largest yield ever known, but the shipping demand exceeds the receipts and the market remains fairly steady; the fear of a squeeze in August options also prevents the bears from selling that future with their previous freedom. Oats are dull and weak, the July options being about settled, and August deliveries are freely offered at 5@5½c. under the former. The provisions market is unsettled, and values have materially decreased since the opening of the month, the closing prices to-day showing a decline of $3.20 per barrel on mess pork, 65c. per 100 pounds on lard, and 80c. per 100 pounds on short-rib sides since July 1. The depreciation is purely the result of former speculative manipulations which forced prices far above their intrinsic value, and although pork has declined about $7 per barrel, lard 4c., and short-rib sides 4@4¼c. per pound, there is nothing in the present situation of the trade to encourage an opinion that any permanent improvement is likely to or can possibly occur; on the reverse, the promise of a large corn crop, and certainly of an increased supply of hogs as the year advances, in connection with the certainty of an unprecedented supply of high-grade beef cattle and mutton, guarantees reasonable prices for meats. The following shows the stocks:

	July 7, 1883, bush.	July 7, 1882, bush.	July 8, 1881, bush.	July 8, 1880, bush.
Wheat	5,995,000	1,036,000	4,208,000	2,947,000
Corn	2,212,000	1,044,000	1,727,000	1,133,000
Oats	524,000	84,000	3,610,000	433,000
Rye	642,000	70,000	30,000	12,000
Barley	21,000	16,000	32,000	7,800

The iron market is quiet and merchant bar is dull. Pig is meeting a little more demand for immediate consumption, workers being without stock. A number of large blast furnaces here and at other points in the northwest will also close within a few days, and the certainty of a decreased production encourages dealers in pig to look for a more satisfactory trade in the near future. Nails are in moderate supply and dull. Steel rails are selling fairly, but profits are small.

THE HARVEST YEAR 1882–83 ON THE PACIFIC COAST.

[Special Correspondence BRADSTREET'S.]

San Francisco, July 3.—The harvest year in California closed June 30, and although it is too early as yet to estimate the stock of old grain on hand, it is safe to say that it will be much less than usual. The hold-over stock of wheat and flour on July 1, 1881, represented 12,851,054 centals; at same date 1882 it was 3,180,875 centals. The harvest of 1880 was the heaviest yield ever before reaped, but, owing to low prices, the bulk of it was held over to 1881, which was a short year. The yield of 1883 will certainly be greater than that of 1880. This year 3,350,000 acres are returned as in wheat, while 1880 had only 2,837,000 acres. The late hot spell did about 10 per cent. damage to the whole crop, if so much, and threshing returns show the yield to be about the average in quantity and quality per acre.

California farmers are in the habit of underestimating the crop in the hope of hardening prices. They sometimes succeed this way in shortening the tonnage supply, thereby singeing themselves by the payment of higher freights to Liverpool, which is their great market. There is a fair tonnage supply at present, but should the Suez canal be closed for any considerable length of time, owing to cholera quarantine, there may be increased tonnage movement to India to transport the wheat crop more expeditiously around the Cape of Good Hope. This might sensibly reduce the tonnage available for the movement of our wheat and harden freights.

The export of wheat in 1882-'83 was 14,612,496 centals, valued at $25,331,709; in the preceding year the figures were: export, 22,187,392 centals; value, $36,376,117; decrease, 7,574,896 centals, worth $11,044,408. The wheat receipts from Oregon were 191,261 centals. Great Britain took the bulk of our wheat, the shipments thence in the year ended June 30, 1883, being 13,531,432 centals, worth $23,476,739. The average export price for the year was about $1.75 per cental. In March last the price touched $2.05 per cental. During 1880-'81 the average export price was $1.42; in 1881-'82 it averaged $1.64 a cental.

The introduction of the call system rendered speculation in grain much easier than under the old conservative method, but nothing very rash took place. Barley was the favorite line for speculation throughout the year, and there is now tied up under contracts a larger surplus of this grain than ever before, while the new crop to a certainty will be far in excess of that of any former year. Prices are now lower, which stimulates export. The high range of speculative prices at the Produce Exchange almost checked the movement of barley east by rail, and the operation of the new tariff, favoring Canadian barley, will probably shut off the eastern demand in the future. The first of the new crop of barley was delivered June 25; new wheat was sold in this city on June 19.

There was a noticeable increase in the receipts of flour at tide-water thus:

1881–82	761,578 bbls.
1882–83	901,387 "

As great additions are being made to our milling capacity, it follows that the present year will witness further development in this direction. The export of wheat to foreign countries last harvest year was 1,097,107 barrels, worth $5,601,166, compared with the previous year, which showed an export value of $4,169,925. Oregon sent up 77,556 barrels flour; but toward the close of the season we shipped a considerable quantity of seed-wheat and breadstuffs to that state. The largest buyer of California flour was Great Britain, which took 643,244 barrels, worth $3,283,533. Hong Kong and China took 274,214 barrels, worth $1,358,550; Japan, 10,592 barrels, valued at $56,780; Hawaii, 33,551 barrels, worth $184,565; and Central America 77,166 barrels, value $422,300.

As already stated, the yield of wheat this harvest will exceed that of 1880 in California. There are those who put it largely in excess, but it is better to take a conservative view of the case. From Oregon and Washington Territory advices are not so favorable, and despite increased acreage it is doubtful whether the export surplus will exceed that of last season. This is owing to the long spell of dry weather following a remarkably unfavorable spring, which necessitated resowing in the Willamette valley, and to the influx of population very sensibly increasing the local demand. Later advices may modify this opinion for the better, but at present it is only safe to set down the northwestern part of the Pacific coast at last year's export surplus.

SOUTHERN PROSPERITY.

The *Courier-Journal* of Louisville has the following: Railroad earnings are now considered about the best index of the condition of business that we have, and it is pleasant to record the fact that the southern roads, almost without exception, show increased earnings, and in some instances the increase is marked.

A recent number of the *Railway Gazette* has a long article analyzing the returns for May. These show in the east a slight change for the worse, in the country north of the Ohio a decided decline, in the country west of Chicago an increase which lacks much of keeping pace with the mileage, in the far west a decided falling off, in the southwest and on the lines west of St. Louis a decided increase, and a still more decided increase on lines south of the Ohio and Potomac.

The *Gazette* continues: "Not a few, among which are the Alabama Great Southern, the Central of Georgia, the Charlotte, Columbia & Augusta, the Chesapeake & Ohio, the Chicago & Alton, the Cleveland, Akron & Columbus, the Eastern, the Flint & Pere Marquette, the Hannibal & St. Joseph, the Illinois Central in Iowa, the Louisville & Nashville, the Memphis & Charleston, the Norfolk & Western, the Northern Central, the Richmond & Danville, the St. Louis & Cairo, and the South Carolina have larger earnings per mile this year than in any other year for which we have reports. Except where there has been increase of capital, therefore, these roads must be doing decidedly well, and at all events their business shows a satisfactory growth." This is based on the May earnings, and it is thought the June earnings will show even a better condition of affairs.

One of the best features of this exhibit, one which shows that population is increasing and that the people are more able to travel than before, is the marked increase in passenger earnings. During the past six months the passenger earnings on the Louisville & Nashville system have increased steadily, due partly to better connections and quicker time, partly to improved business prospects, and partly to the fact that two years ago the uniform rate of three cents a mile was adopted on this entire system.

The improved condition of affairs in the south is not imaginary or temporary; it is substantial, and it will be continuous. Last year the south raised its food; it will do so again this year. Practically it had cotton for its surplus crop, and having little corn and wheat to buy, the farmers could pay their debts, improve their farms and buy more and better machinery. This they have done. During the spring months, when the southern roads generally carry provisions to the south, their traffic was somewhat lighter than usual, for the south did not need to buy provisions as it had done before, but now we see evidences that the changed condition of affairs is best for all concerned.

This new tendency, which leads to complete commercial independence, will be intensified and stimulated by the Southern Exposition. It will represent a south which few of us know—a new south, young and vigorous, just coming to a full realization of its might and power.

COL. SNOWDEN ON THE TRADE DOLLAR.

Col. Snowden, of the Philadelphia mint, has given his views on the trade dollar in an "interview" published in the Philadelphia *Evening Telegraph*. The act authorizing the issue of these dollars, passed February 12, 1873, reads as follows: "Any owner of silver bullion may deposit the same at any mint, to be formed into bars or into dollars of the weight of 420 grains troy, designated in this title as trade dollars; and no deposit of silver for other coinage shall be received." At market price of silver at that time, the trade dollar was worth 102¼ cents in gold. The coin was authorized for use in Japan and China, and for that purpose was made three and one-half grains heavier than the Spanish dollar. The amount coined was $35,000,000, of which Mr. Snowden estimates that $5,000,000 remain in the country, the remainder having been sent to the east, and many of them have probably been melted. By an error in the act of 1873 the trade dollars were placed with the subsidiary coinage, and made a legal tender for sums up to $5. The error was corrected in 1876, when all legal tender power was removed. Mr. Snowden believes that the government should authorize the redemption of these trade dollars in standard dollars, and so get rid of a nuisance. He thinks the power of redemption would make them circulate freely, and that actual exchange for standard dollars would be gradual. The government would lose the profit it now makes by buying silver in the open market to the extent of this exchange, but that would be a small price to abate the nuisance. He is emphatic in the opinion that the coinage of standard dollars should be stopped.

ELECTRIC LIGHT SPECULATION AT LONDON.

The *Pall Mall Gazette* of late date has the following:

"Electric light shares, which last year rose to fabulous prices, are well known to have fallen again to a ruinous extent for those who bought during the mania. So long as the public were inclined to buy the contest between those in the market who had money and those who had stock was a very unequal one. The command of money was limitless, and prices rose. After a time the rise ceased, and then came a collapse. Every now and then since the collapse there have been passing signs of another 'rig,' although nobody can expect to see such a rise as took place when the whole thing was new and nothing about the electric light was calculable in advance. Hammond shares, for instance, which rose to 20 or thereabout, when the mania was in action, had lately dropped to par, which is 2½ per share; but dealers and outside operators who had been successful in selling the shares continually all the way down, to use their own expression, have not known when to stop, and are now caught by a rise, and are without the shares they had contracted to deliver. The price has advanced to 4, mainly or solely because the current settlement disclosed a scarcity of shares. In a word, the possessors of money have the non-possessors of shares again to some extent at their mercy. All electric companies expect to do better business when the autumn comes on and the pending provisional orders for local bodies are passed, but that is the immediate cause of the rise."

THE JULY REPORT OF THE DEPARTMENT OF AGRICULTURE.

The July report of the Bureau of Agriculture is thus summarized at Washington and telegraphed to the country: The July report of the Department of Agriculture indicates a very general improvement in the condition of cotton. Rains were general up to June 15 or 20 and local showers have been frequent since. There has been an excess of moisture, interfering with cultivation and promoting the growth of grass. Clean fields are found only in favored

districts and on land of prompt and pushing cultivators. Since June 20 growth has been rapid. In grassy districts the plants are still small, but healthy, and making great progress with recent cultivation. The only complaint of drouth comes from central and southwestern Texas, from the Colorado to the Guadaloupe. A few counties in South Carolina and Georgia report a present need of rain. Recent distribution of moisture has been quite unequal. Adams county, Miss., has had showers daily for five weeks, and Pike county for six to eight weeks. The general average of condition has advanced from 86 to 90. Last July there was an improvement of three points from 89 to 92. July returns since 1870 have indicated higher condition than in June except in 1871, 1873 and 1879. The spring weather was too variable in temperature and moisture, as it usually has been in former years, for the highest condition of the plant. Arkansas reports a loss of 3 points from excessive rains, cool nights and chinch bugs, red ants and rust. There is a promise of improvement during July. A gain of 10 points had been made in the northern zone, North Carolina and Tennessee; 7 in Georgia; 6 in South Carolina; 4 in Texas; 3 in Mississippi; 2 in Virginia and 1 in Florida. Alabama and Louisiana stand as in June. The July state averages are as follows: Virginia, 83; North Carolina, 91; South Carolina, 91; Georgia, 93; Florida, 95; Alabama, 87; Mississippi, 89; Louisiana, 91; Texas, 93; Arkansas, 84; Tennessee, 88. Worms have done little harm as yet. The caterpillar has appeared at a few points from South Carolina to Texas. In Butler, Ala., the second brood of worms appeared June 20. The boll-worm is at work in Denton county, Tex. Picking will begin in southwestern Texas about July 20.

There has been some improvement in winter wheat in Connecticut, New York, Virginia, South Carolina, Texas, Ohio, Michigan, Indiana, Illinois, Missouri, Kansas and California, advancing the general average of condition from 75 to 79. The spring wheat average has advanced from 98 to 100. The indications of July point to a winter wheat crop of fully 300,000,000 bushels and a product of about 125,000,000 bushels of spring wheat.

The area of corn has been increased about 2,500,000 acres, making the total 68,000,000 acres. There has been some increase of area in nearly every state. The proportion of increase is large in the northwest and in the southwest. On the coast from Virginia to the Mississippi the advance has been small. In some places the reduction of price from the increase of supply last year had a discouraging effect. There has been too much rain in the great western maize districts and a failure of stands from planting poor seed, making the crop late and growth small; but improvement has of late been rapid. Taking all the states together, the average for corn is 88 against 85 last July, 90 in 1881 and 100 in 1880. The averages of the principal states are: New York, 84; Pennsylvania, 89; Ohio, 83; Michigan, 73; Indiana, 90; Illinois, 82; Iowa, 80; Missouri, 82; Kansas, 98; Nebraska, 87; Dakota, 78. In the south the averages range from 90 in Tennessee to 103 in Louisiana.

The prospect for oats is nearly as good as in July of last year, the average being 99, against 103.

The condition of barley is represented by 97 against 96 last July. The average in New York is 103, in Pennsylvania 91, Wisconsin 102 and California 90.

There has been an increase of about 5 per cent. in the area planted in northern potatoes. They are reported in high condition, averaging 101.

The area of tobacco appears to have been diminished 7 per cent.; condition 95.

TRADE EMBARRASSMENTS.

There were 140 failures in the United States reported to BRADSTREET'S during the past week, 4 more than the preceding week, 16 more than the corresponding week of 1882, and 50 more than the same week of 1881. Compared with the previous week the middle states had 32, an increase of 3; New England states 27, an increase of 21; southern states 24, an increase of 7; western states 44, a decrease of 9; Pacific states and territories 13, a decrease of 18; Canada and the Provinces 26, an increase of 10. The principal suspensions were Sloat, Bussell & Co., lumber manufacturers, New York and Savannah; Orange Judd, New York; Stiles, Goldey & McMahon, grain and provisions, Chicago; J. P. Macheca & Co., wholesale fruits, New Orleans. In the principal trades they were as follows: Grocers 24; general traders 17; clothing 7; fancy goods 7; hardware 6; dry goods 6; shoes 5; tobacco and cigars 5; produce and provisions 5; liquors 4; manufacturers 4; grain and flour 4; drugs 3; furniture 3; bakers and confectioners 3; hotels and restaurants 2; leather 2; stationers 2; millinery 2.

DISTRICT OF COLUMBIA.

WASHINGTON.—George A. O'Hare, grocer, has assigned.

WASHINGTON.—P. R. Little, grocer, has assigned.

GEORGIA.

ATLANTA.—I. N. Kite, grocer, has assigned. Liabilities $425; no assets.

AUGUSTA.—Chapman Brothers, plumbers, have assigned to John W. Wallace. Liabilities $10,697; nominal assets $6,693; preferred claims $2,390.

AUGUSTA.—Sale & Rassignal, hardware, have assigned. Liabilities $9,000; nominal assets $6,000. Dull trade and losses are ascribed as the causes of the failure.

ILLINOIS.

CARLYLE.—John W. Hagee, clothing, has been closed by the sheriff.

CHAMPAIGN.—John Cody, grocer, offers 50 cents.

CHICAGO.—Richard Forbes, grocer, has assigned.

CHICAGO.—A. Goldsmid, pawnbroker, has been closed by the sheriff on a claim for $2,607.

CHICAGO.—The Jewelers' Publishing Company has been attached.

CHICAGO.—Simon Kreger, tailor, has been closed by the sheriff on judgment for $200.

CHICAGO.—The liabilities of M. S. Nichols & Co., grain, are $324,000; assets $180,000, assuming the accounts receivable are worth 50 cents. The cash assets are $33,000, and due from board members $57,000.

CHICAGO.—Abraham Rubel, stoves, has assigned to M. Rubel. Liabilities $7,153; assets $2,659.

CHICAGO.—Henry Schreil, grocer, has been closed by the sheriff on confessed judgments for $1,163.

CHICAGO.—Stiles, Goldy & McMahon, grain and provisions, suspended on the 11th inst. on account of the decline in pork. They have been in business fifteen years and were favorably known. They are also interested in the Iowa Packing Company, of Sabula, Iowa.

CHICAGO.—William Taussig, leaf tobacco, has been closed by the sheriff.

MECHANICSBURG.—Allen Hall, general store, has assigned to F. H. Weber. Liabilities about $3,900.

INDIANA.

CARPENTERSVILLE.—W. F. Garner, general store, is offering to compromise.

FORT WAYNE.—J. G. Flederman & Co., clothing, gave a chattel mortgage and confessed judgment for $3,300, and a receiver was appointed. Liabilities about $15,000; assets $10,000; preferred claims $8,000.

LAFAYETTE.—J. Erisman & Brother, harness, have assigned. They have a branch at Frankfort.

NEW CASTLE.—Alix & McMeans, clothing, has been closed on execution.

TERRE HAUTE.—Fraser & Co., vinegar manufacturers, have been closed up and are out of business.

IOWA.

ALBIA.—A. E. Noble, grocer, has sold out to a creditor.

CEDAR BLUFFS.—Fink & Bender, general store, have assigned.

CORNING.—S. J. Parker, grocer, has mortgaged all his property.

GRUNDY CENTRE.—F. H. Hurd, agricultural implements has given a bill of sale.

KEOKUK.—Ruddick & Schonton, cracker manufacturers, have gone into insolvency. Secured claims $11,000.

SPENCER.—George H. Ward, livery, has assigned to T. P. Bender.

ST. CHARLES.—Thompson & Wheat, general store, have assigned.

WEST UNION.—Butler & Armstrong, publishers, have failed and gone out of business.

KANSAS.

CEDAR JUNCTION.—A. J. Pike, grocer, etc., has assigned.

KENTUCKY.

LOUISVILLE.—J. A. Hart, varieties, has assigned to C. G. Davidson.

LOUISVILLE.—T. M. Moffatt, produce commission, has been attached for $1,200.

LOUISIANA.

NEW ORLEANS.—Forcheimer Brothers, wholesale grocers, offer 50 cents in six, eight, ten and twelve months, unsecured.

NEW ORLEANS.—J. P. Macheca & Co., wholesale fruits, have failed. A note for $2,500 went to protest. The liabilities are upward of $100,000. They had investments in steamboats and schooners which they valued at $50,000, and it is said advanced to parties in Europe about $35,000.

NEW ORLEANS.—Montardier & Louge, hats, have assigned. Liabilities $10,300; assets $5,000.

MAINE.

AUGUSTA.—S. A. Mitchell & Co., clothing, have failed and offer 35 cents. Liabilities $2,300; assets $600.

BIDDEFORD.—Edward Bardsley, grocer, has failed. Liabilities $4,700. It is said he will pay 40 cents.

PORTLAND.—Phinney & Jackson, coopers and importers of West Indian goods, have suspended and been attached for $5,000. They advanced large sums to Cuban merchants, and remittances did not come as expected. They claim a nominal surplus of $100,000 in the business.

PORTLAND.—J. R. Wallace & Co., fish, have failed.

SACCARAPPA.—D. Morrison & Co., bakers, have failed.

SEARSMONT.—Dickey & Brown, sash and blinds, are reported to have failed. Liabilities $7,000.

MARYLAND.

BALTIMORE.—M. J. Rose, trading as M. J. Rose & Co, naval stores, offers 33 1-3 cents. He has lost heavily by failures in North Carolina.

MASSACHUSETTS.

BOSTON.—William Colwell, cattle dealer, has gone into insolvency.

BOSTON.—Edmund H. Gray, saloon, has failed and is in insolvency.

BOSTON.—W. R. Harding, builder, has failed. Liabilities $8,900; no assets. He will settle in insolvency.

BOSTON.—The liabilities of Knight & Frost, grocers, are about $5,050; nominal assets $3,500.

BOSTON.—Wolf Levy, clothing, has failed and gone into insolvency. Liabilities $5,400, of which $730 is secured. There are no assets for the unsecured creditors.

BOSTON.—Robert S. G. Marden, undertaker, will settle in insolvency. Liabilities $5,450; assets about $500.

BOSTON.—L. E. Peirce & Co., wholesale produce, have failed and offer 20 cents cash in thirty days, or if they find they cannot do this, then a second note at forty-five days will be given. Several creditors have accepted the offer and the firm continues to do business. Liabilities about $28,000.

BOSTON.—Sleeper & Co., lamps and glass pipes, have failed.

HAVERHILL.—A. G. Morris, carpenter, has filed a petition in insolvency.

LAWRENCE.—The liabilities of George S. Armstrong, nursery, are $10,133; assets $3,000.

MONTVILLE.—W. L. Whiting, wholesale hoops, has failed.

NEW BEDFORD.—Creditors of James F. McKenney, gents' furnishing goods, have filed a petition against him in insolvency.

NEW BEDFORD.—P. Kelly, Jr., grocer, has failed.

STONEHAM.—W. C. Holdsworth, confectioner, is in insolvency. Liabilities about $2,000.

TAUNTON.—W. H. Flagg, fancy goods, etc., has gone into insolvency.

WORCESTER.—A warrant in insolvency has been issued against James E. Browning & Co., millinery. Liabilities about $17,000; assets about $3,000.

WORCESTER.—The liabilities of Mrs. E. H. Chaffee, woolen manufacturer, are $52,000; nominal assets $50,000.

WORCESTER.—H. B. Locke, drugs, has been attached. Liabilities $1,500; nominal assets $1,100, mortgaged for $1,100, which has been foreclosed.

MICHIGAN.

DAVISBURG.—G. W. Dennis, hardware, is offering to compromise.

MIDLAND.—Bradley & Beardsley, dry goods and groceries, have assigned to John Larkin.

MISSISSIPPI.

MERIDIAN.—W. B. Ramsay & Co., drugs, have assigned to John Williams.

ROLLING FORK.—The liabilities of Fanny Aaron, general store, are $4,000; preferences $2,000.

MISSOURI.

HANNIBAL.—The Southworth Paper Company offers 50 cents for claims against the Hannibal Printing Company.

INDEPENDENCE.—Gilkey & Kelly, drugs, have assigned.

KANSAS CITY.—N. L. Davidson, cigar manufacturer, has been closed by the sheriff on claims for $3,900.

ST. LOUIS.—The L. W. Hemp Tinware Company has assigned. Liabilities about $25,000. Assets $11,000. The company offered to compromise in April last at 40 cents cash or 50 cents on time, but it is said creditors who had agreed to the offer now demanded payment of their accounts, which, it is said, forced the assignment.

ST. LOUIS.—A. Levy, manufacturer of jeans clothing, has been attached for $2,254.

ST. LOUIS.—B. F. Matthews, shoes, gave a chattel mortgage for $900, and assigned to August Sporleder. Assets $4,000, subject to incumbrances for $1,900.

ST. LOUIS.—The Vornbrock Furniture Company offers 35 cents cash in full settlement of the old indebtedness of J. H. Vornbrock, which it has assumed. Most of the creditors have accepted, and if the settlement is not agreed to by all by August 1 the company will probably assign.

NEBRASKA.

PONCA.—S. Munn, furniture, has failed.

NEVADA.

RENO.—J. L. McFarland, blacksmith, is reported to have failed.

NEW JERSEY.

NEWARK.—Goken, Kelly & Co., manufacturers of leather, are reported embarrassed. Liabilities about $10,000. The chattel mortgages aggregate $4,000.

NEW YORK.

ALBANY.—William B. Moore, stationer, has failed.

AUBURN.—C. F. Irish, grocer, has assigned.

BROOKLYN.—Louis Fessler, manufacturer of cigars, has assigned to Henry Bohl, giving preferences for $3,500.

BUFFALO.—E. D. Boles, tinware and fancy goods, has assigned to John W. Stowell. He has stores at Jamestown, N. Y., and Wilmington, Del.

GENEVA.—Miss S. A. Littell, millinery, has failed.

NEW YORK CITY.—Isaac Feiber, combs and jewelry, assigned on the 13th inst. to Meyer Hahn, giving preferences for $260.

NEW YORK CITY.—Haines & Underhill, manufacturers of sheep leather, assigned on the 10th inst. to Robert C. Brewster, giving preferences for $11,980, as follows: Jonathan Thorn $5,000; estate of Samuel Willetts $5,000; Butchers' & Drovers' National Bank $1,000; Oriental Bank $900; Jay Snyder $80. They started in September, 1881, but the business proved unprofitable, and they have been winding it up for some months past. The liabilities are reported at about $38,000 and assets $10,000.

NEW YORK CITY.—Witson Godfrey has been appointed receiver for Sloat, Bussell & Co., manufacturers of lumber, in order to protect the interests of creditors and all concerned, the partners having quarreled among themselves. The liabilities are about $100,000, and it is thought the firm have ample assets to pay in full. They have a branch at Savannah and a mill at Stockton, Ga., and have been in business eighteen years.

NEW YORK CITY.—Orange Judd assigned on the 12th inst. to Benjamin S. Clark, giving nine preferences, aggregating $11,306, the largest being to secure trust funds of the estate of Thomas F. Stewart $2,545 and of Charles W. Judd $5,000. His liabilities are principally on discounted notes held by the banks. He has been ill for a month past. Notes matured, for which he had made no provision; a creditor pressed him, which necessitated an assignment. His connection as president of the Orange Judd Company and the Sackett Plow & Pulverizer Company terminated several months ago.

NEW YORK CITY.—William C. Rogers, wholesale wines and liquors, offers 40 cents in his own notes, unindorsed, at one, two and three months, which has been accepted by some of the largest creditors. Liabilities $58,000; actual assets $48,000.

NEW YORK CITY.—Slattery Brothers, furniture, assigned on the 9th inst. to William A. Keller, giving preferences to Honora Slattery $1,169; Catharine Garrick $300.

NEW YORK CITY.—The schedules of Dennis Sullivan, grocer, show liabilities $9,130; nominal assets $2,823; actual assets $1,720.

NEW YORK CITY.—The Union & Bay State Manufacturing Company, straw goods, has settled with the New York creditors at 66 2-3 cents cash, which has been paid, and is now negotiating for a settlement with the eastern banks by turning over the property to the latter.

ROCHESTER.—Frank King, confectioner, has assigned to George R. Losey, without preference.

YONKERS.—Sullivan & Nolan, paints, paper hangings, etc., have assigned, preferring their workmen.

NORTH CAROLINA.

CAMERON.—Monger, McPherson & Co., general store, it is thought will not pay more than 10 or 15 cents. Liabilities about $8,000.

HENDERSON.—John G. Vaughan, liquors, who recently assigned, owes about $1,600, and his actual assets are placed at $2,000.

NEW BERNE.—S. A. Munter, general store, has assigned.

OHIO.

AKRON.—A receiver has been appointed for the Akron Cutlery Company. They gave a chattel mortgage for $4,000 to secure indorsements. Other liabilities $7,000; nominal assets $14,500.

AKRON.—The liabilities of Beck & Johnston, shoes, are about $24,000, of which $11,000 is secured by chattel mortgages on stock; actual assets $16,000.

CINCINNATI.—William Frankel & Co., notions and furnishing goods, gave a chattel mortgage for $350 and assigned to Simon Gosdorfer.

CINCINNATI.—Augustus Morris, shoe manufacturer, has assigned.

CLEVELAND.—Herman Ahlers & Co., gents' furnishing goods, have assigned to E. D. Wheelock.

COSHOCTON.—T. H. Dixon, cigar manufacturer, has been closed by the sheriff.

LOUISVILLE.—Mrs. L. F. Davis, general store, has assigned to John Keim, giving preferences for $4,303. Liabilities $12,000; assets about $7,500.

MARION.—John Gregory, wholesale grain, has failed.

PORTAGE.—The liabilities of Daniel Triem, drugs, are $2,473; assets $2,222.

PORTSMOUTH.—W. H. Williams, hotel, has assigned. Liabilities $8,000; assets $4,000.

ADDRESS PUBLISHER OF BRADSTREET'S, NEW YORK.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, JULY 21, 1883.

NOTES OF THE WEEK.

The stock market has had periods of great activity, with intervals of dullness, during the past six days. There was an exceedingly lively break in prices last Saturday, when the attacks of Lackawanna—a heavily-cliqued stock—showed their effects in the promptitude with which the bull clique threw over its holdings of stock, not caring to wait for any more such shots. On Monday the throwing-over process was resumed, prices going down again under it, but on Tuesday there was a pause and Wednesday also, while some of the large operators were evidently covering their shorts and taking in the profits. On Thursday a furious fire was opened on several stocks, mainly those of roads serving the extreme northwest section of country, and the prices sunk quite rapidly. At this point, however, Mr. Gould found himself compelled to come in and sustain the market to protect Western Union, and the market has been dull and strong since.

The operators of the Western Union Telegraph Company, on the refusal of their demand for increased pay and reduced hours of labor, left their desks on Thursday at New York, and at the principal cities of the country outside of the metropolis. As nearly as can be ascertained, about three-fourths of the operators struck work simultaneously throughout the country. The demand was (1) for the total abolition of Sunday work as a compulsory duty unless compensated as extra service; (2) that eight hours should constitute a regular day's work and seven hours a regular night's work, and that both sexes should receive equal pay for equal work, and (3) that a universal increase of 15 per cent. on all salaries should be granted now. An executive committee representing the telegraphers have issued a temperate address, setting forth what is claimed to be an accumulation of grievances, by way of justifying the strike. It would be difficult to prove that strikes have ever, on the whole, been effective in raising wages. But this fact has little or no bearing as regards the wisdom or unwisdom of the action of the telegraphers, who in the present stage of the labor question have no other equal means at hand for making their protest effective.

One cannot go very far wrong in assuming that the telegraphers have had sufficient cause for setting on foot a compact organization for common defense and welfare. Furthermore, we do not believe it possible for several thousand men to act together in this manner without a bond of union in the shape of a substantial grievance. The relation of a telegraph company with its operators is one of mutual dependence. It is believed that had the policy of the telegraph company been a more enlightened one there would have been no difficulty in so caring for the interests of the operators that the return through increased loyalty and devotion would clearly exceed any additional draft upon the wages fund. In substituting shortsighted for enlightened selfishness the Western Union Company has neither conserved its own interests nor those of the public, which, properly understood, are identical. Plainly the way out of the differences between the company and the operators was through arbitration, but this was rendered difficult, if not impossible, by the refusal of the company to recognize the committee of the Brotherhood. Had arbitration been possible there is reason to believe that a compromise would have been effected. As it is, a trial of strength is under way.

The New York Grand Jury recently proposed that the books of the Finance Department of the municipal government should be examined by experts appointed by certain of the city banks in order that the true state of affairs in regard to the Carroll frauds might be discovered. This proposition met with very general approbation on the part of citizens, because it was reasonably certain that if the banks undertook the work the investigation would be thorough and would be prosecuted with a view to the public interest. There could, of course, have been no objection to the banks undertaking the work except on the part of the politicians more or less interested in concealing the state of the municipal finances from the citizens. The banks first selected, however, have declined to undertake the investigation, for the reason that they have not the force at their command to furnish for such an extended and minute examination of the controller's books as would be required to do the work in a proper manner, and that it would be folly to attempt it unless it was to be made thorough. The Grand Jury will make an attempt next week to secure the services of three other banks. It is not altogether pleasant to recollect that scarcely a dozen years have passed since the exposure of the gigantic malversations of the Tweed ring before the Grand Jury of the county feels the necessity of setting on foot another investigation through private agency into official misconduct.

The civil-service experiment seems to be working well at Washington, at least as far as the examinations are concerned. These appear to have been quite satisfactory to the commissioners, the papers submitted showing for the most part as high a grade of ability as had been anticipated. It is said that about 70 per cent. of those examined will pass. The questions propounded by the examiners are, on the whole, of a practical nature, and afford little ground for the usual sneering references to this feature of the system on the part of those opposed to the reform. The success of the new departure is apparently little relished by certain of the politicians, who have hitherto been accustomed to an unrestrained exercise of their rights of patronage, and it is said that the pressure they have been able to bring to bear upon some prominent officials has been so convincing that they have succeeded in securing the induction of their friends into office in violation of the civil-service rules. This, however, is an irregularity of a kind which, it is to be hoped, the vigilance of the reformers will be able to guard against sufficiently.

There seems to be no very energetic disposition on the part of the lawyers in charge of the star route business on the part of the government to get at the bottom of that very unsavory business. It is true that the Attorney-General's representative expresses anxiety for an early disposition of the remaining criminal cases. These, however, are of comparatively trifling importance in themselves, and are seen to be of still less moment when it is recollected that the prosecution failed in their selected case. In the meantime the civil cases are apparently slipping out of the official memory. The defendants, of course, are entirely willing that nothing should be done. Every day's delay is an influence in their favor. There is the possibility that evidence relied upon by the government may be lost and that the edge of public feeling may be blunted by the lapse of time; circumstances that would render a verdict in favor of the star-routers not very difficult to procure. On account of the very peculiar system adopted by the chief law officer of the government in regard to these cases it is next to impossible to discover in just what condition the cases are. It seems that nothing can be learned about them at the Department of Justice, the Attorney-General having resigned the control of them to private or at best to semi-official counsel. Taking everything into account, it cannot be said that the Attorney-General's official zeal has been in the least degree precipitate.

A circular has been issued from the office of the Postmaster-General instructing postmasters to take all available means, without incurring any expense, to call public attention to the reduction in postage rates which is to take effect October 1, so that purchasers may not accumulate an unnecessary supply of three-cent stamps and envelopes. No arrangements have yet been made for the redemption of the three-cent stamps and envelopes in the hands of postmasters or for the exchange by postmasters of those stamps and envelopes in the hands of private holders, and until further notice postmasters are directed not to make exchanges for the public. The two and three cent stamps and envelopes of the present issue, however, will continue to be valid after October 1, and postmasters must accept them in payment of postage when offered in proper amounts. The three-cent stamps can also be used in combination with other denominations on letters requiring more than one rate of postage and on parcels of third and fourth class matter.

In the case of ex-State Treasurer Polk, of Tennessee, on trial for embezzlement of the funds of the state, some very peculiar testimony has been elicited, which goes to show that the official morality of the parties concerned was at a rather low ebb. Polk's confidential bookkeeper testified that when he was reëlected in 1879 he was short in his accounts, and that the shortage account was destroyed or thrown away. He was frequently short before his exposure, but at times made his deficits good. He was accustomed to take money out of the State's safe and to charge himself on it with bits of paper. Polk regarded the bank-book in the Treasurer's office as his private property, and thought that he had a right to take it with him at the close of his term of office. He took the very simple and expeditious plan of hiring a person to abstract it from its place. The controlling reason for the ex-Treasurer's anxiety to secure the bank-book, probably, was that it contained very damaging evidence against him.

REFORM IN PARLIAMENTARY PROCEDURE.

There is a protest in all countries where parliamentary government exists against the tyranny and wastefulness of talk. There is a demand for an increase in the working power of legislatures, and for a relief from the obstruction of the minority. The conditions of modern life are not those of the last century. The age of talk is not the age of steam and electricity. The stage-coach and the mail have been superseded by the railroad and the telegraph. The *Congressional Globe*, which used to be the weekly food at the country store, has given place to the daily newspaper, and the record of congressional proceedings finds its way to the trunk-maker and the pulp vat. It has been discovered that, in parliamentary governments based upon popular suffrage, liberty is not endangered by the limitation of debate. No majority can prevent an appeal to the people. The obstructionists of one house may be the majority of the next. It has also been learned that the conditions of modern life demand economy in legislative time and a saving in the expenditure of vital force. Long speeches are an advertisement of the individual rather than an aid to legislation. Parliamentary action is not generally determined by debate. The orator has given place to the tactician; the forum has been succeeded by the caucus. Talk is self-assertion; it is the weapon of self-preservation to which the politicians resort.

Accordingly we see, both in the British Parliament and in our own Congress, efforts to relieve those bodies from the tyranny of the "superstition of talk." The latest attempt in Great Britain has been the creation of the "grand committees." The parliamentary system and methods of Great Britain and of our own country are so different that it would be difficult to draw an exact parallel between the "grand committees" and the committees of the American Congress. It is enough for general purposes to know that the grand committees have been created for the purpose of giving measures mature consideration before they are presented to Parliament for debate. They seek to require that the men in Parliament most capable to consider certain questions shall give those subjects their attention, so that the report of the grand committees shall have whatever effect may be expected from experienced and careful deliberation. The purpose of the committees is, in short, to facilitate the transaction of public business by intelligent and orderly procedure. The leaders of British parliamentary opinion have discovered that a subject can receive wiser consideration from a body of men at 5 o'clock in the evening, in the privacy of a committee room, with all the facilities that the grand committees can command, than in a mob of 650 men at midnight, tired from unusual hours of labor, and often heated and heavy from the pleasures of the table.

The new rules have been found to work well. They have now been in force some five months—the greater part of an ordinary parliamentary session—and their practical working has given satisfaction to those who devised them. It has been found that they have greatly increased the working power of the Parliament. These committees have already considered several bills, any one of which, under the old methods, might have consumed the greater portion of the session. The difficulties which were predicted did not appear. The only serious complaint made has been that some of the members who have been active on these committees feel that they have been required to do too much work. Complaints of that sort will, doubtless, continue so long as the British Parliament maintains its absurd practice of turning the night into day. The experience of the American Congress is that night sessions are more productive of evil than of good. Most of the bad laws have been enacted in the night sessions at the close of a congress, when designing men have taken advantage of the fatigue or the ignorance of the honest majority. It is found in England that even under the grand committee system the debates are quite full enough. The suggestions that the "grand committees" might be used as instruments of partisan oppression have proved groundless. The most that the Parnell party have claimed against the committees is that "with only four friends on the grand committees he could not as effectually delay the passage of a measure as formerly."

The experiment has been so successful that it is now proposed that the number of committees shall be increased, and that additional subjects shall have the advantage of more careful deliberation. But even this will not prove sufficient. It is not enough, either in the British Parliament or in our own Congress, to provide means for facilitating the transaction of public business. It is necessary that Congress and Parliament shall have less business to do. The spectacle was recently witnessed in the lower house of the American Congress that the greater part of two days was occupied with a discussion as to whether a private soldier should be reimbursed for the loss of a pair of pantaloons which was destroyed in a burned barracks. Committees had considered and reported upon it in two congresses, and there had been long debates. The cost of the white paper used in printing the proceedings of the committees and of the House about it would have furnished pantaloons for an entire company. Private claims, bills for relief, pension bills, private measures of all kinds will have to go to the courts. A reform of this sort was commenced in the last Congress in the Bowman bill, which authorizes committees of Congress to refer certain claims to the Court of Claims for a finding and report as to the facts. Such a system may be wisely and widely enlarged. It is now proposed in the British Parliament that special courts be created for the consideration of questions relating to railroads, docks, gas works, city improvements and other local matters. It is not possible for about 375 members of the American Congress, sitting six months in a year, to transact the private business of 50,000,000 of people.

In our House the last Congress made some commendable progress in the way of limiting debate upon dilatory motions. Unfortunately, this was secured as the result of a heated partisan contest, and its fairness and equity is disputed by those who were then in the minority. As the change gives the majority the power of restricting debate, and of limiting the capacity of the minority to obstruct, it may happen, in the changed political complexion of the House, that those who passed this rule may be the strongest in the coming Congress in favor of abolishing it.

The necessity of some change in our system which will restrict debate has long been felt in the Senate, and a committee of that body is now engaged in considering the whole body of the rules, with instructions to report at the next session. Many of the changes proposed are merely technical, but some are of popular interest. The one which proposes to raise a barrier against the endless stream of talk is the proposition to adopt a rule providing for the "previous question." It is the popular impression that the previous question never existed in the Senate. This is an error. In the first code of rules adopted by the Senate, April 16, 1789, the previous question was recognized. It was dropped in the revision of 1806, and has not been admitted in the Senate since that time. A rule for the previous question was submitted to the Senate by Mr. Douglas, July 27, 1850 (Thirty-first Congress, first session), and was tabled at the same session. April 4, 1862 (Thirty-seventh Congress, second session), Mr. Hale proposed a rule providing "that during the present rebellion" the Senate might, by a majority vote, fix a limit to debate, and it was indefinitely postponed. At a special session of the Senate, March 20, 1873, Mr. Wright submitted a rule as follows: "Debate may be closed at any time upon any bill or measure by order of two-thirds of the senators present, after notice of twenty-four hours to that effect." The consideration of this rule was indefinitely postponed. But much as such a rule is now needed in the Senate, it is very doubtful whether the senators will consent to its adoption. The bugaboo of state rights is urged against it. There are a good many left of the old school of politics who consider a United States senator as the representative from a sovereign state, who cannot be bound to do, or not to do, anything by any set of rules, and who is responsible to no one except to the state which sent him. Those who entertain these views will, of course, oppose a previous question which puts it in the power of a majority of states to silence the voices of the senators from the remaining states. But the tendency in favor of parliamentary reform is everywhere manifest, and the United States Senate will some time be compelled to recognize this.

PROGRESS OF NATIONAL BANKING.

The charter numbers of the national banks have now turned 3,000; the actual number in existence, however, is materially less. The number appearing in the returns of May 1 was 2,375; in those of March 13, 2,343; December 30, 1882, 2,308; October 3, 2,269; October 1, 1881, 2,132. The number organized during the year ending November 1 last was 171, which was the largest in any year since 1872. Nineteen voluntarily discontinued business during that year, but the 2,269 in operation on the 3d of October was the largest ever in operation at any one time, so that the still larger number at present represents the maximum of national bank property as far as numbers are concerned. The comparison as to some other respects is thus briefly shown, the amounts being stated in millions and tenths:

	1,919 *banks, Oct* 3, 1872.	2,089 *banks, Oct.* 2, 1876.	2,053 *banks, Oct.* 1, 1878.	2,132 *banks, Oct* 1, 1881.	2,308 *banks, Dec.* 30, 1882.	2,375 *banks, May* 1, 1883.
Loans	877.2	931.3	834 0	1,173 8	1,230.5	1,262.4
Bonds for circulat'n	382.0	337 2	347 6	363.3	357.0	354.5
Total resources	1,755.8	1,827.2	1,767.3	2,358.4	2,360.8	2,360.2
Capital stock	479 6	499 8	466 2	463 8	484.8	494.0
Surplus	156.9	178 6	167.8	184.5	191.1	198.5
Circulation	335.1	292.2	301.9	320.2	315.4	313.7
Deposits	772.7	846.0	833.5	1,378.0	1,351.8	1,342.0

The new banks organized during the year ending November 1 last were located geographically as follows: Eastern 9, with $950,000 capital; middle 26, with $2,517,000 capital; southern 29, with $2,775,300 capital; western 86, with $7,940,000 capital; Pacific and territories 21, with $1,585,000 capital. Unfortunately, the previous reports do not contain the figures for carrying this interesting comparison back; nor do we know just what the classification as above is, the terms middle and west being now of very inexact meaning. We have made a count of the 144 banks reported as organized in 1883, and find them located thus:

R. I. and Mass., each	1	Kansas	6
Vermont and N. J., each	2	Colorado	3
New York	7	Kentucky	7
Pennsylvania	11	Texas	10
Ohio	16	Virginia and Miss., each	2
Indiana and Minn., each	4	Ark., N. C. and Cal., each	1
Illinois	9	Oregon	3
Michigan and Missouri, each	7	Dakota	7
Wisconsin	3	Idaho	1
Iowa and Nebraska, each	10	Washington	5

Passing by the large number in Ohio and Pennsylvania, one-half the 144 are located in the newest country.

As will be observed, there is no corresponding, and even no absolute, increase in circulation, but, on the contrary, an absolute decline, the actual aggregate being less than in 1872, less than in October, 1881, and still less than at the close of 1882, the movement being clearly downward, although the banking interest and general industry are going the other way. The causes of this have been repeatedly and plainly set forth in these columns, when the question of the survival of one or another of our many kinds of currency was temporarily an active one, which it is again to be, since it is just as far as ever from being settled. The hysterical opponents of national banks may make of it another count in the indictment against them, but the fact is that they gradually surrender circulation because they can earn more money without it. We need not repeat any of the familiar computations showing the slender and even debatable profit from circulation—the heaviest banks, too, having the least to lose and the most to gain by dispensing with the "monopoly" of double interest—but there are two recent provisions of law which must operate to influence further the retirement of the notes. One is the abolition of the tax on bank capital, which is a concession to the banks, but has a discouraging effect on circulation. This tax was one-half of one per cent. on capital not invested in government bonds, and was therefore so far an inducement to retain capital in bonds, which were the basis of circulation. With the repeal of this tax nothing can be saved in taxation by keeping capital in bonds, and all the inducement to retain circulation for that reason is taken away. The bank extension act of last July also permits banks of $150,000 or less capital to reduce their bond-holdings to one-fourth of their capital; so that 1,341 banks received by that act leave to reduce their bonds, whereas before that time every bank was obliged to keep at least $50,000 of bonds. Of the $356,500,000 now held as security bonds, $201,000,000 are the new 3 per cents, which first appeared in the list of securities nine months ago, and $7,500,000 more are continued 3s. Thus the removal of the profit, per tax, upon circulation, as compared with direct use of capital, the permission to reduce bond-holdings, and the premium on even the low-rate bonds, are forces tending in the same direction.

But the survival of the fittest in circulation, bitter and burning as this question is destined to be, is not the whole of the subject of national banks; their existence is not bound up with that of their notes, and

issuing is only one of the sources of profit in banking. In October, 1879, the banks' discounts averaged $1,563 per piece in New England, $1,175 in the middle states, $781 in the south, and $713 in the western and territories—$1,082 for the whole country. The number of bills of $100 or less and $500 or less, were 20 and 55 per cent. of the whole in New England; in the middle states, those under $100 were 32 per cent., and those not over $500 were 70 per cent. of the whole; in the south these percentages were 27 and 70; in the west and the territories they were 37 and 72. Assuming sixty days as the average time and that the same aggregates were continuously held, the number of discounts made would be nearly five millions annually, the total amounts discounted would be $5,250,000,000, and this would be equivalent to a discount annually of $700 for every voter, or $500 for every family. The total number of pieces not over $100 was 251,345, or nearly a third of the whole; those of not over $500 were 547,385, or more than two-thirds of the whole; those of $1,000 or less were 642,765, or more than three-fourths of the whole. New York city had the largest average, $3,962; Boston and Chicago were next, with $3,083 and $2,244. The states of Iowa, Kansas and West Virginia had an average of less than $400. Manufacturers of tobacco, billiard tables, pianos, sewing machines and agricultural implements receive large numbers of small promissory notes, running thirty to sixty days, as monthly installments on goods sold, payable in almost every town and village. These notes are lumped and deposited with the banks as collateral, a charge of 10c. to 25c. being made for collection. This illustrates the ramification and probably indefinite extension of banking in its greatest function of loaning and discounting, which is only a system of machinery for the exchange of commodities, as veritably so as the railroad itself. The operations of banking also become more and more dissociated from and independent of both notes and coin. From 80 to 98 per cent. of the receipts and disbursements of the banks consist of checks and other paper substitutes, collected and canceled through the set-offs machinery of clearing-houses, it being a noticeable fact that the number of places having the latter continually increases. Including state and savings banks and private bankers, the country has now over 7,000 banking concerns, and they follow the railway in pushing out upon new soil. Prophesy as to the future developments of the national banking is vague, and some predictions which might have been made had they not been too daring—for example, as to the refunding of the public debt—have already come within the facts. But the system has a very firm hold, and will probably survive and perhaps will even thrive upon the extinction of its own notes. The basis of paper circulation has yet to be fought out or to be determined by some of the accidents which shape democracies; but the future of banking seems to be assured.

THE TEXAS PACIFIC LAND-GRANT.

The owners of the Southern Pacific Railroad have made claim to the unearned land-grant of the old Texas Pacific Company. Their application is now pending in the Interior Department. They insist that their claim is a valid one, and that they are certain to secure it.

The grant to the old Texas Pacific Company is a prize worth the effort. It is an empire. The area of improved farming land in the state of New York, according to the census of 1880, was 17,717,862 acres. The unearned land-grant of the extinct Texas Pacific Company is said to exceed 18,000,000 acres, and is certainly not less than that. It is estimated by competent authority that the amount of valuable arable land still in possession of the United States (deducting Alaska, the mountains of the west and the swamps of the south) is 250,000,000 acres. Of this amount the railroads claim 125,000,000 to make good their losses within the "granted limits," owing to settlers' claims. It will be seen that this Texas Pacific grant is a very considerable percentage of the remaining available public domain.

This grant was made to the Texas Pacific Company twelve years ago. Within the area granted by the government the company never laid a rail. All of the Texas Pacific road that ever was constructed was within the limits of the state of Texas, from which the company had a separate grant. A declaratory act from Congress would restore this vast grant at once to the public domain and open it to settlement. Repeated attempts have been made to secure this declaration. Congress has thus far declined to act. The odd sections within the line of this grant are withdrawn from settlement and held in abeyance to await the action of Congress or of the executive departments. Congress unquestionably failed to act because the railroad companies wanted non-action and had influence enough to secure it.

Now, the Southern Pacific Company claims that it is entitled to this unearned grant—this empire of land. And it hopes to be able to secure it by the action of the executive departments of the government before Congress can pass a declaratory act which will restore the land to the public domain.

The argument of the Southern Pacific Company is ingenious, and there are many good lawyers who declare that the legality of the position taken is incontestable. Substantially, the grounds upon which this claim is based are these:

First. The Southern Pacific corporation purchased the franchises of the Texas Pacific, and by virtue of an assignment in due form of law, which is filed in the Interior Department, came into possession of the rights of the Texas Pacific Company to this unearned grant.

Second. The grant of the Texas Pacific Company to this land was a grant *in presenti*. The title to this grant vested absolutely in the Texas Pacific or in its assigns, and cannot be revoked except by the power which made the grant, viz., Congress. Points in the decision in the noted case of Schulenberg vs. Harriman (21 Wallace, rept., page 44) are relied upon to sustain this position. Those points substantially are:

When the route was fixed the location became certain, and the title acquired precision and became attached to the lands. The lands granted have not reverted to the United States, no action having been taken either by legislation or judicial proceedings to enforce a forfeiture. Unless there are clauses in the statute restraining the operation of the words of the present grant, these must be taken in their natural sense and import, and immediately transfer the title. No such words exist in the Texas Pacific grant. No individual can call in question the validity of the proceedings by which precision is thus given to the title where the United States is satisfied with them. The best proof that the United States is satisfied is the fact that Congress has taken no action. Since Congress has taken no action, the title in the Texas Pacific Company and its assigns is perfect, on the principle of law that no one can take advantage of the non-performance of a condition subsequent annexed to an estate in fee but the grantor or his heirs or successors, and if they do not see fit to assert their right to enforce a forfeiture on that ground the title remains unimpaired in the grantee.

These points have been sustained both by the United States Supreme Court and by the opinions of Attorney-General Devens and of Attorney-General Brewster.

Third. The decision of Attorney-General Brewster in the case of the New Orleans & Pacific Company is a precedent which the Secretary of the Interior ought to follow. That case in brief was this:

The New Orleans, Baton Rouge & Vicksburg Railroad Company, to which a grant was given which was unearned, assigned its claim by purchase for a consideration to the New Orleans & Pacific Company. The condition of the grant to the first-named road was that the road should be completed within five years. Not a mile was built within that time, and there was not even a definite location or survey; but many bonds were sold based upon the grant. In December, 1880, it assigned what it is claimed it did not own to the New Orleans & Pacific Company, organized by the legislature of Louisiana, to build through the same section. Attorney-General Brewster gave to the Interior Department an opinion that the New Orleans & Pacific Company was entitled to this old grant of the New Orleans, Baton Rouge & Vicksburg Company, and the New Orleans & Pacific Company has issued mortgages and bonds based on this forfeited land-grant of the New Orleans, Baton Rouge & Vicksburg road. The owners of the Southern Pacific insist that its claim to the unearned grant of the Texas Pacific road is identical in law with that of the New Orleans & Pacific Company.

The following additional points are made in favor of the claim of the Southern Pacific to the land-grant.

The act granting the charter to the Texas Pacific road uses this language:

"That for the purpose of aiding in the construction of the railroad and telegraph line herein provided for there is hereby granted to the said Texas Pacific Railroad Company, its successors and assigns," etc.

The land-grant to the New Orleans, Baton Rouge & Vicksburg Railroad Company is expressed in the same language, and made upon the same terms as the land-grant to the Texas Pacific Railroad Company in the earlier portions of the act.

The last section of the act (section 23) provided that "for the purpose of connecting the Texas Pacific Railroad with the city of San Francisco," the Southern Pacific Railroad Company of California was authorized to construct a line. The Texas Pacific complied with all the provisions of the act, and filed its map. The Southern Pacific constructed its road to a point near the Texas Pacific, and connected with it; but, as is well known, the Texas Pacific Railroad had been only partially constructed in Texas, and there was no reasonable prospect of its being constructed across the territories of New Mexico and Arizona. The parties interested in the Southern Pacific Railroad Company of California therefore found themselves with a road constructed at great expense to the Colorado river, connecting with nothing, and without reasonable prospect of connecting with anything there. They were, therefore, compelled to continue across Arizona and New Mexico until they could make a connection with the Texas Pacific road. This was done by the Southern Pacific railroad companies of Arizona and New Mexico; within the time prescribed in the act for the construction of the road a connection was made with the Texas Pacific road in Texas.

The land-grant was given for the purpose of securing the construction of this road. The Southern Pacific Railroad Company of California was charged with the special duty of connecting the road with the city of San Francisco; that company and its allied companies have constructed the road and made the desired connection, and the Texas Pacific Company has transferred to them the land-grant appertaining to the portions of the road which they have constructed.

The grant was an absolute grant *in presenti* to the Texas Pacific Railroad Company, its successors and assigns.

The "Backbone Case" has, however, taken the question of assignability of the land-grants under this act of 1871 out of the realm of discussion by the express adjudications of the departments of Justice and the Interior thereon.

Upon this state of facts the claim of the Southern Pacific Company to the unearned land-grant of the Texas Pacific Company is made. The matter will not be settled until the return of Secretary Teller to his desk in September.

CHEAP FISH FOR LONDON.

The cheap food problem in the United Kingdom for fifty years past has attracted a large share of public attention. No sooner has a solution, in whole or in part, been discovered for one or more phases than a new one comes to the surface to demand attention. Cheap bread was, fifty years ago, the topic of the day in the economic discussions. The repeal of the corn laws met that issue; but the British public soon found that beef and mutton were steadily appreciating in value, and that beef, the corner-stone of the English dinner-table, as it were, was becoming an expensive luxury to many who toiled for days' wages. Consequent upon this arose the export trade in live cattle from the United States and Canada, to be followed by successful shipments of frozen beef and mutton from Australia to Liverpool and by a growing trade in dressed meats with the United States. The supplies of pork, lard and other hog products, not to enter into details with reference to America's exports of butter, cheese and oleomargarine, require no statistical exhibits to show the part they have played in various European countries in reducing and maintaining low prices for that variety of food.

But the end is not yet, and the latest movement in the direction of enlarging the supply and reducing the price thereof is embodied in the agitation now gaining ground in the United Kingdom as to "cheap fish for London." In one sense of the word London is England and England is the United Kingdom. That is, what will solve the problem for London will apply with equal force to the kingdom. The query is formulated and an answer thereto essayed in the July number of *The Nineteenth Century* by Mr. Samuel Plimsoll. Fish as food, fisheries and the various methods and appliances of procuring this variety of food are now attracting a great deal of attention in London through the very complete exhibit made by various nations at the International Fisheries Exhibition. The press of England have given much space to detailed accounts of this world's exhibit, and high praise has been awarded to those who have succeeded in making it the success it is. After the exhaustive accounts of it which have been published in the United States, it is almost unnecessary to add

that the section in which is contained the display from the United States exceeds all others in general interest, as well from the size, variety, and completeness in every department as in the improvements there recorded in methods and appliances for fish cultivation, propagation and capture.

One of the earliest reviews of some of the more general bearings of the Fisheries Exhibition which have come to our notice is that by Mr. F. Barham Zincke in the July number of *MacMillan's Magazine*. Mr. Zincke has evidently given the subject careful attention. In his summary of the reports on the fisheries of the various nations, as printed in the official catalogue, it is noted that "The most interesting and satisfactorily executed introductory notice * * * is that of the United States Commissioner. * * * It gives all one wants to know, and states the grounds of its calculations; for instance, it distinguishes, and nowhere else do we find this distinction, between the prices received for his products by the fisherman and the wholesale market rates." [It is noted that the total of the former in 1882 had grown to £20,000,000, as against £9,000,000 in 1880.] "In the excellence and finish—these in the end are true economy—of their apparatus and implements, in the size of the vessels employed, in the extent of the water fished over and in the value of the fish taken our kindred on the other side of the Atlantic already stand at the head of this industry."

This fact is regarded by the writer in *MacMillan's* as highly significant in view of the relatively high price of labor here and the fact that the work of reclaiming and developing an extensive new territory at the west naturally claims so many workers. It is, however, believed to typify the restless activity of the race in the new world, whose twenty-three acres of exhibits at London are compared with those from the oldest nation, China. The contrast is striking. The latter has not changed or improved her earliest methods of or appliances for fishing; the former, within one hundred years, with a new continent to develop, has outstripped the world. After following in regular order the features of the fishing industries of the United Kingdom, Holland, Belgium, Germany and Norway in the North Sea and adjacent waters, and those of France, Spain and Italy, the inference is drawn that "the history and present condition of the fisheries of all people, together with the amount of enterprisé and hardihood displayed severally by their fishermen, constitutes a very fair measure of the character of the people themselves."

If the importance of the fishing industry and the efficiency of its intelligent development have made relatively a similar impression upon the London public, it is not difficult to perceive the origin of the inquiry instituted by Mr. Plimsoll with reference to "Cheap Fish for London." In discussing this question, any improvement in the present condition of the trade there is believed to depend upon the establishment of additional market accommodation. At the outset, what a market is, what it should be, and what it should not be, are considered. Mr. Plimsoll finds many faults in the existing methods of distribution of fish through the London markets. Adequate provision is not made by the marketmen to supply retail dealers. The latter are frequently obliged to wait for hours before being able to obtain their day's supplies, and the smaller fish dealers who buy at the market are obliged to take a box of fish, irrespective of the grade of the same or the assortment thereof. The alleys for customers between the counters are the same that are used to bring in supplies, and are therefore kept wet and disagreeable. This should be avoided, it is added, by means of side alleys through which to convey the packages when received. The existing cellars and galleries in some of the English fish markets are condemned, inasmuch as the public will not ascend to the one or descend to the other, thus uselessly increasing the expense. The best modes of distribution of fish receive exhaustive treatment. The present methods are incomplete, inefficient and expensive, and it is suggested that a brigade of fish boys be organized to go over the same routes that the letter carriers traverse to deliver fish to retail dealers, at from 2d. to 4d. per cwt., according to the distance from the center of distribution. Special counters at the market should also be set aside for the patronage of such retail dealers as are possessed of small capital and a limited custom to enable them to make a selection of fish, instead of being obliged to buy a hamper of fish, irrespective of its contents. As to the best means of obtaining supplies considerable that will perhaps surprise Englishmen and that will interest Americans is made known. It is learned that the marketmen, in most cases, own mortgages upon the fishing craft which supply them. It is intimated that there are but few exceptions to this rule, and that the condition of these loans are primarily that the fisherman shall take all his catch to the stall of the mortgagee, and shall buy his supplies solely of him, thereby giving the latter the additional income to be obtained through the occupation of shipchandler and ship's husband. These mortgages, which used to bring 10 per cent. interest, now pay 7½ per cent., and constitute a large share of the revenue of the Billingsgate marketmen. This, as will be readily perceived, places the fishing industry of London in the hands of a comparatively few men, who control the supply, and therefore the price to retailers. The point made in this portion of the discussion of the subject is that not only is the British fishing industry, as at present conducted, very profitable to the marketmen (who control it), but that it is unnecessarily burdened with fees for harbor dues, landing of boxes of fish, loading the same on carts, and other unnecessary expenses, which ultimately fall (with heavy interest) upon the pockets of the consumers. It is therefore suggested that an efficient fleet of fishing vessels (or several such) be established by a stock company, to fish in the waters of the North sea, and which shall be equipped with the latest and most improved appliances. That the daily catch of the same be forwarded by fast steam dispatch boats to the east coast, and thence by rail to London (on ice) and to the markets (improved as outlined). From these centers the improved daily delivery system, it is asserted, would enable a section of London to obtain fish frequently and cheaply, where there are at present over 1,000,000 population of the poorer class, and not over half a dozen small fish stalls.

The profits, in spite of the inefficiency of existing methods of conducting the British fishing industry, are quite plainly shown, and the possibility of an improved, cheaper and more general supply and distribution made equally conspicuous. An investigation of this nature, together with the conclusions reached, testify very fully to the quick apprehension of the business public of to-day when confronted with exhibitions of the world's progress in any particular direction. Should the reforms suggested be carried out with but one-half the increased business and saving in expenses predicted, a sum equal to the entire cost of the London Fisheries Exhibition will have been saved to the London public within a few years.

HOW THE CHEESE TRADE LOOKS THIS SEASON.

The firmness with which the price of cheese has been upheld since May 1 has been a matter of surprise to almost every one connected with the trade. Cheese men all knew that the winter prices were the result of a limited stock and an active home business, a moderate make during the last season lying back of it all. But it was thought that if the make of this year should start out much in excess of the year before there would not only be lower prices but the market would be very apt to get swamped, on account of the disinclination of the English to take our stock unless they could get it very cheap. But while the price last year fell off only 1c. during May and June, and has fallen 3c. in the corresponding time this year, it had the advantage of starting from a much higher level this season, and was seven weeks in reaching the point to which it fell the second week last year. The average, therefore, down to July has been considerably better in 1883 than it was in 1882, and the maintenance of foreign shipments is the factor which has most largely aided to bring about this result. Domestic trade has had but a slight influence, and would have been powerless to help out the cheese manufacturer in the absence of a large foreign demand.

According to the published statistics of the board of trade returns in England, the quantities of cheese imported into Great Britain for the four months ending April 30 during the last three years were as follows: In 1881 they were 337,554 cwts.; in 1882, 281,532 cwts.; in 1883, 234,672 cwts. Here is a steady diminution of about 50,000 cwts. per year, and if this were to continue for a year or two longer our cheese trade would either have to meet with serious disaster or home consumption must increase at a much more rapid rate.

But for some reason or other Britain has seen fit to take a good deal more of our cheese this season than last. It is probable that her own dairy farmers have not made the amount of home stock for early trade which they made last year. At all events we shipped from New York during the months of May and June 456,621 boxes this year, against 386,875 boxes in 1882, an increase of 70,000 boxes in round numbers, or nearly 20 per cent. And this has been done without depressing the market below 10c. for the best qualities of cheese. If to the above amounts we add one-quarter, to represent the cheese shipped from other ports than New York on this continent, then reduce to cwts. and add them to the imports into Great Britain for the first four months of the year, it will be found that there is very little difference between last year and this year for six months, notwithstanding the decrease of 50,000 cwts. during the first four months. The figures will stand at 571,688 cwts. for 1882, and 577,137 cwts. for 1883, the difference showing a slight increase in favor of this year. The probability is, therefore, that the whole year will show quite a marked increase in our shipments, unless some unforeseen cause should interfere to diminish the demand.

But there is another element to be taken into consideration which is not so favorable in its character. In the months of May and June, this year, the receipts in this city were 544,515 boxes, against 436,075 boxes last year. In other words, the excess of receipts over exports was 88,000, where last season it was only 50,000 boxes. Here is an extra 38,000 boxes for the home trade to take care of in two months, and although the account of stock in the city on July 1 showed only 17,328 boxes, to compare with 10,670 a year ago, that difference is likely to widen out very materially in the next five active months of the season. What is to be done with this extra stock? Must it go into cold storage and await its fate during the winter season, or can we look for a combined demand of home and foreign trade sufficient to absorb the whole amount? There is not the slightest doubt that the make of the season will be considerably in advance of last year's. Wet weather has made flush pastures and flush milk. It has also had an unfavorable effect upon the milk, and cheese has not been of the usual excellent quality. This, again, is another point prejudicial to the future prospects of the market. Allowing that the foreign trade is likely to continue throughout the season as active as it has been, we are still confronted with the probability of an accumulation of stock, unless dealers and commission men are wise enough, when the dull weeks come, to put prices where the stock will look attractive to shippers and induce them to take larger quantities. The experience with cold storage two years ago was a warning, which few dealers will forget, to keep stock moving during the active season of trade. If this course is followed sufficiently to keep down stocks until the late August make the year will be a prosperous one for both the producer and the dealer.

OCCASIONAL NOTES.

As an indication of the drift of sentiment which is going on in a section once devotedly attached to protectionist ideas it is interesting to note the attitude of the Boston *Herald*, the leading journal of New England, toward the present tariff, and the scheme of distribution which the Pennsylvania protectionists are anxious to engraft upon it. In a late issue the journal referred to declares that the surplus which the Pennsylvania men propose to distribute arises from the perpetuation of the war tariff, and that 75 per cent. of the taxes imposed by that tariff are collected upon the necessaries and comforts of the people and upon the essentials of manufactures. In support of its position the *Herald* prints a table prepared by the Chicago *Times* before the question of a distribution arose, showing that 71 per cent. of the revenue is paid by such articles as breadstuffs, chemicals, etc., cotton manufactures, earthenware and china, flax, grass, hemp, iron, steel, leather and manufactures thereof, potatoes, salt, sugar and molasses, tin and wood and manufactures thereof, and raw and manufactured wool, all which, says the *Herald*, are among the classes of articles which "may fairly be classed as necessities." Certain articles which cannot be classed as luxuries are omitted from the above enumeration, and would go to increase the percentage. In view of these facts the *Herald* asks: How do the people relish the proposition to perpetuate such a system of taxation, yielding $100,000,000 of unnecessary revenue to become the sport and spoil of politicians in order that favored interests and monopolies may continue to enjoy "protection."

At a recent meeting of the executive committee of the committees appointed by the exchanges and other commercial associations of the Mississippi valley to promote the improvement of the western waterways, a vigorous line of policy was advocated. It was resolved to hold a river convention in Washington not later than November 20, 1883. Resolutions were also adopted declaring it to be the duty of the commercial bodies of the cities and towns, and of the farmers and laborers, in each congressional district in the Mississippi valley to petition their respective representatives in Congress to uphold and vote for adequate appropriations for the improvement of the western waterways, and urging that hereafter no candidates for Congress be selected from the Mississippi valley except those pronouncedly in favor of river improvement. Mr. Wright, the secretary of the conference, spoke of the growth of the west and of the jealousy of the east. The hostility to the last River and Harbor bill, because of the appropriations for alleged obscure creeks, was, he said, merely a pretext to escape from voting to the Mississippi its due. He deprecated any antagonism between east and west, but he thought that all highways should not lead to the Atlantic coast. He was willing that public money should be spent in facilitating transportation on the waterways and the coasts of the east, but the great waterways of the west should first be rendered so complete by wise and judicious systems that commerce should seek their channels. Other members thought that the Mississippi should be rendered navigable from its source to its mouth. After effecting a permanent organization the conference adjourned.

Those commercially philanthropic Americans who engineered the last treaty with China can ponder at their leisure upon the abortive result of their labors; and such of our contemporaries among the secular press as hugged the great moral idea that the opium trade was sinful can now realize how exceedingly sinful a people we Americans be. It was thought, when that instrument was ratified, that there was an end of the opium trade so far as this nation was concerned. As a people we had washed our hands of the whole business, and when Congress, acting on the same line of policy, increased the duty on opium $4 a pound, it was thought that the finishing touch had been put to the entire business, and that the vice of opium eating or smoking would soon disappear from America. The facts, however, are against this conclusion. American and Chinese enterprise was equal to the occasion, and opium has been imported in large quantities to anticipate the new duties. If it had been intended to hit the opium trade between wind and water, as it were, the new duty should have been collected upon the passing of the bill, but with a consideration for opium slaves which was gracious in the extreme six months' notice of intention was given, of which they shrewdly availed themselves.

From the enactment of the Tariff bill 4,347 cases of opium were landed in San Francisco up to the 1st inst. Each of these cases contained 41 pounds, so it is easy to calculate the quantity. Some of the opium came from Australia; the Portuguese settlement in China sent a large lot; but most of all came from the open ports. There is now said to be $3,000,000 advanced on opium at San Francisco by the banks, which hold the drug as collateral. While, therefore, the revenue will not soon be benefited by opium imports, the trade in it continues as brisk as ever. The public conscience has been appeased, however, and that is something considerable. Meanwhile, smuggling will be stimulated by the high duty, which, for this reason, will necessarily become a costly demoralizing agency.

Much attention has been devoted of late years to the diseases of animals, especially of such as are used for food. Little or nothing, however, has been learned about abnormal conditions of this nature in the case of fish. Professor Huxley recently followed up his valuable lectures upon fishes by a lecture on fish diseases, wherein he undertook to present some considerations of a general nature regarding the diseases to which fresh-water fishes are subject. One form of epidemic, he said, was well-known, namely, the salmon disease. A singular feature of this epidemic is that even when prolonged and violent it does not diminish the productiveness. Professor Huxley admitted that very little was definitely known regarding the nature and causes of this disease. A series of experiments, however, had convinced him that the disease was the work of a parasitic fungus—a fungus which lives on decayed organic matter, but has the curious property of attacking living organic matter. As the fungus in question abounds in most rivers the wonder was, he said, not that salmon are diseased, but that they are not always diseased. On the whole he inclined to the belief that the diseased fish had better be, not extirpated, but let alone. At the close of Professor Huxley's lecture Mr. Wilmot, the eminent Canadian fish culturist, expressed the opinion that the salmon disease does not exist to any extent in America or in any other country where the rivers are in a normal condition. Professor Huxley, in referring to Mr. Wilmot's remarks, stated that the disease existed to a devastating extent in British Columbia and northern Asia.

The *Pall Mall Gazette* says that it will be very lamentable if one consequence of the waste of parliamentary time should be the dropping of the National Debt bill. England, it says, must reduce its debt, and that on a large scale, if she is not to lose caste among nations and abandon her foremost place. "Already," the *Gazette* adds, "it is open to question whether we have not by our remissness in the matter, as compared with the United States, distinctly fallen to a second position." The journal referred to then enumerates some of the secondary reasons which should help to convince wavering minds of the necessity of reducing the debt, touching lightly upon the primary reason, the prospect of improved national credit. Prominent among those secondary reasons is the so-called "exhaustion of coal" argument. The *Gazette* points out that England's present prosperity as an industrial and manufacturing nation is largely based on a supply of cheap coal and iron, and that her rapid growth is accompanied by a constantly increasing consumption of these articles. It is obvious that one of the conditions of England's present prosperity and growth is changing to her disadvantage. In every direction England is losing special advantages which she once had. Another reason for reducing the national debt is found in the fact that whatever the country does in that direction is insufficient to compensate the growing indebtedness of the community in another form. Of late years, it seems, while Great Britain has been paying off as a nation seven or eight millions of debt a year, the local authorities have been borrowing from fifteen to twenty millions a year. As the journal quoted remarks, this is certainly a reason for not relaxing the national effort, since the credit of the nation tends to be weakened by local borrowing. Another special reason for paying off the debt is found in the fact that a considerable portion of the national revenue is derived from taxes on capital, and thus the capital of the nation is being diminished through the operations of the national exchequer. Looking at all the circumstances, the *Gazette* says, it is most unsatisfactory, to say the least, that hardly any part of the national revenue is now being applied to reduce debt except what is derived from taxes on capital.

An interesting exposition of the condition of the agricultural population of India was given by Mr. John Bright at a recent meeting of the East India Association. The object of the meeting was to consider the expediency of establishing an agricultural banking system under which the needy ryots or peasants might be supplied with capital at a reasonable rate of interest. Mr. Bright said that the question to be considered was one of the greatest moment. Eighty out of every hundred of the whole population of India he said were engaged more or less directly in agriculture. Out of every hundred persons connected with agriculture, only about twenty it appears are in a condition to carry on their operations as farmers without assistance from bankers or other persons who lend. About 30 per cent. of the agricultural population are so hopelessly poor that it is almost impossible for them to borrow, or borrowing, to be ever able to repay, while about 50 per cent. are in such a condition that it might be judicious under certain circumstances to lend them assisting capital with a fair chance that it would in a reasonable time be repaid. The question was whether anything could be done to assist the fifty out of one hundred to whom loans might be made with reasonable safety. The fact that 80 per cent. of the agricultural population were compelled to borrow was in itself, the speaker said, an astounding fact, but it was also true that those who succeeded in borrowing from the native bankers of the district were obliged to pay rates of interest ranging from 12 to 36 per cent. Capital employed in agriculture in any country, Mr. Bright thought, must be absolutely unprofitable to the cultivator obliged to pay such enormous rates of interest. Considerations such as these rendered apparent the need of a change, and one interesting feature of the case was that the bankers who lent money at the extreme rates mentioned were sensible that it would be an advantage to them to have the rate of interest made lower and the security made better. They were even willing to contribute to a large extent to the funds which should enable some banking system to be established which should give this great relief to the cultivating population of India.

Mr. Bright's views were supported by Sir W. Wedderburn, who had been a judge in India. He said that in the Deccan the ordinary monthly rates of interest were 1, 2 and 3 per cent. For nearly half a century the relations of the ryot to the money-lender had troubled the Bombay government. It was apparent that the ryot could not exist without the money-lender. On the other hand, by constant borrowing, he was falling into hopeless debt. The problem was to supply him with capital without the loan becoming the cause of his ruin. Some steps had already been taken with that end in view. Early in 1881 a rough project for an agricultural bank was drawn up under the auspices of some leading capitalists in Bombay. One important point in the scheme related to the settlement of the ryots' old debts and to the method by which the advances of the bank were to be recovered. It was represented to the government of India that the settlement referred to would be best effected by means of a commission acting under legislative authority. The government in response to these representations agreed to carry out a voluntary liquidation, by way of experiment, in one division of a Deccan district, and also agreed to advance the cash necessary to compromise the claims; the amount to be collected from the ryots in moderate installments over a term of years. Among the advantages expected from the establishment of the system proposed in India the speaker mentioned the large margin of profit from cultivation when capital provided irrigation and manure; the merits of the ryot as an honest debtor; the existence of a skilled agency for money-lending, and the favorable attitude of government. The working of the project set forth above will be watched with interest everywhere, but more particularly in England, whose legislators have been recently troubled with a problem of a somewhat similar character nearer home. The projectors of the scheme have been careful not to allow speculative benefits to cloud their practical judgment. The experiment is not to be tried on a great scale throughout India. The operation of the plan is to be confined to a particular district to the end that it may be fairly worked, that it may be speedily tried and its results made known, and also that no considerable portion of the country may be involved in the failure of the scheme should its outcome prove unsatisfactory.

SPECIAL CORRESPONDENCE.

THE INDUSTRIAL POSITION OF PITTSBURGH.

Pittsburgh, July 18.—In considering the exhibit of Pittsburgh's manufacturing statistics, as shown by the census and in the light of subsequent developments, a most salient feature is the incompleteness and injustice done to the magnitude of the industries of that city by the census returns. Much of this is doubtless due to the observance of geographical divisions. Pittsburgh, as is well known, is a great manufacturing community, of which a large number of the establishments are situated in points just outside the city lines. Of the 250,000 people who get their living from the commercial and industrial enterprises of the city, 100,000 live in the residence and manufacturing suburbs, within a radius of ten miles, while of the manufacturing industries which are operated by Pittsburgh capital, do all their business through Pittsburgh, and are as truly part of her interests as any located within the city lines, fully one-third in number and over one-fourth in number of hands and value of product are located in Alleghany City, Sharpsburg, Etna, Braddock's and McKeesport. The census report naturally observes the geographical division and reports only such establishments as are located within the city lines; yet that does no less injustice to the manufacturing importance of Pittsburgh. The difference which this arbitrary division makes is shown by the following comparison of the manufacturing totals of the census for Pittsburgh and those of the county of Alleghany, of which only an unappreciable portion could properly be reckoned outside of the legitimate industries of the city:

	Pittsburgh.	*Alleghany Co.*
No of establishments	1,112	1,895
Capital invested	$52,645,000	$70,641,426
Hands employed	30,930	49,171
Wages paid	$17,108,989	$22,371,951
Value of material used	42,109,777	61,739,273
Value of product	75,915,033	105,272,739

The census of Pittsburgh alone ranks her as only the fourteenth city of the United States in the number of manufacturing establishments. She is placed in that respect below such cities as Newark, Providence and Buffalo. In the amount of capital invested in her manufactures, Pittsburgh is ranked by the census as the fifth city of the country, whereas the return for the county is only exceeded by those of New York and Philadelphia. In the number of hands employed the return for the city proper gives her only the ninth place, and in wages paid the eighth. But the total for these same items for Alleghany county ranks next to those of New York, Chicago and Buffalo. In the value of manufactured product, which is low on her leading staples, Pittsburgh proper is the ninth city of the country by the census report, while the total of the manufactures in the county is the seventh in the United States. A comparison of the manufacturing statistics of the leading industrial counties would show the relative importance of the manufacturing centers more clearly than the comparison of the twenty leading cities afforded by the census.

The further inadequacy of the census return is strongly indicated by the comparison of the totals of the census for the manufactures of Alleghany county with the totals of the report of the Pittsburgh Chamber of Commerce. Of the manufactures of the two cities of Pittsburgh and Alleghany in 1881 the latter shows a total of capital invested in manufactures of $105,401,481, against $70,641,426 credited by the census report to the entire county for the previous year. In like manner the Chamber of Commerce reports the total of hands employed at 85,436, against 49,171 given by the census, while the value of the product in 1881 is stated by the local report at $145,721,619, against $105,272,739 in 1880 by the census. A portion of these differences may be held to cover the growth of the city in the year. A portion also might be credited to the natural disposition of a local organization to give its totals so as to make the most favorable showing possible. But the Pittsburgh Chamber of Commerce report was remarkably clear from that tendency, and, indeed, what errors have been discovered in it since it was issued last year were in the other direction. Giving both ideas due weight it is tolerably clear that there is a large difference which can only be accounted for by the incompleteness of the census returns upon the manufacturing industries of Alleghany county.

Other reasons why the figures of the census report cannot be analyzed as presenting a fair view of Pittsburgh industries are shown by the utter absence from its table of such branches as the 12 boiler and tank manufactories, turning out $1,450,000 of production in 1881; 16 brass foundries, with a production of $1,300,000; 6 saw and tool factories, with a production of $1,345,000, and 7 stove foundries, with a production of $600,000. Other instances could be given almost *ad infinitum*, a portion of which may be ascribed to a difference in classification between the census report and the Chamber of Commerce report, but which must argue the superficiality of the census report itself to a great extent.

The opportunities for giving a statistical showing of the enlargement of the industries of Pittsburgh since the census year—except such as may be drawn by the enlarged totals of the Chamber of Commerce report, which was published last year—are confined to the official figures of iron and steel production. As those industries form in a great measure the foundation of Pittsburgh's industrial activity, the following statement of the production of iron and steel in Alleghany county, from the annual report of the American Iron and Steel Association, will give a fair indication of the enlargement of the volume of Pittsburgh industries during the past three years:

Pig iron—	1880.	1881.	1882.
Number of blast furnaces	15	15	16
Total make, tons	300,497	385,453	358,840
Finished iron—			
Number of rolling mills	30	30	31
Product of iron rails, bar angle, bolt, rod and hoop, tons	287,253	405,119	336,628
Sheet and plate, tons	80,899	75,767	71,038
Nails, kegs	419,098	485,916	459,228
Total rolled iron, tons	389,107	505,182	430,627
Steel—			
Number of steel mills	17	17	18
Crucible steel ingots, tons	52,136	61,256	59,590
Other steel, including Bessemer, tons	169,819	247,345	258,501
Total steel, tons	221,955	308,601	318,097

Four of the steel mills included in the above report are also iron rolling mills, so that they appear twice in the number of establishments but not in the amount of product. The above table shows that while from 1880 to 1881 there was an increase in the production of 85,000 tons of pig metal, 116,000 tons of rolled iron, and 87,000 tons of steel, there was a retrograde movement in 1882 on the first two classes, the production of pig iron having decreased 27,000 tons, while that of rolled iron fell off 75,000 tons. This is directly attributable to the strike, which held the iron works here idle during four months of 1882. As the loss in product is not by any means in proportion to the loss of time, it will be seen that the real significance of the showing is an actual gain in productive power. Steel made another gain in 1882 of nearly 10,000 tons over the large product of 1881. These figures argue very plainly the steady enlargement of the iron and steel production of Alleghany county, not so much by the addition of new establishments as by the expansion and improvement of the older works.

The relative importance of Pittsburgh to the iron and steel industry of the whole country is also shown to have increased by the official figures of the American Iron and Steel Association. In 1880 Alleghany county produced 7 per cent. of the pig iron made in the United States, 21.21 per cent. of the rolled iron product of the entire country, and 15.9 per cent. of the total domestic production of steel. In 1881 the proportion increased to 8.4 per cent. on pig iron, 23.15 per cent. on rolled iron, 17.34 per cent. on steel. In 1882 the strike principally affected Pittsburgh, and consequently her ratio of the production of the entire nation fell back somewhat, but not to the degree that might have been expected from the duration of the strike. The percentages for that year were 6.5 on pig metal, 19 per cent. on rolled iron, and 16.35 per cent. on steel. When the figures for 1883 are completed next spring it is safe to predict that the importance of Pittsburgh's production will have sustained, if not increased, the percentages shown by the returns of 1881.

In examining the table of manufactures for Pittsburgh the most distinctive feature is, of course, the iron interest and the subsidiary manufactures arising out of that industry. From the Chamber of Commerce report is taken the following summary of the different manufactures of metal in Pittsburgh and Alleghany for 1881:

	No. establishments.	*Capital invested.*	*Hands employed.*	*Value of product.*
Iron rollingmills	36	$19,020,000	18,905	$30,212,257
Iron blast furnaces	16	4,890,000	2,285	8,766,493
Steel mills	17	10,170,000	7,060	18,378,830
Agricultural implts	5	400,000	365	675,000
Boilers, tanks, etc	12	645,800	405	1,450,000
Brass founders	16	683,000	330	1,300,000
Iron bridges	3	570,000	752	1,462,000
Hardware	5	391,000	416	500,000
Copper	2	630,000	120	975,000
Founders & machinists	35	2,470,000	2,083	3,953,000
File works	5	200,000	40	20,000
Guns, pistols, etc	5	100,000	59	257,000
Iron fences	6	100,000	85	204,000
Iron roofs and cornices	3	167,000	141	316,000
Railway supplies	6	1,435,000	1,102	3,177,817
Saws and tools	6	910,000	831	1,345,850
Stoves	7	443,000	406	693,000
Safes	4	100,000	127	443,450
Steam pumps	3	85,000	60	110,000
Miscel. lead and iron	7	1,510,000	1,050	5,052,921
Totals	199	$44,710,800	36,625	$80,232,624

It will thus be seen that the metal-working branches of manufacture, though numbering but a little more than one-tenth of the total of manufacturing establishments in Allegheny county, employ over 40 per cent. of the capital and number of workmen and turn out 55 per cent. of the aggregate value of production.

The ratio of growth shown to exist in the manufacture of bar iron and steel may be generally predicated of the entire metal-working interests of Pittsburgh.

Other special branches of manufacture are shown in the following summary:

	No. establishments.	*Capital.*	*Hands employed.*	*Value of product.*
Glass and glassware	59	$5,985,000	6,442	$6,832,000
Coke	60	10,854,500	5,659	4,423,559
Tanneries	14	1,190,000	345	2,183,000
Fire-brick and tile	10	858,000	845	1,029,500
Oil refineries	16	.....	980	4,000,000

These, with the metal branches already referred to, constitute the distinctive industrial features of Pittsburgh. The coke industry, as given above, represents in a large share the establishments in the Connellsville region operated by Pittsburgh firms, and as such their place among Pittsburgh manufactures may be of doubtful propriety. The same may be said of the coal interest, in which 67 Pittsburgh firms are engaged, with mines located along the railways and rivers of western Pennsylvania, in which $15,552,000 of capital is invested, 17,962 hands are employed and $12,208,306 worth of coal mined in 1881. Among the branches more common to all cities are the 21 breweries, with $1,895,752 of production; 7 distilleries, producing $4,470,000 worth of liquor; 35 cooperage establishments, with a product of $1,150,000; 3 cotton mills, product $785,000; 4 chemical and acid factories, product $1,283,583; 3 flouring mills, product $1,158,930; 57 furniture and chair factories, product $1,220,000; 8 whitelead and linseed oil works, product $1,672,000, and 111 establishments working in lumber, including barge builders, turning out $5,688,000 worth of work.

The opportunities for obtaining an accurate statistical exhibit of Pittsburgh manufactures are very few, and an improvement in that respect is one of that city's present needs.

AMERICAN RAILROAD STERLING SECURITIES.

London, July 5.—It is perhaps a little strange, with all the demand which has been observable of late years in this country for American railroad securities, that the sterling issues have not been more extended. There are over £50,000,000 of such sterling bonds held in this country—the Stock Exchange official list enumerates upwards of £52,000,000—and this amount has stood very nearly at its present figure for years past. A very few new issues have made their appearance to replace others redeemed or reduced, but while the dollar list has

extended greatly since 1879—in fact business in dollar shares and bonds has probably more than quadrupled since then—the fact remains that there is stagnation in respect to the sterling department. It will be interesting to inquire why this should be. The sterling bonds, as a rule, command high prices, and are very firmly held, so much so, indeed, that, apart from a few issues connected with the Atlantic & Great Western, it may almost be said that they have stood still in the market during the past eighteen months. This is not a little in their favor, having regard to the serious depreciation in many of the dollar securities held in England during this period.

The following list certainly shows very little variation over the period named. It is, however, worthy of remark that as so many of the sterling bonds stand at a premium, while they are redeemable at par, the fact that the price has remained stationary in reality indicates an increased appreciation on the part of the public. The complete list, as quoted in the Stock Exchange, is given below, together with the present amount, the date of redemption, and the market quotations at the end of 1881 and 1882, as well as at the present time:

Present amount.	*Per cent.*	*Sterling bonds and shares.*	*Redeemable.*	*Decemb'r, 1881.*	*Decemb'r, 1882.*	*June, 1883.*
£350,000	12	Alabama & Great Southern, limited, A, 6 per cent. preferred	....	11	10¼	10

1,138,800	6	United New Jersey bonds	1901	119	121	120
£52,376,026						

As a rule, English investors have done considerably better by holding the bonds quoted above than by the shares and bonds quoted in the considerably more extensive list of dollar stocks. But there are reasons why the latter have been so much more extensively floated in this country of late years. In the first place—and perhaps this is the most important reason of all—a very large proportion of the recent additions were originally floated on the other side of the Atlantic, or, at any rate, partly floated there, and it has been an afterthought to introduce them to the London market. Had Wabash, or Louisville & Nashville, or New York, Ontario & Western, or Norfolk & Western, or Denver & Rio Grande securities been originally intended for the London market they might have assumed a sterling form; but they came here after they were created, and in their present form they have certain advantages over the purely sterling issues. Those advantages are such as are in the main appreciated by the dealer and speculator, as apart from the investor. The mere negotiation of dollar coupons in London affords a lucrative business to a large number of firms, and they realize a much handsomer profit by purchasing isolated coupons from the holder than by remitting the dividend in bulk for payment in sterling here. This is one reason why the American houses have a distinct preference for dollar shares and bonds. A second and also a powerful reason is that dollar investments have the support of the transatlantic markets, where they originated. When the British public show a tendency to reject such securities they can be returned to America, and when the British public show a preference for them, and they can be purchased in New York under the price bid here, there is a good profit to be made by the Anglo-American financial houses. Of course, the dollar securities quoted here are to a very great extent regulated in their prices from America, and it is noticed that when there is confidence in American markets there is likewise a better support accorded to such securities by English investors. Confidence begets confidence, and when people here see that American railroad stocks are out of favor in New York there is a not unnatural tendency to think that something is genuinely the matter with them. Hence it is that it would be an almost useless reproduction of market fluctuations to record a comparison of prices among the dollar securities quoted here. All the great movements in our prices have their counterpart in New York or Philadelphia.

With the sterling bonds, however, it is a very different matter. London prices in these instances stand practically alone, and the enumeration is a sufficiently important one to consider them in some detail. It will be seen that the Baltimore & Ohio, the Illinois Central, the Pennsylvania and the Philadelphia & Reading have specially favored this market, and for a thoroughly sound and well-managed line, the management of which desire to see their bonds well placed and commanding high though stationary prices, there has in times past been a considerable advantage accruing to them upon their sterling issues. At the present time English investors are glad to take a high-class American railroad bond to pay them 4½ per cent., the recent issue of 4½ per cents by the Baltimore & Ohio Company standing above par. But another reason why the sterling list of securities has not increased is that bonds can now be issued in New York upon much more favorable terms than they used to be, and if London is willing to take 4½ per cents transatlantic markets are found to be willing to do very nearly the same. In London the dealers have a very distinct liking for the dollar securities. There is no gambling whatever in the sterling loans, and as dealers play so important a part in the introduction of American securities here, they naturally select a form of security which will bring the greatest amount of business to themselves. There is no doubt that the public here, and the market, have become well accustomed to the dollar in their transactions in American railroad investments. Still, the sterling bonds are an attraction to an important class of our investors, who would not be tempted to go in for a security quoted in foreign money, with interest payable only abroad, and it would be a matter for regret if the list recorded above should not be extended. It is to be remarked that one or two of the dollar issues have been arranged so as to become practically sterling securities, although they do not find a place in the foregoing statement. When, for instance, a number of New York Central shares have their dividends payable in sterling at the fixed exchange of 4s. 1½d. per dollar, they fulfill most of the requisites of a sterling security.

NOTES FROM CHINA AND JAPAN.

Yokohama, June 11.—War between China and France would greatly unsettle business, but it is by no means improbable. The policy of the French republic is to increase its influence in southeastern Asia, which it hopes to dominate, as England does Hindustan and the Malay peninsula. Its objective point now appears to be the control of the trade of the two great provinces of China—Yunan and Kiangsee. For that object it might pay France to go to war, but the republic may find the "effete empire of China" a far tougher customer than it bargained for. That the Anamite government does not favor French territorial aggrandizement is beyond question, although it was compelled, through weakness, to acquiesce in the annexation of its three southern provinces by France in 1867. If Anam becomes a vassal of France the latter country will be brought into direct contact with China, whose border population is at once lawless and warlike. China cannot afford to renounce its suzerainty over Anam, although the treaty between France and the sovereign of Anam, in 1874, declared his independence of every foreign power, the king promising, on his part, to conform his foreign policy to that of France. The fact that Chinese troops marched to the relief of Hanoi, and that the bulk of them, instead of leaving the country, have since taken military service under petty Anamite mandarins, indicates the settled policy of the empire to check French aggression on the south. It was of these auxiliaries that the French envoy spoke when he declared that Chinese troops in Anam would be treated as marauders and shot. Li Hung Chang, the Chinese commander-in-chief, is not to be deterred by any such threats, and it is known that intervention in the Anamite affair has been undertaken at his suggestion. Nevertheless he must be well aware that China is not a match for France, and may be prepared to negotiate at the last moment, owing to the prevalent disaffection in Wuchaug and the probability of seditious outbreaks all over the southern provinces. The slaughter of Christians in Yunan serves to complicate matters.

Admiral Willes has sailed for Nanking, with a squadron of four ships, and will remain there until the silk factory question is settled. This is a peculiarly British method of negotiating with China, and the English admiral may imagine that the sight of his guns will frighten the Chinese governor, Tso-tung Tsang. This old general is the leader of the war party in China. He is opposed to foreigners, and would build a new wall, if possible, to exclude them.

The new code of coinage regulations has been issued by the Japanese government, signed by the Premier and Finance Minister. It is far more satisfactory than the old one. Any one can now command the services of the mint directly, and the convenience of the commercial public is served by the provision that bullion may be delivered either at the mint in Osaka or at the Bank of Japan, in Tokio. Provision is also made for the immediate issue of coin for bullion. The assay charges are not unreasonable.

In my last it was stated that Mr. Aston, of the English consular service, was in Corea, negotiating a favorable tariff with the Hermit Kingdom. Mr. Aston has returned from Corea, having succeeded in postponing the ratification of the treaty with the United Kingdom until the end of this year. The postponement was caused by a desire on the part of the British to obtain a modification of the treaty in their favor. The precise point has not transpired.

Japanese trade with Corea was worse in 1882 than heretofore. This is accounted for by the outbreak at Souel, in July of that year, and the consequent withdrawal of Japanese traders. This lost them the August trade, which is the month in which Coreans always buy their stock of gray shirtings. The trade is reviving. Statistics of Corean foreign trade show that in the last six months of 1882 the imports from Japan fell off 20 per cent. while the exports decreased 40 per cent., as compared with the corresponding period of 1881. The Chinese monopolize nearly all places of profit and influence in the peninsular kingdom, and the presence of Chinese troops at the Corean capital is not an agreeable feature. Their commander was very indignant that General Foote did not invite him to be present at the ratification of the American treaty, which was managed without any parade or display.

Interior trade in Japan is bad, reports of increasing bankruptcies prevailing. The weather has been phenomenally severe, interfering seriously with farming operations. The fears entertained regarding the silk crop are not sustained by late advices. The crop promises a full average, although a fortnight to three weeks late.

Under the direction of the Department of Agriculture a Union Silk Association has been formed for the purpose of procuring and publishing correct information as to the conditions of the silk market abroad, changes of fashion and style, improvements in machinery, and the effect of products of wool, hemp and cotton upon the markets in opposition to silk. "Hereafter elaborate investigations will be made as to where silk is most needed and what textile fabrics are in vogue," remarks the prospectus of the Union Silk Association. It will devote its utmost power to the improvement of the silk industry. This can best be attained by organized effort. Correspondents will be appointed to investigate and report upon the precise condition of the silk industry in all producing parts of the empire, with a view to accurate information and improvement of methods. This effort is regarded as a most important step toward direct trade. Japan wants to conduct its own trade without the intervention of foreign middlemen, who make all the profits.

Japan will be fairly well represented at the Boston international show next autumn. If time had allowed the exhibits would have been more numerous, great interest being taken in the project. Americans will be able to compare genuine works of Japanese art with the spurious specimens which are so commonly met with in their country.

The market for kerosene is depressed, with large shipments advised to arrive. Shirtings neglected; iron weak at lower rates; tea firm at current prices, with fair demand; sugar without material change in value. New silk may be expected in about a fortnight. The season of 1882–83 is practically closed.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

The indorsement, "Pay B or order for account of C," is a restricted indorsement, and vests no general property in B, but simply constitutes him the agent of C for the purpose of collection. So held by the Supreme Court of Kansas in the recent case of The Armour Brothers' Banking Company vs. The Riley County Bank, et al. The court held further that an indorsement such as that referred to was a contract in writing, and not subject to contradiction by parol testimony.

A "debt owing or accruing" means one actually existing, and not such as may arise in the future, according to the decision of the English Court of Appeal in the recent case of Webb vs. Stenton. This was a case where a judgment-creditor sought to attach the debtor's interest in the income, payable half-yearly, arising from a trust fund under a will. The interest under the will, the Master of the Rolls said, was not a debt owing or accruing to the defendant at the time the order was asked, and could not therefore be attached. The debt, the same learned judge continued, must be one recognized by law, and it is not sufficient to show that it is probable that there will soon be a debt. It must be shown that a debt actually exists, though it need not yet be payable.

Where taxes have been paid under a mistake of fact the party receiving them is bound to refund, and they may be recovered back in an action for money had and received, according to the decision of the Maryland Court of Appeals in the recent case of Wicks vs. Westcott. The court held that the extraordinary process of mandamus was not proper to be invoked before judgment recovered in an ordinary action at law, the remedy by such action being sufficient, but said that after judgment recovered mandamus would be the proper remedy to compel county commissioners to levy taxes for its payment.

In a recent case before the Supreme Court of the United States it appeared that there was a contest for the right to enter a tract of land, one party asserting title under a patent from the United States, and that a state court denied the title under the patent on the ground that the land department of the United States had decided erroneously a question of fact. The Supreme Court held that there was a federal question involved, authorizing an appeal from the state court to the federal tribunal of last resort, and further, that the decision of the land department concluded the parties. The court said that the land department was a tribunal appointed by Congress to decide questions such as that involved in the case before them, and that a final decision by the officers of the department was conclusive everywhere else as regarded questions of fact.

During ten days of 1882 the Governor of Missouri was absent from the state engaged in the performance of duties imposed upon him by the constitution and laws of the state. In the absence of the Governor the Lieutenant-Governor appeared at the executive office and assumed the duties of the Governor, which he continued to discharge until the return of the latter, in the meantime receiving the Governor's salary. The Auditor withheld the amount thus paid from the Governor, who instituted proceedings by mandamus (Crittenden vs. Walker) to compel the Auditor to issue his warrant for the

amount withheld. The Supreme Court of Missouri recently ordered a peremptory mandamus, holding that the absence of the Governor from the State for the purpose of performing duties cast upon him by law did not authorize the Lieutenant-Governor to assume the duties and prerogatives of his office and to receive his salary during his absence.

One Hind recently brought an action for an alleged libel against Sir Henry Brand, the speaker of the House of Commons, in respect of matter which was published in a parliamentary paper. The paper embodied a report of certain treasury officers made to the Lords Commissioners of the Treasury in relation to the purchase by the English government of an undertaking known as the United Kingdom Electric Telegraph Company. The plaintiff complained of the report as libelous and calculated to do him an injury, asserted that it had been published for a fraudulent purpose, and claimed that the speaker both in his official and individual character was responsible for its publication. The Court of Appeal, confirming the decisions of the inferior tribunals, dismissed the action upon the ground that the publication in question was admittedly and notoriously an official one, and that in his official character the speaker was privileged. Hind vs. Brand, decided July 3.

In the case of Somers vs. McLaughlin, recently decided by the Wisconsin Supreme Court, it appeared that the defendant agreed with the plaintiff to purchase of the latter a horse then in possession of another. Plaintiff gave defendant an order on the one having the custody of the horse to deliver it to the defendant. The latter, on taking the horse, said to the custodian that he took it only on trial, and he returned it to the custodian on the same day. The court held that there had been a sale and delivery of the horse, and that the defendant was liable for the purchase price. The rule in such cases was declared to be that when property in the custody of another has been sold and everything done to complete the sale except an actual delivery, and an order is given upon the custodian for such delivery and the purchaser obtains the property on such order, he cannot change or rescind the bargain upon mere notice to the custodian, and the delivery is complete.

Section 2,333 of the U. S. Revised Statutes provides that where a vein or lode bearing gold, silver or other valuable deposits is known to exist within the boundaries of a placer claim an application for a patent for such placer claim which does not include an application for the vein or lode claim shall be construed as a conclusive declaration that the claimant of the placer claim has no right of possession of the vein or lode claim, but that where the existence of a vein or lode in a placer claim is not known, a patent for the placer claim shall convey all valuable mineral and other deposits within the boundaries thereof. In the case of the Iron Silver Mining Company vs. Sullivan, in the United States Circuit Court at Denver, Judge McCrary recently decided that a "known" lode or vein within the purview of the section referred to was a known lode or vein mining claim which had been duly located or recorded and owned by some third party before the application was made for the placer patent, and it appearing from the defendants' pleadings that they did not locate or discover their lode claim till after the placer patent was applied for or had issued, the judge held that their rights were not reserved or excepted in the placer patent.

A creditor cannot lawfully pay himself with the debtor's money without the debtor's consent, either expressed or implied, and when the debtor delivers him money for a purpose which negatives the idea of payment the creditor's control is limited to the purpose declared. Such was the view of the law taken by the Supreme Court of Michigan in the recent case of the Detroit, Hillsdale & Southwestern Railway Company vs. Smith. It appeared that the defendant was the general superintendent of the plaintiff and also of the Toledo & Ann Arbor and Grand Trunk Railroad companies at a salary of $5,000 a year. Each railroad company was to pay one-half the salary. Certain money was transmitted to the defendant to be used in paying laborers, but was retained by the defendant and applied by him to the payment of arrears of salary due him by the Toledo company. The plaintiff thereupon brought suit to recover the money. The defendant had judgment in the court below on the ground that the application of the money by the defendant upon his salary was a payment. The decision below, however, was reversed by the Supreme Court, that tribunal holding that payment implies a voluntary act of the debtor looking to the satisfaction in whole or in part of the demand against. In the case before the court there was no such act whatever. What was done by the defendant was directly in violation of the orders of the plaintiff, who did not contemplate or desire any such payment. Judgment was accordingly rendered for the plaintiff.

An interesting question respecting the rights of consignors under bills of lading was passed upon by the Supreme Court of Kansas in the case of the Missouri Pacific Railway Company vs. Beeson, decided on the 12th inst. It appeared that the plaintiff and appellee entered into a parol contract with the defendant and appellant, a common carrier of goods from Paola, Kan., to St. Louis, Mo., to carry certain goods at a stipulated price from Paola to Philadelphia, Pa. The goods were all marked to a certain consignee in Philadelphia, and were delivered to defendant under the contract and put into defendant's cars. Afterward the defendant gave the plaintiff a bill of lading for the goods, which showed that the goods were consigned to the consignee at Philadelphia and were to be carried from Paola to "St. Louis Station." The plaintiff accepted the bill of lading without objection. He examined it only to see that it stated the amount of goods delivered and that it contained the name of the consignee at Philadelphia. He did not notice that the bill of lading showed that the goods were to be carried by the defendant only to "St. Louis Station." A portion of the goods was not carried to Philadelphia but was lost, and the plaintiff sued the defendant for the value thereof. Upon this state of facts the court held that the plaintiff might show the original parol contract between the parties; that, when shown, it and not the bill of lading would be considered as settling the rights of the parties, and that the bill of lading, taken under the circumstances under which it was received by the plaintiff, would not be held to supersede the original parol contract between the parties.

BUSINESS NOTES.

The forthcoming exhibition of the New England Manufacturers' and Mechanics' Institute, which will open at Boston, September 5, promises to be very successful. The first selection of space to exhibitors was assigned on July 16. It is added that over one thousand applications for space are on file, representing every state in the Union.

The second annual National Mining and Industrial Exposition at Denver was opened with appropriate ceremonies on the 17th inst. As might be expected, the city was thronged with visitors. Press dispatches received here state that the exposition opens this year with the most flattering prospects. Nearly all the important features of last year's exhibit remain, while many others are being added daily, and from nearly every state and territory in the Union. Large annexes, which have become a necessity to accommodate the increasing demand for space, are now near completion. The main building is a massive structure of brick and stone, 500 by 300 feet, costing over $150,000.

During June last the total number of emigrants reaching the United States was 75,034, against 84,786 in June, 1882. The following table, prepared by the National Bureau of Statistics, shows the approximate totals for the past year from each country, with decreases, as compared with the same in the year ending June 30, 1882:

Countries from which arrived	1883.	1882.	*Decrease.*
England and Wales	79,852	83,697	3,845
Ireland	63,720	76,252	12,532
Scotland	19,612	18,763	*849
Austria	10,517	20,089	9,572
Germany	191,643	249,161	57,518
Italy	31,715	32,066	351
Norway	21,849	28,466	6,617
Sweden	34,596	64,276	29,680
Dominion of Canada	64,971	93,029	28,058
All other countries	73,849	104,623	30,774
Totals	592,324	770,422	178,098

*Increase.

The interests of the forthcoming World's Centennial Cotton Exposition, to be held at New Orleans next year, seems to have fallen into competent hands. It is noticed that E. A. Burke, the enterprising proprietor of the New Orleans *Times-Democrat*, H. C. Morehead, president of the Cotton Planters' Association of the South, and Mr. W. B. Schmidt, a leading merchant of New Orleans, have arrived in New York to confer with the managers of railroads leading into New Orleans with a view of securing their coöperation and subscriptions, and it is learned that they have been very successful. Nearly every line of railway entering New Orleans will subscribe $25,000. Over a quarter of a million dollars has been already secured. Other railways, those which lead to the lower Mississippi valley at all, have expressed a desire to contribute something.

The regular biennial convention of the National Cotton Exchange of America convened at Fortress Monroe on the 18th inst. At that time the following subjects were presented for consideration: "Through Bills of Lading"; "International Cotton Exchange and Inter-State Arbitration"; "Sandy and Dusty Cotton"; "Information and Statistics, to Include Interior Town Statements"; "Cable News"; "Crop and Acreage Reports"; "Weight of Bales and Monthly Crop Statements"; "Protection of Cotton from the Weather at Interior Depots and in Transit"; "Bills of Lading to Show Condition of Cotton when Received"; "Manner of Making up Reports of the Agricultural Bureau"; "Duty on Cotton Ties," and "A Uniform Standard of Classification." Eight committees were appointed to give the above topics their attention. On Thursday the reports were to be read, and a general discussion of them by the delegates was to follow.

The following national banks have been organized: The First National Bank of Stevens Point, Wis.; capital $50,000; A. E. Bosworth president; A. E. Morse cashier. The Strong City National Bank, Strong City, Kan.; capital $50,000; Stephen F. Jones president; Edward A. Hildebrand cashier. The First National Bank of Biggsville, Ill.; capital $50,000; H. M. Whiteman president; J. E. Barnes cashier. The Tipp National Bank of Tippecanoe City, Ohio; capital $60,000; Samuel Sullivan president; Abijah W. Miles cashier. The First National Bank of Carthage, Mo.; capital $100,000; William E. Brinkerhoff president; Victor A. Wallace cashier. The First National Bank of Livingston, Mon.; capital $50,000; Crawford Livingston president; Fred. Ward cashier. The First National Bank of Mitchell, Dak., has elected John D. Lawler president in place of S. T. Goodykoontz.

Our San Francisco correspondent writes as follows under date of July 3: "Our trade with Australia is steadily growing. The mail steamship Zealandia sailed with a full cargo and passengers on June 30, having on deck fifty registered merino sheep from Mr. W. Markham's flock, Rochester, N. Y. The J. G. Pendleton, 900 tons, sailed for Sydney on the 3d inst., with a general cargo, including 600,000 feet redwood lumber, doors, moldings, etc., and thirty fine California merino sheep on deck. The Johan Irgens, 600 tons, will have dispatch in a few days for the same destination with lumber, brewing barley and general merchandise, and in about a fortnight the ship Spartan, 1,200 tons, will follow with 1,600,000 feet redwood lumber and merchandise. This lumber has all been purchased by William Burns & Co., of Sydney, on whose account it is being shipped. The schooner Annie Larsen sailed from Puget Sound on June 22 for Nournes, New Caledonia, with a cargo of Oregon pine, and the following vessels are loading in the sound for Sydney and Melbourne, viz., Jubilee, Pacific Slope, L. B. Gilchrist, Ivanhoe, Kate Irving and Melrose. They will carry 4,000,000 feet of pine lumber.

The report of exports of breadstuffs from the United States for June last, and for six and twelve months ended therewith, has been issued by the National Bureau of Statistics, and shows very considerable gains as to the value of the same when compared with those exported in corresponding periods in 1881-82. The figures are: Values of exports of breadstuffs from all ports for June, 1883, $11,545,936; June, 1882, $9,270,126; six months ended June 30, 1883, $85,148,935; six months ended June 30, 1882, $64,856,930; twelve months ended June 30, 1883, $202,971,491; twelve months ended June 30, 1882, $177,001,396. Of the leading staples the totals in bushels and values in the periods given were as follows:

	June, 1883.		*June*, 1882.	
Wheat, bush.	3,573,875	$4,119,736	4,400,341	$5,476,139
Wh. flour, bbls.	595,610	3,427,236	441,408	2,728,848
Ind. corn, bush.	5,786,387	3,004,647	1,071,040	870,870
	6 months, 1883.		*6 months*, 1882.	
Wheat, bush.	29,342,057	$33,633,524	32,863,728	$38,415,863
Wh. flour, bbls.	4,535,047	26,407,715	2,888,950	17,685,777
Ind. corn, bush.	34,953,929	23,404,824	10,179,893	7,663,899
	12 mos. June 30, '83.		*12 mos. June* 30, '82.	
Wheat, bush.	104,971,133	$118,458,702	92,822,732	$110,453,350
Wh. flour, bbls.	9,369,031	54,044,837	5,733,194	35,396,705
Ind. corn, bush.	40,163,754	27,385,671	43,148,889	28,814,016

The marked decline in exports of wheat and wheat flour in June as against those of June, 1882, and of the former in the past six months is plainly shown by these tables.

It is to be regretted that a complete and authentic report of the progress attained by the petroleum producing and refining industry at Baku, Russia, on the west shore of the Caspian sea, has not been obtained. It has been several times attempted, but each succeeding effort reveals with what indifferent success. During the past two years BRADSTREET'S has taken notice of all apparently reliable reports of the progress made in that region, and feels warranted in saying that of those yet coming to its notice no one of them appears to be based on sufficient familiarity with the situation. In view of the interest which the present and possible petroleum supply of Russia, Austria, Hungary and Germany naturally has to the American petroleum producers, refiners and dealers, it appears strange that no such account of the resources abroad as has been suggested has been obtained here. The London *Journal of the Society of Arts*, just at hand, states that Professor Liebermann has recently made "a detailed statement" of the "remarkable development of activity in the Russian petroleum industry" to the Berlin Association for Commercial Progress. The synopsis, while of interest, does not wholly bear out the meaning of the word "detailed," but adds its mite to that already published. It states that there are at Baku "about 200 small distilling works" and also several large establishments. In 1881 there were distilled at Baku about 1,400,000 tons of raw naphtha, which yielded about 180,000 tons of illuminating oils. The most important factory, as is known, is that of the Messrs. Noble, which has lately extended its operations, and has at the same time increased its capital from £900,000 to £1,500,000. The oil wells are about eight miles distant from their works, and transportation is effected by means of a five-inch pipe, through which 1,600 tons are daily conveyed to the factory. It is intended to replace this pipe by one six inches in diameter. The factory produced illuminating oils in 1880 to the extent of about 22,000 tons, while in 1881 and 1882 there was a progressive augmentation to 50,000 and 90,000 tons. "It is calculated," says the *Journal*, "that a further considerable increase of production may be expected during 1883 and 1884."

The earliest report which comes to hand of the number of failures in business taking place in the United Kingdom during the last half year is that prepared by Mr. Richard Seyd, F. S. S. Its comparisons show quite a satisfactory condition of trade in the British islands. The total number of failures between January 1 and June 30, 1883, was 5,698, as against 5,891 in 1882, 6,270 in 1881, 6,662 in 1880, 8,990 in 1879 and 7,516 in 1878. These figures show a steady improvement since the earliest date noted, although the gain between the records of the first half of 1882 and 1883 was smaller than between the former and preceding half yearly exhibits. In the wholesale trades there were more financial disasters in the past six months than during any corresponding half year since 1879, although in the retail trades the change for the better was decided and considerable. The failures in the wholesale branches of trade up to June 30 numbered 734, against 620 in 1882, 690 in 1881 and 732 in 1880. The retail trade failures this year aggregated 4,964, as compared with 5,271 in 1882, 5,580 in 1881, 5,730 in 1880 and 7,437 in 1879. January, 1883, recorded the largest number of failures during the past six months, March ranking second. The great majority of the disasters took place in England—it being explained that this sort of evidence of the trade situation from Scotland and Ireland is to the highest degree favorable to those countries. The total (six months) number of London failures was 194, the same rate as noted last year; Yorkshire chronicled 141 (exclusive of Middlesborough and Hull), or an increase as compared with 1882; Birmingham and the Midland iron district 60, a 25 per cent. gain; Manchester 48, a like increase; Liverpool 18, a decline of 25 per cent., and the remainder of Lancashire 47, a slight gain; Newcastle, Middlesborough, Hull and district count up to 26, as against 42 last year; Bristol, Cardiff, Newport and Swansea have 16, as compared with 30; Scotland gives 44, as against 44, and Ireland 10, as against 15, the figures for last year being in each case for the whole twelve months. In the wholesale trades the heaviest number of failures, 98, was of manufacturers and dealers in textiles, and the second largest, 88, "engineers, founders, iron, metal and hardware merchants." In the retail trades the lead is taken by the grocers and provisions dealers, with 556; "the publicans" being second, with 489; the builders and architects third, with 312; farmers fourth, with 242. The succeeding places are, "private persons," 243; miscellaneous, 241; drapers, hosiers, etc., 206; tailors, 160; bakers, 153; butchers, 144; shoe and boot dealers, 131; plumbers, painters and gasfitters, 122; clerks and commercial travelers, 104; carpenters, turners and wheelwrights, 100, and ironmongers, japanners or tinmen, 91. At the bottom of the list come the opticians, with only one failure.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

We could not see, as hinted last week, the full effects of the two fierce attacks on Lackawanna on Thursday and Friday of last week in the same hour or the same day that they were made. Any experienced observer knows that if such a mass of stock as was thrown on the market in two shots, as it were, could be taken without apparent difficulty by the combination which was sustaining the market, it would be a demonstration of strength which the operators on the bear side would be the first to acknowledge and act upon. They would promptly proceed to cover their shorts, or at least abstain from further selling, fearful of placing themselves too far in the power of a combination which exhibited such dangerous strength. In such a case the market would soon show the effects in a quick upward turn of prices, and it would be safe to calculate, under such conditions, that a rise of a few points at least was safe to reckon on. On the other hand, if the bull combination was badly hit; if the members found that all their quiet work of a week in lightening their holdings of stock was undone in fifteen minutes by having to sustain the market against the attack, so that after 3 o'clock they found they had more stock on hand than they had three or four days before, while they were in fact manipulating the market to sell, it would be very likely to happen that on the next day or soon after they would wait for no more such terrible testing shots from the other side, but would empty out their tin boxes with extreme haste. In such a case the market would show it by a bad break. This is what happened. The Smith-Morgan combination got all it wanted on Thursday and Friday, and on Saturday each member proceeded to lighten ship. An immense lot of certain kinds of stock was thrown overboard, and of course prices broke badly under the weight. Any one passing down Exchange place that afternoon and glancing at the open windows of Mr. Henry N. Smith's office might have seen that gentleman bending close over the ticker in the corner, all the lines of his face contracted with painful determination as he watched the tape reel off the falling prices, while behind him stood some three or four attendants whose gloomy and anxious looks reflected the state of mind of their chief. It was Lackawanna which was mainly thrown over that day; but on Monday the fun was resumed. The room-traders and others had taken the cue, and everybody went to selling stock, so that the short sales bore a much larger proportion to the total on Monday and Tuesday than they had on Saturday, when it seemed that "long" stock was coming out all the time. Prices were on the down grade all of Monday and the greater part of Tuesday, but late that afternoon there was a slight rally, and on Wednesday the market was dull but quite strong. It seemed that some of the big operators had stopped selling and were quietly buying to cover, so that the short interest might not grow to inconveniently large proportions, which would furnish a basis for a sharper rally of the market than they cared to risk. The increasing scarcity of stocks in the loan market had given them warning. So much long stock, however, was constantly dripping out that the free buying to cover merely kept the market steady, and by Thursday morning the free condition of the loan market showed that another smash might be made.

It was a really rattling market that day between 10 o'clock and 12. After that Mr. Gould's hand was considered to be visible in the recovery and steady close to which the market was brought. The main objects of attack on this day were the Northern Pacifics, common and preferred, the allied corporation known as Oregon Transcontinental, Canadian Pacific and the Vanderbilt stocks. Neither the one nor the other seemed to find much support in the market, and the basis for the attack was the annual report, issued the day before, of the Oregon Company, which was considered to make a less favorable showing for itself and the Northern Pacific Company the more its figures were analyzed. Besides this, the reports from the section of country through which the Northern Pacific runs have been constantly coming in showing a bad state of the spring-wheat crop, which is the main dependence of the road for freight. It is true that these have been denied as often as made, but, unluckily, the denials have come invariably from the railroad company, or through it, and Wall street naturally looks upon them with some distrust, since it is to the interest of the company to have everything appear in good shape. So that, whether the reports of damage to the wheat have been exaggerated or not, it is certain that the Wall street people believe them, and hence are far more willing to sell Northern Pacific than to buy it. Canadian Pacific is about in the same fix, and the syndicate which recently took 300,000 shares of stock having successfully marketed the lot have no longer an interest in sustaining the price. The worst thing about the Vanderbilt stocks is the constant decline of New York Central, which has gone down to figures which six months ago would have seemed incredible, and which even now create a feeling of surprise in one as the tape records them. The significant feature about it, too, is that the stock does not rally, but, on the contrary, whenever the market generally stiffens up a bit New York Central is the first to break again, showing that there must be orders to sell the stock constantly in the hands of brokers acting for investors, who are getting rid of it at every opportunity. It seems to be a settled conviction in the street that the dividend is to be reduced to 6 per cent., in order to meet the reduced income which the inevitable fight against the West Shore road will cause. It may be mentioned here, also, that West Shore bonds have had a tumble of about 5 per cent. The decline was rather rapid and was accompanied by statements—made as if they were recent discoveries—that the company did not own its terminals at Hoboken. This was shown in the article in BRADSTREET'S of May 19, in which a number of other unfavorable features were pointed out as shown in the company's report, but which do not yet seem to have found their way into the current gossip of Wall street. It is said that $12,000,000 of bonds will be issued to cover the Hoboken terminals, and that the West Shore Company will guarantee them. The truth would seem to be that the people who have lately been sustaining the bonds in the market have sold out, and therefore withdrawn their supporting orders.

Of course the telegraph strike has been a powerful factor in depressing the market, for before it did actually occur there was an uneasy fear that it was coming and might have very serious effects. Western Union has been weighed down by this for four or five days, and had declined from about 81½ to 80; but on Thursday morning when it was confidently expected that the strike would take place some time that day, the stock sold down in the general break of the market to 77⅞. By the time the signal for striking had been given at noon, Washington time, the stock had recovered to between 79 and 80. The critical situation had, in short, compelled Mr. Gould to come in as an active supporter of the whole market, for to protect his Western Union it was necessary to support other stocks. This he could do without buying much stock (except telegraph), for he certainly had a big line of shorts out; and his purchases to cover would for the time being have the same stimulating effect as if he had actually bought "long" stock. The market steadied considerably and closed comparatively strong, but among the stocks which showed the least strength was, as usual, New York Central. Yesterday all the cliques rallied up by Mr. Gould, and the market was held steady and lastly made to look quite strong.

The loan market has been as easy as ever through the week, the rate on call loans being 2 to 2½ per cent. It has given some satisfaction to note that the continued increase of commercial bills, indicating exports, has caused foreign exchange to decline, and the posted rates are now $4.83½ and $4.88. As to our foreign customers for securities practically there are none now, so our interest in the foreign markets has died away. They appear neither to be buying from nor selling to us in London now, except that some of the New York Central may come from there, and we have our hands full just at present in attending to our domestic affairs.

The government bond market was somewhat active at times this week, and fractionally lower quotations for some classes of bonds were made. The following were the closing quotations yesterday:

	July 13, bid.	July 20, bid.	July 20, asked.
U. S. 5s extended (3½ p. c.)	101	101	—
U. S. 4½s 1891, registered	112¾	112½	112¾
U. S. coupon	112¾	112½	112¾
U. S. 4s 1907, registered	118⅞	118½	118¾
U. S. 4s 1907, coupon	118⅞	118½	118⅝

The bank statement of Saturday was good, as showing an increase of $1,600,000 in the surplus reserve, bringing it up to $8,000,000, but it came out at a time when the market was thoroughly demoralized and had no effect on it. The following are the comparative totals of the statements of July 7 and July 14:

	July 7.	July 14.	Differences.
Loans	$328,653,200	$329,839,300	Inc. $1,186,100
Specie	62,799,500	64,817,200	Inc. 2,017,700
Legal-tenders	24,431,700	25,532,400	Inc. 1,100,700
Deposits	322,348,200	327,326,700	Inc. 4,978,500
Circulation	15,612,300	15,527,200	Dec. 85,100

The proportion of total reserve to liabilities is now 27.62 per cent., against 28.28 per cent. for the corresponding week last year:

THE LONDON STOCK MARKET.

[By Cable to BRADSTREET'S.]

From London: The stock markets are depressed partly because money is dearer. Business in Americans is slack, except New York Central. Prices of all are lower and buyers are hard to find.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: Money is easy and the stock market, though dull, is quoted steady.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

SUMMARY.

Special telegrams to BRADSTREET'S this week contain evidence of a distinct improvement in general trade. This is the more particularly noticeable at the east. While prices have not as yet experienced improvement, the demand for leading commercial staples has exhibited a noticeable increase, commercial travelers having started out from and fall buyers appearing in mercantile circles at Boston, New York and Philadelphia. No such gain has been made as to warrant comparison with preceding years. On the contrary the improvement is observed rather by contrast with the expected prolonged midsummer dullness. The excess of purchases has been chiefly noticeable in dry goods, wool, leather and iron. The industrial disturbance has culminated this week in the strike of about three-fourths of the telegraph operators. The companies have succeeded in replacing only a small portion of those who struck. At New York the volume of business has been restricted, owing to the inability of the telegraph companies to forward the bulk of private commercial dispatches. Commercial and financial quotations have, however, been forwarded with a moderate degree of dispatch. Local telegraphing and other dispatches of lesser importance have been more or less obstructed. It must be noted, however, that no such disturbance in business circles has resulted from the telegraphers' strike as was anticipated. The cigar-makers' lock-out in New York appears to be the outcome of an interferance on the part of rival trades unions with shop regulations. Iron continues firm, and the best grades, such as Crane, Allentown and Thomas foundry irons are held at $23, or $1 above the nominal rate. Coal continues in fair demand but not at full circular prices. Petroleum advanced 4c. Friday after an almost steady decline during the preceding portion of the week. Wheat has advanced about 3c. on the week under the influence of bad weather, a firmer market abroad and active bull manipulation at home. Corn has been firmer, but has experienced less change in price. The weather has been reported as unfavorable to the growing corn crop, and several lots of the cereal in eastern elevators have been posted as damaged by the heat. Provisions have advanced somewhat, owing for the most part to manipulation, although several sales at Chicago and a few export orders influenced figures somewhat. Lard saw a gain of .45c. per pound, and spot mess pork an advance of 25c. per barrel. Purchases of new wool at the east have been noticeably large during the week, several New England mills being prominent buyers in the Ohio markets. Ocean freights are firmer and higher for grain. There were 162 failures in the United States reported during the past week, 22 more than the preceding week, 31 more than the corresponding week of 1882, and 80 more than the same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: General trade is fair for the season.

From Boston, Mass.: The business situation shows a further improvement, and wholesale houses which cater for the far west are beginning to move some goods. The local trade has not yet started to any extent, but preparations are in active progress, and the indications are that there will be an unusually good distribution in August. The summer trade in several branches is better than last year, and dealers in most of the New England states are well cleaned up on stocks and manufactured wares. The prospect generally is in favor of an early opening of the fall trade. One of the most important features is the continued large movement in wool, which runs up to nearly 4,000,000 pounds this week. There is no improvement in prices, but the fact that manufacturers are eager to secure supplies is one point in favor of a change for the better. Other raw materials are without much change, but there has been more selling than last week. The money market has gained a little more strength, and discounts are quoted about ½ per cent. higher, but there is still an ample supply of funds at reasonable rates.

From Buffalo, N. Y.: The general trade movement is quiet and devoid of any special features unless it be the improvement in leather. The tone of the markets are, however, healthy and encouraging. The week has been one of pleasure rather than that of business, the celebration of the Saengerfest having attracted thousands of strangers to the city, among whom were many buyers from western and southern points who improved the opportunity to meet the seller, some for the first time in a business intercourse of many years.

From Rochester, N. Y.: Trade is still experiencing the usual midsummer dullness and but little business is being done.

From Cleveland, Ohio: The general merchandise jobbing trade is quiet, but fair for the season. Collections fairly satisfactory, and the outlook for fall business considered favorable.

From Chicago, Ill.: Money is moderately active at 5@6c. Exchange 40c. premium. Collections are good for the season. Drugs, chemicals and miscellaneous trade is fair for the season.

From Peoria, Ill.: There is no new feature in general trade. The latter is fairly satisfactory.

From Detroit, Mich.: General business here is experiencing the usual dullness at this season. Collections are only fair, and will not improve until after harvest, which is now in progress.

From Burlington, Iowa: Business has been very fair during the week. Some lines show a noticeable improvement, though the season is not far enough advanced to create a lively demand for fall goods. The weather is favorable.

From Indianapolis, Ind.: Trade is quite fair for the season, but will be quiet for several weeks yet.

From Des Moines, Iowa: Trade in all lines quiet, waiting on the harvest.

From St. Louis, Mo.: General trade is in heavier volume than for some weeks. Collections are improving and the business feeling is very confident. Money is in demand and the supply about even; discounting is brisk. New York exchange is 90c. premium, and prime commercial bills are par.

From Topeka, Kan.: Trade is quiet, with no special feature. Collections are fair.

From Minneapolis, Minn.: General trade is quiet. Jobbers and country dealers are holding off to note the result of harvesting and are not pressing goods on their customers. The money market is working close. Deposited balances are light. Eastern exchange is steady at 75c. to $1 per $1,000 premium.

From Lawrence, Kan.: All lines of trade are quiet, and so have been for the past week, caused principally by the farmers being busy harvesting. When they have finished the prospects are good for a lively trade. Money is easy and collections good.

From Omaha, Neb.: Jobbers report trade on the increase and look for a good fall business. General trade appears to be in a healthful condition.

From Baltimore, Md.: The improvement on the general trade situation has been very slight.

From Norfolk, Va.: Trade about as usual at this season of the year. Collections moderate.

From Richmond, Va.: Business in all lines is improving, with fair prospects.

From Savannah, Ga.: The weather being hot stagnates trade of all kinds, yet the business for July thus far compares favorably with that in previous seasons.

From New Orleans, La.: With the exception of notes of preparation for the lively fall business expected, dry goods, hardware, etc., are at a standstill. Money continues in good request and steady. Securities are generally fairly maintained, but little disposition is shown to operate.

From Wilmington, N. C.: The telegraph strike deranges general business. The weather is hot, with daily rains.

INDUSTRIAL.

The commercial and financial interests of the country have been seriously interrupted during the week by reason of the strike of the telegraph operators belonging to a trades-union organization known as the Brotherhood. Their demands were, in the main, 15 per cent. increased wages, a reduction of time from nine to eight hours daily, that work for six days in a week only shall be demanded, except at extra compensation for Sunday, and that women shall receive like compensation with men for the like labor. The Western Union Telegraph Company refused to grant the demands made, although a committee was named to consider such grievances as individual employés may make known. On Thursday, at noon, according to various estimates, from 7,000 to 10,000 operators of the leading lines left their work. The strike continues and each side remains confident of success. The companies have succeeded in replacing fewer of the absent employés than their official statements indicate. It is a gratifying fact, however, that while the interruption and delay caused to the business community has been serious it has not been nearly so damaging as was anticipated. The volume of speculative trading has, of course, been cut into. Quotations have, however, been received with a fair degree of punctuality. Commercial, financial and press dispatches have received more attention than was to be expected. It is fair to presume that recruits will be placed before the deserted operating tables as fast as possible, and that approximately full if not efficient communication will be obtained within a few days. The cigar-makers' lockout in New York is directed against the Progressive Cigar-makers' Union for interference with the regulations of the factories where, it appears, the members of the International Cigar-makers' Union are also employed. The lockout is due to the concerted action of fifteen leading cigar manufacturers. The result, in view of the fact that there are considerably more than fifteen cigar manufacturers in New York, is somewhat doubtful in case the men locked out can afford to and will wait.

INDUSTRIAL FEATURES.

[By Telegraph to BRADSTREET'S.]

From St. Louis, Mo.: Most of the industries have plenty of work.

From Savannah, Ga.: There is some activity in industrial pursuits. There is a steady demand for carpenters. Machine shops and blacksmiths are giving employment to two-thirds of their usual force.

BREADSTUFFS ABROAD.

On Saturday last cable advices were received on this side announcing a firmer market for wheat at London and Liverpool. The effect was at once felt in domestic markets. Cargoes off the coast abroad were firmer as well, and the information received on Monday of increased firmness caused a decided upward turn here. This was repeated on Tuesday and during a portion of Wednesday, although later telegraphic advices stated that the sudden advance abroad had been checked and that wheat at Liverpool was 6d. lower. This, in turn, of course was reflected in New York and Chicago. The change in English markets was caused p i- marily by thunderstorms in the agricultural regions, which apparently settled down into a series of showers which seriously threatened the maturing crop. Even previous to this there had been some damage done by cold and wet weather. Special reports to the *Mark Lane Express* concerning the growing crops in the United Kingdom state that in no instance is the wheat crop spoken of with unqualified approbation, and the diffidence which characterizes the opinions expressed with regard to the best wheats as they stand, together with the more frequent mention of smut, appears to warrant a discount being taken off the most hopeful estimates. All the cereals are coming rapidly into ear under the forcing influence of the weather of the past few days, and a short crop of straw "is an absolute certainty, so far as anything may be regarded in the light of a certainty in a season of such phenomenal character as that of 1882-83 has so far proved." All the spring-sown crops are showing material improvement since the rainfall and subsequent higher temperature. Mail advices from Bombay dated June 5 state that large quantities of wheat were accumulating in the depots of all the producing districts, and that the railways were quite unequal to deal with the traffic, all the lines being blocked with grain. On the continent the weather has been somewhat similar to that which has prevailed in England, and the markets had generally been dull and declining. The conditions mentioned have resulted in a noticeably increased demand for supplies of wheat from abroad, although the same was not that of stability or steadiness which was looked for. Other than this flurry there has been no marked change in the situation abroad from that previously recorded. Wheat from the New Zealand and Chilian crops of 1883 has already reached English ports, the former being an unusually attractive grain. The turn of the weather in the United Kingdom during the remainder of July will be watched with exceeding interest.

Beerbohm reports wheat and maize on passage July 19:

	Wheat, quarters.	*Maize, quarters.*
To the United Kingdom	1,650,000	290,000
Continent	410,000	160,000
Total quarters	2,060,000	450,000
Equal bushels	16,480,000	3,600,000

Compared with the previous week:

To the United Kingdom	1,775,000	390,000
Continent	450,000	80,000
Total quarters	2,225,000	470,000
Equal bushels	17,800,000	3,760,000
Increase bushels	.....	.....
Decrease bushels	1,320,000	160,000

AMERICAN WHEAT MARKETS.

During six weeks past, not including that ended to day, the domestic wheat markets have suffered a continuous decline in price. While Chicago has suffered the most from the speculative mania, New York city's record exhibits a conservative view of the results of the bear movement following so successfully upon the steady upward movement in wheat prices during the spring, and which was the natural outcome of the discouraging wheat crop reports which obtained wide currency in April and May. As characterizing the subsequent decline in prices, the following list has been compiled from the official records, the prices of wheat (current earliest deliveries) on the dates named:

	Price wheat.		*Price wheat.*
June 1	$1.25⅛	June 29	$1.12
June 8	1 23	July 6	1.10⅝
June 15	1.20¾	July 14	1 12½
June 23	1.17¼		

This shows a decline of 13c. a bushel on the June option during six weeks, in the face of numerous exhaustive reports from the wheat-growing regions that the new crop would, in all probability, be from 80,000,000 to 100,000,000 bushels short of that in 1882. Without taking into account the probable accuracy of such reports, or discussing anew later advices which point to a crop of about 444,000,000 bushels of wheat, it is entirely within bounds to admit that the decline was quite precipitate and warranted only by a thorough confidence in the favorable reports of the growing crops abroad, a change in which would cause prices here to advance.

This opinion was expressed in these columns a fortnight ago, and the events of the past week have fully justified them. Within the week reports of wet and "unsummerlike" weather in the United Kingdom and in France have been received. July and a part of August have much to do with the final outcome of the harvest in those two countries, and the cable dispatches referred to were at once followed by notice of a firmer market on the other side. This was repeated on Monday. On Tuesday an advance in British markets was scored and maintained through a part of Wednesday, although a decline there was observed late on the last-named day. Domestic markets have been irregular and uncertain. The bull party here and at the west began moderately confident and landed about the middle of the week flushed with wheat several cents higher per bushel. Then a reaction took place, and the bears came smilingly forward. The speculative business in grain staples this week was seriously interrupted, of course, by the strike of telegraphic operators, and quotations of late have, therefore, comparatively little dependence upon other than speculative action. During the earlier part of the week the foreign demand began to show its head at this port, but higher prices here and scarcity of berth room checked what might have, for the time, proved to be a considerable movement. Prices closed higher on Friday.

The receipts of wheat at tide-water for the week ending July 14 increased to 655,256 bushels from July 7, when they were 407,828 bushels. The exports from the Atlantic ports for the week ended July 14 amounted to 584,900 bushels, against 837,709 bushels July 7. From September 1, 1882, to July 14, the exports of wheat from the Atlantic ports were 61,771,800 bushels, against 41,426,251 bushels in a corresponding portion of the preceding year, a gain of 20,345,549 bushels.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended July 14 amounted to 486,166 bushels, against 384,730 bushels in the preceding week, and the shipments to 528,537 bushels, against 444,761 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) July 14, as against the preceding week, showed a decrease of 428,172 bushels.

The course of the wheat market at New York, Chicago and Milwaukee, during the past week, has been as follows:

AT NEW YORK.

	July.	*Aug*	*Sept.*	*Oct.*	*Nov.*
July 14	$1.12½	$1.14⅛	$1.16⅝	$1 18½	$1.2.⅜
July 16	1.15	1.16¾	1.19½	1.21⅛	1.23¾
July 17	1.14	1.15½	1 18	1.20	1.21¾
July 18	1 14	1.15⅛	1 17⅝	1.19⅝	1 21⅝
July 19	1.13	1.14⅞	1 17¼	1.19½	1 21⅜
July 20	...	1.16¼	1.19⅜	1.21	1.23

1 P. M.	AT CHICAGO.		AT MILWAUKEE	
	July	*August.*	*July*	*August.*
July 14	$1.00⅛	$1.01¾	$ 99½	$1.01⅞
July 16	1.01½	1.02	1 00	1 01¾
July 17	1.03	1.04⅞	1.02¼	1.03⅞
July 18	1.02	1 03⅜	1.02	1 03⅜
July 19	1.01⅛	1.02¼	....	....
July 20	1.03½	1.05¾	....	....

INDIAN CORN.

This cereal has not enjoyed the degree of inflation as to price and speculative demand which has been reported of wheat. The character of the weather at the west, whether too wet or too hot, has been variously reported as generally against the best interests of the growing corn. In addition to this "hot corn" has been reported in warehouses and elevators, which curtailed dealings both speculative

and others. The foreign demand, too, has been less than for wheat. Notwithstanding this, corn advanced on Monday and Tuesday. The following day it closed at a lower figure. The falling prices of Indian corn at New York since June 1 have been about one-half as great per bushel as on wheat, shown above. The quotations (for earliest current delivery) on the dates named, were:

	Price at New York.
June 1	65⅝
June 8	60⅛
June 15	65
June 23	62⅝
June 29	59⅞
July 6	58

—or a net decline of over 7c. per bushel.

The receipts of Indian corn at the Atlantic ports for the week ended July 14 were 1,433,207 bushels, against 1,154,960 in the preceding week, while the exports from the same points amounted to 1,541,987, against 986,181 bushels. From September 1 last to July 14 the exports of Indian corn were 40,618,613 bushels, against 25,401,673 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, July 14, had decreased 724,111 bushels as compared with July 7. The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending July 14, were 1,599,240 bushels, against 1,618,406 the week preceding, and the shipments were 2,063,188 bushels, against 2,143,592 in the preceding week.

The closing prices of Indian corn at New York and Chicago for the past week were:

	At New York.			*Chicago, 1 p.m.*		
	July.	*Aug.*	*Sept.*	*Oct.*	*July.*	*Aug.*
July 14	.58¾	.60⅞	.62⅜	.63	.51⅜	.52⅛
July 16	.58	.60⅝	.62⅛	.63⅛	.52	.52⅜
July 17	.59	.61⅜	.62⅞	.63¼	.52⅛	.52⅜
July 18	.57½	.59¼	.61¾	.62½	.50½	.50¾
July 19	.60¼	.61⅜	.62½	.63⅜	.50⅞	.51⅛
July 20	.58½	.60⅞	.61⅞	.62⅜	.51¼	.51⅛

The closing prices of breadstuffs in New York last evening, as against those of the Friday preceding and the corresponding date last year, were as follows:

PRICES OF BREADSTUFFS IN NEW YORK.

	July 13.		*July* 20.	
No. 2 flour	$2.65	@3.40	$2.40	@3.35

Total bushels	35,359,876	36,756,067	16,964,069	38,389,359

THE BREADSTUFFS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Milwaukee, Wis.: The market is higher, but closes with a downward tendency. Flour is in better demand, with fair sales of export extras at $4.65. Patent seconds also selling readily. Other grades dull.

From St. Louis, Mo.: Corn and wheat are unsettled but tending downward. Oats are in small supply and firm. Flour remains very quiet.

From Minneapolis, Minn.: But little wheat is moving. Receipts for the week were 201,000 bushels. The market is a shade stronger. There is a little better demand for flour, which is firmer. Shipments were 51,000 barrels.

From Wilmington, N. C.: Grain and breadstuffs are steady at the recent gain in quotations.

From Savannah, Ga.: Grain market slightly better, with more demand.

From New Orleans, La.: The receipts of grain are very light, and there are scarcely any exports.

From Baltimore, Md.: Speculation in grain was larger than last week. Some active trading was done in both the wheat and corn markets, and prices have ruled steady. The inquiry for flour is better, and the market is more animated, but prices remain unchanged.

From Chicago, Ill.: Wheat is steady and dull. There is scarcely any shipping demand, and trading is mostly between local speculators. Corn is in fair shipping demand, receipts are liberal and the feeling is weakened by the fine crop reports. Country advices say that stocks of old corn are good. Oats are weak and dull. Crop prospects are good and receipts very large.

THE GROWING GRAIN CROPS.

[By Telegraph to BRADSTREET'S.]

From Peoria, Ill.: The crop outlook is still satisfactory. The late storms were only local and the injuries only in spots.

From Omaha, Neb.: Reports from nearly all parts of the state show the crops to be doing well. The small grain in Buffalo and in neighboring western counties never were better, and corn is also doing well. In some localities the corn has been injured by hail, but the general condition is good.

From Portland, Me.: The crops are good and the feeling is hopeful.

From Des Moines, Iowa: The crops still promise well. The weather is good.

From Minneapolis, Minn.: The condition of the growing crops is considerably improved since last week. On Friday and Saturday northern Minnesota and Dakota was visited by copious rains, the ground being thoroughly wet. This was of great benefit to the growing wheat, but came too late to give a full crop. The straw is short and uneven, and as a rule the heads short. The best that can be hoped for in the northern portion of the wheat belt is from one-half to two-thirds of last year's yield. This with the increased acreage will give as many bushels as last year, and with good weather for harvest the quality should be good. In central and southern Minnesota and Dakota and northern Iowa the growing wheat is in good condition and promises above an average yield. Oats and barley are in good shape. Corn continues to improve but is backward, and the outcome is uncertain. The grass crop is very large and farmers are now in the midst of haying. The weather for the last week has been very favorable for the growing wheat crop, but rather low temperature and too much rain for securing the hay in good order.

From Milwaukee, Wis.: Copious rains throughout the northwest have relieved the drouth in the Red river country, though too late to materially benefit wheat, which is very short in straw and small in ear. The yield in the country north of the Pacific road is estimated at from two to four bushels less than in 1882. Storms have done some damage, causing the grain to lodge, but not extensively. Reports from Wisconsin, Minnesota and the larger portion of Dakota are favorable for a larger crop than in 1882.

PROVISIONS.

During the earlier half of the week pork and lard enjoyed an advance in prices, which undoubtedly proved a novelty to all engaged in trading in those lines since the McGeoch failure. Saturday saw no advance—on the other hand it witnessed a slight decline. But Monday registered a distinct gain in prices and Tuesday a still greater one. Wednesday's movement was less noticeable, but the market continued firm. The reason for this spurt is not easy to find. Receipts of hogs at the west continue heavy. There are, to be sure, relatively speaking, lighter stocks held there, but this will not do to base the boom upon. Exporters came into the market to an unlimited extent and some noteworthy sales were made. It is not generally believed that the regular consumptive demand has set in so strongly that it will account for the change. The rapid decline during the past month or so may possibly have convinced many that pork and lard are worth what is now asked for them. If the outside speculative public have been convinced of this by their brokers it will explain much of the promiscuous buying, which appeared to be based solely upon an idea that "now is the time." The prices of lard and pork at New York (nearest current delivery) on the dates named were as follows:

	Lard.	*Pork.*
May 25	11.70c.	$20.00
June 1	11.54	20.00
June 8	11.40	19.90
June 15	11.30	19.00
June 22	10.00	18.50
June 29	9.40	17.75
July 6	9.60	17.50
July 13	8.60	15.50

—or a decline of 3.1c. per pound on lard (near options) and $4.50 per barrel on spot mess pork. Prices of lard and spot mess pork at New York during the past week were as follows:

	July 14.	*July* 16.	*July* 17.	*July* 18.	*July* 19.	*July* 20
Lard, Aug.	$8.80	$8.88	$9.10	$9.16	$9.10	$9 25
Pork, spot mess	15.50	15.75	15.75	16.00	15.75	15.75

The export of hog product from the following places for the week ending July 14, 1883:

	Pork, barrels.	*Bacon, pounds.*	*Lard, pounds*
New York	2,950	3,114,302	7,628,762
Boston	150	145.743	1,239,927
Portland	..	....	....
Montreal	890	1,295,000	2,852,220
Philadelphia	1	1,200,000	451,110
Baltimore	3	....	611,850
New Orleans	63	5,224	5,600
Totals	4,057	5,760,269	12,789,769
Previous week	4,381	5,157,131	6,449,605

The total exports of hog product from the above-mentioned places from November 1, 1882, to July 14, 1883, were as follows:

	1882–83. *pounds.*	1881–82. *pounds.*
Pork	33,311,600	38,578,200
Bacon	295,816,439	306,211,345
Lard	178,857,894	187,294,818
Totals	507,785,933	532,084,363

The total value of the total exports of provisions and dairy products during June was $8,673,828, against $7,751,974 in June, 1882. For six months, ended June 30 last, the total of exports of the same was $52,515,437, as compared with $50,708,190 in a like portion of 1882. The shipments of fresh beef for six months past increased in quantity, as against those in the first half of 1882, about 45 per cent.; of salt beef about 4 per cent., and of hams nearly 100 per cent. Those of bacon declined nearly 12 per cent.; lard fell away about 10 per cent.; pork about 15 per cent., and tallow about 4 per cent.

PROVISIONS AND LIVE STOCK.

[By Telegraph to BRADSTREET'S.]

From Chicago, Ill.: Provisions are quiet and steady, the demand being chiefly speculative. No confidence is shown by capitalists to hold, and prices would go down lower were it not that the bears fear a corner and decline to sell freely.

From Peoria, Ill.: The receipts of cattle have been liberal.

From St. Louis, Mo.: Provisions higher and more active than for many weeks. Both cattle and hogs are stronger and in good supply.

From Topeka, Kan.: Provisions are in fair demand. Live stock is stagnant, very few being marketed.

From Baltimore, Md.: The provisions market is stronger and business improving.

From Wilmington, N. C.: Provisions are steady at the advance.

From New Orleans, La.: Provisions have sunk to the parity of the low western prices, consequently there is scarcely an operator or dealer here who has not been badly left on provisions, as they had already bought at high prices for future delivery.

PRODUCE MARKETS.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: The local production of vegetables and fruits is backward. On account of limited supplies good prices are realized.

From Savannah, Ga.: Demand for southern vegetables lessened, except for potatoes and onions.

THE NEW YORK DRY GOODS MARKET.

Business for the week is quoted of very fair proportions. Out-of-town buyers are here in good force, but are not purchasing with perfect freedom. The delay in the settlement of the freight tariff has, doubtless, something to do with this. Importing houses seem to be doing a more active business than the domestic firms. Sales by them are reported quite satisfactory. Collections throughout are reported good, and business generally seems to be in a very satisfactory condition. The failure yesterday of E. W. Holbrook & Co., of New York and Boston, causes considerable surprise, as the firm were known to be in possession of an excellent paying business, which undoubtedly yielded them handsome returns. The particulars are not yet known, but it is understood to be another example of disastrous speculation in Wall street.

THE BRITISH COTTON GOODS MARKET.

[By Cable to BRADSTREET'S.]

From London: At Manchester cotton goods are still altogether dull and yarns are drooping and cloth quiet at last weeks lowest prices.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Dry goods are very quiet. Collections difficult.

From Boston, Mass.: All the principal lines of fall goods have been opened by agents and orders to a fair extent have been secured, mostly from large jobbers in western cities. Our jobbers are not buying, but they are examining samples and will soon make their selections. Jobbers will not begin to distribute till next month. Their summer trade, so far, has been very satisfactory.

From Providence, R. I.: The print cloth market is very quiet and sales are light; 64s are quoted at 3 9/16c. and 56x60s at 3⅛c. The stock on hand is about the same as last week.

From Buffalo, N. Y.: Dry goods are quiet but fully up to and possibly something ahead of the July average. Collections are very fair.

From Rochester, N. Y.: Dry goods jobbers are taking very few fall orders.

From Philadelphia, Pa.: Dry goods are reasonably quiet, but promise improvement, buyers showing more interest in preparation for fall trade.

From Pittsburgh, Pa.: The dry goods trade is quiet, but is as good as is usual at this season of the year.

From Cleveland, Ohio: The dry goods business for July is about as in former years.

From Columbus, Ohio: Dry goods are about the same as last week, quiet, but fully up to anticipations. On the average collections are fair.

From Dayton, Ohio: The dry goods market has slightly improved over last week, with a good prospect of it continuing.

From Indianapolis, Ind.: The dry goods trade is reported good.

From Chicago, Ill.: Dry goods are rather more called for. The week's distribution shows a slight increase over either of three preceding ones and jobbers look for an early improvement in trade.

From Peoria, Ill.: In dry goods no activity is looked for until the latter part of August.

From Detroit, Mich.: In dry goods jobbers are doing a fair amount of summer business, and sales are fully up to last year.

From St. Louis, Mo.: The dry goods trade is rather better than during harvest.

From Burlington, Iowa: Dry goods dealers are doing a sorting-up trade, with encouraging prospects.

From Omaha, Neb.: Dry goods sales are fair, orders being mainly for present needs.

From Topeka, Kan. A canvass among merchants here shows the usual quiet summer trade in dry goods.

From Baltimore, Md.: Jobbers of dry goods are busy assorting stocks and also report a fair order trade. Commission men are doing as well as they expected, and their sales compare favorably with last year's. Business in the retail line has slackened up some, but dealers have had a good season and appear satisfied.

From Norfolk, Va.: Dry goods are very quiet.

From Richmond, Va.: The dry goods trade is improving.

From Savannah, Ga.: The dry goods trade is quiet with full stocks, and holders waiting for the fall demand.

THE CLOTHING MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: A few of the large clothing houses have started their salesmen, and more will have their representatives on the road next week. Trade will probably open about the first week in August.

From Savannah, Ga.: In clothing sales are nominal but the fall prospects for demand are good.

COTTON.

This week our cotton market report is much abbreviated, owing to the telegraphers' strike, which has prevented the receipt of the usual telegraphic information from southern ports and interior towns.

The course of the market for spot cotton at New York for the week has been only a repetition of that of the several preceding weeks. Trade has been slow; in fact, sales have been hardly sufficient to base quotations properly. The price of middling uplands dropped a point on Monday, and has since remained unchanged, closing at 10c. last night. The sales for the week are as follows: For export 858 bales, for consumption 2,311 bales, and for speculation 100 bales. The total sales foot up 2,311 bales, against 4,634 last week. The deliveries on contract amount to 1,400 bales.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	*Last week.*	*Last year.*
Ordinary	7 1-16c.	7⅛c.	10 1-16c.
Strict ordinary	7½	7 9-16	10⅜
Good ordinary	8 5-16	8⅜	11 7-16
Strict good ordinary	9	9 1-16	12 5-16
Low middling	9½	9 9-16	12 9-16
Strict low middling	9 13-16	9⅞	12¾
Middling	10	10 1-16	13⅛
Good middling	10⅜	10 7-16	13⅜
Strict good middling	10⅞	10 11-16	13⅞
Middling fair	11⅜	10 3-16	14⅜
Fair	11⅞	11 15-16	....

STAINED.

	This week.	Last week.	Last year.
Good ordinary	6¼	6 9-16	9⅝
Strictly good ordinary	7 5-16	7⅜	10⅜
Low middling	8	8 1-16	11 5 16
Middling	9¼	9 9-16	12 5-16

The market for spot cotton closed easy.

The future market for the week has been firm and steady, and a fair amount of business was done, but mostly on account of room traders. Transactions were somewhat restricted on Thursday and Friday, caused by the telegraphers' strike. Prices have been slightly lower, and closed last night 5 points off for near months and 2 points for later ones from last Friday. The sales for the week aggregated 505,000 bales, against 362,700 for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, compared with last week and the corresponding week last year:

	This week.	Last week.	Last year.
July	9.97	10.02	12.70
August	10.01	10.10	12.70
September	9.94	9.98	12.46
October	9.79	9.81	11 90
November	9 70	9.72	11 75
December	9.72	9.74	11.76
January	9.79	9.82	11.85
February	9.90	9 93	11.97
March	10.01	10.03	12.10
April	10.12	10.15	12.22

The market for futures closed steady.

The market at Liverpool for prompt delivery uplands has been dull and easier, with a moderate inquiry, which was fully supplied. Quotations are a trifle down, closing last night at 5 7/16d., 1 point off from last week. The future market has been dull and steady, and closed with quotations an average of 5 points lower for near months and 3 for later ones than last week.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week.	Last week.	Last year.
July	....	5 27-64d.	6 58-64d.
July-August	5 23-64d.	5 27-64	6 58-64
August-September	5 25-64	5 30-64	6 60-64
September-October	5 26-64	5 32-64	6 52-64
October-November	5 25-64	5 28-64	6 40-64
November-December	5 25-64	5 28-64	6 37-64
December-January	5 25-64	5 29-64	....

The sales for the week at Liverpool were 39,000 bales (of which 30,000 were American), against 51,000 (of which 31,000 were American) last year. The sales for export were 2,400 bales, against 5,200 bales last year. The sales for speculation were 300 bales, against 3,500 bales last year. The amount forwarded was 8,000 bales, against 5,700 bales last year. The stock in port is 991,000 bales (of which 734,000 are American), against 810,000 bales (of which 470,000 were American) last year. The total imports for the week were 43,000 bales (of which 28,500 were American), against 43,500 bales (of which 23,500 were American) last year, and the amount afloat 179,000 bales (of which 38,000 are American), against 203,000 bales (of which 19,000 were American) last year.

The Manchester market closed dull and tending down.

The Havre market closed quiet.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The cotton market is quiet and steady, sales being light. Middling uplands are worth 10½c., and middling gulf 10¾c. The stock on hand is moderate.

From Philadelphia, Pa.: Cotton is dull.

From St. Louis, Mo.: Cotton quieter than ever. Stock on hand large but receipts very light.

From Baltimore, Md.: The cotton market continues quiet, but there are some inquiries for spinning and shipping. Late sales of 750 bales was at 10c. Prices are nominal.

From Savannah, Ga.: Cotton market is very dull and prices low with small sales. The new cotton crop is generally reported doing well.

From Wilmington, N. C.: The cotton market is nominal, and stocks and receipts light. The cotton and truck crop reports continue favorable.

From New Orleans, La.: Cotton shows little animation or quotable variation. Spots are unchanged. Futures have dropped as follows since last Thursday: July, 33 points; August, 27; September, 19; October, 18; November and December, 13. Bulls and bears are endeavoring more to seek the shade than manipulate cotton.

THE GROWING COTTON CROP.

[By Telegraph to BRADSTREET'S.]

From Norfolk, Va.: Cotton is very quiet. The weather is pleasant. Reports from the crop region are encouraging for cotton, corn and peanuts.

WOOL.

The wool market is active; the sales the largest we have had to notice for some time, amounting to 3,812,200 pounds for the week, including all kinds. The sales of Ohio and Pennsylvania fleeces have been at 36@37c. for X, 37½@38c. for XX, and choice selections higher. These prices are precisely the same as noticed last week. In Michigan wool there have been large sales at 33@35c. per pound, and for good average X 34c. is a fair quotation. Combing and delaine fleeces are in demand, and have been selling at 38c., 40c. for fine delaine, including Michigan and Ohio, and 42@42½c. for No. 1. In unwashed combing the sales have been at 25@30c. per pound, as to quality. The sales of unwashed fleeces have been very large, amounting to upward of 1,700,000 pounds, and include Georgia at 26@27c., eastern Oregon at 26@28c., Texas principally 25@27c., and unwashed western at 23@28c. per pound, with coarse and low from 16@22c. per pound. California wool has been more inquired for, and sales of 347,000 pounds at 20@30c. for spring. Pulled wools have been in fair demand, with sales of choice supers at 40@44c. for eastern and Maine, and common and good supers at 20@38c. per pound. In foreign wool sales of 30,000 pounds New Zealand at 40c., and some small lots of Australian, cape and carpet wools at previous prices.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: The general wool market has been more active. Manufacturers evidently think prices have touched bottom and are buying more freely. There is, however, no tendency to any improvement in values on the seaboard. Country markets are strong. Three or four New England mills are buying in Ohio at comparatively high rates, and dealers are unable to secure much stock except above a parity with eastern quotations.

From Baltimore, Md.: Offerings of wool are rather weak, and the tendency of the market is to weakness.

From Chicago, Ill.: Wool is dull.

IRON.

The record of improvement reported in the iron market last week continues. Pig iron is firmer and No. 1 grades of Crane, Allentown and Thomas iron are held at $23, one dollar above nominal quotations. Sales of American iron have increased in the aggregate, but the orders continue small. The condition of the trade is reported very healthful and the prospects are believed to be good for a satisfactory fall trade. Word comes from the west that several furnaces along the line of the Pennsylvania & Reading Railroad will blow in on or about August 1. These will not affect the New York market to any extent, but, if they do begin production again, it is unquestionable that it will be in response to an increased demand for raw iron. Prices of Scotch iron abroad are a fraction higher and stocks are firmly held. Freights to this side are also up (to 10s.,) which makes dealers here firm in their views that prices should go up a point or two before making sales. Receipts for the week have not been in excess of the average weekly arrivals of Scotch for some time past, say about 1,300 tons, and sales to arrive will not exceed that amount. Steel rails continue nominally at $38 per ton, and but few new orders are reported of any magnitude. Bar iron mills in Pennsylvania are running on from one-half to three-quarter time, and in this way about keep apace with the demand. Manufacturers expect a fair fall trade, but at present bar iron is very dull. Concessions are reported on the basis of 1.90c. and 2c. for refined.

THE BRITISH IRON AND OTHER INDUSTRIES.

[By Cable to BRADSTREET'S.]

From London, Eng.: Iron quotations are little changed. Shipyards less active. Engineering still fairly brisk. Good demand for coal.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: There is a good demand for leading brands of foundry iron for July and August at outside rates, and forge is more active, but unchanged. Merchant iron selling as required for summer wants.

From Pittsburgh, Pa.: A majority of the iron mills are shut. There is a better feeling in pig iron, but the situation generally is unchanged.

From Cleveland, Ohio: Iron market for the week substantially unchanged.

From St. Louis, Mo.: The demand is improving for both pig and manufactured iron, and prices are firmer at quotations.

From Chicago, Ill.: Hardware jobbing is fair, a slight increase over last week. Bar and angle iron are rather more active on orders and unchanged. Nails are rather more active with less pressure to sell. Pig iron is held with more confidence; sales chiefly in job lots.

From Detroit, Mich.: In iron, prices are firm and prospects good. Stocks of manufactured iron are light.

From Baltimore, Md.: American pig iron is steady at the late advance, and standard brands of No. 1 foundry are quoted firm at $22@$22.50.

COAL.

The anthracite coal trade this week presents a continuation of the features noted on last Saturday. While July prices are not realized, sales, which are moderately active, are more generally at full rates preceding the July circular. There is less activity in the movement from Buffalo west by lake, but the total tonnage thus far shipped from that port for 1883 continues in excess of that in a like portion of 1882. It is believed by many and hoped by others in the trade that no more restriction of work at the mines will be ordered during the year, but of this no one is in position to speak by authority at present. There is talk of an effort to advance rates for August, to be made at the meeting of companies next week. On the whole, the position of the anthracite trade is a very satisfactory one, the demand being well up to the mid-summer average and the prospective requirements equal to the expected supply. It is reported that several iron furnaces along the line of the Reading railway will shortly go into blast. This would of course act favorably upon the coal market. It is also reported that the Philadelphia and Reading Coal and Iron Company will largely increase its capacity for business in the first of next month, when it is announced that that company will take possession of the eighteen Lehigh and Wilkes-Barre collieries. The bituminous trade continues quiet and without features of special moment.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The coal market is quiet and sales are moderate. Prices about the same as last week. The stock on hand is moderate.

From Buffalo, N. Y.: The coal trade is very quiet; receipts light and stock low. Freights to Chicago and Milwaukee 50c., with light offerings. Lake shipments to date 492,028 tons, as compared with 448,548 in 1882, and 296,266 in 1881.

PETROLEUM.

The week has been one of liquidation. The clique which got in at $1 or thereabouts ran oil to $1.20 and began to sell. The past fortnight or three weeks has shown the result of its process of gradual unloading. The bears in oil have, therefore, had things pretty much their own way during the period noted. Stocks in the producing regions are increasing, which has been construed into a bear argument. It is undoubtedly an effective weapon in favor of lower prices, but one cannot lose sight of the recent producers' report of operations for June, in which it was noted that the gain in pipe-line stocks was due (in large part, at least) to the drawing off of well stocks. Similar statements have been made since, and lend color to the suggestion that the Standard's known bearish proclivities may have had something to do with it, inasmuch as the United Pipe-line Company, the Standard, and the heavy "short" interest in the late fight over oil were one and identical. The petroleum market on Thursday was well maintained, notwithstanding the absence of telegraph communication after 1 P. M.

No news of importance was received from the producing region on Friday. The speculative market opened at $1.01⅞ for pipe-line certificates. During the morning sufficient aid was secured by the Western Union Telegraph Company to forward the half-hourly quotations from Oil City, but the customary numerous private telegrams to brokers here from their agents, or principals, or customers at the west was very considerably interrupted and trading was greatly restricted. During the morning, however, prices steadily advanced, closing at noon at $1.03¾. At 1.30 P. M. bids were freely made at the same figure. At the close the offerings were $1.06, against $1.08 on last Friday evening, June 13, a decline of 2c. on the week. The market closed firm with a better tendency.

The following shows the fluctuations in prices of certificates of crude petroleum during the week ended last evening:

	Opening.	Highest.	Lowest.	Closing.
Saturday, July 14	1.03	1.03¼	1.04½	1.04½
Monday, July 16	1.04⅝	1.04⅝	1 01¾	1 02⅝
Tuesday, July 17	1.03¾	1.04⅜	1.01½	1.01¾
Wednesday, July 18	1.00¾	1.02⅜	.99	1 01¾
Thursday, July 19	1.00⅜	1.02⅜	.99¾	1.01¾
Friday, July 20	1.01⅞	1.06¾	1.01¼	1.06

Refined oil was reduced ⅛c. on Saturday and another again on Monday. Not much new business was reported at the concessions. Crude in barrels, case oil and naphtha have been in very moderate request only. The quotations for certificates of crude petroleum and of petroleum products last evening, as against those at the close of the four preceding weeks, are as follows:

	June 22.	June 29.	July 6.	July 13.	July 20.
Certifi's, crude	1.16⅝	1.18	1.14⅜	1.08	1.06
Refined, 110°	7⅞	7¾	7⅞	7⅜	7⅛
Refined, 70°	7⅞	7⅞	7⅞	7½	7¼
Crude, in bbls	7¼@7⅜	7@7¼	7@7¼	6¾@7½	6⅝@7⅜
Case, plain	9⅛	9⅜	9⅜	9⅛	8¾
Naphtha	5¾	5¼	5¼	5¼	5¼

The exports of petroleum from the United States, crude equivalent, for the week ending July 14, was 9,411,535 gallons, against 17,740,881 in the preceding week. The total export from the United States since January 1 was 326,784,993 gallons, against 345,252,622 gallons in the corresponding portion of 1882, a decline in the current year of 18,467,629 gallons. The total exported from New York city during the week ended July 14 was 7,393,723, and during the year, to that date, 270,852,773, against 276,309,582 gallons in a like portion of 1882. The decrease in shipments in the year from New York alone, as compared with 1882, was but 5,456,809 gallons (crude equivalent), or less than one-third of the decline recorded at other petroleum exporting ports.

PETROLEUM ELSEWHERE.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: In petroleum a late sale is reported of a cargo of 3,500 barrels of refined at 7⅛c.

OCEAN FREIGHTS.

The ocean freights market has experienced a decided revival during the week. Berth rates were quoted firmer on Saturday, higher on Monday, with a further advance on Tuesday, succeeded by subsequent firmness and fractional increases. The stimulation has been due to the reëntry of foreign buyers and shippers of grain and, to a small extent, of petroleum. The renewed inquiry, combined with an absence of any surplus of charters or freight room, at once advanced quotations. The gain in the week may be noted in the following quotations: To London, grain, steam, July 14, 4½d.; to Antwerp, steam, 5d. On Thursday, July 19, the corresponding rates were, to London 5¼d., an advance of ¾d., and to Antwerp 5½d., an advance of ½d. On petroleum the advance has not been so marked, although increased firmness has been reported. Special dispatches to BRADSTREET'S confirm these reports, with intelligence of increased inquiry for vessels and better rates at south Atlantic ports.

OCEAN FREIGHTS.

[By Telegraph to BRADSTREET'S.]

From Savannah, Ga.: Foreign charters brightening. Vessels are scarce and wanted for coastwise and Spanish ports.

From Wilmington, N. C.: Freights—Foreign are firm and tonnage is scarce; coastwise is inactive.

From New Orleans, La.: Freights are dull and unchanged.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: A large number of small buyers are in the boot and shoe market, and the fall trade continues in full force. Manufacturers are busy and jobbers are now shipping quite freely. Labor is well employed and we hear no complaints, except that margins of profits are very small. Shipments for the week 59,835 cases.

From Chicago, Ill.: Boots and shoes are meeting an average July sale.

HIDES AND LEATHER.

[By Telegraph to BRADSTREET'S.]

From Buffalo, N. Y.: The leather market is very firm in response to a much better inquiry and the high price of hides. Manufacturers who have held off, or bought from hand to mouth, apparently encouraged by the improved outlook, are in many cases placing full orders for fall consumption.

From Chicago, Ill.: Leather is fairly active.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From St. Louis, Mo.: The tobacco market has improved and is active. The Missouri crop is in bad condition and will be small.

SPECIAL LOUISIANA TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Crude cottonseed oil has slightly advanced, but why, in the face of a large stock, is a surprise. Louisiana products are very dull. Flour is in request for fancy, which is very scarce; medium and low grades are in moderate supply and dull.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Buffalo, N. Y.: Lumber has not shown the improvement that was expected. Sales are light even for midsummer, and it seems possible that a slight decline in values on the coarser grades may follow soon. Lumber freights from Bay City and

Saginaw are off 50c., with but few charters arriving. Receipts at Tonawanda for the season have been quite heavy, but principally for Albany account.

From Minneapolis, Minn.: The lumber market is moderately active and steady.

From Norfolk, Va.: The lumber business is now active, both for consumption and export. All departments in the building line are very active.

From Wilmington, N. C.: Timber is in demand. Lumber is steady and shingles firm.

From Savannah, Ga.: Home demand for lumber for building purposes good.

NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Spirits of turpentine is firm and the price unchanged. Rosin is quiet. Tar advancing, and crude turpentine is steady.

THE CHICAGO TRADE SITUATION.

[Special Correspondence BRADSTREET'S.]

Chicago, July 18.—Business in financial circles continues quiet and destitute of features of interest. The banks, while they report more than the customary July calls for loans, say they are carrying large balances for which they are unable to find employment in desirable paper, and good paper is readily taken at 5@6 per cent. The general trade is fair for the season and country collections very satisfactory. The daily bank clearings show a material gain over the same time last year. They do not, however, reflect the true condition of business, as the gains are partly due to the unusually heavy deposits for margins between operators on 'change, who have been rendered more than ordinarily cautious by the recent heavy failures on the Board of Trade. The jobbing trade in dry goods maintains a very fair summer average, and the sales for July promise to exceed the distributions for the same time last year. Merchants are busy getting in their stocks and preparing for the fall trade, for which the present outlook is very satisfactory, and should the present crop anticipations be realized it is safe to assume that the autumn sales will be far in excess of any previous season, as the unprecedented development that has taken place in the territory tributary to Chicago must cause a corresponding increase in the demand for goods. The grocery trade shows more activity than last week, the consumptive demand for sugars being unusually free and stocks low. The iron trade fails to show any improvement as regards refined bar, and prices favor buyers. Pig is selling fairly in a jobbing way, and some very fair lots have been placed with manufacturers, who are compelled to buy to supply current wants, and prices are steady. Nails are dull, and the market situation without change from last week. The grain markets continue feverish and unsettled, the large stocks of wheat, in connection with the small demand from shippers, and the prospect of early arrivals of new crop, has an adverse influence on a large majority of operators, the only apparent believers in the grain even at present prices being a clique who got loaded up at much higher prices than those now current, and they are using every means at their command to force an advance, and the movement during the previous two days indicated that they were likely to succeed; but the situation was reversed to-day, and the market closed demoralized and weak. The reported buying of No. 2 spring for shipment was simply a device of the bulls, who arranged to ship a few cargoes, hoping that the signs of an outward movement would induce outsiders to buy. Corn is weak and dull; the shipping demand has fallen off; the recent short interest in August has been covered, and the splendid crop prospects shake the faith of speculative buyers; the receipts also continue much larger so far this month than the most sanguine expected. Oats are rather firm for immediate delivery, but the deferred options are weaker and the tendency of prices downward. The provisions market is in the same unsettled condition noted last week. The outward movement of nearly all articles of hog product is large, but the bulk is shipped for account of Chicago holders, who are distributing their property among all the consuming markets in this country and Europe, with a view to reducing home supplies and thereby enable them to control the market, but the fact that shippers are without orders, and the knowledge that the supply of hogs for future delivery will be ample, causes a bearish feeling, and although the bulls frequently succeed in securing an advance, their point is gained by frightening the shorts into covering, and prices recede so soon as contracts are filled. The arrivals of beef cattle continue large and the average quality superior to any ever before received at this season.

GRAIN IN CHICAGO ON DATES NAMED.

	July 14, 1883, bush.	*July 15, 1882, bush.*	*July 15, 1881, bush.*	*July 16, 1880, bush.*
Wheat	5,892,000	870,000	4,664,000	2,666,000
Corn	1,790,000	1,171,000	1,425,000	1,271,000
Oats	466,000	67,000	3,768,000	236,000
Rye	462,000	77,000	23,000	30,000
Barley	19,000	9,000	32,000	62,000
Totals	8,638,000	2,194,000	9,312,000	4,265,000

A VALUABLE SUGGESTION.

The following is from the *Iron Age* (New York):

The system adopted by BRADSTREET'S, of reporting business failures by trades, is an important improvement over any method hitherto followed in the compilation of such statistics. It is much more instructive to a student of the business situation than the statistics of failures by states or general geographical divisions. Believing that it is the desire of this company to make their statistics as valuable as possible, we venture a few suggestions which we think will still further increase their usefulness and interest. For example, in the table elsewhere given, we find "Hardware, iron, steel, etc.," as one item. This is somewhat too broad a generalization to have much value. It would be of great interest to have the figures opposite this item presented in several subdivisions. The hardware trade is a very important interest, and we should like to see it put down by itself, with two subdivisions of its own. Thus:

Hardware.
  Manufacturers.
  Dealers.

The items iron and steel might also be subdivided in the same way, if it were desired to give the figures a real value. This is true of some other items, but by no means of all of them. Out of 47 items in the table, only 17 could with advantage be so subdivided as to show the relation of failures among manufacturers to those among dealers. But the comparison thus rendered possible would be very instructive, and would give such statistics a value far greater than they have ever had. It would show the relative condition of every important industry and trade in the United States, and, by giving warning of the weak places in our industrial and commercial system, would be of the greatest aid to those who have the management of credits as well as to those desiring the information needed to enable them to shape their business policy wisely and intelligently. With the very perfect machinery at the command of BRADSTREET'S the subdivision of items, when such subdivision is likely to add greatly to their value, would not entail labor in proportion to the resulting benefit.

THE STIMULUS OF NECESSITY.

Dr. Carpenter writes as follows in the New York *Medical Journal:*

"What can be in stronger contrast than the sluggish life of the Orinoco Indian—for whom one day's labor (in the planting of a banana grove) is said by Humboldt to be sufficient to provide food for the whole year, and who divides his time between sleeping and smoking—and the hardy activity of the Swiss mountaineer, who toils throughout the summer and autumn in the cultivation of his small patch of grain or potatoes for the needs of his family, and scales heights that most men would deem inaccessible to collect their scanty herbage as winter's food for his beasts, using the long hours of his enforced confinement in some kind of skillful handiwork which may enable him to procure additional comforts for his home or educational advantages for his children? And so, in the higher grades of society, those who are born 'with a silver spoon in their mouths' too often fall into habits of mere dilettanteism, while those who enter upon their career with good educational preparation for it, but without any other means of subsistence than what they can themselves earn, are, as a large experience shows, those most likely to succeed. I need not call to your minds cases so familiar to you as those of your own presidents, Lincoln and Garfield, but would rather draw my illustration from the fact well known in my reputedly aristocratic country—that many of the men who have risen to highest eminence in the legal profession, and have thereby gained seats in our House of Lords, have begun life upon nothing, while those who go to the bar with an income that places them above the need of exertion are regarded as almost sure not to 'get on.' The autobiography of the late Lord Campbell and the biographical notices that have made us acquainted with the early years of the late Lord Justice Lush are most instructive when regarded in this aspect, showing what steady determination may do, without any brilliant ability, when nerved in the first instance by the 'stimulus of necessity.' And so it is with the most of us. In proportion as our path of life is smooth and even we tend to fall into an automatic routine; but obstacles arise which require some extraordinary exertion to surmount them, and then only do we become conscious of our real strength—that which lies in vigorous self-determination."

TESTS OF INDIAN WHEAT.

Dornbusch (England) publishes the report of an English milling firm to the Secretary of State for India on a series of experiments with Indian wheat. Four representative varieties were taken. The results obtained were that, without exception, the yield of flour was unusually large, the two lots most suitable for bakers making probably more bread than the product of any other country. The flour was found profitable for millers, and in color and strength ranged from white and light to dull brown, and the strength liked by the bakers. The flavor of the four lots was beany. The report says there is no probability of these Indian wheats coming into demand for manufacture into flour such as that required by the British and most other foreign markets without a liberal admixture of other wheats. The Indian flours were found to possess in a marked degree the same characteristics of great dryness, and a distinct beany and almost aromatic flavor, inseparable from wheats grown in the climates and soils of the tropics. "The flours are ricy, the texture of the breads is too close, and the crust is hard and brittle. But these characteristics do not detract from their usefulness in any important degree. As is well known, a miller cannot show skill in his craft to greater advantage or profit than that with which he selects his wheats and mixes his grists so as to produce to best advantage a flour from which bread can be made of the color, bloom, strength, and flavor desired, and withal a good yield."

The report adds: "We pronounce them to be exceedingly useful wheats; in fact, hardly equaled for what is deficient and wanting in the English markets by any other wheats. Their chief characteristics are just those in which the wheats grown in our variable climate [Great Britain] are most deficient. Their great dryness and soundness render them invaluable for admixture with English wheats that are in any degree out of condition through moisture, and the great proportions of the wheats harvested here have been in that condition for some years past, a condition that must prevail in all others than that of wheats harvested and stored during fine and favorable weather; and this the English farmer knows, greatly to his cost, is a state of climate that is by a long way the exception rather than the rule."

The thinness of the skins of these Indian wheats, which makes a heavy yield of flour, also puts them in the front rank as a millers' wheat. The yields of flour range from 77.46 to 80.52 per cent., against 65.2 for English and 72.2 for American spring wheats. They also yield a larger percentage of bread than other wheats. The beany flavor is found not to be a serious obstacle, for fair average deliveries, well cleaned and properly dealt with, can be employed in the proportion of 25 per cent. to 50 per cent. with British or wheats like the Americans, possessing a sweet milky or nutty flavor. The character and general excellence of the Indian wheats are said to be improving with every harvest. The development of the wheat resources of India is strongly recommended in the report.

THE SOUTHERN LUMBER INDUSTRY.

The following is taken from the Nashville *Banner:*

During the past years the eastern and northwestern states controlled the lumber market of this country and in fact the world. The vast area of territory, covered as it was with the most magnificent growth of spruce and pine, appeared inexhaustible. To them flocked woodsmen, saw-mill men and buyers of their manufactured lumber. The appliances at first used for sawing lumber being rather crude, it was for a long time inadequate to supply the demand for it. But with time and constant denudation going on, the forests have begun to show signs of depletion, and lumbermen and dealers have had to seek other fields, and have found them in the great southern department of the republic. Every conceivable argument was and is resorted to by capitalists and lumbermen up in the first-named timber regions to prejudice immigration to the new forests, and even against the character of the woods growing in them. For years their efforts were rewarded with success, and they piled up fortunes from their own forests. The denudation has gone on so rapidly, however, that available forests have become scarce, and to get railroads built to where there is timber and to place it on the markets, is so costly that prices necessarily went up to almost prohibitive figures.

At this juncture of the trade a few progressive men experimented upon southern yellow pine, and being satisfied of its equal if not superior qualities to the northern wood, and finding a large difference in their prices, commenced shipments of it to the north, east and west, where it was purchased at comparatively low prices, and used to the perfect satisfaction of builders, cabinetmakers and decorators. Thus began the future prosperous outlook for southern lumbermen and the depression in the trade of the northern ones. Millions of feet of southern timber now go annually from Brunswick, Savannah, Charleston, Wilmington, Pensacola, Mobile and New Orleans, yet the business can scarcely be said to be under way as yet. Atlanta mills and those at points along the railroads passing through the pine belt are overrun with orders from the west and northwest, and the demand is increasing more rapidly than the means of production. Large numbers of the saw-mill men (from the region which for so long a time held the monopoly) have already located down south, and many more will follow. First-class machinery has already been and will continue to be introduced in the south, factories will spring up, lands advance in price, and a bright light of prosperity will shine on the favored land. Kentucky, Tennessee, North Carolina, Louisiana and Arkansas, are now the most attractive localities, on account of their superb timber growth, fine climate and excellent farming lands. The walnut, cherry, ash, hickory, oak and cypress to be found in them is to-day worth millions, and the day is close at hand when every stick of it will have a value. Saw-mills, shingle, barrel and stave machines are busy running off their wares, while the whole country is filled with prospectors wanting to purchase lands.

Manufacturing is increasing in magnitude and variety, so that what has been said of the timber trade may be with equal truthfulness applied to any of our southern industries. The timber interest is the one which absorbs a large portion of the capital now coming south; first, because the growing demand for southern woods has assumed enormous proportions, and secondly because the land can only be utilized for agriculture after the lumber will have been cut and manufactured. Enormous tracts of these timbered lands, lying in all of the southern states, have been purchased by companies, syndicates and individuals within the last few years (principally as a speculation), aggregating several millions of acres; but the more recent purchases of any magnitude have been made by persons intending to utilize the timber on the land at once. Notably among these are A. C. Danner & Co., of Mobile. Their lands lie along the Mobile & Ohio road, where no doubt at short intervals first-class saw and planing mills will soon be erected. All over the south these purchases have been made, in fact, to such an extent that large bodies of land are not so commonly met with as formerly. These wholesale purchases are to be regretted, because the purchasers get the lands so cheaply that they need neither utilize or sell them, but simply wait until timber becomes still scarcer in the north and east, and then realize fabulous interest on their outlay. As far as possible the tide of immigrants coming into the southern states should be induced into following small industries, and then divide the benefits of them over the whole land.

Where manufacturing has been begun in the south success has invariably attended. Look at Chattanooga, Birmingham, Anniston, Columbus, Augusta, Charleston, Nashville, or in fact any town in which a factory of any sort has been put in operation. Anniston, Ala., is perhaps the most remarkable instance of a town's rapid growth of any in the south. Ten years ago it was founded by a private firm which bought sixty-five square miles of the poor rolling country around it. The town was laid out, furnaces erected, factories, churches and schools built, streets macadamized and underdrained. Industrious citizens were welcomed and went there until the town is one of the busiest places in the country. The mountains near by abound in fine timber, and quantities of it are brought into the town to be consumed in the various wood factories established there. In other words, Anniston is the type of what any favorably located spot in the great timber and mineral regions can be made by directing to it a proper class of inhabitants, aided by capital. These instances of success will serve in the future as the bright lights to attract industrious foreigners to its "horn of plenty," and the "tide will then have been irrevocably turned southward."

IRISH LACE.

An exhibition of Irish lace has been held at Dublin. Regarding it the London *Queen* says: "The exhibition of Irish lace at the Mansion House, which was opened last Monday by the Duke and the Duchess of Connaught, fully realized our expectation that excellent work would be found there to show what Irish lace-workers can do when properly taught and fairly encouraged. The display is a thoroughly representative one, comprising every kind of lace which is at present made in Ireland. Youghal sends exquisite imitations of ancient laces, claiming the name of Irish point for admirable reproductions of Argentella, the queen of dentelles, and deservedly so, as in no other country of the world anything like it in perfection has been produced in modern times. Innishmacsaint, the Island of the Sorrel Plain, vies with Youghal in the revival of Italian Reticella, or Venetian and Spanish rose-point, and also in the nationalized Irish point. The ancient city of Limerick, once, with the country around, the most thriving center of the Irish lace industry, and famous for its tambour, run, applique and guipure laces, is represented by some excellent specimens of her work done in bygone times, but has comparatively little to show of recent productions. The number of her lace-workers has dwindled down from over a thousand to a few hundred, and the traveler is no longer addressed by the pretty Irish girls in the market-place with the irresistible, "And, shure, yer honner'll be for buying the handkercher to dry up the tares of the swate young lady as is weeping for ye over the says." Carrickmacross fully sustains its old-established fame for imitations of Brussels applique and for the typically Irish cut-work guipure. Cork and Clones are abundantly represented by every imaginable variety of crochet—the pseudo lace-work with which the name of Ireland has been specially connected for many years. Plain, knotted lifted crochet, and the curious imitation of Reticella, of Venetian and Spanish point guipures, worked with the crochet-hook, are all there, while Ardee sends many specimens of gossamer-like pearl tatting, the most attractive of all crochet work.

TRADE EMBARRASSMENTS.

There were 162 failures in the United States reported to BRADSTREET'S during the past week, 22 more than the preceding week, 31 more than the corresponding week of 1882, and 80 more than the same week of 1881. The principal failures were E. W. Holbrook & Co., commission dry goods, New York and Boston; The Manchester Iron & Steel Company of New York and Pittsburgh; J. W. Morrill & Co., wholesale saddlery, Louisville, Ky., and G. L. Wing, saw mill, at Wingelton, Mich. Compared with the previous week the middle states had 40, an increase of 8; New England states 22, a decrease of 5; southern states 25, an increase of 1; western states 43, a decrease of 1; Pacific states and territories 32, an increase of 19; Canada and the Provinces 27, an increase of 1. In the principal trades they were as follows: General traders 25; grocers 20; liquors 11; clothing 9; manufacturers 7; dry goods 6; hardware 6; hotels and restaurants 6; jewelry 6; drugs 5; shoes 4; tobacco and cigars 4; coal and wood 4; bakers and confectioners 3; commission 3; fancy goods 2; millinery 2; grain 2.

ARIZONA.

BENSON.—I. N. Mundell, general store, has assigned, giving preferences for $1,920. Liabilities about $4,000; assets $3,000.

CALIFORNIA.

CRESCENT CITY.—James McLaughlin, Jr., liquors, is reported to have failed.

DOWNEY.—Application has been made to force J. Schlesinger, general store, into insolvency.

FULTON.—Holly & Gellards, grocers, are reported to have failed.

GRASS VALLEY.—L. B. Wilson, grocer, is reported to have failed.

GREENVILLE.—McBeth & Compton, general store, have assigned.

LINCOLN.—Charles Kennedy, hotel, is reported to have failed.

LOS ANGELES.—Jayaux & Tromboni, general store, have been attached.

OAKLAND.—Farmer Brothers, saloon, have been attached.

OAKLAND.—S. Lewis, jeweler, is reported to have failed.

OAKLAND.—O. M. Sanford, tinner, has filed a petition in insolvency.

PLYMOUTH.—H. S. Turner, publisher, has been attached.

RIVERSIDE.—P. Reinstern, saddler, has been attached.

SALINAS.—James Stokes, tailor, has filed a petition in insolvency.

SAN FRANCISCO.—J. Alcayaga, grocer, is reported to have failed.

SAN FRANCISCO.—J. Bramstatter, butcher, has been attached.

SAN FRANCISCO.—S. A. Burnham, commission, has been sued.

SAN FRANCISCO.—M. Lichtenstern, underwear, has been attached.

SAN FRANCISCO.—Linforth & Wood, cabinetmakers, are advertised to be sold out by the sheriff.

SAN FRANCISCO.—Nathan & Co., dry goods, have assigned. Liabilities $17,000.

SAN FRANCISCO.—Nicolas & Lesonch, restaurant, have been attached.

SAN FRANCISCO.—Henry F. Nordbruch, grocer, has been attached.

SAN FRANCISCO.—L. Reichrath, saloon, is advertised to be sold out by the sheriff.

SAN FRANCISCO.—Charles Schroff, furniture, is reported to have failed.

SAN FRANCISCO.—R. W. Theobald & Co., wood and coal, have assigned.

SAN PABLO.—W. B. Easton & Co., general store, have had judgment for $2,461 entered against them.

UKIAH.—G. N. Savage, dry goods, is reported to have failed.

COLORADO.

COAL CREEK.—Ferguson & Bailey, drugs, have assigned to Dr. King.

SILVERTON.—George C. Brower & Co., saloon, have been closed by attachment.

CONNECTICUT.

BIRMINGHAM.—B. F. Lines, blacksmith, has assigned.

NEW HAVEN.—G. Stanford, saloon, has been attached.

DAKOTA.

VIRGINIA CITY.—Mrs. E. Cohn, clothing, is reported to have failed.

NEW HAMPSHIRE.

NASHUA.—L. W. Godin, shoes, is in insolvency.

NEW JERSEY.

NEWARK.—Hill & Piez, brewers, offer to compromise at 25 cents. Liabilities about $87,000; assets $60,000.

PATERSON.—The receiver of the Paterson Preserving Company has sold the stock, machinery, etc. The cash assets are about $5,000; liabilities nearly $50,000.

PATERSON.—Edgar E. Vreeland, grocer, has called a meeting of creditors. He previously gave a chattel mortgage to his mother for $805, mortgaged his real estate to friends, and gave a bill of sale to H. B. Crosby & Son. Liabilities about $1,600; assets $1,200.

NEW YORK.

ALBANY.—R. P. Cornell, pork, etc., assigned on the 17th inst. to George T. Kirby. Judgment for $1,377 was entered against him on the 16th inst. in favor of P. E. Cornell.

BROOKLYN.—Henry E. Fickett & Co., builders and planing mill, assigned on the 17th inst. to William A. Collingwood. They assigned February 26, but were subsequently granted an extension of four, six, eight and twelve months, and that assignment was annulled.

BROOKLYN.—George Schwally, tailor, assigned on the 16th inst. to Anna Schwally, giving preferences for $920.

BUFFALO.—Jacob Busch, coal, has assigned.

BUFFALO.—A. Rose, hides and leather, has assigned to Rudolph Hoffeld.

BUFFALO.—George Sargent, coal, has assigned.

BUFFALO.—Jacob Streicher, wagon maker, has assigned.

ELMIRA.—The schedules of John W. Collins, harness, show liabilities $3,134; nominal assets $1,532; actual assets $1,268.

JAMESTOWN.—Francis A. Jewett, jeweler, has assigned to Solomon Jones.

NEW YORK CITY.—B. E. Barens, oil broker, suspended on the 18th inst. on account of the decline in oil.

NEW YORK CITY.—Edward Barr, iron pipes, assigned on the 18th inst. to Richard Pancoast. His liabilities are about $50,000. He has been in business since 1875, but not meeting with success recently turned his business into a stock company under the style of the Edward Barr Company (Limited), which was incorporated May 4. He was president of the company until just before he assigned, when he resigned and became the manager.

NEW YORK CITY.—William H. Browning, builder, has been attached for $10,130. He sailed for Europe on the 12th inst., leaving debts aggregating about $60,000. He was erecting nineteen buildings, twelve on 4th avenue, between 69th and 70th streets, and seven in East 63d street, which, if completed, it is thought would realize enough to pay all claims and leave a surplus. The creditors have held several meetings with a view of obtaining the means to finish the buildings.

NEW YORK CITY.—The schedules of Herman Busse, painter, show liabilities $1,838; nominal assets $1,181; actual assets $672.

NEW YORK CITY.—Jacob Caro, frames, assigned on the 17th inst. to Isidor S. Kane, giving preferences to Harry S. Levy $1,000; Neuman Cowen $5,175; Lewis S. Warsauer $1,718; total $7,893. He failed in November, 1874, owing $28,000, which he compromised at 33 1-3 cents and paid.

NEW YORK CITY.—Reese Carpenter has been appointed receiver for the firm of Reese Carpenter & Co., iron and supplies. The liabilities are reported at $25,000, and nominal assets $45,000, consisting of stock $20,000, accounts due $25,000.

NEW YORK CITY.—William D. Eiskamp, produce, assigned on the 14th inst. to D. K. Schusler, giving a preference to W. H. Gerdes for $507.

NEW YORK CITY.—E. W. Holbrook & Co., commission dry goods, assigned on the 20th inst. to Benjamin Dunning, giving preferences for $67,212; to the National City Bank $30,000; Aaron H. Wellington $18,105; O. M. Bogart & Co. $10,000; John Collins & Son $9,017. The liabilities are about $750,000, mainly due to banks, of which about $130,000 is for merchandise, $550,000 on notes, and the balance confidential. It is thought the assets will amount to about $350,000, consisting of three small mills and stock therein, merchandise in bonds and bills receivable. They have secured all their borrowed money debts by preference. The failure is attributed to losses in running the cotton mills, in manufacturing, and also, it is said, to losses in stock speculations. The business was established many years ago in Boston, where they still have a branch. The present firm was established in 1868. The mills are located at Springvale, Me; Grafton, Mass., and Troy, N. Y. The firm stood well in the trade, and has its sympathy.

NEW YORK CITY.—Landow & Herman, dry goods, assigned on the 20th inst. to Emanuel Frey. They began April 1st last, claiming $8,000 capital.

NEW YORK CITY.—The Manchester Iron & Steel Company has assigned to W. W. Martin, of Allegheny City, and Henry Stanton, of New York. The works are located at Allegheny City, where the assignment was made. The company was incorporated in December, 1878, under Pennsylvania laws, with an authorized capital of $500,000, of which it was claimed $460,000 was paid in. All the property was mortgaged July, 1882, for $300,000 to the Metropolitan Trust Company to secure bonds. The proceeds of the bonds, it is said, were issued to put the property in good order. The property consists of eighteen acres of land, a rolling mill, a stock, 134 tenement houses, 40 cars, locomotives, etc., which it is said cost the company $450,000. It also owns ninety acres of coal land in Connellsville, Pa. Charles W. Cass was president, Henry Stanton treasurer, James I. Bennett, of Graff, Bennett & Co., was a director.

NEW YORK CITY.—Charles O'Neill, merchant tailor, assigned on the 19th inst. to Oliver J. Wells, giving preferences to Robert P. Lee $250; Amelia O'Neill $10,000; John Rofkar, executor, $4,000; total $14,250.

NEW YORK CITY.—The schedules of Prokter & Schwartz, jewelers, show liabilities $3,653; nominal assets $5,264; actual assets $2,441.

NEW YORK CITY.—The schedules of George Schaffer, leather, show liabilities $13,906; nominal assets $11,111.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

FINANCIAL.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, JULY 28, 1883.

NOTES OF THE WEEK.

It is plain that the real issue between the striking telegraphers and the Western Union and Baltimore companies is the recognition or non-recognition of the Brotherhood. The Western Union managers would in all likelihood gladly agree upon a compromise were it not that the slightest concession would be a victory for the Brotherhood. Such an outcome would instantly strengthen and make permanent the organization, while a defeat of the strikers now will go far to break it down. We believe that in making the fight on the principle of destroying the Brotherhood the Western Union managers are but continuing a short-sighted policy. The strikers may be defeated, but in that event the company will have gained a costly victory. The path of orderly progress in industry and commerce to-day lies in the direction of a more thorough organization of labor. It is the part of men who are not blinded by a narrow selfishness to further this progress in every reasonable way. Through a recognition of the Brotherhood the morale and discipline of the operators might have been improved in various ways, which would directly further the interests of the company. It is believed that in putting these opinions on record we are but giving voice to the intelligent judgment of such men of business as insist upon seeing things as they are. The iron heel may win to-day, but the real battle is to be fought to-morrow.

The strike of the telegraph operators has given rise in some quarters to discussions regarding the expediency of government control of the telegraph system of the country. In a letter which we print in another column our Washington correspondent recalls the propositions which have heretofore been made in Congress looking to the establishment of a government telegraph company, and sets forth the arguments for and against the scheme as they have been formulated by those in favor of and those opposed to such a project respectively. We do not think that the arguments in favor of the undertaking referred to are of sufficient weight to justify a change in what has hitherto been the policy of the government in regard to this matter. Congress and the executive departments are already so overloaded with business that many matters of great national importance suffer enforced neglect. Action upon pressing public measures is reached only slowly and with difficulty. Not to mention lesser matters, the country is awaiting a legislative settlement of its commercial policy. The enactment of a national bankrupt law also has been too long postponed. The executive branch of the government is even now confronted with the heavy task of endeavoring to make civil-service reform something more than a name. Indeed, the condition of the civil service as at present organized should be in itself conclusive against the adoption of any such scheme as that suggested.

The tariff plank in the platform of the Virginia Democrats is almost identical with that adopted by the Ohio Democrats over a month ago. Like that, it in no sense defines the position of the party, but seems to be a mixture, in about equal parts, of free trade and protection. No other construction can be placed upon a declaration which favors a "tariff for revenue" so adjusted "as to encourage productive interests at home and afford just compensation to labor." Perhaps some light upon the hidden meaning of the convention may be found in the preceding declaration, in which the "unconditional and immediate abolition of the internal revenue system" is demanded as being, among other things, "an intolerable burden upon the taxpayers." We have noticed that this particular demand has been made very frequently of late by extreme protectionists. The convention accepts as final the settlement of the debt question made by the Readjusters, and expresses its determination to oppose the further agitation of the question or any disturbance of the settlement by appeals or otherwise. Strict economy in all the departments of the government is demanded, and any increase of taxation is opposed. The platform also contains a resolution in favor of "real" civil-service reform, which, we presume, means something different from the kind usually "demanded" by politicians.

The stock market has been dreadfully dull since Monday last. On that day there was considerable activity imparted to it by a lively attack on the Gould stocks other than Western Union, which Mr. Gould has concentrated his strength upon. These stocks were knocked down about 2 per cent., and some of the Vanderbilt and Villard stocks shared the same fate. Since then the market has slowly recovered, and with the recovery the volume of business has declined; nor did the bond call of the Secretary of the Treasury on Thursday appear to have the slightest stimulating effect. Business is at a very low ebb in Wall street in these days.

The transition from the old to the new era in the civil service has, not unnaturally, been attended by indications that the old system was not passing away without a protest. The enemies of the politicians relate that, just before the civil-service rules were to go into effect, the appointment clerks in the departments were kept busy until late in the evenings in dispatching routine work relative to the filling of vacancies. The object of this haste was, of course, to secure to the politicians all the spoils of office available and to leave as little patronage as possible to be disposed of under the civil-service rules. A characteristic incident has been added during the week to the history of the transition to the new system. It appears that a clerk in the Treasury Department resigned her position on the 19th of June, the resignation to take effect on the 19th of July. Here was an opportunity not to be let slip. The lady was requested to allow her resignation to be dated back to June 14, so that it would take effect on July 14, two days before the Civil Service act took effect. To this she at first demurred, but, under the threat of peremptory dismissal unless she complied, she permitted the change to be made, and the position thus rendered vacant was promptly filled according to the good old practice. Such incidents as this render it clearly apparent that what has been termed the apathy of the politicians in regard to questions of reform is not apathy at all, but a peculiarly keen instinct of self-preservation. As will be perceived, these gentlemen display unwonted activity when occasion demands.

The creditors of the city of Elizabeth seem to be inclined to adopt the policy of compromise which we pointed out some time ago as the only practical course open to them. The two chief holders of the city's obligations, the Singer Manufacturing Company and the Ætna Life Insurance Company, have signed a stipulation whereby they agree not to enforce their mandamus during the current year. The four assessors who resigned in order to render impossible the including the amounts of the mandamuses in the present year's tax levy have been reappointed by the city council. The assessors have requalified and have determined the tax ratio for the ensuing year. An increase is noticeable in most of the items, though the total rate is not as high as that of last year, owing to the omission of the item for interest on the proposed readjustment bonds, which has been omitted this year on account of the failure of the readjustment scheme. The total valuation of the city for the current year is $11,493,350. The debt, with accrued interest, is said to amount to nearly $7,000,000.

The London *Economist* says that the close of the half year finds British trade in a better position than it was at the beginning, and that the indications point to an improvement in the general condition of trade. This, notwithstanding the fact that in some branches of industry, such, for instance, as the ship-building trade, the outlook is not so promising as it was, and that manufacturers have still cause to complain of the extreme narrowness of their margin of profit. The revenue returns for the quarter ending in June exhibit a slight increase under nearly all heads. The returns of the Board of Trade show a larger volume of transactions in the past than in the previous quarter. A similar record of expanding business is afforded by the traffic returns of the various railway companies. The London clearing-house returns show only negatively favorable results, both the March and June quarters showing diminished totals as compared with the corresponding periods in 1882. The diminution in the June quarter is, however, considerably smaller than that for the three months ending in March. This showing the *Economist* regards as all the more satisfactory for the reason that during the quarter ending in June British trade had greater difficulties to contend against than in the previous quarter, a temporary curtailment of the American imports having been occasioned by the circumstance that the alterations in the United States tariff were in the main deferred to July 1, while the trade of the United Kingdom with China was adversely affected by the Tonquin dispute. In view of the fact that Great Britain has still the command of an abundant supply of the raw materials for manufacture at low prices, and the promise of a good harvest and a consequent stimulus to her home trade, the *Economist* thinks that more decided and more rapid progress will be made in the future. The situation in the East is not free from difficulty, but the journal quoted hopes that the French government will see the necessity of acting with caution and prudence.

THE JULY COTTON REPORT.

The July cotton report to BRADSTREET'S summarizes 1,107 mail replies, of average date July 16. These come from 602 out of the 657 counties growing over 500 acres of cotton each. The counties heard from represent 96 per cent. of the cotton-growing regions. The July report of 1882 to BRADSTREET'S was based on 892 replies from 522 counties, representing 92 per cent. of the cotton belt. The July report of last year was published on August 5, a week later than the present report. In writing of the general condition of the crop a year ago we said: "The condition of the crop as a whole is from fair to good. But for the excessive rains in some parts, notably in Alabama, the condition could be reported good, with the exception of Tennessee." The report of June last to BRADSTREET'S made the weather for that month from fair to good, and the prospects for a good crop scarcely more than fair. Following is our customary table:

CONDITION OF THE COTTON CROP ON JULY 16, 1883.

States.	Condition of crop as to weather since June 16.			Cond'n of plant as to blooming and fruiting.			Condition of crop as to cultivation.			Prospect for a good crop.			Percentage of area reported.	Number of replies received.	Number of counties reported.	Cotton counties of over 500 acres.
	Bad.	Fair.	Good.	Bad.	Fair.	Good.	Bad.	Fair.	Good.	Bad.	Fair.	Good.

* "Condition of stand" in June report is compared with "condition of plant as to blooming and fruiting" in July report.

It has been thought worth while to compare the June and July reports as to weather:

COMPARISON OF JUNE AND JULY REPORTS AS TO WEATHER.

	Good.	*Fair.*	*Bad.*
North Carolina—June	32	50	34
July	62	42	14
South Carolina—June	23	15	37
July	33	38	75
Georgia—June	91	84	28
July	55	85	81
Florida—June	21	11	2
July	14	11	3
Alabama—June	41	56	28
July	56	54	12
Mississippi—June	38	59	41
July	59	49	12
Louisiana—June	34	26	20
July	25	19	26
Texas—June	129	78	16
July	146	45	8
Arkansas—June	16	52	54
July	55	33	14
Tennessee—June	13	31	26
July	21	27	5
Virginia, Missouri and Indian Territory—June	5	5	5
July	10	4	3
Total—June	443	467	291
July	546	407	153

Taking the cotton regions as a whole, the present shows an improvement as to weather compared with the June report. For North Carolina a distinct improvement is recorded. South Carolina also shows an improvement, according to the mail advices on July 16, but the situation had then become critical on account of a lack of rain. The weather in Georgia for the month ending July 16 was a good deal below that for the previous month. In fact, Georgia was threatened with a severe drouth, and the dispatches given below show little or no improvement to date. In Mississippi, Arkansas and Tennessee a distinct improvement is noted. In Louisiana the weather has not been so good, while from Texas word comes of marked improvement. While the summary of replies as to weather shows slight improvement over the June report, it is not yet possible to report the general condition of the crop above fair. The prospects to-day are below the corresponding date last year. A year ago the plant was contending with too much rain, but this gave it a strong growth, which formed the basis of the big crop which matured during the ensuing very favorable weather. To-day insufficient rain has fallen over wide regions, instead of too much. In Georgia especially distinct injury has been done to the crop through lack of rain, and our dispatches from Georgia, given below, do not record any improvement on this point. The tenor of mail advices as to the state of cultivation is about the same as at the close of June. Following are our telegraphic advices to date indicating the development since July 16:

From Charlotte, N. C.: No rain has fallen since the 16th inst., until yesterday and to-day, which came in due season. The present outlook is very good.

From Raleigh, N. C.: The crop looks less favorable. Too much rain during June, coupled with last ten days of intense heat, has injured everything.

From Raleigh, N. C.: We had a fine rain last night, which will be very beneficial to the crops.

From Wilmington, N. C.: The prospects for a good cotton crop are at present discouraging.

From Charleston, S. C.: Weather is hot and dry; much rain needed; crops suffering from drouth.

From Columbia, S. C.: The weather has been hot and generally dry until yesterday and to-day, when we had heavy rains. Cotton prospects are fair.

From Columbia, S. C.: The weather for the past ten days has been hot and dry with an occasional thunder shower. Prospects are now good for an average crop.

From Greenwood, S. C.: The weather has been excessively dry and hot. The plant is small and growth is stopped. It is casting fruit rapidly.

From Spartanburg, S. C.: Moderate rain to-day, the first in six weeks. Outlook for cotton very poor.

From Yemassee, S. C.: The weather has been very dry and sultry and cotton is suffering for want of rain.

From Atlanta, Ga.: The weather has been extremely dry and the present outlook is very unfavorable.

From Albany, Ga.: We have had no rain for past four weeks, and cotton is suffering. The caterpillar is doing some damage.

From Columbus, Ga.: The weather has been hot and dry, and the crops have suffered much. There are complaints that worms are doing damage, and we consider the outlook not so good by 25 per cent. as at the same time last year.

From Macon, Ga.: Weather is very hot and dry, but cool and cloudy to-day. Cotton suffering for rain. Some caterpillars.

From Montezuma, Ga.: The weather is excessively dry, which is causing shedding of forms. Worms are reported all over this section, and altogether the prospects are extremely unfavorable.

From Rome, Ga.: The weather is exceedingly dry and the outlook gloomy; we are needing rain badly. Corn crops by no means favorable.

From Savannah, Ga.: Reports from the upper counties say the growing crops have been retarded in consequence of the drouth and extreme hot weather, which is parching the plant.

From Madison, Fla.: There is some talk of caterpillar; rain not excessive at present, and condition of crop is promising.

From Columbus, Miss.: Since the 16th inst. the weather has been warm and dry. Rain is very much needed. The cotton plant is small, but fruiting well.

From Meridian, Miss.: The weather has been too dry and the present outlook is unfavorable. Worms have appeared a month earlier than usual.

From Eufaula, Ala.: The weather has been moderately favorable. The caterpillar is in every neighborhood, and the outlook is not good.

From Montgomery, Ala.: Weather good since 16th inst. Worms are general, and it is believed the crop will be destroyed in three weeks.

From Selma, Ala.: The weather since July 16 has been generally dry, with local showers here and there. This week cotton is commencing to suffer badly from drouth. Caterpillars have made their appearance in unusual numbers for this date, and the destroying army is expected by August 15. Poisoning is more resorted to than formerly, but is not universal. On the whole the prospect is very discouraging.

From New Orleans, La.: The crop prospects are considered good.

From Shreveport, La.: The weather has been rather unfavorable; in some places there has been too much rain, while others are suffering for want of it. The plant is small, and the condition 25 per cent. below that of last season. Worms are reported everywhere, though thought to be first crop.

From Athens, Tex.: The weather since the 16th has been good and the present outlook is splendid, though we are needing rain now.

From Corsicana, Tex.: The weather since the 16th has been dry and very hot. During the last few days partial showers have fallen, but a good soaking general rain is needed now. The outlook is very fine. The plant is fruiting well and we have as yet no worms.

From Fort Worth, Tex.: The condition of the growing cotton crop is extra good.

From Galveston, Tex.: The weather during the past two weeks has continued hot with occasional rains in some sections, but locally we are needing rain badly. Cotton prospects are excellent.

From Terrell, Tex.: The weather has been hot and dry since the 16th. We had a shower yesterday, but the plant is needing rain badly, and without it soon the crop will be cut short.

From Waco, Tex.: The weather has been dry since the 16th inst., and the outlook is favorable, although cotton is beginning to suffer from the drouth.

From Arkadelphia, Ark.: The weather has been dry and favorable, and the cotton plant looks well.

From Helena, Ark.: The weather too dry, although good showers fell Wednesday. The plant is too small and stands deficient. The outlook is not encouraging.

From Texarkana, Ark.: The weather since July 16 has been hot and dry, with showers in spots. Cotton is good in places, but generally suffering for rain and beginning to shed.

From Van Buren, Ark.: The weather has been favorable over this county, and prospects are very good; the plant is fruiting well.

From Murfreesboro, Tenn.: The weather is dry and prospects more favorable.

The mail advices show that the damage from worms, insects, etc., on July 16 had been merely nominal. Only two states report distinct injury from rust and shedding—Florida 2 and Louisiana 3 per cent.

FIRE UNDERWRITING FOR THE HALF YEAR.

From the usual mid-year charts of the New York Insurance Department a summary comparison is thus made of the half-year now completed with the full years 1882 and 1881:

NEW YORK STATE COMPANIES.

	Six months of 1883, 66 Co's.	*Year 1882, 66 Co's.*	*Year 1881, 71 Co's.*
Assets	$56,450,674	$56,251,273	$57,856,248
Reserve liability	14,839,493	14,097,443	13,935,778
Capital stock	21,937,020	21,937,020	23,157,020
Total liability, including cap.	38,828,278	38,708,968	39,647,194
Surplus over all	17,622,395	17,482,305	18,209,054
Premiums	11,795,097	22,015,498	22,123,051
Total income	12,975,530	24,426,342	24,571,600
Losses paid	7,147,093	12,462,188	12,121,676
Dividends paid	1,066,997	2,235,942	2,603,591
Total outgoes	13,078,472	22,334,815	23,509,577

OTHER-STATES COMPANIES.

	Six months of 1883, 55 Co's.	*Year 1882, 56 Co's.*	*Year 1881, 57 Co's.*
Assets	$76,216,053	$75,173,614	$74,362,222
Reserve liability	21,627,846	20,720,237	19,343,986
Capital stock	31,411,503	31,128,000	31,278,000
Total liability, including cap.	55,892,042	55,114,930	53,750,179
Surplus over all	20,324,010	20,028,684	20,612,443
Premiums	14,293,864	27,289,569	25,791,082
Total income	16,157,661	30,928,970	29,156,662
Losses paid	9,111,152	17,064,270	15,726,643
Dividends paid	2,023,069	3,780,731	3,717,45
Total outgoes	16,015,567	29,825,408	27,897,00

FOREIGN COMPANIES—UNITED STATES BRANCHES.

	Six months of 1883. 26 Co's.	*Year 1882, 28 Co's.*	*Year 1881, 25 Co's.*
Assets	$37,317,197	$32,630,306	$30,046,998
Reserve liability	15,411,353	14,081,293	11,945,404
Total liability	18,085,329	16,822,030	14,575,847
Surplus	14,031,867	10,208,275	10,471,151
Premiums	12,551,869	21,124,454	18,938,822
Income	13,461,599	25,243,046	19,987,709
Losses paid	8,641,035	15,090,202	11,467,791
Total outgoes	12,929,178	22,734,026	17,481,485

As heretofore, it is proper now to remind the reader that these figures of totals have but little practical value for purposes of comparison, partly because of the coming and going of companies, but more because comparisons of surplus are confounded by the absurd practice, before noted, of not taking account of "the deposits held in other states for the exclusive benefit of policy-holders in such states, which are not now allowed as assets." A foot-note in these words was appended to the two 1882 charts, in which comparison was made with the condition at the close of 1881. This foot-note is now dropped, as the comparison does not go back of the end of 1882. The department has now relaxed the ruling so far as to admit to the assets schedule of the foreign companies such deposits as may be in the several states, and to that extent the returns for this half year are nearer the fact as to surplus, although comparison is not the less interfered with. In the totals for the New York companies a very close uniformity will be noticed in the three columns, except that income, losses and outgoes are proportionately increased from 1882. The other-states companies show increasing amounts, although the number has declined a little, and this is still more the case with the foreign companies. As heretofore, the liabilities and surplus of the last named fall well short of the assets, there being some five or six millions of "deposit capital held by the department," which, by fiction of statute, is treated as the equivalent of capital stock instead of being active assets and really a part of surplus. The following is a comparison extending back four and a half years, in respect to the particulars named, excess or deficit of premiums as to losses and expenses, and excess or deficit of gross receipts as to gross outgoes:

	New York Co's.	*Other states Co's.*	*Foreign Co's.*
6 mos., 1883—Excess of premiums	.....	$301,367	.....
Deficit of premiums	$216,378	.....	$77,308
1882—Excess of premiums	916,627	1,244,895	1,390,429
Deficit of premiums	.....	.....	.....
6 mos., 1882—Excess of premiums	.....	.....	.....
Deficit of premiums	814,162	872,442	499,324
1881—Excess of premiums	1,216,867	1,611,452	1,457,337
Deficit of premiums	.....	.....	.....
1880—Excess of premiums	1,243,484	1,673,327	1,884,595
Deficit of premiums	.....	.....	.....
1879—Excess of premiums	.....	893,193	727,807
Deficit of premiums	87,454	.....	.....
6 mos., 1883—Excess of income	.....	142,084	532,421
Deficit of income	102,942	.....	.....
1882—Excess of income	1,091,527	1,103,562	2,509,020
Deficit of income	.....	.....	.....
6 mos., 1882—Excess of income	.....	.....	23,570
Deficit of income	848,611	1,032,814	.....
1881—Excess of income	1,061,823	1,259,573	2,506,224
Deficit of income	.....	.....	.....
1880—Excess of income	1,243,338	1,438,836	2,804,520
Deficit of income	.....	.....	.....
1879—Excess of income	.....	622,322	.....
Deficit of income	574,063	.....	1,679,216

The ratios of losses, expenses, and combined losses and expenses, to premiums, for the half year, are 65.9, 41.2 and 107.1 for the New York companies; 63.8, 34.1 and 97.9 for the companies of other states; 67.2, 33.4 and 100.6 for the foreign companies. Lumping all companies together, we find $38,940,830 taken in as premiums this year, against $24,899,330 paid for losses, and $14,033,818 for expenses, leaving $7,682 over; this is 0.0171 per cent., or of each $100 of premiums about 1¾c. was "saved." This is getting phenomenally close to coming out "even," but of course it is a rude and temporary test only; losses paid and losses incurred are different things, and although each class of companies has materially increased the reserve or "unearned premium" liabilities since December, the unpaid losses and miscellaneous liabilities have been reduced in each class, and each class shows increased surplus, the foreign ones taking the lead in this respect. The $3,000,000 dividends paid in the half year evidently had no assistance from underwriting operations; as for 1882, $106.17 per

$100 of premiums was absorbed in losses and expenses in the first half, $80.46 in the second half, and $95.16 in the whole year. The following shows the number of companies which "lost money"—that is, which paid for losses and expenses more than they received for premiums, also those which more than paid out their income in all ways:

	1883, *1st half.*	1882, *whole.*	1882, *1st half.*	1881.	1880.	1879.
New York companies..	33	35	44	25	25	39
Other-states companies.	23	16	33	15	15	16
Foreign companies.....	11	11	17	4	3	5

COMPANIES WHOSE OUTGOES EXCEEDED INCOME.

	1883, *1st half*	1882, *whole.*	1882, *1st half.*	1881.	1880.	1879.
New York companies..	29	40	46	31	29	46
Other-states companies.	21	15	33	16	14	15
Foreign companies.....	9	7	14	1	1	1

These last figures concur with the others given in showing how disastrous was the first half of the year 1882, as was also shown by the more elaborate tables given in BRADSTREET'S six months ago, the second half of 1882 not only having wiped out the large excess of outgo over income in the underwriting branch, but having brought out a residuum of 4.84 per cent. of underwriting receipts for the whole year. In the first half of 1882, seven New York, six other-states and two foreign companies consumed in losses alone more than their premiums; for the whole year, only one New York and one other state were thus unfortunate; in the half year just finished we find one New York company standing alone in this undesirable position. The loss and expense ratios combined are still heavy, being over 100 per cent. of premiums in the New York and the foreign companies, and burning and expending, in all combined, almost identically the premiums taken in, leaving interest to pay dividends, although, of course, the cost of caring for the invested assets is included in operating expenses, there being no data for separating the latter.

The first half of 1883 is very far an improvement over the first half of last year, but behind the whole of that year, as restored in its second half. Whether the first half of the year generally shows a comparatively unfavorable result, atoned for in the second, and, if so, whether there is any rational explanation, would be a curious inquiry. The progress in improvement is slight, yet it is progress. The rise and fall of underwriting success obeys the law of action and reaction; although its crises do not show any periodicity, they illustrate the proverb that when things are at their worst they must mend, and the certain, although costly and painful, cure which competition applies to its own disorders.

TIN-PLATES.

There has been much comment and considerable complaint made during the past few months concerning the duty on imported tin-plates. The rate of duty previous to the amended tariff now in force was 1.1c. per pound. This was reduced to 1c. per pound, although the American Iron and Steel Association suggested a duty of 2¾c., and the Tariff Commission recommended 2.2c. a pound. A Pittsburgh daily says: "Under the present low duty the American manufacturers cannot compete with those of England, and until a change is brought about the industry must languish." In order to gain a comprehensive view of the situation some statistics respecting the tin-plate importation may be of service. The imports of British tin-plates into the United States in 1867 amounted to 1,060,224 cwt.; ten years later they amounted to 2,131,860 cwt.; in 1879 they were 3,115,900, in 1881 3,594,880, and in 1882 4,291,040 cwt. Thus in fifteen years they increased over 400 per cent. The shipments of British tin-plates to the United States in 1867 amounted to 66 per cent. of the total British exports of the same year (1,060,224 cwt. out of 1,579,692 cwt.), but in 1882 they had grown to 4,291,040 cwt. out of an aggregate exportation of 5,300,420 cwt., or about 81 per cent. The receipts of British tin-plates last year, according to the above, amounted to 429,104,000 pounds, or 214,552 tons. These figures are very large, and look as if Great Britain were supplying the entire demand for tin-plates in the United States. In this respect appearances are not deceptive. Notwithstanding the statement quoted above, which indicates the existence of an "American tin-plate industry," there is none such worthy the name. Efforts are making to bring a pressure to bear upon the next Congress to induce that body to "adequately protect tin-plates" against foreign competition. The officers of the association having this object in view have been given as follows: President, W. J. Lewis, of Linden Steel Company; vice-presidents, Alfred Marshall, Philadelphia; E. P. Williams, New York; P. H. Laufman, Pittsburgh; C. A. Scott, Cincinnati; L. Bacon Foss, Boston; treasurer, Bissell Everson; secretary, W. C. Cronemeyer. Not long since a New York paper touched upon the subject of "a" tin-plate industry in the United States, under the head of "Protection Wanted."

As deduced from the letter of the president of the Tinned Plate Association, the position of that body is as follows:

1. That Secretary of the Treasury W. P. Fessenden, in July, 1864, decided, with "no legal authority," that tin-plates must be admitted as "tin in sheets," at a rate of duty equal to 1.1c. per pound, instead of at the rate of 2½c., as per the tariff act of 1864 in relation to "tin-plates and iron galvanized or coated with any metal by electric batteries or otherwise." Right here is found the nice point in controversy. In the engrossed copy of the act last quoted a comma was placed after the word "plates." Secretary Fessenden felt able, "from the part which" he "took personally in the framing of this provision," to state that the comma should have been placed after the word iron, and that its misplacement was due doubtless to the engrossing clerk. This comma made a great difference. "Tin-plates, and iron galvanized," etc., means one thing, but "tin-plates and iron, galvanized" means a very different thing; for the tin-plates of commerce are not made in the manner described by the latter construction of the tariff law of 1864, which is the interpretation put upon it by a Secretary of the Treasury, one of its framers.

2. The elaboration of this point furnishes the second argument in favor of a higher duty on tin-plates. The latter are made by a process of rolling the tin upon sheet iron or steel. The imported tin-plates, under the Fessenden decision, therefore paid from .14c. to .65c. less duty per pound than foreign sheet-iron, and violated the claim that no imported manufactured article should pay a lower rate of duty than the raw material from which it is made. This is characterized as "an outrage upon American sheet-iron makers," for "by admitting these coated forms of sheet-iron at 1.1c. per pound, British makers have been able to undersell the black and galvanized sheet-iron made by American mills for all purposes where the substitution has been practicable." Upon these two points, in fact, hangs the weght of the argument for a higher duty on tin-plates. There are a few other claims, but they do not suggest anything favorable to the investigator.

The old and new rates of duty on common or black sheet-iron and on tin-plates are:

	Old rate duty.	*New rate duty.*
Sheet iron.....	1.25c. to 1.75c. per lb.	1.1 to 1.5c. per lb.
Tin-plates.	1.1c. per lb.	1c. per lb.

From this it is seen that the discrepancy between the duty on common sheet-iron and tin-plates (regarded as one form of finished sheet-iron) has been decreased by the changes in the new tariff. But the essence of the discussion will be found below. The Tinned Plate Association itself says: "Block and pig-tin are imported free of duty, and these Australian products are about as cheap in the United States as in Great Britain. Lead is obtained abundantly in the west and is very low in price. So far as 'tin' and 'lead' are concerned, therefore, no obstacle exists to an American production of 'tin and terne plates.' The processes of coating the sheets are comparatively simple and easy, the labor being done mainly by women and children in England, Wales and Germany. Of course, none will be made while the duties are so fixed that the black sheets can be and are sold for more than when 'tinned' or 'leaded'." A New York journal recently stated that in the fiscal year 1882 importations were 200,000 tons, valued at $16,599,000 at Liverpool, and estimating that "the American present price to consumers would be, if made in the United States at present rates of wages, $27,515,000," the conclusion was reached that $11,000,000 difference had been saved to American consumers. In reply to this, the Association (Tin Plate) said: "Permit us to remind you of the following items *necessarily added to the cost of the British products* before obtained by American consumers:

First. Government duties at 1.1c.....	$4,763,611
Second. Freights and insurances.....	2,500,000
Third. British agents' commissions.....	500,000
Fourth. Importers' and jobbers' expenses and profits, say	3,000,000
Total.....	$10,763,611

These unavoidable additions wipe out the $11,000,000 and leave the American consumer in subjection to a British monopoly." The italics are our own. To the unbiased non-manufacturer this statement controverts its purpose. Here the Tin Plate Association have shown in detail that a protection of nearly $11,000,000 on the 240,000 tons of tin-plates imported in the fiscal year 1882, and this with confessedly as cheap tin and lead here as the British maker enjoys. It would appear as if, with a protection of $11,000,000 on $16,500,000 worth of products at Liverpool, (nearly 69 per cent. ad valorem), the enthusiastic would-be producer of tin-plate in the United States might find sufficient encouragement to induce him to invest his surplus funds in the necessary plant.

THE STEEL PEN TRADE.

The steel pen in the many types in which it is manufactured—and there are more than a thousand different numbers—is a signal instance of the triumph of mechanical skill in combining and varying the qualities of the implement, involving extreme niceties of distinctions to an extent that few other industrial arts demand. Our entire annual trade in steel pens, domestic and imported, may be placed at $1,500,000, and is a steadily progressive one. The larger proportion of those sold are American pens. It is a matter of difficulty to ascertain the relative amounts disposed of in different sections of the country, pens being mainly distributed by large wholesale houses who make shipments from the east. The chief retailers of pens throughout the country are in the stationery, publishing, notions, dry goods and hardware trades. Our own manufacturers are reticent as to their annual production, but taking the ascertained output of Birmingham, which supplies between fifteen and sixteen million pens per week, with that of the few manufactories in France, the one in Germany and the one in Austria, there being none in the other European states, and the leading American establishments, in Meriden, Ct., Camden, N. J., and in Philadelphia, the weekly production for this country and Europe cannot be less than from twenty-two to twenty-three million pens.

Some British sheet steel made into rolled steel is, on account of certain special qualities, employed for our domestic pens, but the aggregate amount is small, American steel being in all respects suited for the great majority of pens. There is a peculiar trait in the character of steel which enables an adept to render it at will as pliant and obdurate as may be desired, which alone renders possible the varieties of steel pens produced. The bulk of imported steel pens is from England. Some pens of extremely fine make come from France. We also receive a moderate supply from Germany. Under the amended tariff the duty on steel pens, formerly based on price and quality, is specific, being determined by quantity alone. This duty is now 12c. per gross for all qualities. Practically there is a slight reduction of the duty on popular pens, such as range from 50c. to $1.50 per gross. The obvious benefits of this simplification are that it allows of quicker dispatch of importers' business at the custom-house, prevents frauds from undervaluations and affords no scope for disputes.

That there are comparatively few manufacturers in this trade is due in part to the great difficulties that attend manufacturing operations, to the scale on which these must be undertaken to render the business a success, to the large capital required, and to the reputation secured by those who early entered the field, and whose constant endeavor is to maintain their preëminence. An evidence that on numerous classes of pens appreciable profits are only to be obtained by enormous sales is that in Birmingham, England, where some fifteen tons of steel are used per week in pen making, there are steel pens made at the wholesale price of 3c. per gross. Favorite domestic pens are sold here to users at less than 1c. apiece, a marvel of cheapness, considering their quality, and that the material undergoes from fifteen to twenty-five distinct processes. With such a diversity of steel pens the operations of trade are facilitated by numbers corresponding in price lists to kinds, sizes and purpose. In addition, some pens are marked with incised letters or devices, indicating the name of the maker or the distinctive appellation of some particular pattern; others have ornaments embossed on them in relief. These aid the general public in identifying pens when new supplies are wanted, and contribute to establish a reputation for given descriptions. Under the systematic arrangement of numbers the assorting of stock is simplified, and the possibility of error in filling orders is all but eliminated.

The practical and really useful steel pen dates back a little more than a half century. Steel pens were heard of long before, but could have few of the admirable qualities of the modern implement, which, with all the ease and freedom of the time-honored goose quill, has also firmness and precision, besides saving time, rapidity of writing being aided by ease of manipulation. The growth of the trade to its present dimensions is not only from advances in mechanism, as in the powerful presses in use, rendering production rapid, but improvements in the various processes from tempering to the final coloring and varnishing. It is a mark of progress that manufacturers so closely study the wants of the public. American manufacturers have shown much ingenuity in devising types suited to particular classes of penmanship, business or otherwise, and it may be said of the public that they are exceedingly watchful of new designs and appreciative of merit. The variety of pens might seem baffling, but it is otherwise. Pens of all degrees of hardness are now produced for light and heavy hands; for very thin and fine and for rough and strong paper, and for writing on card-board; for correspondence, for bookkeeping, for round-hand and quick writing, for autographic and caligraphic work, for lithographic and drawing purposes, for fine handwriting almost devoid of shading, and even pens are made for the Hebrew and Greek characters. Then, again, there are steel pens plated with copper and gold; others that are simply gilded. Even pens known by other names than steel are essentially of that metal, gutta percha pens included. The variations which forms of steel pens

take, in curvelinear lines, bulging, etc., alter in some respect their qualities for use, and so widen the demand. While habit and taste determine the adoption by the majority of individuals of special makes of pens, novelties are being continually called for—wants discovered that must be met.

OCCASIONAL NOTES.

The London *Daily News*, in a late issue, directs attention to the reduced profits of the London joint stock banks for the half-year. The London and Westminster Bank has to confess a reduction, and the net profits of the Union Bank of England for the six months were only £113,572, against £133,355 for the same period of 1882. Beyond this, the return shows that the loans and discounts are £1,250,000 less than a year ago. The returns of the other London banks are of similar purport. The *Daily News* writer traces this reduction in banking profits to the diminished profits of business as a whole. "Low prices in commercial markets and disappointing stock markets have combined to reduce the turnover of banks during the past half-year. Their reduced profits, therefore, correspond with and indicate quietude in business generally." Our contemporary is not hopeful of an early development which, through increased activity, will enable banking profits to recover. Two good harvests are thought to be needed to bring about the desired improvement.

The *American* newspaper of Philadelphia disclaims the inference that it is in favor of treating the tariff as a permanent institution—as something good in itself—and says:

> We do not call the tariff "a temporary expedient," but a means to an end—the independence of the nation as regards all the great staples. We can conceive of circumstances in which it should cease to be required for that end. In that case we should favor the reduction of duties to the revenue basis, on the principles on which we supported the revision of the tariff. In so doing we should not become free traders, for we should hold ourselves ready to advocate their restoration just as fast as occasion required, and we should advocate the retention of protective duties by every nation whose circumstances still called for this.

We are glad to learn that the foremost of protectionist writers regards protection as "a means to an end." The difficulty in carrying out such a view in practice is that in time the protected interests become so bound up together that the instinct of narrow selfishness goes far to shut out the general good. Thus, instead of meeting the advocates of free trade on some common ground of discussion, the manufacturers and the extreme protectionists persist in fighting for the highest rates of duty without due regard to the interests of the general public. We believe the true and wise solution of the tariff controversy is the adoption of a plan looking to the gradual reduction of duties on a sliding scale extending over a period of years. Would the *American* decide to make such a proposal?

In some portions of Georgia and in other portions of the south the cry has been raised that "truck farming" in that region is "an exploded humbug." This, on investigation, however, does not prove to be the case. When it was started, a few years ago, on a large scale, extravagant profits were realized. Since then hundreds of farmers in the south have begun the raising of fruit and vegetables. Profits have, of course, on the average, diminished. Competition will always cause such a result. Other farmers, from purely local causes, have enjoyed no gain worth mentioning. But these are declared, on investigation, to be exceptions to the rule. A prominent southern journal says: "Truck farming in the south was, probably, never in better condition than it is just now. The farmers have everything in their favor. The railroads have been more than friendly to them, have put on cars suitable for this trade, and have expedited their trains so as to land this perishable freight in the market at as early a time as possible. The markets certainly continue as good as ever, and the supply as yet does not equal the demand." It would be astonishing, with all these advantages, to learn that the raising of early vegetables and fruit for the northern and western markets is not a profitable industry. But it is. The Atlanta *Constitution*, after thorough examination, shows how much this industry has benefited and enriched Georgia. The melon crop of that state alone is worth over $1,000,000, and the yield of vegetables and fruits of all kinds has increased fourfold in the last three years. In southern Georgia, in the counties devoted to raising early vegetables, real estate has increased from 50 to 100 per cent. in value. Large investments have been made in these lands by northern and western men, and the number of acres under cultivation has increased annually. Some farmers have failed in this business, as they might have failed in any other, and occasionally drouth and unfavorable weather have cut off much of the profit, but these interventions have no bearing on the general status of the industry.

Some enterprising citizens of Detroit have formed a "Michigan Land and Immigration Company," the object of which is to obtain and disseminate information concerning lands in the state of Michigan, to bring the owners of real estate in contact with parties wishing to purchase lands, to act as agents of owners of lands in their care and disposal, and to encourage immigration and the settlement of the same. The company states in a circular that it has connections throughout the United States, Canada, Europe, and every port where a United States consul is located. It also informs the public that it has for sale improved and unimproved lands in every part of the state in small or large tracts, for individuals or for colonists, suitable for agricultural purposes. Companies of this kind under conscientious and responsible management may be of great service in building up the country. Michigan has been in need of such an organization, for, notwithstanding its natural advantages, it has heretofore secured only a small proportion of the immigrant population. Its advantages of geographical position, bordering as it does upon the lakes, the magnitude of its lumber, mining and fishery interests, and its capacity for agricultural position, should render it a very desirable place for settlers. Much waste of effort in the work of colonization might be saved by the dissemination of trustworthy information of the character which this Michigan company promises to supply regarding its own section.

The year 1882, it appears, was the most prosperous ever recorded in the Argentine Republic, according to the late message of the President thereof, delivered before the Argentine Congress. The aggregate of exports and imports was 2,976,193 tons, the customs value being $f.139,261,763, a gain over 1881 of $f.18,949,490, and over 1880 $f.33,669,526. The public revenue amounted to $f.26,763,985, an increase of 7.58 per cent. over 1881, and the cost of administration was $f.25,354,996, leaving a surplus of $f.1,408,988, which was applied to the liquidation of the debts of the country. These during the last few years have been reduced by $f.8,687,509, leaving the total at $f.94,565,787. As the credit of the republic is believed to be now on a stable foundation it is proposed to convert some portion of the debt into loans bearing lower rates of interest than are at present paid, and a great saving, which can be directed to the development of the resources of the country, will thereby be effected. It is contemplated to reduce the export duties on beef, and it is suggested to create a mortgage department in connection with the National Bank, whose sole mission will be to advance money on real estate at long dates and on moderate interest. The President maintains that there is a keen necessity for passing a general banking act, which will protect capital and place it, as in the United States, under the guard of national legislation.

SPECIAL CORRESPONDENCE.

THE NEW PATENT BILL FOR GREAT BRITAIN AND IRELAND.

London, July 12.—On Monday last the Grand Committee of the House of Commons on Trade, Shipping and Manufactures completed their labors upon the new Patents bill, and we now have a very clear notion of the form in which it will ultimately become law. The patent laws of this country have always been a source of great dissatisfaction, not alone to inventors, but also to those who were of necessity compelled to use patented inventions. The chief complaints brought against the law as it at present stands are, first, its costliness to poor inventors, which in many cases, if not the majority, has necessitated the aid of capitalist partners, who almost invaribly take the lion's share of the accruing profits; secondly, the great difficulties placed in the way of searching the records for previous inventions bearing upon the same subject; and, thirdly, the difficulty, often the impossibility, of obtaining from inventors, upon any practicable terms, the right to use their inventions. The government bill, which Mr. Chamberlain, the president of the Board of Trade, has in charge, deals with all these questions, and introduces various regulations into the working of the patent laws in this country, which may be advantageously considered.

Hitherto the minimum first cost of obtaining a patent in this country has been £25, but in the majority of instances it has been considerably more than this, owing to the necessity of employing a skilled patent agent to carry out the requisite formalities, to search the records, and to draw up the necessary documents in proper official form. That the work of the patent agent can be dispensed with in future can hardly be anticipated, but the bill now before Parliament, by simplifying procedure and cheapening the early payments to the state, will be a great aid to needy inventors—and almost all inventors are needy. According to this bill the first payments are to be limited to the sum of £4, and thereafter the inventor will have three years before anything more is demanded from him by the state. Efforts were made to induce the government to reduce the amounts of the subsequent payments, viz., £50 at the commencement of the fourth year, and £100 at the commencement of the seventh year, but these efforts proved fruitless, Mr. Chamberlain maintaining that any invention worth continuing as a patent should, at the end of three or seven years, be capable of bearing the already existing imposts. Efforts were likewise made to extend the duration of patents from fourteen to seventeen years, but these endeavors also failed. The result is that the existing law will remain operative in respect to the tax demanded by the state during what may be termed the operation of a patent and in respect to its duration, but the first cost of obtaining the protection and official recognition of the invention will be very materially reduced. In this, therefore, it will be clearly seen that the British Patent law will not be upon a level with that of the United States, where the period of seventeen years is adopted, and the first small payment covers the full term. Mr. Chamberlain promised the Grand Committee to introduce a further regulation to the effect that "if the patentee, by accident, mistake or inadvertency, failed to make the requisite payments the comptroller of the Patent Office would be empowered to grant him more time, not exceeding half a year," and he likewise promised the introduction of a schedule whereby, if it were desired, the inventor could, after the first payment of £4, elect to make his subsequent payments by annual installments, provided always that such annual installments made £150 in the aggregate. Altogether, it may be said, the new measure will afford distinct relief to inventors in the early existence of their patents, while at the same time it will produce, as at present, a means whereby the public will ascertain in due course that a useless patent has been abandoned. Any system which makes a first payment cover the entire period provides for the protection of a vast amount of worthless inventions, whereas if, as under the existing laws of this country, it is found that the subsequent installments have not been forthcoming there is at once a clear proof that the patent has ceased to exist. The existing law whereby under rare circumstances patent rights are extended beyond the period of fourteen years will continue in force, but in such cases it has to be clearly proved that the inventors or owners of such patent have never obtained compensation for the outlay they have incurred, while by an extension of a few years and under conditions to be assigned by the court there will be a reasonable prospect of their doing so.

Turning to the second objection urged against the law as it at present stands, efforts have been made to introduce some sort of order into the Patent Office. In the first place clause 37 of the new bill provides for the publication of an illustrated patents journal, which will have an official character and furnish drawings of inventions in considerable detail. The Patent Office will keep on sale copies of this journal, as well as complete specifications and drawings of all unexpired patents, while the comptroller is from time to time to publish indexes, catalogues and abridgements of specifications as required. There exists in this country at the present time a patents museum, and this it has been decided to transfer to the science and art department, it being more an auxiliary to than a portion of the patents procedure in Great Britain. The committee also dealt with the question of copyrighting designs, and it was arranged that such copyrights should have a duration of five years from the date of registration, but a proposition that a fee of £10 should secure protection for an additional five years was negatived. It is a provision of the law of this country that all such registered designs shall bear a notification to that effect upon them.

The obligation now to be imposed upon inventors to permit the public to use their patents upon reasonable terms has also been dealt with in the new bill. The Board of Trade will have the power to compel inventors to grant such licenses, and it was further arranged that where the crown itself made use of such patents the Board of Trade should determine the remuneration for that purpose. This is, perhaps, a regulation which will produce a great amount of opposition on the part of inventors, and it is, of course, open to palpable objection. Nevertheless, the recognized judicial character of the department of the Board of Trade will in some degree lessen the inference that the government claims to use every invention just as it may think fit and upon its own terms.

It will be gathered from this summary of the new bill that some important modifications of existing English patent laws are about to be established, and they are certainly modifications which may be expected to benefit inventors, manufacturers and users of patents generally. But that it will give us anything like a perfect patent law, or one which will not be open to a good deal of objection, is not for a moment to be anticipated. We shall doubtless, therefore, before the law has been any long time in operation, hear many complaints about it. People have a tendency in all conditions of life to consider themselves hardly used, and of inventors this is peculiarly the case. When such people regard themselves as being hardly dealt with we may be certain they will let us know it.

THE STRIKE AND THE POSTAL TELEGRAPH.

Washington, July 25.—The strike of the telegraph operators, whatever the result may be as between the operators and the companies, will certainly bring to public attention the question of the relations of the government to the telegraph. It will undoubtedly stimulate attempts in the next Congress to secure legislation the object of which will be either the establishment of a national postal telegraph system or the enactment of a law which, in the event of differences between the telegraph companies and their employés, shall make arbitration compulsory and prevent an interruption of telegraph business.

There have been, at different times, several attempts to establish a postal telegraph system in this country. They have all failed. They have proceeded upon a very different basis from the movement which is likely to be inaugurated at Washington next winter. The promoters of the postal telegraph schemes hitherto have proposed that the government should purchase existing lines. The most popular plan next winter will undoubtedly be that the government shall build its own lines. So distinguished and powerful an advocate as Senator Edmunds, of Vermont, has indicated his purpose in the following language:

"What the United States, in regard to its postal affairs and the welfare of its people, needs to do more than anything else is the construction of a postal telegraph, beginning moderately between great points in the country and all intermediate points, and then extending it, just as we have the mail system, as the needs of the community and fair economy would require, until every post office in the country should have, or be within immediate reach of, a postal telegraph. That is what ought to be done, and what will be done within a few years, beyond all question. But I beg the stock operators in New York not to suppose that I, for one, am in favor of the United States buying out any telegraph company anywhere. I am in favor of the United States building its own postal telegraph, and managing it in its own way, and leaving the gentlemen who are engaged in private pursuits to pursue their operations in their own way as private pursuits."

In view of the certainty of the agitation of this question, we will endeavor here briefly to trace the history of the attempts to establish a postal telegraph system in this country, and to give a summary of the arguments which have been presented, and which, probably, will be made in support of and against this proposition. The information may be of service as a basis for future discussion. It will be noticed that while those who oppose such a system will doubtless be restricted to their old arguments, the advocates of the change will be able to use all their old arguments, together with many new ones which the strike has suggested.

The first proposition for the establishment of a government telegraph company in this country was made by Representative C. C. Washburn, of Wisconsin, in Congress, in 1869, in the form of a bill. This measure was subsequently indorsed by the Postmaster-General, and by President Grant in his annual message in 1871. It proposed that the goverment should purchase existing lines and make the telegraph an adjunct of the postal system. This was to be accomplished under the provisions of the

act of 1866, which authorizes the government at any time to purchase existing lines at a price to be fixed by arbitration.

The second proposition is what was known as the Hubbard scheme. It was proposed by Gardner G. Hubbard, of Boston, who was then very active in such matters, but who now, as one of the leading owners of the Bell Telephone Company, possibly might not be anxious to establish the principle of government control. His proposition differed in important particulars from that which had been recommended by President Grant. The Hubbard scheme was not, like the Washburn plan, a purely government enterprise, by which the telegraph was to be managed exclusively by the Post Office Department. It proposed, on the contrary, the incorporation of a private company, which was to be granted certain extraordinary privileges, and which was to enter into special contracts with the government.

These two plans caused the agitation of the postal telegraph system from 1869 to 1872. The proposed systems were vigorously combated by the Western Union Company, Mr. William M. Orton, the president then, being especially active in opposing the purchase of the Western Union lines. There were investigations by committees of both branches of Congress, which resulted in the collection of all information as to the subject of telegraphs which then existed in any country. The result was that no action was taken by Congress, and the subject passed from public attention. It has, however, been brought back to public notice by the practical absorption of the telegraph business of the country into the hands of a gigantic monopoly, the reduction in the wages of the operators, said to have been made necessary to pay large dividends upon their stock, and the consequent strike.

The arguments used by the company at the time of the former agitation against the purchase of its lines, not only went to that point, but represented the opposition to the establishment of a postal telegraph in general. They were, in the main, the following:

1. Government control of the telegraph is contrary to the spirit of American institutions. Telegraph ownership by the federal government is inconsistent with the theory and maintenance of republican government. It is the very essence of centralized power. It is entirely destructive of the principle of local self-government, and of the rights of the states. It is a step toward imperialism. It threatens the vitality of our institutions. It is part of a general scheme to enlarge the functions of the federal government so as practically to destroy state sovereignty. It involves a large increase of federal patronage, and the consequent danger that the telegraph company, in times of political excitement, might be used for partisan purposes. The administration would at any time have it in its power to create false popular sentiment, and, at a critical time, might have a determining influence on the result of elections by causing false information to be circulated. A postal telegraph system would place, possibly, 25,000 more officials under government control. A government system of telegraph might result in the establishment of a system of espionage, and of interference with the rights of the citizens. It would be possible under government control of the telegraph for an administration, through an examination of the messages, to ascertain all the secrets of its political opponents. The telegraph system might be made a mere adjunct of a national police in the interest of the dominant party.

2. The fifth article of the Constitution of the United States provides that private property shall not be taken for public use without just compensation; but in the present state of popular hostility to corporations it is not probable that any appraisement could be secured which would be fair.

3. The government could not conduct the postal telegraph system except at a loss. Cheap telegraphic service under the government would be logically followed by increased taxation of the people. A government postal telegraph would be no more self-sustaining than the government Post-office Department in the past has been. If the government is to go into the business of furnishing people with the necessaries of life it should commence with food, raiment, fuel and shelter, and not with the telegraph.

4. The experience of governments in the control of the telegraph in foreign countries is not calculated to encourage the system in this country. The people, by the establishment of a government telegraph, would not be likely to be furnished with any cheaper, better or more efficient telegraph facilities. All the data which have been presented at different times in support of the government scheme have been unreliable. The government has not in its possession sufficiently accurate or adequate information to enter upon the management of an undertaking of such great financial, political and social importance.

5. A government telegraph, if existing lines should not be purchased, would be a direct interference with private citizens, and government competition might cause very serious loss to individuals. The government has already entered into competition in part with the express companies. The logical consequence of going into the telegraph business would be that the government would ultimately insist upon the control of all interstate railroads.

6. It is doubtful whether, under the federal Constitution, the general government has any right to establish a postal telegraph system. It is not the purpose of the government to become a vast commercial enterprise, or to do whatever is deemed best for the public welfare at the public expense. Such a principle is essentially a part of a scheme of government like that of Fourier or of the Oneida community.

These are some of the substantial reasons urged against the establishment of a postal telegraph, both on the basis of the purchase of the existing lines and of the erection of lines by the government itself.

The following are some of the arguments submitted by those who advocate the postal telegraph system:

1. Because the telegraph system of the country, which is founded in an instrument created originally by the government, has come to be an enormous monopoly, which has destroyed all competition, and is likely to make further competition impossible. The consequence is that by the manipulations of a few operators who have grown enormously wealthy the people are placed at the mercy of a monopoly, and are compelled to pay unnecessarily high rates in order to enable the corporation to maintain large dividends upon watered stock. Another consequence of the system is that operators are not adequately paid, and there seems no help except through government control. The Western Union monopoly, from an outlay of about $300,000 in 1858, which was soon repaid many times over, has now a nominal capital stock of more than $80,000,000, upon much of which 8 per cent. has to be paid. The telegraph monopoly is in effect a "corner" on means of communication between citizens and between the government and its officials. The telegraph is essentially a common carrier, and should be subjected to all the restrictions and conditions ordinarily imposed upon common carriers. It is necessary that the people should be protected from this monopoly. The telegraph is simply a quicker mode of sending the mails. The telegraph properly belongs to the educational and postal system of the country, and private corporations should not be permitted to monopolize it for he purpose of money making or of stock gambling.

2. The rates of charges in the United States, particularly at non-competing points, are unnecessarily oppressive.

3. The telegraph holds a relation to commerce as delicate and important as that of the post office itself, and is, under the Constitution, just as much a proper subject of national control as the post office.

4. The telegraph is an educational agency too potent to be left under the control of private corporations, which look alone to quick returns for their investments.

5. The lines of the Western Union Company could be duplicated with the best materials at a cost which probably would not exceed one-third the present nominal capital of the consolidated monopoly. The argument as to the expense to which the government would be put for telegraphing could not be sustained.

6. The strike has shown that the telegraph has become too important an agency of business and national life to be permitted to remain in a condition where all telegraphic communication can be stopped, either by the strike of the employés or through the malice of the managers.

7. If the existing lines should be purchased, there would be no confiscation of property, as the telegraph companies of the country have practically all accepted the terms of the act of 1866, by which they have already entered into a contract with the government—which can be concluded at the option of the government—to sell their lines on an appraisal, for which provision is made. If the government should not care to purchase existing lines, it can construct its own lines at an expense not to exceed one-third of the nominal watered stock of the consolidated monopoly. The act of 1866 is an effectual estoppel to any suggestion that the establishment of a postal telegraph, by the purchase of existing lines, would be a confiscation of private property. There is no argument which is used against a postal telegraph which cannot, with equal reason and like effect, be used against the control of the mails by the government. In fact the same arguments were used by the express companies against the reduction of letter postage and the popularization of the postal system. At the time when letter postage was 25c. the express companies did a very large percentage of the transmission of mails as private enterprises. This was broken up by the government with the passage of a law forbidding the transmission of any mail matter by any private person or corporation. A similar complaint from the express companies was heard when the provision was added to the postal laws authorizing the transmission of merchandise by the mails. Yet the people have been benefited and the express companies still live and pay large dividends.

8. The reduced rates which would be the result of a postal telegraph system would be followed by a great increase of business, the popularization of the telegraph, and such returns as would certainly make a government postal telegraph self-sustaining.

9. The arguments that a postal telegraph system is unconstitutional; that it would be an infringement of the rights of individuals and of the sovereignty of states; that it would be made a partisan engine in times of political excitement, and would result in a system of espionage, are all "bugaboos." The argument as to state sovereignty in matters relating to intercommunication with people of states, whether by telegraph or rail, no longer belongs to this era. The fears of centralization of power and of partisanship have no better foundation as to the telegraph than as to the postal system.

THE INDUSTRIES OF ST. LOUIS.

St. Louis, July 10.—According to the special census of manufactures in 1880 St. Louis had 2,924 industrial establishments, representing an aggregate capital of $50,832,885, and employing 33,980 male hands above sixteen years of age, 4,761 females above fifteen years, and 3,084 children and youths. To these hands were paid wages aggregating $17,743,532 for transforming $75,379,867 worth of materials into $114,333,375 worth of marketable products during the year for which the enumeration was made. Flour and grist milling was then, and continues to be, the greatest of St. Louis' industries, measured merely by value of products, which amounted to $13,783,178. The laborers in this industry averaged an output for the year of $20,634 worth of product to each one. This was a far heavier proportion than existed in any other prominent line of industry. But this does not signify very much, though the figures look so imposing, for less than one-thirteenth of that amount represents the productive value of each man's labor for the year, the remaining twelve-thirteenths and over of final value having previously existed in the material used—the grain ground. Nevertheless, for producing that much new value the mill hands were paid an average of $731 each for his year's work. In considering this rate of pay, allowance must be made for the fact that child-labor is not employed in St. Louis flour mills to such an extent as to be noticed in the census enumeration. Our flour-mill hands average considerably higher wages than is paid here in any other prominent industry.

Is this the reason that a strike of consequence was never heard of among flour-mill men in this section? Not necessarily, for in this part of the country there are more mills than post offices, and a general strike among them would be almost impossible to manage. It is a point worth noting that the flour-mill workers here have always (even when their mills were closed down) held themselves aloof from labor difficulties.

Notwithstanding the old saw that "figures do not lie," it is very difficult to get the exact truth out of them in drawing conclusions from industrial comparisons. A very plausible conclusion may be rendered quite absurd by some intimately connected element which does not appear in the figures. Hence it is not easy to say which of the industries herein named has the most local value and is worth the most to St. Louis as a city. The flour interest can scarcely be deemed ahead of all others in this respect. It employs only hundreds of workers where other lines support thousands. Yet, taking the sum of wages paid and materials used from the total value of products, the owners of our twenty-four mills in 1880 had $1,262,935 surplus with which to meet "wear and tear" on their "plants," valued in the aggregate at $2,067,500. In point of profit to owners the milling business would seem to be a notable industry in St. Louis.

As to probable profits to owners, however, the meat-packing interest rather outranks flour-milling. In this line the difference between the value of live meat for slaughtering, added to wages paid, and the value of total products, is represented by $1,068,392, which the owners have for one year's wear and tear upon sixty-two establishments valued at $1,243,000. Their total product that year was worth $8,424,064, but nearly seven-eighths of this value previously existed in the live stock used, so that the $14,936 worth, or more, which each of the 564 employés contributed, on an average, to the total product did not really amount to a great deal in new value. However, the laborers in this industry averaged only $478 apiece for their year's work.

This city numbers sixty-two foundry and machine-shop establishments which were listed in the census. It must be conceded that of the more massive industries in St. Louis this one is of eminent importance. It supports more people than any other one. There are 3,433 males above sixteen years of age to whom it is credited with giving employment. The average value of the product of each one's labor for the year was only $1,733. But almost one-half of this was new value, evolved, by accurate though rough hands guided by disciplined though restless intelligence, from $2,700,844 worth of raw material, making an aggregate of $5,952,770 worth of marketable products. After paying for labor and material, the owners of these establishments had left $1,397,880 for fuel, etc., and wear and tear on their "plants," the aggregate value of which was $3,055,713.

Iron and steel production, however, left owners that year with very slight encouragement. The cost of labor and materials reduced them to a balance for other accounts of only $510,897, though they had $5,960,600 capital invested in ten establishments, which turned out $3,950,530 worth of products. The 2,158 laborers employed also fared poorly, for their average wages were only about $290 each, notwithstanding each averaged $1,367 worth of products, nearly one-third of which was new value.

The merry brewers averaged an income of $516. In products they averaged $3,687 worth of malt liquor, nearly half of which was new value. The proprietors of the twenty-three establishments also apparently did passably well. The cost of labor and materials left them for sundries and profit $1,335,578, on an investment of $4,184,600. Of beer, etc., they prepared for market $4,535,630 worth.

Printing and publishing embraced one hundred and one establishments, employing 2,153 hands, exclusive of children and including 175 females. Their incomes averaged $570, and not quite one-third of what they produced consisted of new value—"such as it was." The owners had an income of $1,179,894, over and above the cost of labor and material, from an aggregate investment of $2,480,060.

It will be noticed that in point of wages the arrangers of intellectual pabulum are less liberally supported than the providers of solid breadstuffs, though they are a little better recompensed than the concoctors of liquid refreshments.

This is the record of a few of the leading industries in St. Louis during a year which was not generally a discouraging one nor one marked with extraordinary prosperity. These industries are waxing greater and showing more steady thrift than for many years heretofore. They are supplemented by a multitude of lesser interests in the productive line, most of which are in excellent condition, and many of which are developing commanding proportions.

POINTS FROM THE PACIFIC COAST.

San Francisco, July 16.—The fruit harvest, except grapes, is a failure. The quantity coming into market is small, quality inferior and prices high. Very hot weather happening when the ground was saturated with moisture was one cause of the short crop. Another cause, however, is neglect of cultivation, which is not general by any means. The same care is not bestowed upon fruit orchards in California that is general in the fruit districts east of the Missouri river. Summer apples now bring $1.50 per box, which last year would not have sold for more than 50 cents. Prunes are 50 per cent. higher than the average price of last season. Tomatoes are small and fetch $3 for what 25 cents would have been considered dear this time last year. Currants failed, being baked on the bushes. Strawberries and raspberries are hardly a half crop. Blackberries are as dear in proportion as other fruits. Grapes have not yet come into market, but the promise is for a very abundant supply of superior quality. Vegetables of all kinds are inferior and dear.

The Chinese strike in San Francisco is at an end, as the men are again at work. About two thousand were out for a fortnight, and it is understood they gained their point and enforced higher wages. This was independent of the previous strike against the Chinese boarding-houses. The Chinese laborers on the Oregon division of the Central Pacific Railroad are returning in driblets to work at the old rates, but many are off prospecting in Shasta mountains, while others have gone to the valley for harvest work. This strike will delay the completion of about twenty miles of railroad this year. Another strike of Chinese labor hands is reported from the Northern Pacific. In truth, they are as apt to "strike" as white laborers, and can only be relied upon when they are in constant dread of competition by their own countrymen. These facts bear out the opinion expressed by BRADSTREET'S recently on the economic side of the Chinese labor question. Perhaps the most strenuous opponents of unrestricted Chinese immigration are the Chinese laborers in California.

The city has compromised its suits with the water and gas companies, which thereupon paid enough money into the treasury to enable salary demands to be met. The streets have likewise been lighted with gas, but nothing has been done in the way of sweeping, repairing or improving them. Private assistance enables the Park Commissioners to rebuild the conservatory in the Golden Gate Park.

San Francisco, July 19.—The strike of the telegraph operators to-day has seriously disturbed business, and in nothing, perhaps, more so than in preventing the distribution of commercial news. The public can well afford a respite from the social rubbish and criminal garbage which the Press Association dumps upon the breakfast tables every morning as the news of the country. You missed your regular dispatch from this coast on account of the strike; but inasmuch as there was really little of importance to send it did not so much matter.

Wheat has increased in value, with considerable dealings in options. Barley continues the favorite gamble. I see no reason to modify my previous reports on the harvest outlook.

Trade is steady and conservative, and next month we may expect more active times. The dry goods trade for the first half of this year was in excess of that of last season for the corresponding period, although falling under that of 1881. Imports of boots and shoes from the east fell off from last season by over 6,000 cases, but exceeded the importations for the previous year, 1881. The prospects for a brisk fall business in the shoe trade is very encouraging. Home manufactures have extended considerably, and labor is better paid. The price of hides has been dear, despite large importations from Hawaii and Australia. If any argument in favor of admitting the raw material of manufacture duty free were needed it would be found in the history of the leather trade.

Opium importation was the special feature of the past half-year's trade. The stock on hand in this city is valued at $2,000,000. The total importation for the half-year was 5,309 boxes, of which 937 came by Australian steamers.

Sericulture is being vigorously prosecuted under the auspices of a state society with very fair results, the cocoons sent from California having obtained the prize at the last exhibition of the Women's Silk Culture Association of the United States in Philadelphia. There is also a fine new silk mill in operation in San Francisco.

Our warehouses are packed full of wool, which has dull sale. All the woolen mills in the state are running up to their full capacity, several of them on eastern orders, although so many sets are idle in New England. There is no manufacturing enterprise which promises a more certain return on this coast than woolen manufacture.

A new floating dry-dock has been projected and the necessary capital subscribed.

Ostrich farming is likely to prove a success. Young and healthy chicks are being hatched out at the pioneer ostrich farm in Los Angeles county.

LETTERS TO THE EDITOR.

RECENT CORN CROPS.

To the Editor of BRADSTREET'S.

SIR—It is evident from the heavy receipts of Indian corn at the eight western river and lake ports since December 25, that the estimate of the Agricultural Bureau of 1,624,000,000 bushels of Indian corn for the crop of 1882 was too low, and the following, comprising western receipts, exports, eastern consumptive demand and the visible supply for the season of 1882-3, compared with that of 1881-2, tends to confirm the view.

1882-3.	*Bushels.*
Visible supply December 25, 1882	8,233,604
Receipts at eight western points from December 25, 1882, to July 7, 1883	60,083,565
	68,316,565
Exports from Atlantic coast December 25 to July 7	36,215,460
Visibly supply July 7	12,336,529
	48,551,989
Consumption of western corn between the lakes and the seaboard	19,764,576

1881-2.	*Bushels.*
Visible supply December 25, 1881	17,382,227
Receipts at eight western points from December 25, 1881, to July 7, 1882	44,357,522
	61,739,749
Exports from Atlantic coast from December 25, 1881, to July 7, 1882	10,519,503
Visible supply July 7, 1882	6,388,650
	16,938,153
Consumption of western corn between the lakes and the seaboard	44,791,596

From this it is noted that the receipts from December 25, 1882, to July 7, 1883, were 60,083,161 bushels, against 44,357,512 bushels at same period last season; second, that the exports for season 1882-3 were 36,215,460 bushels, against 10,549,503 bushels for the like period last season; and, third, that the visible supply increased from 8,233,404 bushels on December 25, 1882, to 12,336,529 bushels on July 7, 1883. This shows that the demand for Indian corn here during the past half year has been less than the receipts. On the other hand, in the corresponding portion of 1881-2, the visible supply diminished from 17,382,-227, on December 25, 1881, to 6,388,650 bushels on July 7, 1882, showing that the demand that year was in excess of the supply. The receipts of Indian corn at eight western points, from December 25 to July 8, in the years noted, were as follows: In 1882-3, 60,083,161 bushels; in 1881-2, 44,357,522 bushels, and in 1880-1, 60,925,871 bushels.

It is quite evident from this, viewed in connection with the visible supply, that the supply of western Indian corn this year has been greater than the demand. The increased exports since December 25 last, as compared with the previous season, will be more than compensated by the decrease in home consumption of corn. The average weekly home consumption for the last three years has been, from December 25 to July 7, in 1882-3, 706,000 bushels; in 1881-2, 1,596,000 bushels; and in 1880-1, 821,000 bushels. These figures indicate that the states, other than those which supply the bulk of corn, hogs and cattle, require considerable corn to supplement their own production; but the requiring double the quantity of western corn in the season of 1881-2 over previous years shows clearly what a very deficient crop was that of 1881. It was not remarkable, therefore, that 79 cents per bushel for Indian corn was paid in Chicago, and $1 in New York for corn, last season. The effort to raise prices this year has ended in failure. In Chicago, in March last, 65 cents per bushel was the price of May delivery; in April it fell to 52 cents, but was advanced to 59 cents; it is now about 51 cents. There is plenty of corn in the country, and it is now evident that the last Indian corn crop was a good average, especially as the severe winter of 1880-1, followed by the short corn crop of 1881, had diminished the stocks of cattle and hogs requiring to be fed.

New York, July 25.

REVIEWS.

LOCAL GOVERNMENT IN ENGLAND.*

For many reasons the subject of local government in England is invested with peculiar interest for Americans. Our system of law and our political system generally bear strong traces of their English origin, and we are naturally led to look to parallel developments in the early home of our institutions for light upon some of the difficulties which have made themselves apparent in the practical working of our political system here. England's system of local self-government has been generally regarded as the chief stone of the corner in her constitutional polity. John Stuart Mill declared that the local administrative institutions were the chief intruments of the public education of the citizens, and May, the historian of England's more recent constitutional development, expresses the opinion that her liberties may be ascribed, above all things, to her free local institutions. While such encomiums as these have been bestowed upon local government in England matters have been somewhat otherwise in this country. It is not going wide of the mark to say that in the United States what may be properly termed local government is less satisfactorily administered than are affairs falling under the cognizance of the more general departments of our complex political system. This condition of things has come about through the operation of a variety of causes, upon the consideration of which it is unnecessary for us to enter at present. We refer to it in this place merely in order to direct attention to one of the chief reasons which render an exposition of the present state of local government in England of practical interest here. The information relative to the subject heretofore available has been very scanty, and Mr. Chalmers' book has supplied a real want, as far, at least, as the general reader is concerned. It may be, however, that an examination of the facts presented by him will convince us that, notwithstanding the long experience of the English people in local self-government and the applause of distinguished constitutional writers, she has yet something (perhaps not inconsiderable) to learn about the convenient and economical conduct of local affairs.

Local self-government is, as one would naturally suppose, the prevailing system in England, and in local affairs the general type of government is representative. We say the general type because there are some exceptions to the rule of representative government in local matters. Of these exceptions the most conspicuous is found in the case of the counties, the governing bodies of which consist of justices appointed by the crown. The right to vote for purposes of local government depends, like the right to vote at parliamentary elections, on the possession or occupation of lands or houses, no amount of mere funded property and no payment of income tax being sufficient to entitle to a vote. In the matter of taxation there is this difference to be noted—the central government taxes both real and personal property, while local taxation falls exclusively on lands and houses. There is also a point of contrast noted respecting the position of women. A woman cannot vote at a parliamentary election nor can she serve as a member of Parliament. On the other hand, she may exercise all local franchises if she be otherwise qualified, and may fill most local offices. There is a further point of difference between the central and local governments as regards the classes by whom they are respectively administered. Although both governments rest upon substantially the same basis (which the author regards as a broad one) of popular representation, the local governments are not administered by men of the same high class as those who conduct the general affairs of the kingdom. This is perhaps inevitable under any system which maintains a division of the spheres of central and local government. In England, for reasons which will presently appear, this tendency has been particularly unfortunate.

The author admits that it is hardly possible to give a correct and general view of the various local institutions which, in the aggregate, make up the system of local government in England. Indeed, it is somewhat inaccurate to call it a system, for, according to the author, "there is neither co-ordination nor subordination among the numerous authorities which regulate our local affairs." Even so patient a student as Mr. Goschen declares that "there is no labyrinth so intricate as the chaos of our local laws." Mr. Chalmers says that local government in England may be fitly described as consisting of a chaos of areas, a chaos of authorities and a chaos of rates. With few exceptions all the various areas intersect and overlap. A very jungle of jurisdictions is brought about by the circumstance that all these areas are governed by different authorities, elected or selected at different times by different means or bodies. These defects and difficulties have resulted, says the author, from the English habit of legislating by piecemeal, the shortcomings of existing institutions being remedied from time to time by a species of patchwork. This system or want of system it is not altogether easy to replace, numerous vested interests being enlisted in favor of its permanency. Under it offices are unnecessarily multiplied, and, there not being a redundance of talent available for the local public service, the latter suffers in an appreciable degree. Under the circumstance it is not singular that confusion and extravagance should be, as the author declares they are, the characteristic features of the whole system.

The author gives some statistics of the expense of local government in England, and of the increase thereof during recent years, which are of grave significance. In 1871 the sum total of the outlay for local purposes was £29,000,000. In 1880 the expenditure for the year had risen to £50,000,000, although the care of prisons had in the meantime been transferred to the central government. Of this amount a considerable proportion was raised by loans. Some of the details of this expenditure suggest strange comparisons. For instance, as appears from the figures given, the maintenance of the paupers of the country cost a sum equal to nine-tenths of the amount required to maintain the navy and fleet equipped with all the appliances of modern warfare, and the number of adult able-bodied paupers is about the same as that of the army and navy combined, excluding soldiers serving abroad. England's local indebtedness has been steadily increasing of late years. In 1875 the amount aggregated £92,000,000; in 1881 the total debt amounted to £144,000,000—not a very hopeful state of affairs certainly. This extravagant cost of local administration and the increase of local indebtedness are thought by the author to be principally owing to the following among a variety of causes: First, that there is no efficient control over local expenditure so long as the money raised is actually expended on the objects for which it was raised; secondly, that the standard of education and intelligence among local authorities generally is not so high as could be wished, and that the classes from whom local authorities are chiefly selected are precisely those who desire most benefit from local expenditure and have the least object in checking extravagance; and, finally, that the complicated nature of the English system of local government, with its ever-clashing and intersecting areas and authorities, whose accounts are made up at different dates, prevents the possibility of anything like a local budget, so that it is impossible to make out what is the total expenditure for any given locality. The Local Government Board has a general control over the administration of local affairs, but its supervision over local financial operations, judging from results, does not seem to have been at all times judiciously exercised. Its permissive authority is peculiarly liable to abuse, for the reason that the sanction given by the government to borrowing schemes naturally tends to weaken and finally destroy the sense of obligation in the minds of the borrowers, the government being regarded in some sense as a guarantor. Moreover, the control of the Board in this direction is by no means complete, it appearing that local bodies are in the habit of obtaining special acts, under which they can borrow large sums without the sanction of the board.

We have not space to follow the author in his descriptions of the various local areas, such as parishes, unions, highway and burial areas, etc. These divisions are, for the most part, of merely local interest. The author has, however, a chapter on "The Municipal Borough," which will be found of general interest. It seems that in England there is no system of town government as such. Some favored towns are, it is true, incorporated, but the great majority of them have no legal existence or recognition, and are merely geographical names to denote certain arbitrarily defined or undefined areas having an urban population. Under the Municipal Corporations act of 1835, as amended in 1882, provision is made for the creation, by charter, of new municipalities upon petition of the inhabitants of towns, but under this act petitions appear to be sparingly made and still more sparingly granted. When the Municipal Corporations act of 1835 was passed 178 boroughs were included under its provisions. Since that time the town population of England has doubled, but the list of municipal boroughs had been increased at the author's writing by only 63 towns. The accounts of boroughs are not, like those of most local authorities, subject to audit by the local government board, though that body receives returns of the receipts and expenditures of those corporations for the year. One great defect in the English municipal system is the absence of anything in the nature of a town budget. Much might be done to check local extravagance by the introduction of a system of accounting which would show the actual financial position of a town at the end of every year. Such a system, together with stringent prohibitions or, at the least, regulations of municipal borrowing, would remove most of the occasions for contracting debt which present themselves to local authorities left entirely to their own unwisdom.

* Local Government. The English Citizen Series. By M. D. Chalmers, M. A., Barrister at Law. London: Macmillan & Co., 1883.

KING'S DICTIONARY OF BOSTON.*

This attractive handbook is modeled upon the "Dictionary of London," which appeared some years ago under the editorship of the younger Dickens. It is much more than a mere guide-book, many articles and much information incorporated in others being of a nature such as one does not usually look for in a volume of this kind. The aim of the publisher and the editor has

* King's Dictionary of Boston. By Edwin M. Bacon. With an Historical Introduction by George E. Ellis, D.D. Cambridge, Mass.: Moses King, Publisher. 1883. pp. xvi-518.

been to furnish in a convenient form a body of complete and trustworthy information concerning the Boston of to-day—a volume which would be at once a guidebook, handbook and condensed history of the city, its noteworthy institutions and its most interesting features. In this endeavor they appear to have been entirely successful. The various heads are conveniently arranged and the information under each is concise, yet comprehensive, that under some heads being, indeed, for all ordinary purposes, exhaustive. Among the articles to which the latter description applies may be mentioned "Boston University," "City Government" and "Harvard University." The article on "Hacks" is the evident outcome of a laudable determination to guard the unwary sojourner in the city against the machinations of a reputedly unscrupulous class of public servants. The traveler of a commercial turn will find convenient and pertinent information in such articles as those treating of "Banks," the "Commerce of Boston," the "Harbor," "Hotels," "Insurance in Boston," "Steamships and the Steamship Trade of Boston," the "Stock Exchange" and the "Trade Centres" of the city. The uncommercial traveler, on the other hand, will be grateful for the information rendered so easily accessible in such articles as "Club Life in Boston," the "Drama in Boston," and "Music in Boston," and for the full references to places of amusement, museums, libraries, etc. The liberal view taken by the publisher and editor of the scope of their work is seen in the articles on the "Brook Farm Movement," "Bunker Hill Monument," the "First Newspaper," the "Stamp Act," the "Boston Tea Party," and "Sunday in Boston," to instance a few among many. Under the head "Isms" there is given an account of the various beliefs and doctrines which either originated in Boston or found there a ready acceptance. A distinct concession to the spirit of antiquity is made in the paper on "Old Burial Places," and the innate capacity for reverence and for hero-worship receives recognition in the article on "Old Landmarks" rendered interesting by historic associations. Such articles as these, and that for example on "Kissing a Crime," are sufficient to establish the unconventional character of this handbook. The volume is of convenient size, is very well printed on good paper, and contains a map of the city and its suburbs.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

The word "security," when written after the name of one who signs a promissory note, means surety, according to the decision of the Supreme Court of Indiana, in the recent case of Favorite vs. Stidham.

Shares of the capital stock of an unincorporated association are not "commodities" within the meaning of a statute taxing "produce, goods, wares, merchandise and commodities," according to the decision of the Massachusetts Supreme Court, in the recent case of Gleason vs. McKay.

Under a statute directing the governor of a state to appoint the successors of certain officers "at the expiration of" their terms, the appointment of a successor on the day of the expiration of the term of such an office is valid. So held by the Supreme Court of California in the recent case of The People vs. Blanding.

The Supreme Court of Maine recently held, in the case of Vallier vs. Ditson, that the receipt by the vendor of a chattel of the worthless note of a third person, falsely and fraudulently represented by the vendee to be solvent, was no payment, and that the vendor might maintain an action for the balance due, according to the bargain.

In the case of Irons vs. The Manufacturers' National Bank of Chicago, decided in the United States District Court at Chicago on the 23d inst., Judge Blodgett held that the stockholders of the bank were liable for the debts of the bank to the amount of their stock, and that individual suits to recover on that liability could be commenced without the intervention of a receiver.

Where certificates of preferred stock of a railway company provided among other things that the preferred stock was to be and remain a first claim upon the property of the company after its indebtedness, the Supreme Court of the United States held (in the case of Warren vs. King, decided recently,) that the preferred stockholders had no claim on the property superior to that of creditors under debts contracted by the company subsequently to the issue of the preferred stock, and that their only valid claim was one to a priority over the holders of common stock.

The Supreme Court of Georgia recently held, in the case of Griffin vs. Augusta & Knoxville Railroad Company, that after a railroad company had completed its track through the property of a citizen without legal objection made thereto, or assessment of damages therefor, an injunction should not be granted to stop the running of its trains until damages were assessed and paid. The court said that one could not stand by and suffer another to expend money to large amounts on his land as part of a great system of improvement and then stop, by injunction, the entire system until he is paid.

A corporation created by a territorial legislature is is not a federal corporation, and cannot, therefore, sue in the United States courts as such, according to the opinion of the United States Circuit Court for the District of Colorado, in the case of the Adams Express Company vs. The Denver & Rio Grande Railway Company, decided on the 9th ult. The court further held that an act of Congress granting to a railway company organized under territorial legislation right of way through the public domain does not create the corporation, but only grants to an existing corporation certain rights, and constitutes no ground of jurisdiction on the part of the federal courts in a case in which the cause of action does not in any sense rest upon or grow out of the grant of such right of way.

A statute repealing all usury laws previously in force in a state takes away the defense of usury from existing contracts, and is valid under the Federal Constitution, according to the decision of the Supreme Court of the United States in the case of Ewell vs. Daggs. The court said that the effect of a usury statute is to enable the party sued to resist a recovery against him of the interest which he has contracted to pay, and that such a statute is in its nature a penal statute, inflicting upon the lender a loss and forfeiture to that extent. The repeal of such statutes without a saving clause has generally been held to operate retrospectively, so as to cut off the defense for the future, even in actions upon contracts previously made. Repealing laws operating with that effect have been upheld as against all objections on the ground that they deprived parties of vested rights or impaired the obligation of contracts. The right which the curative or repealing act takes away in such a case is the right in the party to avoid his contract, a naked legal right which it is usually unjust to insist upon, and which no constitutional provision was ever designed to protect.

In the case of Peak vs. Ellicott, recently decided by the Supreme Court of Kansas, it appeared that the plaintiff executed a note to the Riley County Bank of Manhattan, Kansas, for the loan of $782.50. Afterward, at the request of the cashier that he should pay the same, and upon the promise of the former that he would send and get the note, then owned and held by another party, he delivered to the cashier before the note was due the amount thereof, and the cashier executed to him a receipt acknowledging the payment of the note. The cashier then credited the amount so received from the plaintiff to the cash account of the bank, but the bank failed to pay the note or any part thereof at its maturity, and appropriated all the money to its own use. The court held that by the transaction the relation of principal and agent existed between the plaintiff and the bank as regarded the fund, and that upon an assignment by the bank of all its property and effects to an assignee in trust for its creditors the plaintiff had a right to follow and reclaim the fund from the assignee, for the reason that the money was a trust fund and not assets of the bank and did not pass to the assignee for distribution to the general creditors of the bank.

BUSINESS NOTES.

The annual meeting of the American Paper Manufacturers' Association was held at Saratoga on the 25th inst. It is reported that 150 manufacturers were present. The object of the gathering, as may be supposed, was the general interests of the association, beyond which particular attention was paid to the question of the exportation of paper.

The *Exposition Gazette*, published at Denver, Col., contains much that is of interest concerning the second annual Mining Exposition at that city. Among recent arrivals are mentioned two gold bricks from the reduction works at Golden, weighing 1,003¾ and 1,011¾ ounces respectively, valued at $20,000 each, and which will be on permanent exhibition.

The total number of failures in the United Kingdom and Ireland, reported to *Kemp's Mercantile Gazette*, for the week ended July 7, was 208, against 238 in the corresponding week of 1882, and as compared with 226 in the like week in 1881. The total for England and Wales was 173 against 216 and 203, respectively, in the corresponding weeks in 1882 and 1881. In Scotland the total was 29 against 16 and 15, and in Ireland it was 6 against 6 and 8 in the like weeks in 1882 and 1881.

According to the report made to the London *Labour News*, of July 7, the era of labor strikes in the United Kingdom had continued as for several weeks previously. At that time, of course, the North Staffordshire miners' strike was at its full tide. In various lines of metal working and textile manufacturing trade was fairly active and comparatively brisk. The tin-mining industry continued active, and labor disputes in that line rare. In the agricultural regions work was brisk and the demand for hands active. Emigration continued fairly brisk.

The exports of British iron and steel to the United States in June, 1883, according to the reports of the British Board of Trade returns, and as compared with those of June, 1882, and May, 1883, were:

	June, 1883.	*May*, 1883.	*June*, 1882.
Pig Iron.....tons	24,669	22,187	42,368
Bar, angle, rod, etc.....tons	535	587	880
Railroad, all.....tons	5,590	7,737	21,531
Hoops, sheets, plates, etc.....tons	2,684	3,043	2,776
Tin-plates.....tons	17,710	17,513	21,182
Cast or wrought.....tons	628	304	286
Old iron.....tons	8,048	6,179	5,739
Steel, unwrought.....tons	3,884	3,321	12,453
Lead, all sorts.....tons	1	4	..
Steam engines.....£	5,268	4,542	7,257
Other machinery, etc.....£	75,179	46,721	46,271
Tin, unwrought.....cwt.	242	257	755
Special return—			
Iron rails.....tons	100	130	..
Steel rails.....tons	5,281	7,522	21,223

With the exception of tin-plates, old iron and pig iron, it will be noticed from the above that the June imports have declined since May. As compared with June, 1882, the decline is still more noticeable.

The French watch industry, that at Besançon in particular, where it centers, is making rapid progress, as evinced by the returns of 1882. From the figures obtained it is noted that the importation of watches into Besançon has of late rapidly decreased. The annual report of the Chamber of Commerce of Besançon for 1882 states that over 500,000 watches were manufactured in that town in 1882, an increase of 50,000 on 1881. The proportion of gold to silver cases is as one of the former to two of the later. Taking the average selling price of the gold watches at 60f., and of the silver at 20f., the total value of the goods amounts to 18,000,000f. In 1881, 32,056 gold and 60,554 silver watches were obtained from other places, principally from Switzerland, but last year the numbers had decreased to 28,218 and 48,704 respectively. The total number of timekeepers manufactured in France in 1882 was 568,722, of which 86 per cent. are credited to Besançon.

The high prices for cattle and meats which have prevailed in England have greatly stimulated importations of the same. The value of the aggregate receipts of live stock in the United Kingdom during the past six months, as compared with that of the arrivals in the first half of 1882 and of 1881, were as follows:

	1881.	1882.	1883.
Oxen and bulls.....	£2,567,313	£2,628,482	£3,230,527
Cows.....	271,216	493,581	604,541
Calves.....	87,839	80,380	112,538
Sheep and lambs.....	903,330	1,137,343	1,174,175
Swine.....	32,844	11,228	48,996
Totals.....	£3,862,542	£4,151,014	£5,176,777

The oxen and bulls were chiefly from the United States and Denmark, the cows almost entirely from Denmark, the calves and swine mainly from Holland, and the sheep and lambs principally from Germany. Receipts of fresh meats in the United Kingdom during the past six months have also shown a marked increase in value when compared with preceding half-year's report, the aggregate for six months of 1883 being given at £1,160,653.

The periodical published in New York entitled *The Bookkeeper* has sunk its identity in a new monthly publication, of which the July number has just come to hand. It is known as *The American Counting Room*. While it is due the memory of *The Bookkeeper* to say of it that it was ever a welcome visitor and contained much that made it of value to the business man as well as to the accountant, it must not be overlooked that *The American Counting Room* rises at once to the worth and dignity of a sixty-five-page monthly between handsome covers, and contains, together with a selection of light and entertaining reading matter, articles of particular application to the counting-room and the interests of the commercial world which render it indispensable. Several new features in a work of its character, such as a list of business reverses classified by trades, and tables of daily prices of stocks and staple commodities during the month, and forward sailing dates of foreign mails for a month, will suggest the advisability of filing the numbers for reference.

In imitation of Austria and Hungary, Germany has decided to increase the tax on the production of sugar. This is believed to have long been much lower than the industry could well afford to pay, as the improvements in sugar-making machinery and the general increase in the average production of sugar per mill indicate. During the crisis of 1873 the German sugar industry actually increased in the number of establishments. They were 311 in 1872, and 357 in 1882, 14 having been finished only in 1882. The increase of the production of sugar is, however, out of all proportion with the increase in the number of manufactories. The number of steamers in use in 1872 was 1,918, and increased to 3,043 in 1882, and the quantity of beet-root used, which was 45,000,000 cwt. in 1872, increased to 105,000,000 cwt. in 1882. The production of raw sugar increased from 3,000,000 to 12,000,000 cwt.; the tax on sugar, which was 36,000,000 marks in 1872 (3,300,000 being returned at the frontier for exported sugar), increased to 100,300,000 marks in 1882 (43,700,000 being returned at the frontier for exported sugar).

The following national banks have been organized: The First National Bank of Burnet, Tex.; capital $50,000; W. H. Westfall president; W. H. Hotchkiss cashier. The Dallas National Bank of Dallas, Tex.; capital $150,000; R. V. Tompkins vice-president; E. M. Reardon cashier. The German-American National Bank of St. Cloud, Minn.; capital $50,000; Charles A. Hull president; Edgar Hull cashier. The First National Bank of Havre de Grace, Md.; capital $60,000; Arthur Vosbury president; R. K. Vanneman cashier. The Chenango National Bank of Norwich, N. Y.; capital $100,000; Cyrus B. Martin president; Henry T. Dunham cashier. The Albia National Bank, Albia, Iowa; capital $50,000; William Bradley president; J. R. Hays cashier. The Indiana National Bank of Bedford, Ind.; capital $50,000; Archibald C. Voris president; Thomas H. Malott cashier. The First National Bank of Mexia, Tex.; capital $50,000; William Kamsler president; W. L. Murphey cashier. The Allentown (Pa.) National Bank has elected E. Rehrig president. The First National Bank of Central City, Col., has elected Otto Sauer president, in place of J. A. Thatcher.

A Pittsburgh gentleman prominent in the iron trade furnishes an elaborate calculation to convince a reporter and the public generally that the depression in the pig iron trade has touched bottom, and that ere the close of the year a moderate amount of activity may be confidently expected. There is no reason now known pointing to any different result. It is added that the "overproduction" of pig iron "will be disposed of" by next year. The total supply of 1882, counting the iron on hand January 1, the production, the importation and the old rails and scraps used, was 7,500,000 tons. The total consumption last year was 5,852,644 tons. Add to this the stock on hand January 1, which was 1,000,000 tons, and the total is 6,852,644 tons, leaving an overproduction of 647,356 tons for the year 1882. The same authority estimates the supply of pig iron in 1883 at 6,759,854 tons, under the agreement to curtail production 20 per cent. arranged at the opening of the year. The above total includes 1,000,000 tons, "normal stock," the quantity "overproduced" in 1882, as shown above, 20 per cent. less production than that reported in 1882, or 4,142,498 tons, an importation of 470,000 tons and stocks of old rails and scraps, say 500,000 tons. The probable consumption of pig this year is given as follows:

	Tons.
For wrought iron of all kinds.....	2,250,000
For steel of all kinds.....	1,550,000
For 20 per cent. waste on above.....	760,000
For foundry purposes.....	535,000
For normal stock.....	1,000,000
Total.....	6,095,000

From these calculations it appears that the 20 per cent. restricted output arrangement would still leave an "overproduction" of 664,854 net tons by next January. But it is explained that the stoppage of the blast furnaces in reality amounted to 33⅓ per cent. of the total capacity, hence the estimate given above as to the probable supply for 1883 is changed in its most important item, that of the production, which must now be estimated at 66⅔ per cent. of that of 1882, instead of at 80 per cent. This cuts the total estimated supply for 1883 down to 6,069,438 tons, as compared with 6,759,854 tons first computed.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

The terse expression of the situation in London given in last week's cable dispatch from that place to BRADSTREET'S sums up the situation here. "Buyers are hard to find." That is the difficulty in Wall street to-day. That is why it seems almost impossible to get up more than a mere spurt in prices, for the scarcity of buyers makes the people who are laboriously carrying loads of stock rush in to sell the moment the market appears to have gained any strength, and the number of buyers being so few they are soon filled up and prices sag off again. Buyers are so hard to find, while the quantity of goods seeking buyers has so vastly increased, which, in the stock market, contributes very much to scare away possible buyers, that the value of seats on the Stock Exchange has sunk $9,000 within less than a year. The last sale of a seat was at $23,000; the last sale before it was at $25,000, and within twelve months they have sold as high as $32,000. If the volume of business in Wall street continues not to diminish but only to remain at its present dimensions, seats will sell considerably under $20,000 before the year is out. As with the railroads which have outgrown in so many sections of the country the business from which they must derive their support, so with the brokers firms which deal in them, there are more than the present amount of business calls for, and very few houses in Wall street to-day—that is, commission houses, are more than making expenses, while many are not doing that, though they have largely reduced their clerical force. Times are certainly dull there, and brokers are naturally inclined to take a more or less gloomy view of things in consequence. "Buyers are hard to find," sums up the whole situation, and only when they become easier to find will there be an improvement.

Under such circumstances the movements of the markets have little interest for the general public. The cliques who have stocks struggle for a long time to hold out against the tide, producing a sort of deadlock in the market, then something comes which compels them to throw over part of their holdings and a bad break in prices follows. After this they pick up again, try to rally the market, and the same struggle goes on again. This has been, substantially, the history of the stock market since last fall. At this time Mr. Gould is its main support. He had not only refused to assist the bull clique after the complete failure of his plans for a June rise with his Western Union, but it was tolerably well known that, having set down the prices of his own stocks to a point where he was willing to support them to whatever extent should be necessary, he was actively bearing the trunk line and the Villard stocks, with such others as looked promising for a decline. The outbreak of the telegraph strike forced him to change his tactics, to give the market a general support, and to devote special attention to his Western Union. The effects of the strike have proved so much more serious than seems at first to have been anticipated that to support the market under their adverse influence must have given him quite as much as he cared to attend to at one time. Nor is the end yet, by any means. Nevertheless he has supported the market, and dreadfully dull it has been since Monday last in consequence. It was mentioned last week that the market was rallied up from the moment it was known that the strike had been ordered. That was on Thursday. The improvement continued through Friday and Saturday, though there was a little reaction in the last hour that day, due probably to the selling of stocks by the room traders, who in troubled times never like to go away on Saturday "long of the market." On Monday, there was a quite lively attack on a variety of stocks by the bears. Western Union was let alone in a measure, but other Gould stocks, as Wabash, Missouri Pacific and Texas Pacific were hammered hard, and they went down very easily under it, showing that the support given them was comparatively feeble. Denver also had a bad break, and this was supposed to be from some one of the large holders getting rid of a portion of his uncomfortable load, for when the rest of the market began to improve next day by the covering to realize profits by those who had been selling the day before, Denver dragged heavily. It has recorded this week the lowest figures, we believe, that it has ever seen since the stock was listed on this market in the summer of 1880. It finally dragged itself up with the general advance of prices. The stocks in which the short interest was supposed to be largest have naturally shown the most recovery. New York Central, for example, have gained as much as 3 per cent. from its lowest figures of last week, though it did not hold all the advance made. Western Union has been supported about 80, as it was expected that Mr. Gould would do, and the common expectation that any day would see the strike brought to a sudden end by compromise has contributed considerably to assist Mr. Gould in his task. Just in proportion as prices were advanced the market has become dull, for the reason that though quotations may be advanced "buyers are hard to find." Yesterday the market was even duller than before.

Large drawers of exchange confirm the rumor that there had been extensive borrowing of sixty-day bills of exchange on London, and that the collateral deposited has been Oregon Transcontinental and Northern Pacific preferred. The amount of sixty-day bills thus borrowed cannot be ascertained, but it is known to be large. A prominent broker said: "The party or parties borrowing these bills simply go short of the exchange market, as borrowers of sixty-day bills must, at the expiration of the sixty days, return demand exchange. The interest paid on money secured in this way is governed wholly by the rate for demand exchange which may prevail sixty days from date. In case demand exchange is selling at to-day's prices, $4.82¾@$4.83, the money would cost the borrowers between 7 and 10 per cent. But in case exchange goes down, with each cent reduction the rate of interest diminishes. A 4-cent reduction to $4.78¾@$4.79 would make the interest rate about 3½ per cent.

"As to the probabilities of a reduction opinions differ widely. There are bulls and bears in exchange exactly as in the stock market. An export demand for grain, provisions and cotton would tend to reduce rates, while further selling of stocks for foreign account and heavy imports would cause corresponding advance in exchange."

The extreme ease of the loan market has been of great assistance to the bull cliques, for they have long been able to borrow all the money wanted at 2 to 2½ per cent. on call. Time money is now become a little harder to get than it was a few weeks ago, and loans are at 5 per cent. Still the general stagnation of trade causes but small demand to be made on the banks. It will not be long, however, before the usual fall movement of money to the west begins for the purpose of moving the crops, and just as soon as money becomes active here we may expect lively times in the stock market. Foreign exchange remains about where it was last week, the posted rates being $4.84 and $4.87½. The Bank of England discount rate remains at 4 per cent., as it has all the summer, and we see by the foreign papers that the volume of business on the London and Paris stock markets has fallen off this year, as compared with last year and the year before, fully as much as it has here. The same cause seems to be at work—reaction from the excessive speculation of previous years. Consols are still below par.

The government bond market was made somewhat active by the anticipation of the bond call, and the 4s were quoted fractionally higher. The following were the closing quotations yesterday:

	July 20, bid.	July 27, bid.	July 27, asked.
U. S. 5s extended (3¼ p. c.)	101	101	—
U. S. 4½s 1891, registered	112½	112¾	113
U. S. coupon	112½	—	—
U. S. 4s 1907, registered	118½	119	119⅛
U. S. 4s 1907, coupon	118½	119	119¼

The bank statement of Saturday was favorable, showing a contraction of loans of $1,483,200, and an increase in the surplus reserve of $1,071,400, bringing it up to $9,589,325. This is somewhat in excess of the amount of the reserve for the same week of last year, but it is expected that from about this time on the bank reserves will run down by the movement of money west. The following are the comparative totals of the statements of July 14 and July 21:

	July 14.	July 21.	Differences.
Loans	$329,839,300	$328,356,100	Dec. $1,483,200
Specie	64,817,200	65,046,700	Dec. 170,500
Legal-tenders	25,532,400	26,493,900	Inc. 961,500
Deposits	327,326,700	326,205,100	Dec. 1,121,600
Circulation	15,527,200	15,583,400	Inc. 56,200

The proportion of total reserve to liabilities is now 27.93 per cent., against 27.51 per cent. at the corresponding date of 1882.

THE LONDON STOCK MARKET.

[By Cable to BRADSTREET'S.]

From London: There is some recovery in American securities in response to New York prices.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: Money is easy, and transactions in stocks have been brisk; still there is no marked change in the value of securities to note. Marietta railroad bonds are wanted at full rates, but are not obtainable. Mining stocks were most neglected.

From New Orleans, La.: Financial circles are quiet, with limited movements in securities. The latter, however, are generally fairly maintained.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

	July 28, 1882.	July 20, 1883.	July 27 1883.

COMMERCIAL.

SUMMARY.

Special telegrams to BRADSTREET'S from leading business centers throughout the United States yesterday do not record such a marked derangement of general trade as had been duly prophesied as the inevitable outcome of a general strike among the telegraph operators. Speculative business at the various exchanges of the country, stock, grain, produce, cotton, oil and others, was greatly cut into by the inability of operators, large and small, to communicate promptly with their customers. But even in these departments of trade prices were not demoralized. In fact, in a number of them an advance was made while the effects of the strike were at their worst. The legitimate consumptive demand of the country, however, in all lines has not been materially interfered with except in the south, and even there the check was not serious, being due to the fact that at a number of towns outside communication by wire was entirely cut off. The July cotton report of BRADSTREET'S shows the condition of the crop to be not above fair. In Georgia a severe drouth is doing injury. Wheat, after declining, hardened, dropped away again, and closed yesterday at a fractional advance, due largely to the heavy storm at the west and the exertions of a large short interest to cover. Corn has been higher, but bad weather and the posting of nine and a-half carloads at New York yesterday weakened it at the close. Provisions have fluctuated moderately within the week. Nothing conclusive can be learned of the alleged attempt to corner lard again at Chicago, and little credence is given it. Petroleum has advanced between 2c. and 3c. over the closing prices a week ago, and fully 10c. above Monday's ruling prices. Free buying and a probable decline of 1,000 barrels per day in the July new production had some effect. Anthracite coal is moving off slowly. Stocks are lighter than they were one year ago, and production is less than 1,000,000 tons ahead of that of July 21, 1883, as against an excess of near 1,500,000 tons one month ago. There has been a good trade in wool in the seaboard markets, and the movement from primary points has continued large. There were 168 failures in the United States reported during the past week, 6 more than the preceding week, 46 more than the corresponding week of 1882, and 90 more than the same week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: General trade has been fairly active. Groceries are rather unsettled, and prices declining. The future looks well, however, and general volume fully equal to last year.

From Boston, Mass.: The volume of trade in some departments has not increased as much as was expected, owing to certain temporary drawbacks, but the general situation retains all the favorable features previously noticed, and preparations for the fall campaign are in active progress. The telegraphers' strike has incommoded merchants to a considerable extent, but as it occurs at a comparatively quiet season its effects are not so seriously felt as they would be at some other time. A confident tone continues to prevail in regard to the fall trade in leading manufactures, but there is no indication of any speculation, and all seem to be determined to adhere to the cautious policy which has been the leading feature of the past season. There continues to be an active movement in wool. Sales are larger than last week, being more than four million pounds. The money market has become easier, but funds are still fairly employed.

From Providence, R. I.: The manufacturing jewelry interest looks more promising than in the spring, though it is full time for a movement for the fall season, and the July trade is about up to the average. The spring season's business was not satisfactory, though June, which is usually a dull month, was found to be fairly remunerative to such firms as sent their travelers west in search of a market. There is more doing at present in plated than in gold work, which is the last to improve at this season. Collections, which have been quiet all the year, have not materially improved.

From Rochester, N. Y.: Trade continues very quiet. Jobbers generally report a light business.

From Philadelphia, Pa.: General trade has been only moderately active, but the feeling in commercial circles is more hopeful, and the outlook is considered good for a satisfactory fall season. The telegraphers' strike has been an impediment to business in many lines, noticeably in the speculative markets.

From Cincinnati, Ohio: The influence of the embargo upon the electrical communication is becoming more effective, and there is growing dissatisfaction among the business community. The usual market reports of produce meet with little delay, but accumulation of business retards and even prevents the sending and receiving of important messages relative to business. Notwithstanding this adverse influence and the dullness incident to this season, there is a more confident tone prevailing in various branches of trade and industry. The movement of general merchandise is moderate.

From Cleveland, Ohio: In general merchandise the volume of business for July has been fairly satisfactory, and merchants are anticipating a good fall trade.

From Detroit, Mich.: General business quiet. Collections are rather slow but an improvement is looked for after harvest.

From Louisville, Ky.: Trade exhibits a gradual revival. All business has fully started in most jobbing lines and with encouraging prospects. The Southern Exposition opens next week, and salesmen write that there will be an unusually large attendance of country merchants to make personal selections of fall stocks. Money is quiet and comfortable at 7 per cent. The grain trade is employing less money than usual at this period. Exchange firm at 80c. premium.

From St. Louis, Mo.: General trade is better if anything than last week, and is remarkably good for the season. Money is very active on a miscellaneous demand, and rates have advanced to 7 per cent. on call, and 9 to 8 on time loans. New York exchange is 90c. premium, and prime commercial bills are quoted at par.

From Kansas City, Mo.: No general activity is yet manifest, but the condition of trade is healthy and a heavy fall business is expected. Collections fair.

From Des Moines, Iowa: Money firm; bank deposits small. Collections show trade in all lines dull. Weather seasonable.

From Chicago, Ill.: There is no change in Western Union stocks; all classes of business men are using the Postal telegraph in preference, as it does business more promptly than any other lines. If the strike continues it is likely to soon affect other branches. The feeling on change is bitter against the Western Union.

From Peoria, Ill.: General trade is still quiet in most lines.

San Francisco, Cal.: Fears are entertained about the Oregon trade. That state is experiencing its first dry season for the past ten years.

From Baltimore, Md.: Business is gradually improving, and the general outlook for the fall trade is fair.

From Richmond, Va.: Business in all lines is improving.

From Norfolk, Va.: The excessive heat largely interrupts trade. Retail departments seem to be doing a fair business generally. The influx of strangers bound to the seashore keeps up considerably.

From Wilmington, N. C.: General business is quiet. The dissatisfaction about interrupted telegrams increasing. The weather is hot.

From New Orleans, La.: General business is considerably interrupted by the telegraphers' strike. Little doing in breadstuffs or provisions outside of small hand-to-mouth business. Want of telegraphic news entirely checks speculation in these articles, and also stops the small business in grain. Prospects of all lines of trade are very good for a large fall trade. Cottonseed products are very dull.

From Galveston, Tex.: Weather has been hot with occasional showers. In view of the prospective cotton crop the outlook for a large fall trade is very favorable. Jobbers report trade much more active for the past few days.

From Nashville, Tenn.: Jobbers are doing a fair trade this week on orders.

INDUSTRIAL.

The industrial situation throughout the country remains practically as reported last week. At certain points, as in Boston, Philadelphia and elsewhere, there has been a moderate revival from the stagnation of two months ago, and there is an improved demand for labor, skilled and unskilled. The strike of the operators belonging to the Telegrapher's Brotherhood continues, with no change so far as the issues between the Western Union and Baltimore & Ohio companies and the Brotherhood are concerned. Both sides are apparently as confident of ultimate victory as they were a week ago The recognition of the Brotherhood and arrangement of difficulties between the Rapid Telegraph Company and the striking operators is, of course, a vantage ground gained by the latter, but is not likely to have much, if any, real bearing on the struggle. The cloak-making strikers at New York have secured concessions from some employers.

INDUSTRIAL FEATURES.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: The industrial branches are all working on full time, and demands for machinery and building material are very large.

From Boston, Mass.: In the manufacturing districts labor is well employed, and in some departments skilled hands are scarce. Aside from the striking telegraphers there are very few idlers.

From Cincinnati, Ohio: The leading industries are fairly active and larger orders are being placed for a number of manufactured articles, but the present distribution of most commodities is small.

From Grand Rapids, Mich.: The most severe blow western Michigan has yet sustained was caused Thursday by the carrying off by floods of upwards of 100,000,000 feet of logs, held in the booms at this place, which carried with them three railroad bridges. A fourth is in great danger. About 30,000,000 feet of the logs belonged to Grand Rapids firms, the balance being held by firms at Grand Haven and Spring Lake. Manufactories and mills are compelled to shut down on account of high water.

From Savannah, Ga.: More buildings are being erected now than for some time past, and real estate is having a boom, with plenty of work for contractors.

From Cleveland, Ohio: The activity heretofore noted in building operations continues, and lumber dealers are having an active summer's trade.

BREADSTUFFS ABROAD.

The sudden, and to many persons unlooked for, change of front in the British wheat market of late has a meaning which lies considerably deeper than "a natural reaction" from the prolonged weakness, as has been suggested. To begin with, since May the United Kingdom has been importing enormous quantities of Russian and Indian wheat, the amount so received being unprecedented. This, with the favoring weather to the growing wheat in the United Kingdom and fairly good promise from the wheat-growing localities on the continent and elsewhere, had a steadily weakening effect on prices of that cereal in Mark Lane, and reactively on prices of wheat in the United States. Some ten days or more ago, however, crop reports from European countries proved of a less favorable tenor. Austro-Hungary, it is now believed, will not have 3,000,000 quarters of wheat to export as expected. It has rained there considerably, and complaints of rust are made. This paves the way, of course, to fears of a worse condition than as yet exists. In Italy, also, wheat has suffered from rust. One-third less acreage was sown than last year, it is stated; which complaints, if true, will unquestionably send Italy into the market as a heavier buyer than expected. Less serious accounts of the wheat have come from France and Russia, but the weather in the United Kingdom has of late been quite unsettled. In addition to these causes of a firmer wheat market abroad comes the report of six months' receipts of breadstuffs in the United Kingdom for the first half of 1883, and a comparative examination of said receipts, together with stocks of breadstuffs on hand. It will be recalled that the receipts at London during the latter three of the six months ending June 30 last were unexampled. Yet it appears that the excess of wheat (and flour reduced thereto) amounted to but 208,574 quarters, or about 1,668,592 bushels. The excess of receipts of breadstuffs in the United Kingdom during ten months ended June 30 last, as compared with a like period in 1881-82, was equal to 2,994,247 quarters of wheat, or to 23,953,976 bushels. But the relatively small proportion remaining on hand shows a remarkable increase in consumption per capita. There is no good reason to doubt that these and kindred considerations were the prime movers in the improved British and foreign breadstuffs markets where such changes have been noted. It is now reported that the yield of wheat in the United Kingdom will be less than has been expected. Late mail advices from London are contradictory on this point.

The quantity of grain on passage for the United Kingdom and the continent on July 25, as reported by cable, was as follows:

	For United Kingdom.	*For continent.*	*Total.*
Wheat, bushels	12,600,000	3,840,000	16,440,000
Maize	1,840,000	1,280,000	3,120,000
Previous week—			
Wheat, bushels	13,200,000	3,280,000	16,480,000
Maize	2,320,000	1,280,000	3,600,000
Comparison—			
Decrease wheat, bushels	600,000	*560,000	40,000
Decrease maize	480,000	... ..	480,000
On passage same week '82—			
Wheat, bushels	16,800,000	4,480,000	21,280,000
Maize	1,840,000	400,000	2,240,000

* Increase.

AMERICAN WHEAT MARKETS.

As has been the case with most speculative markets, and to a large extent with all commercial exchanges throughout the country, trading in wheat has been seriously curtailed during the past week, owing to lack of ready telegraphic communication. A somewhat surprising feature has been the forbearance with which operators and merchants on 'change generally have withstood the unusual interruption without more loss than they have sustained, and without a very much greater complication of the business interests of the commercial community generally. Wheat has not fluctuated much, that is it did not during the earlier portion of the week. It sagged away 1c., then grew firmer, then fell away once more. All sorts of rumors and occurrences constituted the alleged causes thereof. The cholera abroad, which was to obstruct for the time the Suez canal, and the storms in the west, with continued cold, did a little in the way of advancing prices. On the other hand, free selling at the west at one time let quotations down again. On the whole a steadily firm British wheat market was felt as much as any other influence. If anything, the crop reports received during the week were in favor of the short interest. The trouble arising from the difficulty of receiving quotations from the west was intensified by the unreliability of many of those which did get through. During the latter part of the week, however, the effect of this drag upon operations was in part overcome, special efforts having been made by the Western Union Company to render more efficient service to the Exchange. Very comprehensive returns of the yield of wheat in Minnesota to the *Pioneer Press* of St. Paul, on the 25th inst., are said by that journal to indicate the certainty of a crop equal to last year's, and that it may reach 35,000,000 bushels. Special advices to BRADSTREET'S from San Francisco say that late reports point to a probable crop of wheat in California amounting to 53,000,000 bushels. Both of these reports are in excess of BRADSTREET'S estimates made July 6.

The receipts of wheat at tide-water for the week ending July 21 increased to 894,048 bushels from July 14, when they were 655,256 bushels. The exports from the Atlantic ports for the week ended July 21 amounted to 775,477 bushels, against 584,900 bushels July 14. From September 1, 1882, to July 21, the exports of wheat from the Atlantic ports were 62,547,277 bushels, against 43,071,449 bushels in a corresponding portion of the preceding year, a gain of 19,475,828 bushels.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended July 21 amounted to 606,863 bushels, against 486,166 bushels in the preceding week, and the shipments to 849,141 bushels, against 528,537 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) July 21, as against the preceding week, showed a decrease of 421,812 bushels.

The course of the wheat market at New York and Chicago during the past week, has been as follows:

AT NEW YORK.	*July.*	*Aug*	*Sept.*	*Oct.*	*Nov.*
July 21	$1.14¾	$1.15⅞	$1.18½	$1.20½	$1.22¼
July 23	1.14	1.14⅝	1.17¾	1.19⅜	1.21⅜
July 24	1.14¾	1.15	1.17¾	1.19½	1.21⅝
July 25	1.14⅜	1.15¼	1.18½	1.20⅜	1.22⅜
July 26	1.14¾	1.15	1 17¾	1.19¾	1.21⅝

1 P. M. — AT CHICAGO. —	*August.*	*Sept.*
July 21	$1.02¾	$1.05
July 23	....	....
July 24	1.02	1.04¼
July 25	1.03⅛	1.05⅜
July 26	1.02¼	1.04⅜
July 27	1.02⅝	1.04⅜

Wheat options Friday opened weak and ½ @ ¾c. lower, subsequently ruled steadier with a recovery of ¼ @ ⅜c., closing very firm at the improvement. Exporters very quiet; city millers buying only for actual wants; speculation moderate.

INDIAN CORN.

During a portion of the week Indian corn has fluctuated in strict sympathy with prices of wheat, although having on the whole enjoyed a noticeable export demand, and several lots having been sold for export it went relatively higher until yesterday. While wheat was dull among foreign buyers, corn was in some request. None of the latter had been posted in some days (so reported on Thursday), which naturally aided the incipient advance. The storms at the west and the prolonged rain and lower thermometer had an influence on prices, but manipulation of speculators, rumors of corners and no corners, and a slightly increased demand had their natural effect without reference to the probable size of the forthcoming crop, which present indications warrant in placing at not less than 1,700,000,000 bushels.

The receipts of Indian corn at the Atlantic ports for the week ended July 21 were 1,505,942 bushels, against 1,433,207 in the preceding week, while the

exports from the same points amounted to 984,693, against 1,541,987 bushels. From September 1 last to July 21 the exports of Indian corn were 41,603,306 bushels, against 25,465,381 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, July 21, had creased 130,858 bushels as compared with July 14. The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending July 21, were 1,853,518 bushels, against 1,599,240 the week preceding, and the shipments were 1,526,361 bushels, against 2,063,188 in the preceding week.

The closing prices of Indian corn at New York and Chicago for the past week were:

	At New York.				Chicago, 1 p.m.	
	July.	Aug.	Sept.	Oct.	Aug.	Sept
July 23	.59½	.61½	.62	.62½	.51	.50¾
July 24	....	.61¼	.62	.62⅝	.51¼	.50¾
July 25	.61	.62	.62¼	.63	.51⅞	.51⅜
July 26	.63	.64	.63⅞	.64⅜	.52⅛	.51⅞
July 27	.62¾	.63½	.63	.63½	.51¾	.50⅜

Corn—spot lots Friday varied little in prices, closing weak. July and August sold down 1½@1¾c., and closed heavy; later deliveries ½@1c. lower. Export and jobbing trade demand moderate. Light speculative business reported.

The closing prices of breadstuffs in New York last evening, as against those of the Friday preceding and the corresponding date last year, were as follows:

PRICES OF BREADSTUFFS IN NEW YORK.

	July 20.	July 27.
No. 2 flour	$2.40 @3.35	$2.40 @3.35

Total bushels	35,012,082	35,359,876	18,857,380	39,334,545

THE BREADSTUFFS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Speculation in grain has been almost at a standstill in consequence of the interruption of telegraphic communication by the strike. Exporters have had more orders, but mostly limited—too low for business. Stocks are very small but receipts are increasing. Flour is more active, with a hardening tendency on fresh-ground old wheats.

From Cincinnati, Ohio: Receipts of new and old wheat have been heavy, but under an active shipping and local milling demand prices have ruled higher. A large part of arrivals of new wheat have graded No. 2. Corn has been heavy and lower. Oats close easy and irregular. Rye dull. Flour has sympathized with wheat, but closes easier.

From Louisville, Ky.: Farmers are holding back and refusing dealers' offers of 85c. per bushel at the country stations, hence but little new wheat is received. The grain trade is dull, buyers and sellers being apart.

From St. Louis, Mo.: Wheat is in large receipt, mostly new crop, and very active at sharp advances. Corn receipts are small, and sales are limited, though prices are advancing; an export movement of corn has started. Oats have broken downward under heavy receipts.

From Chicago, Ill.: Wheat quiet; rather weak; prices chiefly supported by the storm, which induces short sellers to cover trades; there is scarcely any shipping demand; receipts of new wheat are slowly increasing, and would rapidly enlarge with good weather. Corn is arriving freely; shipments are moderate, but the demand to cover shorts for July and August gives sellers the advantage; cash and July are ¾c. premium over August; receipts would increase and prices decline with good weather. Oats are weak; cash are at the lowest price of the year; the indications are that the so-called July corner is broken; receipts liberal; stocks increasing.

From Milwaukee, Wis.: The markets are weak, but prices are sustained by reports of damage, and higher figures expected next month, when the movement of spring wheat is generally light.

From Baltimore, Md.: The favorable advices from abroad has strengthened the grain market, and southern wheat advanced 1c.; western is firm, and prices have a tendency to advance. Corn is in good demand, particularly southern lots, which find ready sales; western rules higher. There is an active inquiry for fresh-ground flour, but other qualities are dull.

From Savannah, Ga.: Grain continues steady and the demand good for choice lots.

From Wilmington, N. C.: The corn crop is encouraging. Grain is firm. Breadstuffs are steady.

From Nashville, Tenn.: The flour trade is local and dull. Corn is in fair demand at full prices. Wheat in good demand.

From New Orleans, La.: Fancy and choice flour is scarce and in demand.

THE GROWING GRAIN CROPS.

[By Telegraph to BRADSTREET'S.]

From Des Moines, Iowa: Crop prospects continue favorable.

From Louisville, Ky.: Crops of hay and oats will give large yields. The weather is perfect for corn, which has gained strongly. Wheat is threshing out light and the yield will not exceed recent short-crop estimates.

From Milwaukee, Wis.: Heavy local rain-storms in this state have done some damage to the grain crop and delayed the harvest, which has commenced, but the general outlook is not changed materially. Wisconsin will have more wheat than in 1882; Minnesota about as much, and Dakota more, provided the weather conditions remain unchanged. Heavy rains do little damage unless accompanied by high winds; these, fortunately, are not very extensive.

From San Francisco, Cal.: New wheat comes forward slowly. Prices are steady at the advance, with no material change in the harvest reports. Harvesting is progressing in Oregon. The best estimates place the surplus about equal to last season. It will probably fall below.

PROVISIONS.

The interruption to communication between packing points and New York kept the market here very dull and weak. Such quotations as came straggling over the wires operators were afraid to base transactions upon, and the speculative dealings were, of course, very much restricted. Prices of both pork and lard sagged off and recovered again. On Wednesday there was a noticeable advance in prices of both pork and lard at the west, which was reflected here but in part. There was no remarkable explanation of the higher figures except that of manipulation—it has been suggested in order to make a market to get out. The receipts of hogs at the west continued very much heavier than at the corresponding time last year; prices were easier abroad. Exporters were not doing anything and the consumptive domestic demand seemed to have been checked as compared with a short time previous. The reports of leading hog products from the principal Atlantic and gulf ports during the week ended July 21 were, with comparisons, as follows:

	Pork, barrels.	Bacon, pounds.	Lard, pounds.
New York	3,272	3,716,134	7,184,245
Boston	25	1,255,380	5,846,046
Portland	....	....	....
Montreal	829	605,000	970,200
Philadelphia	150	1,500,000	259,700
Baltimore	84	4,155	....
New Orleans	25	2,000	....
Totals	4,385	7,082,669	14,260,161
Previous week	4,057	5,760,269	12,789,769

The total quantity of exports of hog product from the above-mentioned places from November 1, 1882, to July 21, 1883, were as follows:

	1882–83, pounds.	1881–82. pounds.
Pork	34,188,600	39,144,600
Bacon	302,699,108	312,144,947
Lard	193,118,055	191,926,533
Totals	530,005,763	543,186,080

Prices of lard and spot mess pork at New York during the past week were as follows:

	July 21.	July 23.	July 24.	July 25.	July 26.	July 27
Lard, Aug.	9.20c.	9.12c.	9.16c.	9.21c.	9.14c.	9.10c.
Pork, spot mess.	$16.00	$15.75	$16.00	$16.00	$15 87½	$16.00

PROVISIONS AND LIVE STOCK.

[By Telegraph to BRADSTREET'S.]

From Nashville, Tenn.: The cattle trade is only fair.

From New Orleans, La.: The supply of provisions is small and offering at low prices.

From Wilmington, N. C.: Meats are firm.

From Philadelphia, Pa.: There is a good jobbing trade in hog products, and the market is on the whole firmer than last week, though there is a good deal of irregularity, reflecting the frequent changes in Chicago. Beef hams have sharply advanced, owing to scarcity. Dairy produce is steady with good demand for extras, but supplies mostly below that grade.

From Kansas City, Mo.: Provisions rather slow, prices steady. Cattle receipts increasing; market for shipping grades firm and active. Hog receipts about the same; prices very irregular. Money rates unchanged.

From Cincinnati, Ohio: While there is little animation in the provisions interest a firm feeling prevails as there is no bonded pork to speak of, light stocks of lard and scarcely 6,000,000 pounds of meats, all cuts, in Cincinnati. Hogs have sold readily, mainly for shipment, and the market closes strong.

From Chicago, Ill.: Pork is dull. There is no confidence in prices. Trading is speculative between brokers. The fear of yellow fever prevents buying to hold. Lard is steady, and prices are chiefly supported by buying to fill short sales. There is little shipping demand. Short rib sides are firm under good demand from shorts who fear a corner. Other meats are in good demand for consumption and to fill export orders.

From Louisville, Ky.: Provisions are steadier; the trade is moderate.

From St. Louis, Mo.: Provisions all tending upward and are firm. Cattle are steady and active, and hogs are advancing on a rather light supply. Horses and mules are in lively demand again at good values with increasing supplies.

PRODUCE.

[By Telegraph to BRADSTREET'S.]

From Cincinnati, Ohio: Fruits and vegetables are in abundance. Dairy produce is easy. Staple food articles are quiet and barely steady.

THE NEW YORK DRY GOODS MARKET.

The conservatism shown by buyers since the opening of fall trade still continues. There have been many new arrivals during the week and the market is full of representatives of out-of-town houses; their purchases, however, have not been large, though many have made good general selections. The extensive sale of 11,000 packages of cotton goods by Wilmerding, Hoguet & Co. had its effect upon the market. It is estimated that not less than one thousand buyers were present at one time. Bidding was spirited, prices satisfactory, and not only was the entire catalogue disposed of but over 1,000 duplicate packages in addition. The sale has proved the firmness of the cotton goods market, the prices, in many instances, being in excess of what was anticipated.

Woolens, cloakings, silks, satins and dress goods were most in demand during the week, and business is reported as fairly satisfactory. The jobbing trade is in its usual quietness at this season, and retailers say they are not troubled with too much business.

THE BRITISH DRY GOODS MARKET.

[By Cable to BRADSTREET'S.]

From London: At Manchester the cotton market is quiet and prices are maintained, but buyers are waiting a further decline in yarns. There is small inquiry at Liverpool. Spot sales are fair. Futures are weak on American advices.

THE DRY GOODS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: The dry goods trade has shown a decided improvement on the week previous.

From Boston, Mass.: Nothing of consequence has been done by commission merchants the past week, as the attention of the trade was altogether centered in the large auction sale of cotton goods which took place in New York on Thursday. Agents are satisfied with the reception their goods have met so far, and look for a healthy movement when the distributive trade is fairly under way. Jobbers have started their western salesmen, and expect some orders next week. The retail summer trade holds up well.

From Detroit, Mich.: In dry goods business is light, purchases made only to keep up assortments.

Rochester, N. Y.: The dry goods trade both wholesale and retail is light, but no more so than is usual at this season; fall orders except in underwear are few.

From Providence, R. I.: The print cloth market is quiet and sales are reported light; 64s are quoted at 3½c. and 56x60s at 3 1/16c. There are about 155,000 pieces on hand.

From Philadelphia, Pa.: There has been a fair inquiry for autumn stocks at first hands, but buyers have been operating chiefly in small lots. There is no tendency to speculation, but the prospects are favorable for a good fall trade. Jobbers have had a light week.

From Pittsburgh, Pa.: There has been considerable improvement in the dry goods trade since last week, and the volume of business is in excess of same period last year. Collections generally satisfactory.

From Cincinnati, Ohio: The movement in dry goods has been only moderate, but a more confident feeling has prevailed. The prominent feature is the good demand for Kentucky jeans.

From Columbus, Ohio: Trade in dry goods reported somewhat better than last week, but a little slowness is noticed in collections from some points. Jobbers do not expect to do much until about the middle of August, when they get their fall goods.

From Chicago, Ill.: Dry goods are meeting an average order sale. Staple lines are more active than last week. Millinery, notions and furnishing goods are slow; boots and shoes dull; leather in fair request, and prices steady.

From Louisville, Ky.: Dry goods are steadily improving, and preparations are making for a heavy season.

From St. Louis, Mo.: Dry goods continue in fair trade, with no new features.

From San Francisco, Cal.: Dry goods are without any improvement, but transactions this month equal last season's. A very active fall trade is anticipated.

From Peoria, Ill.: There is no change to report.

From Baltimore, Md.: Dry goods jobbers are now ready for the fall trade and sales are improving. Profits in this line during the past season are said to have been considerably cut into by out-of-town competition, and results in some cases have not been as satisfactory as was at first expected.

From Richmond, Va.: The dry goods trade is good for the season.

From Wilmington, N. C.: Dry goods are dull.

From Savannah, Ga.: There is no change to note in dry goods. The fall trade not yet fully opened.

CLOTHING:

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The clothing trade is just beginning to start. Salesmen are out and a few orders have been received, but dealers do not look for much activity until about the second week in August.

COTTON.

This week our cotton market report is much abbreviated, owing to the telegraphers' strike, which has prevented the receipt of the usual telegraphic information from southern ports and interior towns.

The market for spot cotton at New York for the week shows no material change. Dealings continue very light and quotations have remained unchanged, closing last night at 10c. for spot middling uplands. The sales for the week have been as follows: For export, 1,014 bales; for consumption, 2,150; and for speculation 957. The total sales foot up 4,121 bales, against 2,311 last week. Deliveries on contract amount to 700 bales.

Below will be found the closing quotations for prompt delivery uplands at New York, on Friday evening, as compared with last week and the corresponding week last year (quotations are based on the American standard of classification and on cotton in store, running in quality not more than half a grade above or below the grade quoted):

	This week.	Last week.	Last year.
Ordinary	7 1-16c.	7 1-16c.	10 3-16c.
Strict ordinary	7½	7½	10¾
Good ordinary	8 15-16	8 5-16	11 9-16
Strict good ordinary	9	9	12
Low middling	9½	9½	12 7-16
Strict low middling	9 13-16	9 13-16	12 11-16
Middling	10	10	12⅞
Good middling	10⅜	10⅜	13¼
Strict good middling	10⅞	10⅞	13½
Middling fair	11⅜	11⅜	14
Fair	11⅞	11⅞	14¾

STAINED.

	This week.	Last week.	Last year.
Good ordinary	6½	6½	9¾
Strictly good ordinary	7 5-16	7 5-16	10¼
Low middling	8	8	11 7-16
Middling	9⅛	9⅛	12 7-16

The market for spot cotton closed quiet.

The future market for the week past has presented no new feature worthy of mention. Trading has been, as for some time past, mostly for local account, and while prices have as a rule advanced in the early part of the day, they have at the closing shown but little change. The closing prices last night show an advance of 11 points for near months and 21 points for later ones from those of one week ago.

The week's sales sum up 551,000 bales against 345,000 bales for the same week last year.

The following table shows the closing quotations for futures at New York Friday evening, com-

pared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
July	10.05	9.97	12.80
August	10.06	10.01	12.76
September	10.09	9.94	12.53
October	9.96	9.79	11.93
November	9.91	9.70	11.74
December	9 93	9.72	11.74
January	10.00	9.79	11.85
February	10.11	9.90	11.97
March	10.22	10.01	12.09
April	10.33	10.12	12.21

The market for futures closed steady.

Below will be found the receipts for each day of the week ending Friday, July 27, at eleven leading ports, as compared with last week and the same week last year:

	Sat.	*S. & M.*	*Tues.*	*Wed.*	*Thurs.*	*Fri.*
Galveston	832	701	82	718	....	....
New Orleans	122	262	913	293	219	....
Mobile	2	1,241	2	....	....	....
Savannah	27	10	21	21	35	46
Charleston	27	33	14	24	....	....
Wilmington	2	....	5	....	1	1
Norfolk	11	127	356	258	....	86
Baltimore	6	253	110	....	140	146
New York	....	6	....	....	7	10
Boston	....	....	....	....	....	233
Philadelphia	....	....	....	51	25	....
Totals	1,029	1,633	1,503	1,365	....	....
This day last week	1,429	1,921	995	1,971	1,723	961
This day last year	838	892	1,620	500	538	333

The market at Liverpool for prompt delivery uplands has been steady, with a moderate inquiry, which was freely supplied. Quotations have remained unchanged during the week, and closed last evening at 5 7/16d. for middling uplands. The future market has been dull and firm, and closed with quotations an average of 5 points higher for near months and 7 for later ones.

Below will be found the closing quotations on Friday of low middling uplands as compared with last week and the corresponding week last year:

	This week.	*Last week.*	*Last year.*
July	....	....	7 2-64d.
July-August	5 29-64d.	5 23-64d.	7 3-64
August-September	5 31-64	5 25-64	7 1-64
September-October	5 32-64	5 26-64	6 55-64
October-November	5 33-64	5 25-64	6 44-64
November-December	5 32-64	5 25-64	6 41-64
December-January	5 33-64	5 25-64	6 42-64

The sales for the week at Liverpool were 54,000 bales (of which 42,000 were American), against 90,000 (of which 50,000 were American) last year. The sales for export were 2,700 bales, against 4,700 bales last year. The sales for speculation were 340 bales, against 19,500 bales last year. The amount forwarded was 4,700 bales, against 5,200 bales last year. The stock in port is 955,000 bales (of which 697,000 are American), against 736,000 bales (of which 426,000 were American) last year. The total imports for the week were 24,500 bales (of which 9,900 were American), against 10,500 bales (of which 5,700 were American) last year, and the amount afloat 184,000 bales (of which 40,000 are American), against 231,000 bales (of which 25,000 were American) last year.

The Manchester market closed steady.

The Havre market closed steady.

COTTON MARKETS.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: The week's cotton movement has been small. Spots are unchanged. Futures have varied as follows: July advanced 10 points; August declined 7; September advanced 3; October, 9; November and December, 7. The rain of the past few days has abated the uneasiness about drouth in some sections. The weight of cotton in sight is regarded as sufficiently heavy to soon further depress prices unless prevented by manipulation. A tender of August deliveries slightly weakened near months to-day, and caused more inquiry for money.

From Savannah, Ga.: The cotton market still continues dull.

From Cincinnati, Ohio: Cotton has met an increased demand from foreign as well domestic spinners, and a firmer tone has prevailed.

From Louisville, Ky.: Cotton is quiet and steady, with improved inquiry at reduced quotations.

From Baltimore, Md.: The cotton market has quieted down considerably, but prices remain unchanged.

From Philadelphia, Pa.: Manufacturers are buying only for actual wants, and the market closes steady, but dull.

From Providence, R. I.: The cotton market is quiet and steady, sales being light. Middling uplands are worth 10⅜c. and middling gulfs 10⅝@10¾c. The stock on hand is fair for this time of year.

From Wilmington, N. C.: Cotton steady; stock and receipts small.

WOOL.

There has been continued activity but no excitement in the seaboard wool markets during the past week. The comparatively low rates ruling on many descriptions have arrested the attention of buyers, and some good sized lines have changed hands, but the demand has been freely met and in some cases further slight concessions have been made. There is no tendency to improvement in the price of any class of stock. Supplies are coming forward freely from all points, and liberal assortments are now available to buyers in all the eastern markets. The position at primary points continues very strong. In large sections of Ohio, Pennsylvania, Michigan, Illinois and West Virginia the clip of washed wool has passed out of growers' hands, either by sale direct to manufacturers and eastern dealers or to local operators who are, in most cases, holding for an advance over the rates paid to farmers. The prices realized in the country, as a general thing, have been very fair, considering the position of affairs in the distributing centers. There is still a good deal of uncertainty concerning the outlook for wool, but confidence is gaining ground, and the general feeling in the markets is steadier and more hopeful.

AMERICAN WOOL MARKETS.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The wool market continues active, but prices are only steady. The sales of the week amount to 4,030,300 pounds, and include 264,000 pounds Ohio and Pennsylvania at 36@37c. for X, and 38@40c. for XX and XX and above; large sales of Michigan X at 34@35c.—principally at 34c., which is a fair quotation for good average lots. Combing and de laine fleeces are in demand and have been selling at 38@40c. for fine Michigan and Ohio de laine, and 42@44c. for fine and No. 1 combing. Unwashed fleeces are in demand, and further large sales of Texas, territory and western unwashed, amounting to upward of 1,500,000 pounds at a wide range of prices, but principally from 22@28c. per pound for fine and medium grades. California spring wool has been in fair demand at 20c.@30c. per pound, as to quality and condition. Pulled wools remain the same and have been selling at 40@42c. for choice eastern and Maine supers, and 20@38c. for common and good. In foreign wool the business has not been to any extent, and comprise 77,000 pounds Canada combing at 32@32½c., 22,000 pounds New Zealand at 41c., and small lots of Cape, Montevideo and Mediterranean carpet.

From Philadelphia, Pa.: The week's sales aggregate 1,300,000 pounds of all kinds—a fairly good trade. Values have not materially changed, but the advantage has been with buyers.

From Cincinnati, Ohio: Wool has remained easy under a large supply, but local and other western mills are buying more freely, and the demand from eastern manufacturers is fair.

From Louisville, Ky.: Wool is quiet and steady.

From Savannah, Ga.: Wool and hides show little or no activity, and receipts have been very light.

IRON.

There is not much change to record in iron during the past week. Pig remains about as last quoted, viz., special American brands at $23@23.50; No. 1, American foundries extra, $23, and No. 1, $22. In a similar manner do No. 2 and forge irons grade about the nominal figures therefor, $20 and $19. Prices are still firmly held, but as yet there is no rush to buy. The fact that prices have sustained no advance is evidence of no marked gain in request, for, at the existing firmness in rates, any noticeable improvement in demand, followed by new orders, would be reflected at once in higher prices. Various western pig iron centers have felt the late improvement in American pig iron as recorded in special telegrams to BRADSTREET'S given below. Furnaces are not anxious to contract for future delivery at present rates, and the fair order business now doing is mainly for immediate wants. At the west the southern iron trade report charcoal irons rather slow, softening irons in fair demand, and forge irons firm but not active owing to the suspension of work at the nail mills. The advance in rates at the west, in some localities, evidently does not mean as much as at New York, for a leading Cincinnati authority reports that while the features are about the same as a week ago, with a liberal amount of business, buyers get the iron they need at prices which represent no advance. The number of pig iron furnaces in the United States in blast July 1, 343, is less than the total since July 1, 1879, when the total was but 277. July 1, 1880, the total number in operation was 413, July 1, 1881, it was 437; July 1, 1882, it was 434, and on the 1st inst., 91 less than the total at the corresponding date 1882. The number of furnaces in and out of blast at the dates named below were as follows:

	Jan. 1, '83.		*April 1, '83.*		*July 1, '83*	
	In.	*Out.*	*In.*	*Out.*	*In.*	*Out.*
Charcoal	123	128	98	153	111	139
Anthracite	169	64	156	78	124	107
Bituminous	138	88	121	103	108	116
Totals	430	280	375	334	343	362

Scotch pig iron continues very firm at unchanged prices. Freights from Glasgow to this port are 8s. @ $10s., which at prevailing rates for Scotch pig in this market prevents heavy importations. The arrivals during the week at this port will not aggregate over 1,000 tons and the sales to arrive have been very small. During August, the trade in this line as well as dealers in and importers of American pig look hopefully for a revival in the demand, which will in large part make good the losses resulting from the stagnancy of the year thus far. There have been a number of orders given out since July 1, by car, bridge and other constructors, though more largely at western centers than at New York. This has tended to stiffen some departments of the manufactured iron market, and the outlook for the remainder of the year in these lines is more encouraging. There are no new features to report in bar iron or steel rails.

THE BRITISH IRON AND OTHER INDUSTRIES.

[By Cable to BRADSTREET'S.]

From London, Eng.: Pig iron is moderately firm. Cleveland stocks are being slowly reduced. Ship building and engineering are brisk.

THE AMERICAN IRON MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: Pig is strong, with a good demand for current requirements. Bessemer is very dull. Merchant bar is moving fairly in small lots at steady prices. Nails active. Plate in fair request, but at low prices. Sheet is in steady demand. There is a good run of orders for steel rails for fall and winter delivery.

From Pittsburgh, Pa.: There have been no new developments in the iron market. Many of the mills are repairing and preparing to take stock so that business is at a stand still, but the outlook is as good if not better than at the same time last year. There has been no change in price, but a stiffer feeling has prevailed among sellers for the past ten days, and it is believed better prices will be obtained in the near future. The stock of the leading sizes of nails is about exhausted and prices are well maintained; as soon as fall trade begins prices will be likely to stiffen.

From Cincinnati, Ohio: The demand for pig iron has been fair and the situation improved, but prices are unchanged. Manufactured iron is dull and easy, selling under card rates.

From Cleveland, Ohio: A trifling improvement is noted in the pig iron market so far as sales are concerned, but prices continue unchanged and weak.

From Chicago, Ill.: Hardware and heavy iron goods selling about the same as last week. Bar iron and nails steady, and stocks moderate. Pig iron rather more active; stocks smaller than at the opening of the month, and held with more confidence; dealers predict increasing demand as year advances. Production of iron ore in northern lake mines will show a heavy decrease from 1882.

From Louisville, Ky.: Iron and hardware have a better tone and are in fair demand.

From St. Louis, Mo.: Pig iron in much improved demand and very firm with a tendency to advance, and manufactured is selling well at unchanged prices. Nails are in small supply, strong and tending upward on account of the stoppage of the mills.

From Detroit, Mich.: In iron there is no advance in price, but the market is firm and the demand improving.

COAL.

Anthracite coal, while in a seasonably healthful condition, is moving into consumption with a moderate degree of rapidity only. The busy season is expected to arrive after August 1, and the all important question of an advance in price (nominal of course), to take effect at that date is still agitating coal-trade circles. By a nominal advance is meant one which none in the trade expects to realize inasmuch as the full July rates are as yet in existence more on paper than in fact. The question of the probable total production in 1883 still continues to excite a good share of attention. The official figures for the production of anthracite for the first six months of the current year are, respectively, 14,010,767 tons in 1883, against 12,567,851 tons in 1882, an increase during the first six months of 1883 of about 1,442,000 tons. The production during the first three weeks of July has been given in comparison with that in like weeks of July 1882, as follows:

	1883, tons.	*1882, tons.*
Week ending July 7	295,000	487,663
Week ending July 14	448,000	692,105
Week ending July 21	667,313	682,641
Total, three weeks' production	1,410,313	1,862,409
Preceding six months' production	14,010,767	12,567,851
Total, January 1 to July 21	15,421,080	14,430,260

From this it looks as if the unusually active business of the latter half of 1882 would have to be fully equaled if the production is to exceed the 30,000,000 tons as expected. Still the increased requirement due to the growth of the general demand, and including the extra western demand, may come to the rescue. In bituminous coals business continues quiet. There is nothing to report that is new.

COAL MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Providence, R. I.: The coal trade is quoted as fair, though the demand from families for winter supplies has not yet become brisk. The larger dealers of this section bought freely during the early spring, and, although at present are buying as much as the average, are thought to have purchased rather less than usual during the months of May and June.

From Chicago, Ill.: Coal is quiet, stocks large, and consumers buy rather slow.

PETROLEUM.

The week in the petroleum exchanges has, of course, been seriously cut into so far as dealings were concerned, owing to the lack of efficient as well as sufficient communication with the producing regions and other exchanges. Prices of pipe-line certificates remained stubbornly on their feet for a day or two after the strike, but Monday saw them go over. Tuesday there was a very slight improvement, but on Wednesday the market stiffened up and prices advanced, as compared with those at the close on Tuesday, 1⅝c. per barrel. Thursday saw considerable activity and 3¾c. per barrel advance. It was not due in any way to news from the producing regions unless it was owing to the rumored reduced production in Balltown and Cooper tracts. But inasmuch as the same rumor brought news of probable increased activity in Allegany and Bradford, it cannot be assumed that the leakings of the forthcoming monthly report of operations in reality excused the gain made. Recent advances in the price of refined and fairly liberal purchases by exporters give color to the belief that the bear crowd in the recent fight have reduced prices to where they wanted them, and that the market for crude now has its permission to advance prices. In any event it looks as if those controlling refined now looked for a higher range.

On Friday the market was exposed to the tender mercies of those who desired to possess oil, and prices advanced sharply. The latest information from the regions is to the effect that the total *new* production of petroleum obtained during the month of July will fall short of the June new production by about 1,000 barrels daily—the probable July daily new production being estimated at about 2,400 barrels, against about 3,400 barrels during June. It was not upon this, however, that the market advanced so actively. A number of brokers appeared possessed of a desire to buy. They acted upon it and prices advanced. There were some fluctuations, but, upon the whole, the past two days' advance has been very noticeable. Prices opened yesterday morning at $1.08¾, by eleven o'clock they had touched $1.09, and by twelve o'clock $1.10. At the close of the morning session the bid made was $1.10¾. Opening at 1:30 p.m. at the same figure, there was a slight reaction. At two o'clock the offer was $1.10¾. At the close yesterday the bid made was $1.08¾, against $1.06 at the close on Friday, July 20, an advance of 2¾c. on the week.

The following shows the fluctuations in prices of certificates of crude petroleum during the week ended last evening:

	Opening.	*Highest.*	*Lowest.*	*Closing.*
Saturday, July 21	1.06	1.06¼	1.03⅞	1.03⅞
Monday, July 23	1.03⅞	1.03⅞	1.01¾	1 01¾
Tuesday, July 24	1.02	1.03⅞	1.00⅝	1.02⅝
Wednesday, July 25	1.02¾	1.04⅜	1.02¾	1.04¼
Thursday, July 26	1.04¾	1.08⅛	1.04¾	1.08
Friday, July 27	1.08¾	1.11⅝	1.08⅛	1.08¾

Refined oil sustained an advance of ⅛c. on all grades late on Friday last, which was firmly maintained on Saturday, although few transactions were recorded. During the week there was considerable chartering of petroleum vessels for September. This is believed to indicate renewed dealings by exporters, and the conclusion is perforce reached that in their opinion refined is not to decline materially in the near future. On Thursday refined oil was again advanced, as is done in the majority of instances when crude improves in price, and a noticeable quantity of export business for future delivery, mostly for September, was reported. The business done in case oil was fair, and there has been a considerable trade in crude in barrels for continental, largely Mediterranean ports. The price of naphtha has been reduced. The quotations for certificates of crude petroleum and of petroleum products last evening, as against those at the close of the four preceding weeks, are as follows:

	June 29.	*July 6.*	*July 13.*	*July 20.*	*July 27.*
Certifi's, crude..	1.18	1.14⅜	1.08	1.06	1.08¾
Refined, 110°....	7¾	7¾	7⅜	7⅛	7⅛
Refined, 70°.....	7⅞	7⅞	7½	7¼	7⅝
Crude, in bbls...	7@7¾	7@7¾	6¾@7½	6⅝@7⅜	6½@7½
Case, plain.....	9⅜	9⅜	9⅛	8¾	9⅛
Naphtha.....	5¼	5¼	5¼	5¼	5

The exports of petroleum from the United States, crude equivalent, for the week ending July 21, was 13,743,695 gallons, against 9,411,535 in the preceding week. The total export from the United States since January 1 was 340,348,688 gallons, against 366,441,253 gallons in the corresponding portion of 1882, a decline in the current year of 26,095,565 gallons. The total exported from New York city during the week ended July 21 was 10,013,924, and during the year, to that date, 280,886,697, against 291,152,098 gallons in a like portion of 1882. The decrease in shipments in the year from New York alone, as compared with 1882, was 10,265,401 gallons (crude equivalent), or about 40 per cent. of the total decline recorded thus far in the year.

PETROLEUM ELSEWHERE.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: In petroleum some business is doing in cargoes for future shipment, but refiners are not doing anything, and the market is nominal.

OCEAN FREIGHTS.

Freight rates have ruled comparatively firm during most of the week. A few days ago the demand for even petroleum vessels was slack enough, but the scarcity of tonnage helped to stiffen the market and rates were well maintained. Last week there was considerable grain room, per steam engaged, but during the past week there has been less, owing to unstable prices of wheat and the growth of speculative manipulation at this port. Later in the week petroleum charters were more in request and rates were at full figure. Several August and September charters were contracted. The breadstuffs and provisions movement abroad has been very nominal, and an abundance of room for that class of commodities would have lowered rates at once.

OCEAN FREIGHTS ELSEWHERE.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: The supply of tonnage is small, and rates are well maintained both for grain and petroleum. There is a fair inquiry for oil charters, but very little demand for grain.

From Wilmington, N. C.: Freights—foreign firm; tonnage very scarce and wanted; coastwise inactive.

From Savannah, Ga.: Lumber very dull, with but little demand, and but few vessels are here to forward present contracts.

From New Orleans, La.: Freights are very dull.

HIDES AND LEATHER.

[By Telegraph to BRADSTREET'S.]

From Chicago, Ill.: Hides are arriving more freely and are steady.

From Louisville, Ky.: Leather is quiet and easy. Tanners complain of depression in heavy grades. Hides are firm and quiet.

BOOTS AND SHOES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: There continues to be a satisfactory movement in boots and shoes, and sales are fully up to the average. Shipments are on a large scale. The factories continue at work with full forces, and the trade generally appears in a prosperous condition.

WHISKY MARKET REPORTS.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Whisky is quiet, but with a firmer feeling. There are no distilleries running in this district. The entire stock of whiskies in Kentucky of all grades and ages is stated to be 48,000,000 gallons. Considering the probable stock of highwines in the Covington district, this leaves about two years' supply. On the present scale of computation it is claimed that there is $25,000,000 less of Kentucky capital tied up in whisky now than during the depression in 1871. Holders assert that the discussion and agitation of new revenue laws has harmed the trade more than the burden of stocks.

From Peoria, Ill.: Those distilleries which shut down for repairs are now running again.

From Cincinnati, Ohio: The production of whisky has been reduced to so low a point as to hold the market steady at $1.13 per gallon, but the demand is only moderate.

TOBACCO REPORTS.

[By Telegraph to BRADSTREET'S.]

From Baltimore, Md.: Receipts of Maryland tobacco continue large, and for all desirable samples good prices are obtained. Ohio grades are also in demand and prices firm.

From St. Louis, Mo.: Tobacco is very dull, and without any shipping demand.

From Louisville, Ky.: Leaf tobacco receipts are fair but smaller than last week, and white burleys are bringing high prices, and all grades are active and in sellers favor. The growing crop is reported in good condition.

From Cincinnati, Ohio: A weaker tone has been developed in leaf tobacco, under comparatively large offerings and a less active demand except for fine and fancy classes; but prices have been well sustained. Manufactured tobacco is dull.

NAVAL STORES.

[By Telegraph to BRADSTREET'S.]

From Wilmington, N. C.: Spirits of turpentine and rosins steady. Tar and crude turpentine firm.

From Savannah, Ga.: Naval stores are quiet, but steady; the stock on hand and on shipboard amounts to 8,571 barrels of spirits and 58,680 of rosins.

LUMBER.

[By Telegraph to BRADSTREET'S.]

From Louisville, Ky.: Lumber is in active demand and the building industries are briskly employed.

From Portland, Me.: The lumber business is active.

From Wilmington, N. C.: Timber, lumber and shingles are dull.

AMERICAN FISHERIES.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: The fishing business is good.

From San Francisco, Cal.: Salmon fishing on the Columbia river closes soon, with a prospect of last year's pack being equaled. Sacramento salmon are out of the market.

SPECIAL CALIFORNIA TRADE REPORT.

[By Telegraph to BRADSTREET'S.]

From San Francisco, Cal.: The supply of canned fruits is short in most lines. The grocery trade is fairly active and stocks are full. The honey crop in southern California is very short, owing to the failure of the pastures from drouth. San Bernardino county reports barely one-third of a crop, and Sacramento reports a failure, with a little chance for the better. Half the bees are being carried over till spring.

LOUISIANA SUGAR, MOLASSES AND RICE.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: The sugar crop is estimated at 241,000 hogsheads, weighing 303,000,000 pounds, compressed; 184,000,000 pounds of brown sugar and 118,000,000 refined and clarified. Average weight of hogsheads, refined, 1,300 pounds; brown, 1,200 pounds; clarified, in barrels, 300 pounds. The molasses crop, 15,700,000 gallons; average per barrel, 47 gallons. In making the crop 743 sugar houses used steam presses and 167 hand presses. The rice crop is equal to 187,000 barrels clean, weighing 43,000,000 pounds. The sugar market is quiet and steady. Molasses is nominal. Rice is steady.

LATE NEWS FROM JAPAN AND CHINA.

[By Telegraph to BRADSTREET'S.]

From San Francisco, Cal.: The China steamer brought 3,000 tons of merchandise, chiefly rice, tea, silk, nut oil and gunny. It is reported that warlike preparations at Shanghai have had a disquieting effect on business. Of the silk sold at Yokohama June 22, quality first, the hanks fetched $540; a decline of $50 was subsequently established. Imports are dull and quiet. The estimated increase of Japanese revenues for the year is nearly 9,000,000 yen.

MEMORANDA FROM THE JULY COTTON REPORT.

NORTH CAROLINA.

From Alexander county: The growth and appearance of the plant is very good where it has been worked, in some places it is stunted for want of being well worked. Its appearance is decidedly better now than at this time last year. Hear no complaints about insects or rust.

From Cabarrus county: Having had a fine season since our last report, cotton has grown very fast. The only hindrance has been too much grass in places.

From Camden county: The cotton crop throughout this section of the country is about two weeks later than last year, caused by the cold spring. I think, however, we will make an average crop.

From Cleveland county: The crop prospects are very flattering at this writing.

From Columbus county: The weather for the past month has been good for the growing crop; the frequent rains have caused the grass to grow also, and a great many crops are "in the grass" badly.

From Union county: Cotton was looking rather badly up to June 15, but since then have had good rains, and in most sections of our county cotton is looking fine—as well as could be wished for.

SOUTH CAROLINA.

From Anderson county: The weather is very warm, with considerable wind, and the crop is beginning to suffer for want of rain. Should it come soon the crop will not be materially injured.

From Chester county: The plant is small, but healthy, some sections needing rain badly. There is much complaint of grass from all parts of the county. Labor is scarce and unreliable. I regard the prospect for a large crop as doubtful.

From Lexington county: The weather in this section has been dry, and crops suffered slightly until the last ten days; since then we have had good showers. Cultivation is fair, though grass is lively through recent rains, but not dangerous. Have had no trouble from worms as yet.

From Pickens county: We are needing rain badly. Nothing is injured yet, but will suffer soon unless it rains.

From Union county: The weather since last report has been very dry and windy, and while the crop is small it is clean and has a healthy color. What is to be feared in case we have much rain is the plant shedding its fruit.

GEORGIA.

From Clarke county: Many crops were exceedingly grassy up to a week ago. Rains have generally been abundant until recently, but crops are now suffering. The extremely hot winds that have been blowing daily for some time are threatening to seriously injure both corn and cotton; farmers are becoming alarmed.

From Coweta county: We are in a terrible drouth; hot, scorching winds and no rain in four weeks. The cotton plant has stopped growing, and is not more than one-half as large as it was this time last year. No prospect of rain at this writing.

From Elbert county: Crops are being worked well and are clean of grass and weeds. Nothing is wanting now but rain, and unless we get it in a few days 50 per cent. of the crop will be cut off.

From Forsyth county: We are having some very dry weather at present, and the crop will be considerably damaged if it continues.

From Heard county: The cotton crop will suffer for want of rain within ten days. The weed is not now so large as it is some years at this season, but it is in a fine growing condition and fruiting well.

From Johnson county: A considerable drouth is now prevailing in our county.

From Meriwether county: We have been having very hot weather for over three weeks, without rain. A continuation of dry weather for a few days will do great damage to the cotton crop.

From Milton county: We have the poorest cotton prospect I think I ever saw in this section at this season of the year, owing to continued drouth. I do not think there will be more than one-half a crop if rains should set in at once, and if rains fail to come in ten days I cannot say that there will be anything made over guano purchases.

From Mitchell county: While I call the condition of the crop fair up to date, it is now suffering extremely from drouth, and unless rain falls within one week the crop will be seriously injured.

From Pulaski county: While cotton, as a general thing, has a good stand and is promising, we are in need of rain, having had none in a month. In the absence of rain much longer the crop in this section will be short.

From Thomas county: The weather has been good, but at this time rain is needed. No disaster so far has befallen the crop, save an occasional farm has suffered from grass. The stand is good, and no worms have appeared yet. Cotton will soon begin to open with the present hot sun and warm nights.

ALABAMA.

From Cherokee county: The weather has been dry, with an occasional shower, which is very favorable for cotton. The stand is fair and generally well cultivated.

From Conecuh county: Worms are found on nearly every plantation, but what damage they will do is impossible to foretell. If they come in numbers at this time hardly one-third of a crop will be made. Excessive rain has delayed the cultivation of the plant some and considerable grass is reported in some sections, but is being cleaned very rapidly now. If season continues good and the worms do not destroy the plant the prospects now are for a good crop.

From Dallas county: This immediate section is suffering just now for the want of rain. The cotton, though smaller in size than last year, is nearly up to the average; it is fruiting splendidly. Freedom from worms, and a late frost, will almost insure a large crop.

MISSISSIPPI.

From Copiah county: Several weeks of rainy weather retarded materially the work in the cotton fields and caused it to become grassy, but we think they will be able to clean the crop before it can injure it to any considerable extent. Taking everything into consideration, we think the prospect for a good crop was never better.

From De Soto county: Cultivation is only moderate, owing to continued heavy rains in early spring. Stands are fair and no worms as yet. The crop is now doing well, but fifteen days behind last year.

From Lafayette county: A small section of this county reports too dry and the plant small, but if no serious damage should happen to the growing crop during August we will make more cotton than last year.

From Marshall county: The cotton up to this present time is decidedly better than last year, and if we have a late fall we will have the largest crop ever raised.

From Wayne county: Owing to wet weather and bad cultivation the cotton crop is at least three weeks late, and the present outlook is anything but encouraging to the planter.

LOUISIANA.

From Concordia parish: We have had continuous rains in this section since last report. Cotton is very grassy, and the growth of young cotton checked, but now we are having dry and hot weather, and cotton is fruiting well, and with a continuation of the present weather I think the prospects are good for a fair crop.

From East Baton Rouge parish: Our opinion of the cotton crop, based upon our own observation and what we can learn from parties in the county, is that about one-third of the growing crop is good, that which is on high ground and has been worked, one-third an average crop as to its condition and size, and one-third as poor as was ever seen in this parish. The cotton worm may be seen in most of the fields, but what damage will result remains to be seen.

From Morehouse parish: General promise of crop very good. It is cleaner of grass than usual, and fruiting finely. There are no signs of cotton worms yet. Stands are not as good as last year, although good weather from now out would make it up.

TEXAS.

From Atascosa county: Cotton is better at this time than it has ever been before. Should it rain this month more will be raised than can be gathered.

From Bell county: The cotton crop in this section is very promising, and will be heavy if nothing happens to it in the next thirty days. It has been well worked and is free from grass and worms.

From Bowie county: The cotton crop in this section is free from grass, worms, etc., and if the season continues good a fine crop will be made.

From Falls county: There are some reports of worms, though I have seen none. The crop is very promising at this time. The season has been very propitious. Cotton is about two weeks later than usual.

From Fannin county: The season, though a little late so far, has been good. The stand is good and the cultivation is better than the average, as compared with past years. Nothing yet has appeared detrimental to the growing crop. Have had fine rains.

From Gonzales county: Some few worms have made their appearance, but have done no damage as yet. Cotton is growing well, and prospects are fair for a good crop.

From Grimes county: Stands are good. Have had more rain than needed, and if it continues, will injure the crop. No worms have yet appeared. Cotton is free from grass and most of it will be laid by during this week. Prospects at present are very flattering.

From Hays county: The stands of cotton, except in cases of late planting, are splendid. Fine rains fell here during the 3d and 4th of this month, breaking the protracted drouth that had existed since March, and now the plant is in a very prosperous condition; crop generally free from grass or weeds and fruiting well. Some reports of worms, but no material injury. Some apprehension is felt from the next growth of worms, to come off in about one month. Some farmers are poisoning them.

ARKANSAS.

From Carroll county: The cotton is in good condition as to cultivation, but is too late to make a good crop, for there are but few blooms in the earliest crops.

From Lawrence county: Since June 16 the

weather has been dry and hot and unusually good for the growing crop, which is generally clean. Owing to lateness of spring the cotton plant is small and the stand is not good, but though small the plant looks vigorous and healthy. Blooming is just commencing Cotton will have to be worked for two or three weeks yet.

From Nevada county: Cotton up to this time could not be better, but ten days longer without rain and the prospect will be very materially changed. The crop is clear of grass and in good condition, but the very light rains of the past month cause fears that a drouth is upon us.

From Ouachita county: The crop prospect to late is most encouraging. During the spring we had frequent rains, and our farmers have had to contend against grass, but have now their crops pretty well cleaned.

From Sharp county: The cotton crop is about twenty days late this season. The plant has a good color, the stand is good and the fields very well worked.

TENNESSEE.

From Chester county: We are having too much rain this month to keep the crop clean, but it is not in bad condition and prospects are very good.

From Crockett county: The crop would be very good if not for size and stand. The plant is small for the season. Good rains have been general within the past week, with warmer weather, and the plant is growing finely.

From Giles county: I have heard of no complaint about rust and worms. The plant is small, but branching out and bolling very well.

From McNairy county: The weather is fine now for the growing plant. Farmers are finishing their crops, and will in a few days have them in fair condition. The stand is good; no worms have yet appeared.

From Williamson county: Cotton is later and smaller than usual at this time. The plant, however, is healthy, and stands generally good.

MISSOURI.

From Dunklin county: Our cotton crop seems to be backward. Continuous rains have made it very difficult to cultivate. The plant is small and not at all well developed for its age. It will be two weeks yet before the cultivation of the crop will be completed.

TRADE EMBARRASSMENTS.

There were 168 failures in the United States reported to BRADSTREET'S during the past week, 6 more than the preceding week, 46 more than the corresponding week of 1882, and 90 more than the same week of 1881. Compared with the previous week the middle states had 36, a decrease of 4; New England states 33, an increase of 11; southern states 26, an increase of 1; western states 40, a decrease of 3; Pacific states and territories 33, an increase of 1; Canada and the Provinces 33, an increase of 6. The important failures were Henry F. Hills & Co., manufacturers of straw goods, New York city; the Ward Iron Company and A. G. Bentley & Co., bankers, Niles, Ohio; the Bank of Leadville, Col.; Jones, Lamson & Co., cotton manufacturers, and the Jones-Lamson Machine Company, cutlery, Windsor, Vt., and the Canton, (Me.) Steam Mills Company, lumber. In the principal trades they were as follows: Grocers 23; general traders 18; liquors 11; hardware 9; manufacturers 9; shoes 8; clothing 8; hotels and restaurants 7; drugs 6; jewelry 6; dry goods 6; millinery 5; coal and wood 5; butchers 5; harness 4; leather 4; lumber 4; grain, flour, etc., 4; fancy goods 3; tobacco and cigars 3; bakers and confectioners 3; cotton 2; stationers 2; produce and provisions 2; bankers and brokers 2; bank 1.

ALABAMA.

BIRMINGHAM.—R. H. Roberts & Co., hardware, have failed.

OPELIKA.—T. T. Kyle, grocer, has failed.

OPELIKA.—Miss Ella Watson, millinery, has failed and left town.

ARIZONA.

CONTENTION.—S. Marks, general store, has been attached.

CALIFORNIA.

ALAMEDA.—J. Edwards, saloon, has been attached.

ANTIOCH.—Charles Niner, jeweler, has filed a petition in insolvency.

CALICO.—Soule & Stacy, grocers, have been attached and called a meeting of creditors.

CAMPBELL SPRINGS.—J. Wood & Co., hotel, have been attached.

CEDARVILLE.—J. C. Jones & Son, saloon, have been attached.

CHICO.—Thomas Walsh, saddler, has assigned.

COLTON.—Emerson & Co., general store, have failed.

FRESNO.—Joseph Schell, jeweler, has been attached and called a meeting of creditors.

LOS ANGELES.—C. B. Knapp, billiard saloon, has assigned.

LOS ANGELES.—J. F. Moreno, harness, has filed a petition in insolvency.

OAKLAND.—Joseph Brandsteller, grocer, has failed.

OAKLAND.—J. H. Fritch, coal and wood, has assigned.

SAN JOSE.—S. A. Gordon & Co., saloon, have been attached.

SAN JUAN.—William Courtney, general store, has failed.

TEHAMA.—Daniel McNeill, publisher, is reported to have failed.

VISALIA.—C. Paddock has filed a petition in insolvency.

COLORADO.

DENVER.—Witt & Meyers, grocers, have assigned to Samuel Shell, Jr.

LEADVILLE.—The Bank of Leadville has assigned. Rumors have been in circulation for several months past that the bank had lost heavily by bad loans, and there was a general feeling of distrust toward the concern. This failure has been followed by a run on all the banks at Leadville. It is thought that the First National and Merchants' & Mechanics' banks could stand it.

PUEBLO.—Julius Berry, clothing, has assigned. Liabilities $26,000; nominal assets $24,000.

PUEBLO.—O. H. Vierquiz, hardware, has sold out.

CONNECTICUT.

DANIELSONVILLE.—L. I. Plummer & Co., job printers, are offering to compromise.

MERIDEN.—Newton A. Roberts, grocer, has assigned.

NEW HAVEN.—Joseph A. Bromley, fancy goods, offers 20 cents.

NEW HAVEN.—Gustave V. Engle, tobacco and cigars, has assigned.

WATERBURY.—The Clowes & Gates Manufacturing Company, tables, has assigned to E. Z. Frisbie.

DAKOTA.

BLUNT.—McMahan & Co., grocers, have been closed by creditors.

DELAWARE.

DOVER.—John R. Myers, lumber, coal, etc., has failed. Liabilities about $20,000.

WILMINGTON.—Thomas McCracken, shoes, has failed.

FLORIDA.

ORLANDO.—Shine & Butler, general store, have failed.

PINE LEVEL.—J. D. Riggs & Co., general store, have failed and sold out.

ILLINOIS.

ALPHA.—A. L. Mitchell, general store, has assigned to Anson Calkins.

BLOOMINGTON.—William McCarthy, saloon, has been closed on judgment and chattel mortgage.

CALEDONIA.—James Wood, general store, who was recently burnt out, has assigned and offers 40 cents.

CHESTNUT.—George R. Dye, general store, has assigned. Liabilities $3,000; assets $2,000.

CHICAGO.—A receiver has been appointed for R. Beer & Co., wholesale liquors.

CHICAGO.—Isaiah Bloch, mirrors, has been closed by the sheriff.

CHICAGO.—Richard Forbes, grocer, has compromised and resumed.

CHICAGO.—Larson & Jorgenson, desk manufacturers, have been closed by the sheriff and assigned.

DE WITT.—H. Le Feber, agricultural implements, has assigned. Liabilities $3,000; assets $4,000. The failure is attributed to inability to collect accounts.

LA SALLE.—Jacob Knapp, harness, confessed judgment for $2,922, and the stock has been levied upon.

MARSHALL.—J. C. O'Neil, dry goods and clothing, has failed and been closed by the sheriff.

STREATOR.—William A. Swartz, market, is reported to have left town on account of financial troubles. Claims for $1,700 have been presented.

VIRGINIA.—The liabilities of J. F. Cherry, harness, are $7,000; actual assets $3,500; preferred claims $2,800.

INDIANA.

INDIANAPOLIS.—Simon Kasper, moldings, has assigned.

INDIANAPOLIS.—Mrs. Ruth Dommanget & Co., general store, have been attached.

MARION.—Charles Young, notions, is reported to have assigned.

IOWA.

COUNCIL BLUFFS.—M. Casey, market, has mortgaged everything.

MARCUS.—William Moore, hardware, has failed and gone out of business. Liabilities about $4,000; actual assets $2,500.

MASON CITY.—George H. Taylor, shoes, has been closed by the sheriff. Liabilities $600; assets small.

VAIL.—S. J. Stewart, confectioner, has failed.

KANSAS.

LAWRENCE.—Mrs. E. Long, millinery, has had a chattel mortgage foreclosed.

SEDAN.—Turner Brothers, shoes, have assigned.

SENECA.—Mrs. L. M. Ocker, millinery, is reported to have failed.

KENTUCKY.

LOUISVILLE.—Lee Bloom, trading as Lee Bloom & Co., wholesale liquors, has been attached by his brother for $7,695 and by the German National Bank for $1,900.

LOUISVILLE.—John R. Moore, roofer, has been attached and advertised to be sold out by the constable.

LOUISIANA.

CARENCRO.—C. C. Brown, general store, asks an extension. Liabilities $4,500; assets $10,900.

NEW ORLEANS.—C. D. Ainger, manufacturer of cigars, has been closed by the sheriff.

NEW ORLEANS.—J. F. Sarrazin & Co., tobacco, ask a respite. Liabilities $18,500; assets $20,800.

VIDALIA.—W. B. & H. H. Meng, drugs, have sold out to their mother.

MAINE.

BANGOR.—A. M. Devereaux, organs, has gone into insolvency.

BIDDEFORD.—E. E. Clark, dry goods, has failed. Liabilities about $12,000; nominal assets $8,000 in stock and book accounts.

BOOTHBAY.—W. C. Clisby, livery, is in insolvency.

BOOTHBAY.—John O'Brien, coal and wood, is in insolvency.

CANTON.—The Canton Steam Mills Company has failed. Liabilities about $80,000.

LEWISTON.—D. M. Garcelon, grocer, has been attached.

PORTLAND.—Gilbert Brothers & McFadden, lumber manufacturers, have failed. Liabilities $80,000; nominal assets $100,000. They had mills at Canton, Me., Randolph and Berlin Falls, N. H. They also carried on business as the Canton Steam Mills Company.

PORTLAND.—The liabilities of Phinney & Jackson, West India goods, are $347,770; contingent liabilities $176,962; nominal assets $235,336, largely in accounts of uncertain value. The failure is attributed to the private speculation of W. H. Phinney.

PORTLAND.—Joseph Russell has been attached for $4,000.

PORTLAND.—Widber & Bacon, lumber, have suspended. Liabilities $35,715; nominal assets $28,711; actual assets $16,335.

MARYLAND.

BALTIMORE.—Charles H. Gogel, confectioner, has assigned to Samuel Edmonds and John C. McCulloh.

BALTIMORE.—J. W. Lewis & Co., oyster packers, have filed a petition in insolvency.

BALTIMORE.—W. N. Toler & Co., shoes, has given a bill of sale to W. R. McKay, of Boston, for $14,000, covering his stock, which has been removed to an auction house.

CUMBERLAND.—A receiver has been appointed for Fronhiser & Co., furniture. John L. Heckmer, who recently fled from Grafton, W. Va., is said to have been a partner. Liabilities about $2,000; actual assets about $3,500.

MASSACHUSETTS.

ATHOL.—R. L. Jones, cotton manufacturer, has failed. He is of Jones, Lamson & Co., of Windsor, Vt. He bought a mill and machinery at Athol in April for $40,000, mortgaged for $39,000.

BOSTON.—Frank C. Butler, grocer, has failed and assigned. Liabilities about $1,400; assets $1,100.

BOSTON.—George S. Cole, grocer, has failed.

BOSTON.—A. F. Copeland, confectioner, has filed a petition in insolvency.

BOSTON.—George Coyle & Sons, contractors, owe $1,325. There are no assets for the unsecured creditors.

BOSTON.—Gunn, Curtis & Co, printers, have been granted an extension by their largest creditors, and business will be continued without interruption. The liabilities are about $120,000, of which $72,000 due the banks is secured by the indorsement of the father of Mr. Curtis. They claim nominal assets of $140,000 of which $60,000 is in machinery.

BOSTON.—Hammond Woodbury, restaurant, has failed.

BOSTON.—Kendall & Phillips, wholesale flour, have suspended on account, they say, of the illness of Mr. Kendall, which has disarranged their affairs, he being the financier. Creditors think the firm may pay in full, though they may need some indulgence as to time.

BOSTON.—One of the creditors of Sleeper & Co., glassware, refused to accept the offer of 20 cents, and the firm will settle in insolvency.

BROCKTON.—C. E. Palmer, hotel, has been attached.

CAMBRIDGE.—John Stewart, provisions, is reported to have failed, and will settle in insolvency.

CHELSEA.—David S. Plummer, provisions, who recently sold out, has filed a petition in insolvency. Liabilities $10,326.

CLINTON.—Day & Folger, stoves and tin, owe about $6,800; assets in stock, which is mortgaged for $665, and book accounts $700.

BROOKFIELD.—J. C. Vance, hotel, has failed.

LAMAR.—Snyder & Dix, general store, have assigned.

ROCHEPORT.—W. E. T. Waddle, stoves, has assigned.

NEBRASKA.

FAIRMONT.—J. P. Tolles has been appointed assignee of J. E. Porter & Son, general store, whose liabilities are about $10,000.

OMAHA.—Salsman & Aylesworth, hotel, have given a chattel mortgage to creditors.

OXFORD.—C. G. Mugg, drugs, has mortgaged his property to creditors.

RED CLOUD.—W. Dany, grocer, has given a chattel mortgage to a creditor.

NEVADA.

BELLEVILLE.—R. Abrahams, general store, has failed.

EUREKA.—B. Lachman, grocer, has been attached.

NEW HAMPSHIRE.

CLAREMONT.—C. B. Gutterson & Co., shoe manufacturers, have failed and been attached by the father of Mr. Gutterson, who assisted them.

NEW JERSEY.

PATERSON.—At a meeting of the creditors of E. E. Vreeland, grocer, Mrs. Vreeland, who holds a chattel mortgage on stock, etc., for $805, offered to cancel it if the creditors would take the assets, divide them pro rata among them and release Mr. Vreeland from all liability. It was accepted.

NEW YORK.

BUFFALO.—George W. Holt has assigned individually and as survivor of Charles Ensign, deceased, steamboat owner. A judgment for $617,848 was entered against him in favor of Mrs. Cornelia Hamilton. Messrs. Holt and Ensign ran the Commercial line of steamers.

CORNING.—Duncan H. Baxter, drugs, has assigned to A. Hadden.

FREDONIA.—L. P. Pritchard, clothing, has assigned to H. A. Pierce, giving preferences, it is said, to Mrs. Pritchard $5,000 and S. E. Allen $1,500. Liabilities about $12,000.

NEW YORK CITY.—Edwin Beckwith, watchmakers' materials, assigned on the 24th inst. to William B. Pugh, giving two preferences for $1,295.

NEW YORK CITY.—The Diecks Pharmaceutical Extract Company assigned on the 23d inst. to Ernest G. Schweig. It was organized in October, 1880, with an authorized capital stock of $15,000.

NEW YORK CITY.—Peter W. Downing, restaurant, has been placed in the hands of a receiver in supplementary proceedings.

NEW YORK CITY.—Henry F. Hills & Co., manufacturers of straw goods, assigned on the 26th inst. to Payson Merrill, without preference. The failure is attributed to the depression in the straw goods trade and lack of capital. The liabilities are reported at about $125,000. This is said to be Mr. Hills' third failure.

NEW YORK CITY.—James M. Keep, stationers' hardware, has been attached for $4,500 by W. H. Bayles for money the latter put into the late firm of Keep & Bayles.

NEW YORK CITY.—The schedules of Charles O'Neill, tailor, show liabilities $29,054; nominal assets $9,842; actual assets $2,993.

NEW YORK CITY.—The schedules of Odis & Perozo, shipping and commission merchants, show liabilities $60,661; nominal assets $88,794; actual assets $16,612.

NEW YORK CITY.—The schedules of George B. Pelham, architect, show liabilities $10,865; nominal assets $851; actual assets $576. The schedules of his wife Eliza show liabilities $8,819; nominal assets $40,000; actual assets $16,800.

NEW YORK CITY.—De Wilton Robinson, agent for D. Leonardt & Co., pens, Birmingham, England, assigned on the 27th inst. to George A. Wick, giving a preference to Joseph O. Robinson $3,620.

NEW YORK CITY.—Simon & Brown, manufacturers of pants, assigned on the 23d inst. to Morris Isaacs, giving preferences to Selig Levine $975; Louis Cohen $550.

NEW YORK CITY (Morrisania).—Julius Brunner, of J. Brunner & Co., manufacturer of toys, assigned on the 26th inst. to William Siegel, giving a preference to the Germania Bank for $1,893.

ROANOKE.—William Laramy, miller, sold and mortgaged all the property he could raise money on and left town.

ROCHESTER.—Charles Mead, grocer, has assigned.

ROCHESTER.—Daniel J. Mead & Co., grocers, have assigned.

NORTH CAROLINA.

NEWBERNE.—A. H. Potter & Co., confectioners, have assigned.

OHIO.

CHAMPION.—A. D. Clark, general store, has assigned to David Caldwell.

CINCINNATI.—J. W. McGraw & Co., wholesale lumber, have failed and offer 50 cents.

CINCINNATI.—J. Westendorf & Co., wholesale millinery, have assigned.

DELPHOS.—L. Faber, grocer, has been closed by the sheriff.

DORSET.—B. F. Denslow, grocer, has assigned to B. W. Phillips.

NILES.—A. G. Bentley & Co., bankers, have suspended. The "Co." was Mrs. L. G. Ward, wife of James Ward, who managed her large and varied business interests. The firm succeeded the Citizens' Savings & Loan Association about three years ago.

NILES.—The Ward Iron Company, owned by Mrs. Elizabeth Ward, assigned on the 26th inst. Mrs. Ward is the mother of James Ward, who had the management of the business, and previous to his failure, in 1873, was the owner. The works have been running full time, and the failure was a surprise.

OREGON.

ASTORIA.—Prael Brothers, dry goods, have been attached, and called a meeting of creditors.

PENNSYLVANIA.

BRADFORD.—Execution has been issued against M. J. Brayton, meat market.

FREEPORT.—J. B. Snowden, grocer, has been sold out by the sheriff.

HONESDALE.—John H. Bauman, butcher, has been sold out by the sheriff.

JOHNSTOWN.—Emil Young, jeweler, has been closed by the sheriff.

LANSDALE.—A. D. Ruth, agricultural implements, has been closed by the sheriff on executions for $24,345.

LINE LEXINGTON.—The Reiner Harrow Company, agricultural implements, has been closed by the sheriff on executions for $4,025.

MIDDLESEX.—William Jones, general store, had judgment for $3,000 entered against him on the 23d inst. Liabilities about $24,000.

PHILADELPHIA.—Ashton Coates & Co., bankers and brokers, have failed. The liabilities are not thought heavy.

PHILADELPHIA.—Herman Degelow, manufacturer of calf kid, was recently sold out by the sheriff, under execution of $2,000 in favor of Joseph Hecht, and it is believed only $1,600 was realized. Two other judgments of $500 each were entered against him in favor of other parties. Total liabilities about $12,000.

PHILADELPHIA.—H. C. Lanphear, novelties, is advertised to be sold out by the sheriff on the 31st inst.

PHILADELPHIA.—Execution has been issued against John A. Redles, gents' furnishing goods, on a judgment for $1,201.

PHILADELPHIA.—Saller & Neuman, wholesale clothing, assigned to N. B. Thompson on the 24th inst. On the preceding day they gave judgment to A. Bacharach for $2,098. Liabilities about $22,000.

PHILADELPHIA.—Joseph Saul, iron and steel, has compromised at 50 cents.

PHILADELPHIA.—Senseman & Brother, printers, etc., have been sold out by the sheriff.

PHILADELPHIA.—P. H. Shields, saloon, was advertised to be sold out by the sheriff.

PHILADELPHIA.—S. D. Sollers & Co., manufacturers of shoes, also trading as Sollers & Co., retail shoes, offer to compromise at 25 cents in four and six months' notes. Liabilities about $88,000; assets about $53,000. They are reported interested to the extent of $11,800 in the Penn Harrow Company.

PHILADELPHIA (Nicetown).—Henry McAnulty, saloon, was advertised to be sold out by the sheriff.

PITTSBURGH.—B. Block, jeweler, has been closed by the sheriff.

PITTSBURGH.—J. W. Clark, coal, has assigned.

PITTSBURGH.—Execution has been issued against Mrs. M. A. Lang, millinery, for $350.

READING.—John Keppelman, foundry, has been closed by the sheriff.

READING.—J. H. Seibert, shoes, has been closed by the sheriff.

THOMPSONTOWN.—David Smith, Jr., coal and grain, has failed. Executions for $3,650 have been issued.

TITUSVILLE.—David Cohen, shoes, offers to compromise.

WEST PITTSTON.—Execution for $1,500 has been issued against V. S. Peet, stationer.

RHODE ISLAND.

PROVIDENCE.—Martin Doyle, Jr., tailor, has assigned to N. E. Church.

PROVIDENCE.—M. & F. Rogers, groceries and liquors, have assigned to George J. West.

WOONSOCKET.—Morin & Pariseau, grocers, have assigned to J. Bouvier.

SOUTH CAROLINA.

SPARTANBURGH.—Craigler & Pool, grocers, offer 40 cents. Liabilities $2,400; nominal assets $2,728.

TENNESSEE.

KNOXVILLE.—Rodgers, McCarty & Co., drugs, have assigned.

LEBANON.—A. R. Davis, dry goods, has assigned to W. H. Brown. Liabilities $16,000; assets $8,000.

MARTIN.—George W. Thomas, trading as George W. Thomas & Co., stoves, has been closed by the sheriff.

MEMPHIS.—Wells & Wildberger, books, have assigned. Liabilities $15,000; assets $11,000.

GALVESTON.—J. T. Ashton & Co., teas and coffee, have been attached.

GALVESTON.—J. S. Clyne, jewelry, has been attached.

GATESVILLE.—J. B. Cranfill, grocer, has assigned to E. A. Solomon. Liabilities $2,700; assets $1,200.

PILOT POINT.—Sanders Brothers, mill, have been attached and gone out of business.

WICHITA FALLS.—Ballou & Williams, general store and saloon, have assigned to J. C. Miller. Liabilities $5,000; nominal assets $10,000.

UTAH.

OGDEN.—W. A. Wade & Co., drugs, have assigned to Samuel Horrocks. Liabilities about $6,000; assets $3,000.

VERMONT.

CANAAN.—G. W. Brackett, dry goods, is trying to compromise. Liabilities $5,500; nominal assets about the same.

WINDSOR.—The Jones & Lamson Machine Company, tools, has failed. It had a paid in capital of $34,000.

WINDSOR.—Jones, Lamson & Co., cotton manufacturers, have failed. The business was established in 1875, but for some time past has been running behind, which was attributed to the depression in business.

VIRGINIA.

BEDFORD.—James W. Smith, general store, has been closed by the sheriff.

BUCKINGHAM.—J. H. Noble, general store, has assigned. Liabilities about $600.

NORFOLK.—D. T. Brooke has been appointed receiver of R. B. Allen & Co., railroad supplies, and an injunction placed upon the trustee in their assignment.

NORFOLK.—C. P. Edwards & Co., dry goods, have given a deed of trust to secure the compromise of their merchandise account. The confidential will be paid in full on the same extension, three, six, nine and twelve months, and the business continues as usual.

NORFOLK.—R. T. James and wife, hotels, have assigned to W. H. White, giving preferences aggregating $18,000 for rent, to employees, and to J. Y. Lowe. Liabilities about $30,000; nominal assets about the same. It is said they were embarrassed by trying to do too much business.

PORTSMOUTH.—C. Bohannon & Son, grocers, have been closed by creditors on a confessed judgment.

WASHINGTON TERRITORY.

NEW TACOMA.—Charles Evans, shoes, is reported to have left town.

BRITISH COLUMBIA.

VICTORIA.—C. Thorne, clothing, is reported to have failed.

MANITOBA.

NEW YORK, July 12, 1883.

The Board of Directors have resolved:

1st—That a Cash Dividend of FIVE PER CENT. be declared to stockholders, payable on and after July 16, 1883.

2d—That Fifty per cent. in scrip on the earned participating premiums for the year ending June 30, 1883, be issued on and after September 1, 1883, to policy-holders entitled thereto.

3d—That Four per cent. interest on outstanding scrip for the year ending June 30, 1883, be paid on and after August 20, 1883, and

4th—That Ten per cent. on the amount of the original issue of the scrip of 1872 be redeemed on and after August 20, 1883, the interest on which shall cease after the year ending June 30, 1883.

Certificates to be presented for cancellation to that extent.

DAVID ADEE, SECRETARY.

BRADSTREET'S:

A Journal of Trade, Finance, and Public Economy.

PUBLISHED BY THE BRADSTREET COMPANY,
279, 281, 283 BROADWAY, NEW YORK.

Terms, $5.00 per year in advance, including postage.

SINGLE COPIES, TEN CENTS.

SPECIMEN COPIES WILL BE SENT FREE UPON APPLICATION.

As a financial and commercial newspaper the foremost purpose of BRADSTREET'S is to be of practical service to business men.

Its special trade and industrial reports; its weekly epitome of bankruptcies throughout the United States and Canada, and the summaries of assets and liabilities, are alone worth the subscription price.

The synopses of recent legal decisions constitute an exceedingly valuable feature.

As commercial transactions, in the wider sense, are coming to be more and more conducted on a statistical basis, the information contained in BRADSTREET'S is of the first importance both to producers and middle-men.

THE TRADE AND AGRICULTURAL SITUATION THROUGHOUT THE UNITED STATES AND CANADA IS REPORTED BY TELEGRAPH TO BRADSTREET'S UP TO THE HOUR OF PUBLICATION.

BRADSTREET'S

A JOURNAL OF

TRADE, FINANCE, AND PUBLIC ECONOMY.

PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 279, 281 & 283 BROADWAY, NEW YORK.

London Office, 84 Newgate Street, E. C.

TERMS: $5.00 PER YEAR IN ADVANCE; SINGLE COPIES 10 CENTS.

All communications regarding editorial or literary matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, AUGUST 4, 1883.

NOTES OF THE WEEK.

The stock market has been in a state of profound stagnation; the movement of prices has been insignificant, and the amount of business done more insignificant. The Boston failures can hardly be said to have affected the market, because it is now in the hands of a comparatively few leaders and the small local public of Wall street, and those among them who are sustaining the market—the chief being Mr. Gould on account of his Western Union—have proved themselves strong enough to hold it against the assaults of their opponents. The general feeling in the street is the reverse of cheerful, and the situation of affairs may be described as a deadlock between opposing factions.

Ths New York Board of Trade and Transportation is again taking steps looking to the enactment of a general bankrupt law at the next session of Congress. It is proposed to hold a convention of delegates from the various trade organizations at Washington some time during the session of Congress. The men of business who are the master spirits of these exchanges should see to it that an influential convention is brought together. The urgent need of a general bankrupt law has never been more clearly shown than by some recent failures brought about through the loss on the trade exchanges of capital previously risked in the regular course of business. A bankrupt law is needed to compel a close inquiry as to the cause of such failures, to the end that adequate punishment might be meted out.

The platform of the Pennsylvania Democrats is at length before the public. The convention declares in favor of "that genuine and deep-reaching civil-service reform which consists in the election to office of honest, intelligent, capable and courageous public servants," "who will redeem and purge the departments of the general government from that corruption and fraud with which they have been permeated under Republican rule and which that party has shown itself unable and unwilling to eradicate." This declaration of opinion is rather ominous for the security of tenure of the Republican officeholders. The Pennsylvania men would probably feel the necessity of making a clean sweep in order to bring about the "deep-reaching" reform which they demand. The tariff plank is in substance identical with that adopted by the Ohio and Virginia Democrats, upon which we have remarked before. This circumstance would seem to indicate that the Ohio platform is likely to stand as the model Democratic declaration on the tariff, especially since it has been adopted in Pennsylvania, where the matter is well understood to be a delicate one. The convention rejects Mr. Wharton Barker's scheme for the distribution of the surplus, and recommends that the existing surplus in the Treasury be applied to the payment of the public debt, and that the money not needed for the expenses of the government remain in the pockets of the people.

The annual convention of the Civil Service Reform Association met at Newport, R. I., on Wednesday, and the pleasant task fell to the lot of Mr. George William Curtis of felicitating his co-workers on the signal success achieved by the cause of reform during the year. He called attention to the fact that in New York state, where the spoils system originated and where the evils of that system had been most fully displayed, the reformers had secured the passage of an act modeled on the Pendleton bill and embodying the most stringent prohibition of political assessments yet proposed. This event, he said, was only second in importance to the passage of the reform bill by Congress, for the reason that a political reform which was possible in New York was practicable everywhere in the country. Mr. Curtis characterized the attitude of the President toward the reform movement as having been, notwithstanding certain inconsistencies of conduct, one of "friendly observation." The efficiency of the Pendleton bill depended at the beginning wholly upon the good faith of the President. The appointment of the present Civil Service Commissioners, however, was conclusive earnest of his desire to give the reformed system fair play. Some of the New York removals disregarded the essential principles of reform, but they were, at least, ingeniously veiled in an apparent desire to promote its interests. This latter circumstance was in itself evidence that the President was conscious of the public expectation that tried and capable officers should not be removed under the plea of the expiration of their terms.

Regarding the future policy of the reformers Mr. Curtis had much of interest to communicate. He said that an important step yet to be taken was the application of the reformed system to the municipal service. An inquiry into this matter is now under way, and it is confidently expected that the deliberations of those charged with the investigation will result in a practicable scheme for the solution of the problem. The especial object, however, to which the reformers will devote their efforts is the repeal of the United States statutes which limit the term of most of the subordinate officers to four years, and which result in practically establishing that term for all offices, places and employments in the service except such as are specifically excepted. In striving to bring about this repeal the reformers show a clear appreciation of the real obstacles in the way of their success. We have all along insisted upon the importance, nay, the absolute necessity, of this measure to anything like a substantial reform of the public service.

The ceremonies connected with the opening of the Louisville Exposition took place on Wednesday, the occasion deriving added interest from the presence of President Arthur and other civic and military dignitaries. The event was one in which the citizens of Louisville naturally took a great interest, and was probably more generally celebrated than any previous event in the city's history. Apropos of the opening the *Courier-Journal*, in an article which we reprint elsewhere, recalls in an interesting way the early history of Louisville as a commercial city and its subsequent progress. That progress has been very satisfactory, and the circumstance which now renders the city a point of interest to the country at large is in itself a sufficient indication that its steps are not likely to be backward in the future. There seems to be some disappointment at the unfinished condition of the displays, many of which are not yet in place. This state of affairs is not owing to any shortcomings on the part of the managers, who have delivered the building and its equipments promptly, but to remissness on the part of exhibitors, especially those in the New England and eastern sections. Some of the neighboring states have well-arranged exhibits, and the agricultural department is complete. One of the most interesting features of the Exposition is the farm, covering four acres, and containing tobacco plants, wheat, cotton, hemp, sugar-cane, corn, and other characteristic southern products, all growing under careful cultivation.

There has been an apparent reduction of a little less than $8,000,000 in the public debt during the month of July. This result is produced by the payment of about $3,000,000 for accrued interest and by an increase of about $5,000,000 in the available cash balance, which latter amounted on August 1 to $155,717,195.74. The Treasury has now nearly $203,000,000 in gold coin and gold bullion—an increase during the month of nearly $5,000,000. The gold certificates outstanding amount to about $60,000,000. The standard silver dollars continue to be accumulated in the Treasury. The number of these pieces now held amounts to over 113,000,000, against which there are outstanding about $74,000,000 in certificates. Of the 2,300,000 silver dollars coined in July about one-half went into circulation, and the remainder into the Treasury. The weight of the silver coin now in the Treasury, including about $28,000,000 of fractional currency, is 5,084 tons. The receipts for the month, as compared with those of July, 1882, show a falling off of over $4,300,000. This loss, which was mainly in internal revenue receipts, is explained by the operation of the new tax law, by which the tobacco tax has been reduced one-half and certain other taxes abolished.

Mr. F. B. Sanborn, the general secretary of the American Social Science Association, has issued the programme for the general meeting of 1883. The meeting will be held as usual at Saratoga, opening on September 3 with an address by President Wayland, and closing on September 7. A number of topics of interest to the general public will be discussed before the Association. Among the exercises in general session we notice an address on "The American Civil Service" by John M. Gregory, of New York, and a debate on the subject of "Labor in Prisons," in which President Waylard, Z. R. Brockway, and others will take part. In the meeting of the department of Education, Professor Herbert B. Adams, of Baltimore, Md., will treat of "New Methods of Study in History." Dr. E. M. Hunt will deal with "The Social Bearings of Sanitation" in the meeting of the department of Health. "The Legal History of the Telephone" will form the subject of a paper by Mr. M. F. Tyler, of New Haven, in the department of Jurisprudence. In the department of Social Economy, "The Race Problem in the United States" will be discussed by Mr. Charles A. Gardiner, of Hamilton, N. Y., and Mr. John Wannamaker, of Philadelphia, will deal with the relations of "Employer and Employed."

THE CLAIMS OF INDUSTRY ON EDUCATION.

It is becoming increasingly evident that there exists a general dissatisfaction with the traditional methods of education which still shape to so large a degree the instruction of the young. Indications of the state of the public mind in regard to the matter have been from time to time forthcoming in the shape of discussions of the proper province of education, criticisms of the right of the classical languages to their present prominent place in the scheme of instruction, pleas for industrial training, and the like. Quite recently, the address of Mr. Charles Francis Adams, Jr., at Harvard, had the effect of directing public attention sharply, if temporarily, to the present condition of education in this country. It had this effect, perhaps, not so much on account of anything particularly striking in the address itself as because the feeling, of which it was the expression, was in the air, and because the note of revolt against the old order was echoed in an institution of conservative traditions. Heretofore pleas for the rearrangement of the educational system have usually come from representatives of distinctly new departments, whose claims have often been pressed with more zeal than discretion. The Harvard address, on the other hand, embodied a temperate and, on the whole, judicious view of the respective claims of the old and the new systems upon public support, given by a man who had the benefits of the traditional curriculum, but who had been convinced by experience of the defects of that system so far as the practical business of life in the great majority of instances was concerned. The very general approbation with which Mr. Adams' ideas were received by the press of the country was a striking evidence of the change of public sentiment upon this question which has taken place within a comparatively short space of time.

The causes of this change are not far to seek. When the foundations of the traditional system of instruction were laid the training given was in some sort an attempt to meet the needs of the time. Education was then confined to the minority, and such skilled intelligence as there was in civil life found its field in the pulpit, in medicine, or at the bar. To the needs of these three learned professions the whole scheme of education was made to conform. The result was that the whole educational system took on a scholastic aspect. Within the space of little more than a century, however, the whole face of the world has been profoundly changed by the immense development of the productive and distributive forces. New discoveries in physics and the application of these to industrial operations have greatly widened the sphere of skilled labor and have complicated its relations. The introduction of steam and electricity, and the numberless ways in which they have been utilized for mechanical purposes, may be said to have brought about an entire reorganization of industry. Other related departments of human activity have taken cognizance of these great industrial movements. The law has accommodated its flexible system to the changes referred to, and many new departments of jurisprudence have arisen in consequence. Legislation has felt the new impetus, and many pages of the statute books are now devoted to regulation of the relationships brought about by the causes mentioned. Literature in some degree, and to a greater extent journalism, have reflected the transition, and continue in an increasing degree to feel its influence. That the awakened industrial spirit should sooner or later make itself felt in the domain of education was naturally to be expected; the wonder is that the legitimate results of the movement we have referred to have been so long delayed.

Properly understood, education should furnish some portion of equipment for the actual needs and the practical duties of life. As those needs vary, so, in response to them, should methods of instruction change. In the light of the considerations set forth above it is clear that a true reform of educational systems should lie in the direction of specialization and, to some extent, in the substitution of the industrial instead of the scholastic spirit. This implies, of course, what however will bear statement, that one considerable department of instruction should be devoted to the training of youth in the mechanical arts and industries—in a word, to technical education. Those who have examined the subject are of opinion that much knowledge of a practical nature, especially of such a kind as in connection with experience is calculated to fit men for the higher industrial posts, may be taught in technical schools conveniently and well. It is not a little singular, however, that up to within a few years very little has been done, either in this country or in England, to put education abreast of the times in this respect. On the continent of Europe, it is true, more especially in France and Belgium, there is something approaching to a recognition of the claims of industry upon education. In England, while some excellent work is being done in a few schools, yet, speaking generally, the subject of technical education has been to a great extent neglected. A gratifying sign of a change in this respect was the appointment of the Royal Commissioners of Technical Education, to whose investigations into the condition of industrial training on the continent of Europe we have made reference from time to time. The very practical nature of the subject was made plain by the discovery that in some directions trade was actually being withdrawn from the country in consequence of the greater attention given to industrial training on the continent. The growth of public interest in the subject of technical education has been slow in the United States, though there have not been wanting public-spirited men who have seen the importance of the subject and have sought to stimulate public opinion in regard to it.

There are some considerations of a general nature (apart from the benefit to be derived from greater skill in technical production) which render the subject one of deep interest to all interested in the welfare of the community. The complaint has been made that education, as at present imparted, has the effect of making large classes of the people discontented with their positions in life, and that much of the discontent so resulting finds an issue in crime. It is not inconceivable that a system of education out of consonance with the needs of the time and operating to stimulate ambition without developing faculty in practical directions would tend to produce the conditions favorable to the growth of criminal impulse. Some recent criminal statistics throw a very interesting light upon this aspect of the matter. Mr. Vaux, of Philadelphia, who has devoted much study to the subject of crime-causes, showed by reference to the records of the Eastern State Penitentiary of Pennsylvania that more than nine-tenths of the convicts received there during the decade between 1871 and 1881 had had no industrial training. The absence of such training he regarded as a very fruitful cause of crime, and he strongly urged the establishment of trade-schools as an important police measure. Facts such as those presented by Mr. Vaux might well open the eyes of people to the need of industrial education, even if its economic advantages on other grounds were overlooked.

CHANGES IN MANUFACTURES.

We print elsewhere a letter from Mr. Lorin Blodget, in which he presents some results suggested by his industrial census of Philadelphia (soon to be published), and from a comparison of the industrial position of the Quaker City with that of other manufacturing centers of the country. The subject is a wide one, and continued intelligent examination of these figures cannot fail to elucidate many more points of interest and value.

The number of families in the United States in 1880 was 9,945,916, with an average to each of 5.04 persons. It is manifest that if there were but one bread-winner to each family the industrial army of the country would number 9,945,916 persons, or 19 per cent. of the population. But we find that in all classes of occupation 17,392,099 persons, or 34 per cent., are engaged. That women and children are constantly taking the place of men in all branches of occupation is well known, and this influx, by the year 1890, the time for the next national census, will cause the figure indicating the number of workers to the family to be relatively greater than now—that is, 1.71 persons in each family of 5.04 persons.

To show that the productive population—meaning those persons engaged in manufacturing and mechanical industries—increases faster than the population, as a whole, means, as an economic truth, that more persons in each family are at work than formerly; but this showing should not be confined to the "productive" population, but should include all workers—those engaged in every class of occupation. If 100,000 more cases of shoes are made in 1882 than in 1881, to transport those shoes to the market, sell them to jobbers, then to retailers, then to individuals, requires an increase of employés in the department of labor classified as trade and transportation, and in other industries which are called upon to do the work of exchange between maker and user.

There are times when population draws industry. Witness the country towns in which manufacturers build factories, having first learned that unemployed labor is plenty, and consequently cheap. In the great majority of cases, however, industry draws population. Let the word go out in the newspaper press that the building trades are brisk in New York and Philadelphia and the unemployed mason, carpenter and laborer soon find their way thither. The slave system as it once existed at the south enabled the planter to mobilize labor when and where it was most needed. The planter paid the traveling expenses. In the future some way of mobilizing our industrial forces may av rt those periods of non-employment from which our workers now often suffer. The whole system of immigration is the mobilization of labor, but modern economists think the movement should be the result of individual ambition rather than the result of government foresight and action. In England to-day, and to some extent in the United States, railway laborers are moved from place to place, or mobilized. It may be said, and truthfully, that this nomadic labor is inimical to the home, with all its traditions of permanency. So it is, but so is our present system of labor which looks at woman, not as maiden, and then mother, but as an operative from youth to old age, with marriage, motherhood, home, as side issues, and the family as only more fuel for the furnace of industry. We do not believe that "the destitute shirtmaker no longer exists." If she is an orphan, or friendless widow, or forsaken wife, our present system of labor will not keep her from becoming destitute; but if she has a father, brother, husband, child, or other co-worker, their combined earnings may secure them a living that is beyond the reach of the "destitute" worker of the past or the present.

It is not so much the diversity of industries that has increased our army of workers as the simplification of labor, due chiefly to the introduction of machinery. In Lynn, Mass., with its 8,300 makers of boots and shoes, there are few, if any, boot and shoe makers—that is, those who could make an entire boot or shoe, as was the custom when to "learn a trade" required an apprenticeship. In all branches of business this simplification has been introduced, and a man or woman may be able to work at several parts of trades and yet be master of none, nor is it necessary that he should be. This innovation has reached the science of government, and public duties are often so simplified that only the minimum of intelligence is needed for their proper performance.

To this simplification of labor statistics of labor must in some degree conform. They must be made applicable to details and not to aggregates. Census statistics must be given in detail. "Iron and steel," used as the name of an industry, and comprehending so much, is valueless at this day of details, until we know just what it covers. It will be said it would cost so much more, to which we reply that in all true scientific work its value is not in its cost, but in its public usefulness, and that with statistics, as with steel, the best goods are worth the highest price. To keep pace with the individualistic tendency of the age statisticians must present details in print and not feed the public with misleading, because misunderstood, aggregates. Mr. Blodget's industrial census of Philadelphia will present that city's industries in a more detailed form than ever before. The Massachusetts state census of 1875 was a census of details, and we trust the next census to be taken in 1885 will be presented more in detail than the one of 1875. Our advice to the state bureaus of labor and statistics, of which there are nine now in existence, is to present facts in detail, as well as aggregates which so often conceal facts.

We think Mr. Blodget is unfortunate in choosing the boot and shoe maker (that is, a man who can make a boot or shoe) and the tailor (who can make a suit of clothes) to prove the point that the single artisan or workman has succumbed to the factory system. The factory boot or shoe and ready-made clothing have certainly narrowed the field of the bootmaker and tailor, but yet there are probably no two industries in which "handwork" so well holds its own against machinery as in the higher grades of boots and shoes and cloth-

ing. To be sure the indiscriminate mixing of hand-workers and machine operatives in all branches of industry in the census returns deprives us of the opportunity to prove the truth or falsity of our opinion.

Our correspondent touches on another interesting industrial question—the same corporation or firm acting as manufacturers, jobbers, and, it may be, retailers as well. The advance of this movement has been so open as to be easily studied. If there is an economic failure or falsity in this way of doing business it must be in the crushing of small dealers and manufacturers by their wealthy rivals, who first use them, then disable them, then absorb them. If struggling industries need protection, why not extend it to struggling small dealers and manufacturers? "Bonanza farms" are already pointed out as menacing our small farmers, but bonanza merchants and manufacturers have not only menaced small merchants and manufacturers, but have literally swallowed them up.

Mr. Blodget presents a statement showing the percentage of the population engaged in productive industries in the twenty chief manufacturing cities of the country. In the following table we reproduce his percentages in order to bring them into direct comparison with our own, which show the percentage of population engaged in all classes of occupation, and, by subtraction, the percentage of population engaged in industries other than productive:

		—Per cent. popul'n engaged in—		
Cities.	*Population.*	*Productive industries.*	*All classes of occupations.*	*Industries other than productive.*
Baltimore	332,313	17.0	39.2	22.2
Boston	362,839	16.3	41.1	24.8
Brooklyn	566,663	8.4	36.8	28.4
Buffalo	155,134	11.6	36.5	24.9
Chicago	503,185	11.7	38.1	26.4
Cincinnati	255,139	21.4	39.0	17.6
Cleveland	160,146	13.5	35.5	22.0
Detroit	116,340	13.8	33.7	19.9
Jersey City	120,722	8.3	35.0	26.7
Louisville	123,758	14.1	36.5	22.4
Milwaukee	115,587	18.1	35.3	17.2
Newark	136,508	22.0	35.9	13.9
New Orleans	216,090	4.4	36.2	31.8
New York	1,206,299	18.7	42.5	23.8
Philadelphia	847,170	21.9	41.4	19.5
Pittsburgh	156,389	23.6	33.3	9.7
Providence	104,857	19.9	41.8	21.9
St. Louis	350,518	11.8	39.9	28.1
San Francisco	233,959	12.6	44.7	32.1
Washington	147,293	4.8	38.8	34.0

Although these cities are preëminently manufacturing centers, yet in only four of them—Milwaukee, Newark, Philadelphia and Pittsburgh—is the percentage engaged in manufactures in excess of that engaged in industries not essentially productive. This shows plainly that all classes of occupations keep pace—in some cases outreaching—the gigantic strides of our manufacturing industries. In fact, they are all parts of an industrial harmony, the study of which rewards the social student and benefits the public. Our correspondent and all other honest searchers after statistical truths, who battle against individual, corporate or government shams or misrepresentations, are public servants, and by continued honest work they can make their private work as "official" as any that bears a state or government seal. To all such, within proper bounds, the columns of BRADSTREET'S will always be open for the advancement, discussion and criticism of vital social questions.

VIRGINIA AND MARYLAND OYSTER BEDS.

The report published by Carlile P. Patterson, Superintendent of the United States Coast and Geodetic Survey, detailing the methods employed in an examination of the oyster beds of the James river, and of Tangier and Pocomoke sounds, Maryland and Virginia, for 1881, together with the results of said investigation, proves a valuable addition to the store of knowledge already possessed respecting the subject. The expedition was in charge of Lieutenant Francis Winslow, U. S. N., and that gentleman's abridged yet thoroughly comprehensive account of the investigation, with plates, charts, maps, etc., having in view the demands of the popular mind for intelligence free from clogging and technical details, shows him to be especially well fitted for the work. The inquiry covered the determination of the position and area of Chesapeake oyster beds and the depth of water over the same at varying tides; the artificial or natural character of said beds, the prevailing or characteristic placement of the oysters, whether scattered in groups, the size thereof, etc., the temperature of the water at varying depths, and the velocity of currents. It was also designed to obtain and preserve specimens of various oyster beds, the water covering the same, and any deposits there found, in order to observe their nature and effects on the young oysters. The relative density of the water at varying depths was also to be examined. A summary of all that was done and determined (either conclusively or in part only) is of course impossible within the limits of this article. It may be stated, however, that the examination into the character of the natural and artificial deposits upon and adjacent to the oyster beds was highly satisfactory, in that it afforded results that will enable the oystermen in that region to profit by an employment of them. The investigations relative to the depths of the oyster beds and the velocity of currents were quite complete, and we find in the report several large charts covered with the results of the soundings taken and measurements made. It was found that the success or failure of the spatting seasons of the oyster are dependent on the density and temperature of the water. There may be three successful seasons in succession or there may be three failures one after another. There was no regularity observed in this respect. The investigation, however, has not been continued a sufficient time to enable those in charge to determine by a series of trials just what the favoring densities and temperatures of the lower currents are in which the young oyster finds his chances for prolonged life greatest. This is unquestionably an important point, and if Lieutenant Winslow's views as to the primary importance of density and temperature of the lower strata of water over the oyster beds be correct, it is to be hoped that special efforts will be made in succeeding surveys to cover these points fully. Oysters, as is well known, live in waters of greatly varying temperatures and densities. But the young oyster, it is to be inferred, finds himself the better enabled to live within a limited range of the same. During the first six months of its existence the young oyster is, of course, exposed to the greatest danger from enemies. The shells at that early period being thin, the young bivalve is easily reached through its outer covering by crabs and other forms of sea-life which prey upon the products of the oyster beds. In this way it is believed that about 50 per cent. of the young oysters are destroyed. As the young one becomes older it naturally finds its way amid differing surroundings. The ratio of oysters one year old to those which live to be four years old is said to be about 70 per cent. These conclusions being well established, the oyster-farming industry will find them of great value in connection with the related data given as to temperature, density, food, etc. The value of "working" upon the beds, thereby spreading the oysters and affording them enlarged opportunities to propagate, is dwelt upon at length, and the results of experiments in this direction are detailed. In conclusion there are given in tabular form the areas of oyster beds in the waters named, together with such other practical hints in regard to oyster cultivation as the experience of the investigation developed.

THE TRADE IN BUILDING MATERIALS.

In face of varying opinions, a survey of the amount of building going on in our chief cities and throughout the country induces the belief that the scale of operations for 1883 will prove larger than it has been for years. The applications for building permits, some of these, however, being merely extensions and improvements, made at the Building Bureau of New York city in the first six months of this year amounted to $30,000,000, and although all authorizations are not at once acted on, the new buildings in progress, with those continued from last year or commenced in this under previous permits, represent figures equal to two-thirds of the above amount. In New England and the northwestern sections of the country building is particularly active. In our great commercial cities the present year will be distinguished by the massive and costly structures commenced or completed. In New York the chief activity is in apartment houses on an unprecedented scale, some of the blocks approximating, with cost of land, to half a million dollars; a number of costly churches are also going up; whilst of commercial buildings of a more than ordinarily imposing character—buildings indicative not only of the growing wealth of the business community, but of advancing taste as respects embellishments and conveniences, there has been a fair quota. Large structures suitable for their purpose are on all hands found to be the most paying, and the confidence of capital in satisfactory returns from these is leading to increasing investments.

This country has the advantage of great capability in producing varieties of building materials, but the contiguity of the British provinces leads to such importations as freestone and laths, and in cements, a comparatively new industry in this country, a considerable importation takes place from England and the continent, which has reached so far this year to about 150,000 barrels. Scotch freestone for basements and trimmings is being imported on an increasing scale. On the other hand, we export our bluestone to Canada, Cuba, Mexico and South America, its special qualities recommending it for flagging and lower courses of buildings. The bluestone, granite and marble of New England handled in this city are chiefly brought here by water. All over the country cost of transport necessarily governs to a great extent the selection of stone for building, though with certain important edifices distance is allowed to offer no impediment to the conveyance of huge quantities of New England stone to remote western cities.

The business in granite, owing to the larger scale on which buildings are now constructed, increases year by year in this section; Maine, which may be regarded as a granite state throughout its length and breadth, supplying the larger proportion. The price of ordinary granite ranges from 75c. to $1 per square foot; but superior qualities, which allow of a fine polish, present an attractive surface, and are not liable to become discolored, will realize as much as $10 per foot. Notwithstanding the costliness of granite, entire buildings in different parts of the country continue to be erected of this material. The stone is cut and fashioned at the quarries according to the architectural drawings, and thus, on arrival, has only to be set in place. So with a great portion of the freestone used here. The most extensive employment of Maine granite in this country has been in the construction of the piers and approaches of the East River Bridge. There is extreme competition among the granite quarrymen, and owing to the abundance and variety of the stone, new specimens are being continually brought to market, but it is difficult to place any new description. The brownstone with which New York is supplied, only obtainable from beds of limited location in Paterson, N. J., and Portland, Ct., is, as a consequence, well controlled by the quarry owners. Their sales are chiefly in New York, Brooklyn and Boston. The stone goes no further than Pennsylvania.

Bluestone has been employed for flagging and building purposes for half a century, but its extensive use has been more recent. Previous to the adoption here of the North river stone the quarries on the Connecticut river were chiefly drawn on for New York flagging. Pennsylvania supplies New York with a moderate proportion. This stone, which is extensively used for trimmings for buildings, for water tables, lower cells, lintels, large platforms, and for rubbing and polishing, goes to all parts of the country. The cost of the rough quarried stone handled here does not exceed $3,000,000 per annum, but the labor expended in shaping it, with cost of freight, brings this amount up to $9,000,000. The figures given for freestone (brown) by qualified estimators closely approximate to the above. Cost of labor in cutting and dressing both blue and freestone has been greatly reduced of late years by the powerful iron planers employed for these purposes.

The marble used in this section, a good part of it employed in interiors for mantels, is from Vermont, which supplies every desirable quality and color. Limestone from Ohio, Indiana and even more distant states is also furnished. An important contribution to our building materials is in Portland stone from Kentucky, of similar quality to the famous English stone of that name.

Artificial building stones have come into prominence of late in the way of concrete blocks, tiles, etc. Of these terra cotta, both for purposes of ornament and utility, is the most prominent, being widely used for architectural trimmings, carved moldings, bands, cornices and for porches. It is found suitable for substantial work in which strength and durability are primarily essential. Terra cotta has served in an important degree to aid the present general adoption of brick in structures by affording effectual contrast and aiding in picturesque design. The brick trade of New York is enormous. The supply is chiefly obtained from North river establishments, which furnish every desirable variety of texture, form and color. The number handled in New York alone may be put at from 700,000,000 to 800,000,000 per annum. The average cost, estimated by the carload, is $6 to $7. The cost is affected not only by the activity of building but also by the favorable character or otherwise of the season for the manufacturer. Enameled bricks for lining interiors and for floorings are extensively imported and to some extent manufactured in this country. Some new buildings contain several hundred thousand. Construction iron enters more largely than ever into our buildings, and ranks essentially, though not nominally, under building materials. Estimates for the quantities required are obtained by architects or contractors direct from the iron founders, whose works are on a large scale. Iron has found uses in building never dreamed of in the old timber days, being adapted for beams and girders, pillars, stairways, balustrades, floorings and landings, and for first stories of store frontages. Of builders' woods this journal has already specially treated. Omitting from the present notice other building materials, we may mention that 150,000,000 laths are sold in this market annually, half the amount coming from St. John's, N. B. Of lime, 1,500,000 barrels are placed each year on the New York market. In Portland cement, both in foreign and home manufacture, an increasing business is being done. The sixteen cement manufacturers of Rosendale, Ulster county, N. Y., alone supply 1,600,000 barrels per annum. There are about the same number of manufacturers in Louisville, Ky., and in Pennsylvania.

LATE CONSULAR REPORTS.

It is now evident that the gentlemen in the State Department at Washington having editorial charge of the monthly publication emanating therefrom are determined not to be outdone in enterprise by the managers of other periodicals. It has become quite common for the latter to expend considerable sums to procure specially-written articles, stories or essays from gentlemen eminent in the literary or scientific world. These are heralded weeks in advance as evidence of unusual liberality or enterprise, or both. Witness the statement that a leading New York daily recently paid a well-known American author $1,500 for a story to be continued through perhaps three Sunday issues. This is evidently becoming quite popular with publications having wealth and taste at their command, and it is noticeable that the State Department monthly magazine, entitled "Reports from the Consuls of the United States on the Commerce, Manufactures, etc., of their Consular Districts," is keeping abreast of the times. The July number, with native modesty, comes to its readers with a brief, although perhaps not very characteristic, contribution from the pen of Mr. Bret Harte, consul at Glasgow

Scotland, the existence of which had not even been hinted at in advance, as might have been done, to secure wider circulation and a reputation for "sparing no expense," etc., to meet existing demands in the matter of variety and quality of articles. There are nearly two hundred pages in this number of the Consular Reports, yet Mr. Harte's article is unsuspectingly tucked in well beyond the middle. The contrast between this method of making public the work of a celebrated author and that which prints in large type on the cover "Mr. Jones' new story begins in this number"—after spending hundreds of dollars in daily papers in advertising its advent—is at once conservative and unique. By this reversal of the ordinary method of gaining fame and dollars the State Department has in reality given Mr. Harte's latest article the greater prominence and at the same time set a good example to older and in some instances more popular magazines. We find Mr. Harte's article complete. This is an added attraction, and hints that one may be warranted in looking for something from other literary lights in future numbers—from Mr. James Russell Lowell, perhaps—for some of the contributions from other consuls in the past have been open to other objections than a lack of interest and purpose. Mr. Harte's article does not bear the mysterious title "Houses of one room," as it might. On the contrary the writer for the time seeks to avoid the delicate flights of fancy and power of word painting which have so distinguished him, and seeks rather to give condensed statements of unvarnished fact. So he writes of "Dwelling House Accommodations in Glasgow," the theme being suggested by a startling statement made by Mr. John Bright on the occasion of his inauguration as lord rector of Glasgow University, viz.: "That 76½ per cent. of the persons residing in Glasgow lived in houses of one room." No details were offered at the time, and it afterward occurred to our consul at that port to look into the matter. He tells us in the plain hard way of the statistician, rather than in the graceful imaginative manner of the fascinating story-writer that he is, that in 1881 the population of Glasgow proper was 511,520, of which 248,467 were males and 263,053 females. The suburban population—which, it is explained, must in reality be considered a part of Glasgow—was 193,620, thus giving Glasgow in all 704,140 citizens. The increase since 1871, shown by the latter total, is 110,888. With these preliminary trifles the writer branches off into the subject of house-building in Glasgow, wherein there is greater opportunity for exhibiting his characteristic style. He says: "In Glasgow the proprietors of the ground believe in making as much money out of it as possible, and the blocks of houses are nearly all built four-stories high, or about forty feet, and these are divided into one, two, three, four or more apartment houses, according to situation and locality." This peculiarity of uniformity in construction suggests an explanation which is given: "In building, a body of experts in such matters, called the 'Dean of Guild Court,' insist on regularity in construction, and compel proprietors to adhere to the conditions of their like deeds as to uniformity of design, height, etc., and it is recorded that one builder who had exceeded the traditional four-stories, on being brought before the said court, pleaded ignorance on the point, and declared that there 'was no ground rent up there.'" It is added that he had, in fact, "paid too high a price for his ground, and wanted to make the speculation pay by adding a fifth story." Following this reminiscence are a few details as to the total number of houses in Glasgow. In 1881 the total was 119,059, of which 12,724 were uninhabited. Of the total 35,843 contained but one room, 52,624 but two rooms, 17,746 but three rooms, 6,623 but four rooms, and 6,223 houses contained five or more rooms. Mr. Harte calculates (giving excellent reasons therefor) that there are now 121,000 houses, and that of these no fewer than 89,600 are of one and two rooms only. The figures previously given indicate that the average number of rooms in inhabited houses is not quite two and a third each, and that the average number of persons in each occupied house in 1881 was a fraction over four and seven-tenths individuals. Mr. Harte, therefore, finds that the lord rector's statement should be cut in two, for the deductions first made indicate that two-thirds of the people of Glasgow live in houses of not more than two apartments. Grouped by families it is shown that 42,687 families live in houses of one room only, and that 49,657 live in houses of but two rooms. On this subject Mr. Harte further says: "There is one startling fact in connection with this social subject which I cannot help pointing out. The operative classes who live in these apartments are remarkably prolific; and I have it from the best authority that 950 families live in Glasgow at the present time whose circle number from ten to sixteen persons. This means a population of something like 10,000 persons living in 1,853 apartments. Whether this prolific quality is the cause or result of overcrowding is a matter of argument. I only record the fact." It is pointed out that these facts do not necessarily argue that the density of Glasgow is greater or less than that of other large cities in Great Britain, nor, on the other hand, that there is a greater degree of mendicancy or destitution there." Mr. Harte concludes: "I believe there is less destitution, less absolute deprivation, less misery and want in Glasgow than in her sister cities. There is certainly less dependence upon charity and less open mendicancy here than elsewhere. The poorest Scotch laborer is too proud to beg. My casual impression of him is that he does not spend what he does not earn—and seldom even as much as he does earn—and that what may seem to be the social sin of poverty is perhaps only the Scotch beatitude—thrift."

Consul-General Mattson, at Calcutta, calls attention to the rude and inefficient plow used by the Indian "ryots" to stir up the 200,000,000 acres which they cultivate annually. This plow consists of a sharp-pointed stick attached to a sort of tongue, which in turn is fastened to a yoke, by means of which a pair of oxen succeed in causing the plow to stir up the soil to the depth of three or four inches. It is pointed out that the ordinary heavy plow used in the United States would not be of service in India and is not acceptable to the agricultural population there. But Mr. Mattson is of the opinion that the light American garden plow, such as a boy can carry and a pony can work, is just the implement to meet with favor if properly introduced into India. The construction of this plow would, of course, have to be varied a trifle for the Indian trade, but if it met with but a share of the demand which it is believed it would, a fortune would accrue to the manufacturer.

Consul Griffin, of Auckland, New Zealand, estimates the meat supply of the Australian colonies at 700,000 tons per annum, or 2,000 tons per day. The real limit of their power to supply is the capacity of the tonnage at their command. Meat can form only a portion of a cargo of steamers or sailing vessels, and there must be further inward as well as outward cargoes in order to pay. It is therefore thought that there is no prospect for one-fourth of this capacity (2,000 tons daily) reaching foreign shores for years to come. The losses reported by the Australian Frozen Meat Company in 1882 were in large part caused by the ravages of the prolonged drouth in Victoria and New South Wales. The result at present continues to show itself in very high prices in the colonies named. Our consul expresses the opinion that the meat trade of the future from Australasia will be from New Zealand. As to the processes for freezing the meat it is stated that it is more than probable that colonial exporters will eventually be compelled to adopt some American process in the place of that now used, which is comparatively expensive in that it is less efficient.

"The World's Silk Industry" is epitomized by Consul Peixotto, at Lyons, France. The statistics given are of considerable interest to the silk-raising and manufacturing industries, but are too voluminous for reproduction. In summarizing it is explained that, while the value of the total silk manufactures of the world "may be estimated" at about $350,000,000, that of China and Japan may be left aside in a general consideration, owing to the radical difference of the economic situation in those countries. Of the remaining silk-manufacturing countries the value of the product is given as folllows:

France	$85,000,000	Austria	$12,000,000
Germany	45,000,000	Italy	14,000,000
United States	35,000,000	Spain	5,000,000
Great Britain	25,000,000	Other countries	17,000,000
Switzerland	18,000,000		
Russia	16,000,000	Grand total	$270,000,000

Mr. Peixotto cheerfully admits that these figures are open to criticism, but thinks that, while the distribution may not be entirely correct, the sum total is very nearly so. The estimate as to the number of silk looms in the world is given at 470,000, including power looms.

POINTS OF INTEREST FROM CHINA.

Our San Francisco correspondent sends us the following points of interest from the latest China mails:

Considerable interest exists among foreign merchants respecting the promising trade offered by the province of Szechuen. This rich province lies on the western frontier of China, along the great snowy range in which the Yang-tse-Kiang has its source. It is due north of Yunan, the trade of which is coveted by the French, who seek control of its outlet, through Red river, to secure which they are prepared to go to war with China. Trade with Szechuen is now carried on by navigating the Yang-tse, shipments being made from the river port of Hankow by steamer to Ichang, thence by native boats through the rapids to Chungking, from whence it is distributed through the province. The commissioner of customs at Ichang reports for 1882 that nearly 34,000 opium lamps were imported, of which about 28,000 went into Szechuen under transit pass. This is double the quantity imported two years before, despite the prohibition proclamation. Szechuen is rich in minerals and very fruitful. A shipment of lead was sent from it to the government last year, besides copper ore from the district of Itu, which is said to contain the richest copper ore in the world. Shanghai is the port where the foreign trade of Szechuen is transacted. Its value as a market for American products may be guessed from the fact that of a total of 5,479,586 pieces of gray shirtings imported into Shanghai in 1881 not less than 553,386 pieces were sent to Szechuen from Hankow and Ichang, or 10.10 per cent., while 18 per cent. of all woolen goods imported found a market in that province. Szechuen is a large producer of opium, great quantities of which are brought down the river in boats. What is needed to develop this trade is light-draft steamers on the upper reaches of the river between Ichang and Chungking. The rapids present no formidable obstacles to steamboat navigation. This is a promising field for American enterprise.

Anticipations of a short crop caused a sudden rise in the price of rice at Foochow of 60c. per picul. This is a purely speculative rise, however, the young crop not being sufficiently forward to base an estimate upon. The tea market opened at Foochow at about one tael lower than last season, the Chinese coming to buyers' terms.

The average amount of banknotes in circulation in Hong Kong during last May was $4,660,224, made up as follows: Oriental Bank corporation, $753,980; chartered Mercantile Bank of India, London and China, $940,150; chartered Bank of India, Australia and China, $737,094; Hong Kong and Shanghai Bank, $2,229,000.

British India is becoming a formidable competitor of China and Japan in the tea trade. Last year 53,547,222 pounds of tea were exported from Calcutta to Great Britain. The committee of the Indian Tea Association estimates the crop of 1883 at 63,000,000 pounds, which, after allowing 3,500,000 pounds for export to Australia, America and elsewhere, and 1,500,000 pounds for home consumption, would leave 58,000,000 pounds for the English market—an increase of about 4,500,000. This shows the rapid development of the India tea trade.

OCCASIONAL NOTES.

The constitutional amendment making the canals free appears to have been abundantly justified by the statistics of canal transportation. The traffic on the canals since the opening of navigation in May, this year, shows an increase of more than 11 per cent. over the corresponding period of 1882. The gain is made up principally of increased shipments of articles made free by constitutional amendment. The importance of the canals as regulators of freight charges will be seen from the fact that during the month of July wheat was carried from Buffalo to New York at a charge of less than $^{24}/_{100}$c. a ton per mile. The rates for the transportation of outward-bound freight are even more suggestive. Merchandise has been carried from New York to Buffalo by river and canal during the present season for a fraction more than $^{12}/_{100}$c. a ton per mile. It is doubtless true that the increase of the business of the canals is not due exclusively to the abolition of tolls, but may be traced in part to other coöperating causes. An analysis of the figures, however, sufficiently establishes the fact that the measure referred to has been a very important factor in the augmentation of the canal traffic.

There are some further considerations regarding traffic on the canals which are well worthy of the attention of the people of New York, especially of those interested in the commerce of the state and of the city. It is believed, upon good authority, that freight charges upon the canals could be further reduced 40 per cent. upon the present charges if the canals were improved by increasing the depth from 2½ to 3 feet, and by lengthening the locks so as to allow a boat and its consort to be locked through at the same time. Locks have heretofore been constructed to admit only one boat, but if the changes suggested were made one canal boat, fitted with an engine and boiler, could tow another and both could be locked through together. In this way the difficulties now experienced at the locks would be obviated. The expense attending the adoption of these improvements would be small in comparison with what has been incurred for many other public works of much less value to the state and to the country at large. The need of improving the canals is a fact that does not require to be established by argument; it is a present practical necessity, to meet which measures must be promptly taken if the canal is to retain its importance as a regulator of transportation charges. The matter is one particularly deserving of the attention of the commercial bodies of New York, and they should take speedy and energetic action in relation to it.

It is beginning to be discovered in England that utilitarianism is not an all-sufficing system of philosophy, or rather, to be more correct, that the true utilitarianism is not a bald and shortsighted materialism. Fresh air and the beauty of natural scenery are, it would seem, not irrevocably classed among the inutilities. This was made apparent recently by the rejection by a committee of the House of Commons of a bill providing for the construction of a railroad in the Lake District, famed for its Wordsworthian associations. That Mr. Ruskin and his æsthetic disciples have been able to score a success like this against the Philistines is a fact not without importance. It is in a sense typical of the revolt, which has of late been making itself felt, against what may be called, though perhaps not with entire justice, the economic view of life and the world. There was a time not very long ago when a remonstrance against unlimited railway extension would have been stigmatized as "opposition to progress" of the most flagrant kind. The change of public attitude is sufficiently indicated in the following lines from an article in the *Pall Mall Gazette*. That journal says: "The construction of a railway may be in the public interest, just as the preservation of natural beauty is in the public interest. It is a mere question which we value more highly, and the fact to notice is that the preservation of natural beauty is no longer regarded as a subordinate matter, but is weighed in a more equal balance against commercial and industrial considerations." This, from a representative newspaper of a country which has been stigmatized as a nation of shopkeepers, is not without its significance.

The British railway returns for the year 1882 show an increase of £22,371,408 on the capital expenditure during the twelve months as compared with an increase of £17,211,314 in the previous twelve months. A considerable portion of last year's growth, however, is nominal, being due to the consolidation of the stocks of some of the companies. The net earnings per mile show an increase of 2.58d. over those of the previous year. The expenditure per mile, on the other hand, exhibits an increase of only 0.19d., leaving, as will be seen, a considerable balance of net earnings. The large net income, however, having to be spread over a large capital, the increase in the percentage of net receipts to paid-up capital is not large, being only 0.03. The total receipts for the year were £69,377,124, as against £66,557,442 during the year before. Of the total receipts for 1882 £28,796,813 were for passengers, £37,740,315 were on account of goods, and £2,839,996 were classed as miscellaneous.

At a recent meeting of the Society for the Suppression of the Opium Trade in London, Mr. Tong Kingsing, of Shanghai, the general manager of the China Merchants' Tea Company, made a strong plea for the suppression of the trade. After remarking at length upon the injurious physical effects of the drug he entered into details to show how terribly poverty was spreading in the towns and villages of China in consequence of indulgence in opium smoking. He said that the Chinese government was sincere in its endeavors to stamp out the trade. That government had never, either before or since the wars connected with opium, admitted it to be a fair article of merchandise or one which ought to be imported from abroad, but when seizures were made on account of smuggling the consuls interfered on the plea that the drug was the property of British subjects. The Chinese government had, he said, proved its sincerity by degrading a viceroy for smoking opium, and at one time laws were made under which the penalty for opium smoking was death, but the Indian drug was forced into China afterward with shot and shell, and these the government was powerless to resist. England's policy in relation to the opium question indirectly opposed a hindrance to the progress of civilization in China. He thought that if England were to stop the importation of opium into China the Chinese government

would take measures for putting down the home cultivation. The meeting, which was presided over by the Earl of Shaftsbury, adopted resolutions deploring the evil effects of the opium trade and urging that justice be done to China in the international negotiations on the subject.

The foreign trade of France for the first six months of 1883 shows a slight increase over that for the corresponding period of 1882. The total value of the imports for six months of 1883 was 2,418,211,000f., as against 2,354,001,000f. for six months of 1882. The increase here observable was mainly due to a gain in the imports of raw materials (which were valued at 1,172,955,000f. in 1883, as against 1,131,279,000f. in 1882), and of articles of food which were valued at 771,899,000f. in 1883, as against 748,710,000f. in 1882. A slight falling off is noticeable in the imports of manufactures. The exports show a decrease, being valued at 1,689,646,000f. in 1883, as against 1,721,236,000f. in 1882. This decrease is principally owing to a decline in the exports of manufactures (which were valued at 858,450,000f. in 1883, as against 907,950,000f. in 1882), and of raw materials (which were valued at 326,016,000f. in 1883, as against 330,763,000f. in 1882). A slight increase is noticeable in the exports of articles of food.

According to some recently-published statistics of the French coinage, the total amount of gold pieces in currency during the period between 1795 and the end of 1882 was 8,651,264,340f., of which 53,396,900f. were of 100f., 46,833,400f. were of 50f., 205,432,360f. of 40f., 7,168,602,800f. of 20f., 965,051,690f. of 10f. and 210,947,190f. of 5f. The issue of 100f. and 50f. pieces only date from Louis Napoleon, and there have been no 40f. pieces struck since the fall of Louis Philippe; 20f. pieces have been struck under all the governments since Louis Napoleon's time. The total amount of silver issued during the period mentioned was 5,519,846,617f., of which 5,060,605,240f. were in 5f. pieces. During last year 3,752,700f. in 100f. gold pieces, were struck, together with 1,159,859f. in 50c. pieces. The total value of gold and silver pieces coined during the period referred to, deducting demonetized pieces, was 13,948,944,204f. The issues of bronze money during the last thirty years of the period have been 33,699,573f. in 10c. pieces, 26,855,347f. in 5c. pieces, 1,888,786f. in 2c. pieces, and 1,177,596f. in 1c. pieces.

The extent to which insurance against fire is resorted to in Paris is disclosed by some recent statistics relating to fires in the French capital. During last year it appears that there were 982 cases of fire in the city, in 926 of which insurances were effected upon houses. Insurances upon furniture were somewhat less common, being had in 751 cases only. The statistics would seem also to indicate a high degree of efficiency on the part of the fire service. The estimate of the losses in 977 cases of fire was 7,729,315f. Of this entire loss 7,590,100f. resulted from 274 fires, in which the average loss amounted to 27,701f. per fire. In the great majority of cases the loss was trifling, the total for the 703 remaining cases amounting to only 139,215f., or an average of 198f. per fire.

LETTERS TO THE EDITOR.

INDUSTRIES OF THE CHIEF CITIES.

To the Editor of BRADSTREET'S.

SIR—The industries of the larger cities, and especially of New York and Philadelphia, are undergoing changes and presenting developments of great interest and great importance, not only in the ordinary sense as measures of the growth of business, but also in the highest social sense, as indications of the future welfare of their rapidly increasing population and of the vast numbers soon to be gathered in these and other great cities of the country. The proportion of their population engaged in productive industries increases more rapidly than the simple growth in numbers. In 1870 New York had but 13¾ per centum engaged in productive industries, and in 1880 there were 227,352 persons, or nearly 19 per centum of the entire population. Philadelphia had 20$^4/_{10}$ per centum engaged in productive industries in 1870 and nearly 22 per centum in 1880, as first taken, but an entirely complete enumeration would have shown more. In 1882 the number reported as being so engaged was over 240,000, or 25 per centum of an assumed population of 950,000. All the larger cities show the same rapid increase in the proportion of industrial population, comparing 1880 with 1870, or with any previous census, and these striking facts are of the highest interest, and most encouraging as regards the welfare of the countless thousands who in the absence or these industries would have no resource.

These industries themselves are also changing their form and becoming a better resource for those engaged in them. Wages are better, and the conditions of labor are less restricted. The easier conditions in this respect are very striking in Philadelphia, and probably not less so in New York. In the census year 1879–80, 227,262 persons employed in the city of New York received $97,030,021 in wages, or the very large sum of $427 each for the year, 71,795 of the persons employed being females and 9,378 being children. The proportion paid to these two classes cannot be distinguished, but it may be supposed to average for both not over $250 per year. At Philadelphia 185,527 persons are reported to have received $64,265,966 in wages, or $346 each for the year, the number of females being 56,818 and of children 15,634. This last is undoubtedly a short or deficient report, but our present purpose is only to show that the wages paid are really liberal in any case, and that the conditions of employment are such as to reach all the members of a family. The minimum rate of wages for both cities may be fairly stated to be $9 for men, $5 for women and $2.50 for children per week; at least this is true for Philadelphia, and it is fair to assume that as the general aggregate is greater at New York the minimum cannot be less.

In contrast with this average of rates for 1880 there was in Philadelphia not more than half as much paid to most classes of labor thirty or forty years ago. In June, 1835, an official report of the wages paid to females in book-folding was made; 19 employers, with 168 female folders employed, reported their wages as realizing from $2 to $3.50 per week only, the average being $3.25. On January 16, 1839, a report on the earnings of sewing women showed that they could obtain at piece-work not more than 94 cents per week, and societies were formed for the amelioration of their condition. During all that early period in the history of the greater cities the wages of labor, whether productive or unproductive, were so low that suffering was constant, and the conditions of constraint were such that frequent and violent social disorders occurred. It was long believed that with the natural increase of population this constraint and the consequent liability to suffering and disorder would also increase, and that there would be no relief except through a partial disposal of these populations. The writer recalls a strong impression to this effect, which continued long after the labor disturbances of 1844 to 1850.

Nothing is more certain than that the situation of the employed classes of the cities has for ten years past been in marked contrast with the state of labor twenty years previous. This change is due to the growth of the productive industries and to the diversity which has become so great and general. The industries have also themselves changed, having become transformed by better methods. The destitute shirt-maker of 1839, and, indeed, for many years afterward, no longer exists; the new appliances of labor have of themselves driven destitution away. Diversity of employment is, however, the leading cause of the great amelioration of the social condition of the great body of the people, especially in the cities. The number of distinct industries so conducted as to employ persons at remunerative wages has increased three-fold within twenty-five years, and the change from single or household employments to coöperative employment and the discipline of the work-room increases the efficiency of labor to three or four times its capacity when isolated. The writer has seen eight women at one table working steam embroidering machines on fine hosiery, and easily earning at piece-work $2 each per day, their employer being himself better paid than if they were working by hand at $2 or $3 per week.

The great progress of the cities is effected through this better organization of labor and the rapid advancement in appliances and machinery. It is well enough known how great the advantage the factory has over isolated handwork, but organization and discipline are found to be as easy and effective in the single work-room and upon the most advanced and even artistic forms of industry as they have been shown to be in the factory. The taste of the age demands a far greater variety of supplies for all classes of uses than before, and the accumulation of wealth justifies liberal expenditures.

The census of 1880 gave, in very crude form, a tabulated statement of the industries of twenty leading cities, the first and most serious defect being the limitation of the numbers or the failure either to obtain or to distinguish the industries in full. But imperfect as the list is in each case, the statements are valuable and instructive. The following is the number assigned to each city:

Baltimore	118	Milwaukee	62
Boston	142	Newark	78
Brooklyn	121	New Orleans	59
Buffalo	73	New York	164
Chicago	139	Philadelphia	195
Cincinnati	125	Pittsburgh	70
Cleveland	77	Providence	69
Detroit	61	St. Louis	117
Jersey City	35	San Francisco	115
Louisville	73	Washington	52

In each case, however, there is a large list of single industrial establishments not scheduled separately, but merged in a "miscellaneous" aggregate—this number ranging from 43 as the lowest, at New Orleans, to 116 as the highest, at Boston, and averaging about 70. It is gratifying to find that there are so many, and it is evident that in a very short time the schedule would be doubled if the rule of putting in all industries presenting two or more establishments should continue to be observed. At New York and Philadelphia the condensation is much too great; such items as "iron and steel," "foundry and machine-shop products," "printing and publishing," "drugs and chemicals" and others might be expanded so as to name and define each distinct commercial product. To do so would add seventy or eighty to the enumerated list for each city, and would give the most valuable information as to the actual state of those industries now entirely covered up under a general term of no distinctive value.

It is also apparent from these schedules that few or no industries are now the subject of so-called neighborhood exchange, at least in the great cities. The single artisan or workman, alike with the organized shop, works for the general market. The small boot and shoe maker works in part on quantities for the wholesale dealer; the clothier or tailor has almost ceased to work for customers wholly, many of them not at all, and all of them, wherever located, work in part for the wholesale dealer, and therefore become participants in the commercial phase all industries take on. This gives them a new importance, and removes a ground of distinction that was quite marked so recently as 1860.

An attendant element of the present situation, and possibly to some extent a cause for the rapidly increasing diversity of industries, is the attempt of large dealers or distributors of all articles bought by shoppers, to produce themselves many of the articles they sell. Some have already gone so far as to have manufactured for themselves, and by workmen paid by them, no less than twenty to thirty classes of fabrics or articles. They therefore create a large manufacturing industry directly connected with all their own operations, a proceeding that may fail on economical grounds, but it is a powerful stimulant to the development of a varied general industry.

The percentage for each of the twenty cities of the population engaged in productive industry, is itself a study worthy of more attention than it has received. The census figures of 1880 illustrate this relation so much as to be very full of interest, but they are far from being conclusive.

Philadelphia, July 31.

REVIEWS.

*METHODS OF SOCIAL REFORM.**

In a volume with the above title the Macmillans have published a collection of essays from the pen of the late Professor Jevons, which were originally printed in the *Contemporary Review* under the same title, together with other papers and addresses on kindred subjects. The papers extend over a period of some fifteen years, though, owing in part to the continuing interest in the subjects treated and in part to the skill and thought displayed by Professor Jevons in dealing with them, these essays have lost little or nothing of their contemporary value. Two of the papers only received a final revision at the hands of the author, namely, that on the "Amusements of the People" and that on "Experimental Legislation and the Drink Traffic;" the others are republished as they were originally written. The essay on the "Use and Abuse of Museums" has not been published before. Many of the readers of Professor Jevons' works will be of the belief that in the field touched upon here the author was by nature as well as by acquirement fitted for a very useful career. A man of original mind, a skilled logician and an economist whose grasp of the principles of his science was familiar and comprehensive, his large social faculty peculiarly qualified him to deal with the vexed questions which lie along the borderland of the economic and social sciences. An active and intelligent social sympathy is not so common an endowment among economists that the death of a man like Professor Jevons can be regarded otherwise than as a serious loss, and the same consideration gives added interest and value to the more enduring memorials of his studies in social philosophy.

The volume before us opens with a series of papers in which the possibility of securing some measure of social reform through the agency of well devised schemes of recreation and of popular instruction other than education properly so-called is discussed with characteristic insight. Then follow a number of essays of a more purely economic character, such as the paper on "Trades Societies; their objects and policy," and that on "Industrial Partnerships." In the former of these essays the author, while generally commending the objects of trades unions, expresses the conviction that the attempt to regulate wages is injurious to the workmen concerned in the majority of cases, and that in all cases it is thoroughly injurious to the welfare of the community. The supposed struggle with capitalists in which many organizations engage for the purpose of raising wages is, he says, not really a struggle of labor against capital, but of labor against labor—that is, of certain classes or sections of laborers against other classes or sections. It is, besides, a struggle in which only a few peculiarly situated trades can succeed in benefiting themselves, and those trades which succeed in maintaining a high rate of wages only succeed by protection—that is, by levying contributions from other classes of laborers and from the population in general. In his article on "Industrial Partnerships" the author says that these arrangements constitute by far the truest form of coöperation, but that the partnership principle is not equally applicable to all trades. The belief is expressed that those kinds of manufacture where the expenditure is to a large extent paid in wages and by time, and where a large number of men are employed in a manner not allowing of any rigid test or superintendence of their work, will derive most advantage from the adoption of the principle referred to. The civil-service reformers will find some strong arguments in favor of the system of competitive examination in the author's article on "Cram." Professor Jevons was led by his experience and that of others to the conclusion that the powers which enable a man to take a conspicuous place in a severe competitive examination are closely correlated to, if they are not identical with, those leading to success in the battle of life, and that, speaking generally, success in such a test requires, in addition to pure intellectual ability, a combination of physical health, nerve, energy, and powers of endurance and perseverance.

In an article dealing with the relations of legislation and the drink traffic the author makes a plea for social experimentation particularly in regard to matters within the domain of legislation; that is, for the actual trial of new measures on a small scale and within a moderate area. Tentative procedure of this kind he declares to be the true method of social growth. It is noteworthy that in obedience to the principle here outlined the experiment of establishing agricultural banks in India, to which we referred recently, is to be tried in a particular district, so that its results there may be made known before its application to any considerable portion of the country is attempted.

The most interesting papers in the volume are those in which the author discusses the arguments for and against state control of the agencies of communication and transportation. Upon this question he by no means occupied the position of a doctrinaire. He believed that there was no abstract principle and no absolute rule to guide in determining what kinds of industrial enterprise the state should undertake and what it should not, and that while state management and control had most indisputable advantages, the advantages inseparable from private commercial enterprise and responsibility were still more unquestionable. Professor Jevons held that state management possessed advantages under the following conditions:

1. Where numberless widespread operations can only be efficiently connected, united and coördinated in a single all-extensive government system.

2. Where the operations possess an invariable routine-like character.

3. Where they are performed under the public eye or for the service of individuals who will immediately detect and expose any failure or laxity; and,

* Methods of Social Reform, and Other Papers. By W Stanley Jevons, M.A., LL.D., F.R.S. London: Macmillan & Co. 1883. pp. viii., 383.

4. Where there is but little capital expenditure, so that each year's revenue and expense account will represent with sufficient accuracy the real commercial conditions of the department.

The author thought that those conditions were combined in the highest perfection in the post office. He advocated the purchase of the telegraphs by the English government because the telegraph system appeared to him to possess the characteristics which favored unity and state action almost in as high a degree as the post office, the parallel failing only in the matter of the expense of transmission. In regard to the state purchase of railways he held a different attitude. He dismissed as of no account some of the evils attributed to such a system, as, for instance, the alleged great patronage and political influence which it would place in the hands of the cabinet. He opposed such a purchase for the reason that railway traffic could not be managed by pure routine like that of the mails, being fluctuating and uncertain, and dependent upon the seasons of the year, the demands of the locality or events of an accidental character. Incessant watchfulness, alacrity and freedom from official routine were, he showed, required on the part of a traffic manager, who should always be ready to meet the public wants. Considerations such as these seemed to him conclusive against state ownership of railways, and he laid stress upon the point that it is only by establishing a judicious system of control and reform in details that railway communication can be improved and cheapened.

RECENT LEGAL DECISIONS.

[*Prepared expressly for* BRADSTREET'S.]

Where a person bargains for and takes into his possession an article of personal property, giving his note therefor, the note containing an agreement that the title to the property shall remain in the seller until the note be paid, he has an insurable interest in the property, although the note is not fully paid, according to the decision of the Supreme Court of Maine in the recent case of Reed vs. The Williamsburg Fire Insurance Company.

In the case of Streeter vs. Smith et al., decided recently by the Minnesota Supreme Court, it appeared that the defendants were in possession of certain chattels upon which the plaintiff held a mortgage, which he was about to foreclose. In order to induce him to refrain from taking immediate possession thereof the defendants agreed in writing to keep the same in their possession subject to his demand, or to pay him a certain fixed sum. In an action to recover this amount the court held that the agreement above referred to was valid, and that in default of the delivery of the goods upon demand the defendants were liable to pay the sum stipulated.

Under a legislative provision authorizing an attachment "when the debtor has failed to pay the price or value of any article or thing delivered which by contract he was bound to pay upon delivery," an attachment can only be maintained where there is a contract between the parties that the property delivered shall be paid for on delivery, and where also the understanding and intention of the vendor that the property shall be paid for on delivery continues on down to the time when the property is actually delivered. Such was the conclusion reached by the Supreme Court of Kansas in the recent case of Young et al. vs. Lynch. The court further held that even where the original contract provided that the property should be paid for on delivery, if the terms of the contract were modified or waived by the vendor and the vendee, an attachment could not be maintained under the provision above referred to.

The right of an auctioneer to retain money paid on account of a purchase, although the purchase had fallen through, was before the English High Court of Justice, in the recent case of Fellowes vs. Jeffries. It appeared that the plaintiff agreed to purchase from the defendant by private contract a certain hotel in London, and that he paid a certain sum of money as a deposit on account thereof. Owing to the vendor being unable to answer satisfactorily certain requisitions in regard to title, the contract of sale fell through, and the plaintiff sued to recover the amount of the deposit. During the litigation the money was paid into court, owing to the claim of the auctioneer who conducted the negotiations to have a lien upon it for his charges. Mr. Justice Kay held that the terms of the contract to purchase entitled the plaintiff to have his deposit returned, as the conditions had not been complied with, and that the auctioneer could have no lien upon any money which came into his hands as stakeholder, unless the money belonged to the vendor. He, therefore, made an order for the return of the money to the purchaser, leaving the auctioneer to recover his charges against the vendor.

The case of Edmunds et al. vs. The Merchants' Despatch Transportation Company, decided by the Supreme Court of Massachusetts on the 5th inst., was an action brought against the defendant as a common carrier to recover the value of certain packages of merchandise which the plaintiffs intrusted to the defendant at Boston for transportation to Dayton, Ohio. The plaintiffs alleged a failure to deliver the goods according to contracts contained in written and printed bills of lading, signed by the defendant's agent at Boston, by the terms of which the defendant acknowledged the receipt of several packages marked Edward Pope, Dayton, Ohio, and agreed to deliver the same at the depot in Dayton only. On the trial it appeared that a swindler, representing himself to be Edward Pope, of Dayton, Ohio, personally bought of the plaintiffs in Boston the goods which were the subject of the suit. The Supreme Court, reversing the judgment of the Superior Court, held that the goods were sold to the swindler in person, that the property in the goods passed to him, and that the defendant, having delivered the goods to the owner, was not responsible.

A different conclusion was reached by the same court in the case of Aborn et al. against the same defendant, which was tried with the last-mentioned case. In this action it appeared that the plaintiffs did not purport or intend to sell to the person who was present and ordered the goods. The swindler introduced himself to them as a brother of Edward Pope, buying for him. The plaintiffs understood that they were selling, and were intending to sell, to the real Edward Pope. There was no contract of sale made with him or with anybody else. In this case the court held that the property in the goods did not pass to the swindler, and that the defendant could not justify on the ground that he delivered them to the owner.

Independent of controlling usage to the contrary, the sale of goods by an agent or the fact that he is or acts as agent to take orders for goods, does not of itself authorize him to receive payment therefor, according to the decision of the Minnesota Supreme Court in the recent case of Janney vs. Boyd. The action was brought for the price of merchandise, the defense being payment to plaintiff's agent. The defendant proved payment to a traveler for plaintiff, and offered evidence to prove that, in accordance with a usage among commercial travelers and the houses they represented, the travelers received payments for those houses. The court held that the admission of this evidence in the court below was an error, and that the usage of commercial travelers and of the houses which they represented was manifestly unimportant and immaterial, unless it was also the usage of houses for which such travelers took orders without representing them. A usage to be binding, simply as such, said the court, must be established, general and uniform, as applicable to the particular business with reference to which it is sought to be set up. It must be the mode in which persons in that line do their business, so that the law will presume knowledge of it.

An interesting decision on a point in the law of trade-marks was rendered in the Circuit Court of the United States for the Eastern District of Virginia on the 18th ult., in the case of Blackwell et al. vs. Hicks et al. The plaintiffs had for many years used the words "Durham Smoking Tobacco," together with the image of a bull, on packages of tobacco manufactured by them. The defendants, it appeared, used a somewhat similar label, in which, however, the word "Pride" was coupled with "Durham Smoking Tobacco," and the image of a cow was substituted for that of a bull. The plaintiffs asked for an injunction against the defendants on the ground that the latter, by their use of the label referred to, infringed the rights of the former. The court held that the plaintiffs had an exclusive right to the use of the words "Durham Smoking Tobacco" on packages of tobacco against every person not living and manufacturing smoking tobacco in the town of Durham, state of North Carolina, and a further exclusive right to the use of such words, coupled with the image of a bull, against all persons whatsoever as a trade-mark. The label used by the defendants was held to be a fraudulent imitation of the plaintiffs' label or trade-mark, and an infringement of their rights calculated to injure them and to deceive the public. A perpetual injunction against the use of the label described was granted and an accounting ordered at the option of the plaintiffs.

A somewhat similar case was that of the Vulcan Match Manufacturing Company vs. Knos et al., which was decided recently by Mr. Justice Pearson, in the Chancery Division of the High Court of Justice. The plaintiffs in this case, who were match manufacturers in Sweden, applied for an injunction to restrain the defendants, who were merchants in London, from selling any matches in boxes having attached to them certain labels, which the plaintiffs claimed were an imitation of their trake-mark. The matches sold by the defendants were also manufactured in Sweden. The plaintiffs' trade-mark had a representation of a volcano in the center, with the words "The Vulcan" above and "Paraffin Matches" underneath, while the defendants' alleged imitation had a picture of a volcano in the center, with a representation of a man coming out of it and the word "Volcanic" at the top and "Paraffin Matches" below. In addition each label had three medals at the sides. The court was of the opinion that the main part of the plaintiffs' label was copied, and that the two devices were so similar in appearance that an ordinary purchaser might be deceived by the defendants' label. An injunction was, therefore, granted restraining the defendants from the use of the labels referred to.

The question under what circumstances partners in a non-trading partnership can bind each other by note was considered by the Supreme Court of Missouri in the recent case of Sherer vs. Thatcher et al. The defendants composed a firm engaged in the insurance, real estate and collecting business in Kansas City. One of the firm, Webster by name, purchased lumber of plaintiff's testator on the credit of the firm, and without the knowledge of the other partners. Plaintiff's testator sold the lumber on the credit of the firm, without any knowledge on his part that it was not being bought and applied for the purposes of the firm. The note sued on was executed by Webster in the firm name in payment for the lumber, and was so executed without the knowledge or consent of the other members of the firm. The plaintiff recovered judgment in the court below, but this was reversed by the Supreme Court on appeal. The court said that while partners engaged in trade had an authority implied by law to bind each other by commercial paper executed in the firm name, partners in other business had no such prima facie authority; the presumption against the possession of authority, however, might be rebutted by showing that the organization and particular purposes of the firm were such as to render it necessary or usual in similar cases. The court said that the rule was that one partner in a non-trading partnership could not bind his copartners by a bill or note drawn, accepted or indorsed by him in the name of the firm, nor even for a debt which the firm owed, unless he had express authority therefor from his copartner, or unless the giving of such instrument was necessary in carrying on the firm business or was usual in similar partnerships, and that the burden was upon the holder of the note, when suing upon it, to prove such authority, necessity or usage.

BUSINESS NOTES.

A shipment of 124 graded merino sheep, from Vermont, Michigan and Ohio, including among them eight ewes, left San Francisco for Sydney, Australia, by the mail steamship City of Sydney, on July 28. This is a continuance of the monthly shipments of American merinos referred to in previous issues of BRADSTREET'S.

The total number of failures in the United Kingdom and Ireland reported to *Kemp's Mercantile Gazette* (London) for the week ending July 14 was 242, against 214 in the corresponding week in 1882 and 233 in the like week in 1881. The totals for England and Wales were 222, against 200 and 213 respectively for the periods specified. For Scotland they were 18 in each of the three weeks named, and for Ireland they were 2, 1 and 2 failures in each of the three weeks named.

The agitation in the British House of Commons respecting the dreaded cattle disease and alleged necessary action to prevent importing the same from the United States has gone over until next session. A committee will then be appointed to consider the matter. In the meantime the British government is said to be receiving definite reports in regard to it "from the American government" and from British consuls abroad.

Various distilling districts interested in securing some extension of the bonded whisky period are said to have arranged to meet in convention at Louisville, Ky., on August 8, for the purpose of considering "some form of suggested legislation to present to the next Congress" for the relief of the trade. A press dispatch concerning the proposed gathering, dated at Cincinnati, states that from the present outlook it will be difficult to suggest anything which will give general satisfaction.

"Reciprocal excursions" between various commercial communities in Florida and the business elements at New Orleans are suggested, their purpose being to secure a good share of the trade of the Florida peninsula to the Crescent City. Savannah has heretofore possessed a large share of the Florida trade. New Orleans has now secured close railway communication, is but thirty hours distant from a number of the larger peninsular cities, and will undoubtedly make an effort to do business with the Floridians to a considerable extent.

The success of the Oldham (England) cotton industry is said by a correspondent of the Manchester *Examiner* to be stimulating the further employment of capital in that vicinity and in like manner. The tendency now is to build very large mills, and the most significant feature of it all is that where, formerly, small shareholders, the factory hands and laboring men, held stock largely in the Oldham companies, the present projects contemplate confining the shares to a few persons (capitalists), and keeping the results of the enterprise as much within the circle of those immediately interested as possible.

A French statistical exhibit gives the cost of pig iron per ton at the places of production at 91f. in France, 74f. in Prussia, 62f. in Great Britain and 59f. in Belgium. Wrought iron is estimated to cost 228f. in France, 180f. in Prussia, 162f. in Belgium and 152f. in England. Steel—280f. in France, 240f. in Prussia, 200f. in Great Britain and 163f. in Belgium. In the quantity of each of these varieties of metal produced the countries named rank: Great Britain first, Prussia, then France and last Belgium. It is noteworthy also that while prices in Belgium are lowest the quantity produced there is but one-quarter of that turned out in France where prices are highest.

The British labor market, according to the advices of the London *Labour News* of July 18, continued unsettled, but the demand was good. The Staffordshire coal miners were still out and no settlement was then in sight. The iron strike, while it had caused great loss and inconvenience, promised to terminate shortly. Welsh colliers were, of course, busy. The shipbuilding and engineering trades also reported business brisk. Building and railway construction were active. Work was fairly plentiful at the hardware centers, but in textile lines the demand for hands was quiet and business not over active. Agricultural work was plentiful and emigration was "very active from all parts."

Reports from the French steel and iron industries state that the outlook is the reverse of encouraging. There is a steady decline in the demand for hands, and holders are reported as making serious sacrifices in order to get rid of their stocks. Sheet iron is said to have suffered, particularly in the matter of concessions as to price. In one district the stocks of pig iron are growing, for the reason that consumers refuse to take the iron ordered by them, and talk of blowing out more furnaces is heard on all sides. It is reported that, notwithstanding building operations in Paris are brisk, manufactured iron shows no diminution of stocks. In Germany the pig iron market is weak. Since the collapse of the combination of producers it has been impossible to sell except at very low prices, and consumers are holding back orders to secure better terms. In Belgium there continues to be a marked scarcity of new orders, though recently some revival of demand was noted. There has not, however, been shown that activity to warrant a belief in a permanent better market.

The French Ministry of Public Works have issued a document purporting to give the cost of coal at the place of origin in 1881 in the principal coal-producing countries. It may be added that the cost in the United States and Russia is returned as unknown. It is stated that with regard to the cost of the coal France and Prussia represent the maximum and minimum, it being 12f. 43c. per ton in the former and in Prussia but 5f. 63c. per ton. After France comes Hungary, 10f. 67c.; England, 10f. 56c.; Spain, 10f. 55c.; Bavaria, 10f. 40c.; and Belgium, 9f. 70c.; Saxony, 7f. 96c.; and Austria, 6f., next higher than the cost in Prussia. The London commenters on the above express the opinion that the relatively high rate in England must be due to the higher rate of wages prevailing there. It is be-

lieved, however, that English coal must meet with a compensation for this increased cost in greater facilities for transportation and shipment where coal is needed. It should be added that in Australia the first cost of coal per ton is given at 8f. 46c., and in Japan at 25f. 40c.

The Louisiana rice-crop prospects, as reported by the New Orleans *Times-Democrat* from a series of interviews with prominent dealers, is highly favorable. More seed has been sown than in a number of years, and the acreage is also somewhat increased. That the crop, therefore, will be greatly increased over that of last year there can be no doubt. The weather throughout the season has been extremely propitious, with high water both below and above and rain well distributed. Some sanguine rice people are disposed to estimate the crop at 300,000 barrels of clear rice, but it is thought 250,000 barrels is nearer the mark. It was further stated that the Carolina crop will be about as heretofore, though it may be a little late. As to the probable price this season the opinions of brokers, merchants and millmen appear to be that it would be from ½c. to 1c. lower than last season, the decline being attributed in the most part to the lower tariff. One or two planters expressed the opinion that the crop would be about two weeks late, but if the harvest season is not unfavorable it would be much larger than last year.

According to the statement published in the Buffalo *Commercial Advertiser* of the flour and grain trade of that city, the movement of the same down the lakes during July has evidently been large. Freights have been low during a portion of the time, but the very large grain-carrying vessels now in use on the lakes can do business at much lower rates than the smaller craft. The receipts of grain from the opening of navigation to July 31 aggregate 30,301,480 bushels, to 30,723,000 last year, and 55,473,000 bushels in 1880. There is a noticeable increase in the receipts of flour, the total being 908,015 barrels, largely in excess of the arrivals for any corresponding period in ten years. In grain the heaviest increase is in corn and oats, the movement of the latter being nearly four times as heavy as it was last season. A heavier percentage of the grain arriving at Buffalo by lake has gone forward by canal this year than last. The total shipments by canal reach 17,484,828 bushels, to 11,475,000 last year, 14,440,000 in 1881, and 33,442,000 in 1880. With one exception, the canal showing for this year is reported to be as good as any on record.

The following-named national banks have been organized since last advice: The First National Bank of Brenham, Tex.; capital $50,000; F. A. Engelke president; J. N. Brown cashier. The Hunt County National Bank of Greenville, Tex.; capital $75,000; Asa Holt president; Alexander Cameron cashier. The Union National Bank of Ames, Iowa; capital $50,000; Wallace M. Greeley president; E. R. Chamberlain cashier. The First National Bank of Marion, Kan.; capital $50,000; Richard M. Crane president; William H. Dudley cashier. The People's National Bank of Middletown, Del.; capital $80,000; James V. Crawford president. The Naugatuck National Bank, Naugatuck, Conn.; capital $100,000; George A. Lewis president. The following changes have been made in the officers of national banks: The Fort Dodge National Bank, Fort Dodge, Iowa; S. T. Meservey cashier, in place of E. D. G. Morgan; G. B. Wheeler assistant cashier. The Ottumwa National Bank, Ottumwa, Iowa; Arthur H. Bayston assistant and acting cashier, in place of Charles P. Brown, resigned. The Peru National Bank, Peru, Ill.; W. G. Reeve vice-president.

In discussing the business needs of the "New South," the Nashville *Artisan* strikes at the root of the question by declaring it to be the establishment of "small industries" more expecially to supply the home demand. Among those named which are essential to the ready development in all sections at the south are named factories at which to provide small farm machines at low price, and for hand or small horse-power, small ricehullers, cottonseed cleaners, small cornshellers and an abundance of little machines needed for daily use about the farm or shop. It is also stated that fruit or vegetable canning shops and fruit evaporators can be established at small outlay, which will materially add to the resources of the neighboring population. None of the industries named require a large capital, and they are of much more importance to the prosperity of a community than the founding of some one industry of large proportions. In conclusion the *Artisan* very pertinently calls to mind the fact that New England is full of these little establishments; that every small waterfall is turning a wheel, which brings work to all the neighborhood, utilizes the spare hours, and brings comfort and luxuries to the home or adds to the deposits in the savings bank.

A forthcoming report by the United States Geological Survey, prepared by Albert Williams, Jr., will show the output and value of minerals in the United States for 1882 and for the first six months of 1883. It gives the total value of metallic products for 1882 at $219,756,004. The items which exceed $1,000,000 each are as follows: Pig iron, spot value, $106,336,429; silver, coining value, $46,800,000; gold, coining value, $32,500,000; copper, value at New York city, $1,603,809; lead, value at New York city, $12,624,550; zinc, value at New York city, $3,646,620; quicksilver, value at San Francisco, $1,487,537. There is an additional table in which the non-metallic products are considered. The total value of the production in 1882 is placed at $226,156,402. The items which exceed $100,000 in value each are: Bituminous and brown coal, lignite, and anthracite mined outside of Pennsylvania, $76,076,487; Pennsylvania anthracite, $70,556,094; crude petroleum, $23,704,698; lime, $21,700,000; building stone, $21,000,000; salt, $4,320,140; cement, $3,672,750; limestone for iron flux, $2,310,000; phosphate rock, $1,147,830; New Jersey marls, $540,000; crude borax, $160,000; chrome iron ore, at Baltimore, $100,000. Except chrome iron ore, the foregoing are all spot values. The quantity of fire-clay, kaolin, etc., produced in 1882 is computed to be worth not less than $8,000,000 (spot value). This makes the grand total of mineral products in 1882 $453,912,406.

The past week has furnished several items relative to the development and application of electric inventions. A second electric launch has been placed upon the Thames at London. The first, the Electricity, was described in this journal last year. The second boat is forty feet long, and is completely unincumbered from end to end, there being no machinery or other obstruction visible. The electric power is derived from eighty cells of Sellon-Volkmar accumulators, of which seven are placed under the seats at each side, and the remaining ones under the floor. The screw is turned by an A. Siemen's dynamo, commutated as a motor. No gearing is used, the spindle of the armature being coupled direct on to the end of the screw shaft. There are four brushes, two for going ahead, two for going astern, and two small lines going to a becket beside the steersman enable him at a moment's notice, by pulling one or the other, to go ahead or astern; a cylindrical switch beside him enables him to stop or go on at pleasure. The weight of the batteries and dynamo is about two tons. In the trial trip made twenty-one persons were on board, and a run of six miles was made at the rate of over eight miles an hour. This craft, which was built and is owned by Messrs. Yarrow & Co., will go to the Vienna Exhibition. The trial made is believed to have demonstrated that electricity forms a satisfactory motor for pleasure sailing at least, in that it avoids heat from steam furnaces, smoke, dust, steam, smells of oil, etc. The boat can run for six hours continuously without recharging the accumulators—say forty-five miles. The London *Engineer* adds that certain very important improvements have been made in the Sellon-Volckmar accumulator, concerning which it will have more to say. As now made they have an E.M.F. of 2.3 volts. per cell at starting, and will give five ampère-hours per pound of battery—"a very admirable result."

The above may interest Mr. Brush, the Cleveland inventor and head of the Brush Electric Light Company. That gentleman has kept some essentials concerning his storage battery secret, claiming it to be necessary in order to maintain the advance which he says he has made over foreign accumulators. In New York it is worthy of note that the Brush-Swan Electric Light Company, which employs the Swan (English) incandescent electric lamp, has begun putting in fixtures, and a consignment of new accumulators having arrived (the same to be supplied by the Brush arc-light wires), several buildings are to be fitted with this rival light to that of Edison. A bank on Broadway will employ the Swan lamps, and the Madison Square Theatre is awaiting accumulators to put in that light. In reference to the use of the Swan lamp in theatres it is claimed by Mr. Brush (and it is notable if successful) that he has devised a means of regulating the current at will so that the incandescent lamps may—as it were—be "turned up and down" gradually, in order to produce stage effects. Mr. Edison has told the reporter that he has gone out of inventing for the present, and that he is now a contractor and his object is to make money.

LOUISVILLE.

Apropos of the opening of the Exposition, the *Courier-Journal* has this to say regarding the past and prospective city of Louisville:

"The one hundredth anniversary of the founding of Louisville should have been appropriately celebrated during the month of May, 1880, but the people were evidently not in a sentimental mood, and the centennial year passed away without any of the pomp and ceremony of a material ebullition of municipal pride. Perhaps, after all, it was well enough, for we are enabled to include in the Exposition festivities, although three years later, appropriate recognition of the effectuation of the act of the Virginia Legislature 'establishing the town of Louisville.' To-morrow, citizens will consider themselves as celebrating the act of foundation, and take proper pride in the visible accretions of progress.

"It has been just about one hundred years since the observing Frenchman, Crevecœur, wrote an account of his trip from New York to Louisville, and found it necessary to explain where Louisville was located. It took him eighteen days to travel from New York to Pittsburgh and two weeks more to reach Louisville. Then Pittsburgh made a showing of seventy-eight houses, and Louisville presented the aspect of a few straggling log cabins and frame houses sandwiched between the frequent frog and duck ponds, which have not, in fact, been entirely obliterated even at this late day. To reach the ultramontane region of Virginia was a journey of no trifling dimensions, even when the helpful current of the Ohio was used from Pittsburgh down, and until Roosevelt, Livingston and Fulton launched the steamboat New Orleans at Pittsburgh, in 1811, and demonstrated the practicability of steam navigation, the voyagers on the Ohio had to content themselves with keel and flat-bottom boats. One hundred years ago—that is a very long time ago, but Dr. Christopher Graham can remember things nearly as far back as that—one hundred years ago the Louisville wharf was fringed with a tangle of the steamless craft from up the Ohio. They brought cattle, salt meat, cider, peach brandy and some other articles to Louisville. What the riparian dwellers on the Ohio could not dispose of down the river they sent in wagons across the mountains to Philadelphia and Baltimore. The keel boats could be propelled down stream at the rate of one hundred miles in twenty-four hours. It was in 1782 that the first two flatboats, loaded with about 1,000 barrels of flour, were successfully landed at Natchez, Miss., from Louisville, and in 1788 the Spanish government, having permitted General Wilkinson to introduce Kentucky productions into New Orleans, the tobacco shipments from Louisville increased. On October 1 it will be seventy-two years since the first steamboat arrived at Louisville, her passengers being Mr. and Mrs. Roosevelt. (Mr. R. was one of the projectors of the enterprise.) It was at Louisville that Mr. Roosevelt demonstrated to the incredulous that the steamboat could run up stream, steaming several miles up the river with a party of citizens on board. The New Orleans, the boat referred to, made the first steamboat trip down the falls. From that time Louisville grew solidly if slowly. She had rivals at an early day in Maysville and Middletown, for, difficult as it is to realize, the Middletown people at one time thought they had the inside track on Louisville, and they did a rushing business for some years with the interior, but this unnatural condition of affairs did not last long. Middletown is to-day a ghost of a rural village, sleeping and dreaming of her former inchoate commercial glories.

"We have referred to these few points of the early days of the city by way of contrast. Various persons at various times have predicted the extinction of Louisville as a commercial and manufacturing point. The city has always had bitter enemies, which is proof positive that she has always been regarded as a dangerous rival. It was predicted that railroads would make Louisville a cipher, but she has by them been made a heavy numeral; that St. Louis and Cincinnati would absorb all the southern trade, and leave Louisville not even well-picked bones; but Louisville not only holds her own, but has all along been doing some good 'scooping' on her own account to the detriment of her neighbors. Louisville has, in fact, grown surprisingly in the material things, even with a lack of the power of combination upon which most cities depend. There has been no lack of original genius in Louisville; her weakness has been that her people have been a very long time learning the acquisitive power of combined effort, while other cities have been actualizing close combinations in business. Louisville knows her strength to-day better than she has known it in the past. A community which will, without fuss or flurry, subscribe a cool $300,000 to materialize an exposition project of great magnitude is prepared to proceed to other acts of self-propulsion and aggrandizement in the future. The community will do it."

THE MOVEMENT FOR A BANKRUPT LAW.

The New York Board of Trade and Transportation has issued the following circular letter to the various trade organizations of the country:

During the past three years the board has unremittingly labored in the cause of procuring the enactment of an equitable bankrupt law. At the last session of Congress the Lowell bill, which has been unanimously approved by the largest commercial bodies of all sections of the country, would have certainly become a law in its amended shape were it not for the consumption of the greater part of the session by the tariff and revenue questions. It is the opinion of the board that if final, united and timely effort is made during the ensuing autumn and at the opening of the next session of Congress our labors in this direction will be crowned with success. It is suggested in view of the pronounced and gratifying outcome of the last convention that no more eloquent or powerful voicing of the sentiment of the commerce of the country can be made than by the holding of another and, if possible, more numerously attended convention in the city of Washington at such time during the next session of Congress as may hereafter be decided upon. Being desirous of ascertaining the sentiment and opinions of the various commercial organizations throughout the country on this proposed plan of action, we herewith have taken the liberty to address this letter of inquiry to you, and would feel gratified with an early reply.

1. Will your organization send one or more representatives to such convention?

2. Will you aid the enactment of a just and uniform bankrupt law by expressing your desire for the same to your senators and representatives?

3. Will you favor us with any suggestions on the subject which you may deem of importance in aiding in the work?

PERSIAN OPIUM.

The following is from the *Pall Mall Gazette*:

"It is a common notion in England that all the foreign opium consumed in China is obtained from British India. This is quite a mistake, for a large quantity of the drug is sent from Persia. According to an article in the *Oesterreichische Monats-Schrift für den Orient* the poppy is grown almost everywhere in that country, and, although Persians of the better class sometimes consume opium in small pills, the greater part is specially prepared for the Chinese market. But like all foreign opium it has suffered in the past two years from the competition of native-grown opium. Persian opium has fallen 50 per cent. in value in the Chinese market since 1880. As a consequence the merchants of Ispahan, Shiraz and Jezd have failed in great numbers, and to add to other misfortunes the poppy harvest last year was almost ruined by the attacks of an insect called schafté, which fastened on the young plants and destroyed them. In 1882 the export of Persian opium to London and China, which usually amounts to 6,000 to 8,000 chests, did not reach half that quantity.

A PROPOSED BERLIN EXHIBITION.

The Vienna correspondent to the London *Economist* writes as follows:

Berlin is the only metropolis of Europe in which an international exhibition has not been held. Proposals have often been made for one, but they have never been carried into effect as yet. It was feared that traders were tired of exhibiting, and that the receipts would not cover the expenses, and it is known that the Prussian government is certainly not disposed to contribute much toward the cost of such an undertaking. At present a plan is being discussed which will probably be carried out at no very distant period. An exhibition, limited to art industry only, and to the German empire and Austria-Hungary, is proposed to be held in 1885. The exhibition of art manufactures is most likely to attract large numbers of visitors, and, therefore, probably to be the most successful from a pecuniary point of view. The manufacturers of Germany and Austria-Hungary will probably be more willing to exhibit under these circumstances, as they always fear being placed side by side with British and French producers, with whom they cannot well compete, although it cannot be denied that very much progress has been made of late in all the branches of art industry.

FINANCIAL.

THE LOAN AND INVESTMENT MARKETS.

The stock market has got into a position where it has become merely a question with Mr. Gould, the Villard syndicate, the Smith-Morgan combination, and any other holders of stocks, whether they can hold up prices against the adverse tide of events and the efforts of the operators who are on the bear side of the market. We hear nothing of any bull movements, but very much about the ability of the cliques to maintain their position, and the contest is well understood to be between the respective leaders on either side, with the room traders and the small local public of Wall street cheering on each and taking a hand now and then with the side which for the moment looks stronger. The opinion of what may be called an observer with bullish proclivities was thus given one day this week: "I am not looking for a bull market until early fall. I think it is the policy of the leaders to do little more than keep stocks at present prices. In a few weeks we may expect the outside public to take hold, and then we may look for more activity and increased values. Messrs. Morgan, Smith, Osborn, and other large dealers, are doing very little. Most of the business is being done by room traders. The cliques will see to it that no noteworthy raid is made upon the market. Mr. Gould, it is understood, will leave town at an early date, to be gone a short while." It will be noted that this expresses no expectation of any upward move at present, but a hope of one some weeks later. Meantime the cliques have held the market with great tenacity, but at the cost of producing a deadlock which has almost killed business on the exchange. The past week has been worse in this respect than last, and that was bad enough. One cause of this is that the public is out of stocks, generally speaking, and they have concentrated in the hands of the large Wall street dealers, while prices have been on the downward move until they have reached a level where the bear leaders seem disinclined for the time to make a decided move. A great many operators who are not bulls at all, yet consider it safer to keep near the shore just at present. Some stocks are conceded to be low, too low to promise with the present outlook any success in raiding them, while some of the stocks considered high have been maintained against all assaults with such stubborn obstinacy that it seems hopeless to try to depress them. Among these the Northern Pacifics stand foremost. Considering that they pay no dividend, and that the prospect of their paying one is yet a hope of the future, it is remarkable how well the price has been sustained. One well known operator remarks on this: "It is hard to reason out a good bull argument on the Northern Pacific properties in view of the reported disagreements between insiders and some members of the pool. The extensive borrowing of long bills of exchange against these stocks, and the continued efforts of brokers to borrow this exchange, do not add to the confidence. Still the syndicate of which Mr. Villard is the head are able to accomplish much, and only able manipulators could ever have kept Northern Pacific preferred among the eighties. Taking into account the highest price attained by this stock, and add to the prevailing quotations the value of the scrip dividend, the steadiness of the stock in all the liquidation of nearly a year is truly remarkable." The scrip dividend referred to is the 11½ per cent. which was paid on the preferred stock some months back (in dividend certificates) representing certain earnings of the road which, under the charter, had accrued to the stock in previous years. It was said at the time it was paid that this year Northern Pacific preferred would become a regular dividend-payer, 6 per cent. payable half yearly, but this is now shown to have been merely a hope of what might be. We are promised in place of it 8 per cent. dividends in the future—which is certainly a most sanguine expectation. While the Vanderbilt stocks have shown some steadiness through the week, and for that matter have been but lightly traded in, the various Gould stocks have been active. Mr. Gould has had to stand by his Western Union throughout, but it was only on Wednesday and Thursday that anything but mere hand-to-hand trading of the small brokers chasing eighths and quarters seemed to be done in it. On the days mentioned, however, many of the sales were in large blocks, and on the second day the stock was forced below eighty under them. A choice collection of rumors were afloat to account for this. Some had it that a number of time loans which Mr. Gould had on the stock were due and that the lenders refused to renew them; supplementary rumors said these loans had been made in Boston, where the banks and money-lenders were calling in their loans on everything except governments. Then it was said that Boston holders of the stock were selling out; then that the telegraphic strike was assuming new and more serious phases. As many of the rumors as fell within the province of the company to deny were promptly denied; but the story of the loans remained uncontradicted, and Wall street seemed to think there was some truth at the back of it. Whenever Western Union goes below 80, which is regarded as the "peg price," it excites comment in the street, and a thousand stories start up to account for it. While Western Union was thus weak Missouri Pacific also showed signs of feebleness, and was forced down to 98½, while the Wabashes have been down to 38 for the preferred and 24 for the common. Another Gould stock, which has long been working downward, is Texas Pacific. This stock used to keep about ten points ahead of Kansas & Texas, but the difference is gradually becoming less and less by the comparative steadiness of the latter and the constant sinking of the former. At one time the difference remained for a period at eight points, then it became seven; now there is scarcely six. In relation to the decline in Texas, a leading operator is quoted as saying: "The decline is not easy to account for, because those connected with the property are so unwilling to disclose anything unfavorable. My information is that Texas Pacific earnings are not so large as had been expected, the reason probably being that unusually large sums are being put into rolling stock and betterments and charged to operating expenses. [There is no market for bonds now.] Last year the operating expenses were running at about 75 or 77 per cent. If they are larger this year there certainly must be considerable disappointment among the inside holders of the stock, and they, being the first to know the facts, would naturally be the first to sell, causing the weakness which has been so inexplicable to what you may call outside holders." As the Texas Pacific is being built across the vast waterless desert known as the Staked Plains it may be surmised that the farther it goes the worse it is off, as the mileage increases with no corresponding increase of traffic, and in this region every construction train has to be accompanied by a water train carrying water for man and beast. It may therefore be imagined that the cost of building the road in such a region, or of running trains when built, is somewhat greater than on the level prairies of more northern regions.

With the market in the state it is, the commercial disasters in New England have been only one more burden the cliques sustaining it have had to bear up under, and therefore they have not been followed by any such sudden drop in prices such as would inevitably have happened had the market been a broader one than it is. As the case stands, we cannot see yet what their full effects will be. They have, of course, greatly added to the difficulty of sustaining the market, but it is yet to be shown whether the cliques will be able to resist the depressing influence. One effect of these commercial disasters has certainly been to greatly restrict the negotiation of mercantile paper, and as a consequence an unusually large amount of money is available for loans on stock and bond collateral. In fact it is said that never since the days of extreme depression following the bad times of 1873 has there been so much money accumulated in Wall street seeking employment. It has been offered all the week at 2 per cent. on call, and even at the unusually low figure of 1½ per cent.; but at the same time it is hard to get any loan on anything but the most approved securities. It is thought to be a bad sign, therefore, that the Northern Pacific people should have had at this time to resort to so extraordinary and costly a method of raising money on their stocks as the borrowing of exchange. President Baldwin of the Fourth National Bank says the amount of money now lending on call is rather less than usual, probably on account of the stagnation in the stock market. He says the movement of money is now on the turn-tide—there is little coming this way, and none going out. He is inclined to think the Boston failures will be less harmful than many people suppose. On the other hand, some bankers fear that they are the precursors of bad times, as the Jay Cooke failure was. Exchange rates had a rise yesterday and were posted at $4.84½ and $4.88.

The government bond market was somewhat affected in tone by the Secretary's bond call, but the quotations have not materially changed. The following were the closing quotations yesterday:

	July 27, bid.	Aug. 3, bid.	Aug. 3, asked.
U. S. 5s extended (3½ p. c.)	101	..	..
U. S. 4½s 1891, registered	112¾	112	112⅛
U. S. coupon	—	113	113⅜
U. S. 4s 1907, registered	119	119⅛	119¼
U. S 4s 1907, coupon	119	119⅛	119¼

The bank statement of Saturday showed a general contraction; the loans had decreased, specie decreased, and there was a small decrease in the surplus reserve, but it stands at $9,339,725, which is $3,958,700 more than at the same time last year. The following are the comparative totals of the statements of July 21 and July 28:

	July 21.	July 28.	Differences.
Loans	$328,356,100	$327,250,300	Dec. $1,105,800
Specie	64,646,700	63,130,000	Dec. 1,516,700
Legal-tenders	26,493,900	27,103,700	Inc. 609,800
Deposits	326,205,100	323,575,900	Dec. 2,629,200
Circulation	15,583,400	15,378,600	Dec. 204,800

The proportion of total reserve to liabilities is now 26.68 per cent., against 27.87 per cent. the corresponding week of 1882.

THE LONDON STOCK MARKET.

[By Cable to BRADSTREET'S.]

From London: In the stock markets, American securities are very weak, and there is a great absence of buyers. The news of failures causes increased weakness.

[By Telegraph to BRADSTREET'S.]

From New Orleans, La.: Financial circles are quiet. Money is in request and steady. It is apprehended that money will be very firm before the end of August. Louisiana sevens are one-half point higher. The State National Bank fiscal agency has advanced interest on Baby bonds due on the 1st of August.

THE FOLLOWING WERE THE CLOSING QUOTATIONS FOR STOCKS ON THE DATES NAMED:

COMMERCIAL.

SUMMARY.

Mercantile circles at the east have been considerably exercised during the past week by failures which have occurred in the tanning, hides, leather, and boot and shoe manufacturing and jobbing trades. The disturbance culminated at Boston with the suspension of one of the oldest and largest tanning and hide houses in the United States. Their failure precipitated like disaster upon a very prominent boot and shoe manufacturing and wholesale house at the same city, and the circling eddy of commercial disaster in widening out swept down several boot and shoe and hide and leather concerns. Most of them are located in Boston and its immediate vicinity, but New York, Baltimore, Chicago and Norfolk have representatives involved. The proximate cause of the failures was an overreaching desire to monopolize a particular branch of the industry, coupled with an ill-advised expansion of operations both in leather and other lines. The firms which have suffered most are all mutually interested through partnerships, special or general, mutual indorsements or otherwise—one with the other. It is believed that the crash will end there, and that the too keen competition and the excessive production from which the leather market has suffered will be done away with in part. The disasters will bring an opportunity for a healthful revival to the branch of trade affected, and it is believed that in less than thirty days hence it will be all the better for having withstood the shock. Iron and dry goods have suffered like failures. The wheat market has tended downward during the greater part of the week. Corn has done likewise. In both cases good growing weather, renewed favorable crop reports, and heavy receipts at the west, together with lower prices abroad, have conspired to this end. Provisions have fluctuated within narrow limits, but receipts of hogs have been very great at the west and prices on the whole have declined. There is little trading in this line except by operators. Coal has improved slightly. No higher prices will be charged for August delivery. The production of anthracite to July 28 is over 1,100,000 tons in excess of a like date in 1882. Petroleum has been steadily maintained at about last week's closing price, despite an apparently bearish report of July operations. The report, however, is believed to represent an opposite view, inasmuch as the increased July production is the result of forcing old districts by torpedoing. Ocean freights have been firmer, and petroleum charters have been frequent. The wool trade has continued active, and a better feeling prevails in all markets, although there is no material change in prices. There were 155 failures in the United States reported to BRADSTREET'S during the past week, 13 less than in the preceding week, 46 more than in the corresponding week of 1882, and 80 more than in the like week of 1881.

THE GENERAL COMMERCIAL MOVEMENT.

[By Telegraph to BRADSTREET'S.]

From Portland, Me.: Money is in better demand and general trade is fairly active and improving. The crops promise splendidly.

From Boston, Mass.: The business situation has received a severe shock from the recent failures, and the volume of trade in all departments has been more or less restricted thereby, but the excitement has not extended beyond the hide, leather and shoe interest, and even there it has toned down considerably since the opening of the week. Those who are conversant with the inside workings of the shoe and leather business affirm that the troubles are confined to a certain circle of merchants who were backing up each other, and that the situation will be all the healthier when the storm is over. But at present confidence is considerably shaken and all will move cautiously until the full effects of the failures can be ascertained. The paper of the suspended firm is scattered over a large territory, and it is not expected that any one of the banks will suffer materially. The money market continues easy, and beyond a closer scrutiny of credits there are no indications of any stringency. Business men generally look for an improvement next week.

From Philadelphia, Pa.: Trade is improving, but is still of a "between seasons" character in most lines. The general temper of merchants is conservative but hopeful. The labor troubles and recent business failures promote caution, but there is, on the whole, a better feeling, and the prospects for the fall season are generally represented as more encouraging.

From Cincinnati, Ohio: Business in the leading branches of trade has shown less vitality during the past week and an easier tone in general has prevailed. The sporadic cases of unsoundness in a few lines of business have apparently caused some apprehension, and in connection with the poor facilities for rapid communication have aggravated the general dullness. There has been no loss of confidence in the industrial situation, but the volume of business has been small. The movement in general merchandise is moderate.

From Cleveland, Ohio: The week has been a quiet one in most departments of wholesale trade, but not an unsatisfactory one for the season and really without special feature in any line. Collections are only fair and there is a good local demand for money.

From Toledo, Ohio: Jobbers of boots, shoes, hats, caps and hardware report satisfactory sales, and in groceries there is a steady increase. Collections have been coming in slowly, and country dealers complain of a scarcity of money. Interest is 7 to 8 per cent. Eastern exchange 1/10 of 1 per cent.

From Indianapolis, Ind.: Trade is only moderately active and merchants complain of slow collections. There appears to be a want of confidence and jobbers are not pressing sales. Money is said to be close and interest is 8 per cent., and exchange is at a slight discount.

From Evansville, Ind.: Trade in every line has been on the increase for the last week and reported better than at this time last year. Collections are fair for the time of year.

From Chicago, Ill.: Money is easy and dull at 5@6 per cent. Exchange is 60@70c. premium. Collections are better. Groceries are more active and sugars are scarce.

From Peoria, Ill.: Business is very quiet in all branches. There is a good demand for money.

From Detroit, Mich.: Merchants report a fair business doing with collections unchanged.

From Louisville, Ky.: The Southern Exposition was successfully opened on Wednesday by the President of the United States, accompanied by several of his cabinet, and with an attendance and enthusiasm that argues complete success. Fall jobbing trade is beginning satisfactorily and indications are for a large number of visiting buyers and a good fall business in all branches. The dealings to date this year are $11,000,000 larger than for the same period last year, and $13,000,000 increase over the previous year. Money is easy and fairly active. Exchange steady and easy.

From St. Louis, Mo.: General trade is remarkably good for this season. The weather is excellent for the crops, and great confidence prevails. The money market is active at 7 to 8 per cent. New York exchange 75c. to 90c. premium. Prime commercial bills are at par.

From Kansas City, Mo.: Completion of wheat harvest has improved collections, and, together with higher favorable advices concerning corn crop, has given an impetus to trade. Conservative dealers in many places have delayed placing fall orders till the crop prospects assumed definite shape. Leading wholesale dealers report sales greater than last season. Present condition of trade healthy and outlook excellent.

From Burlington, Iowa: General business has shown a steady improvement during the week. Jobbers report the outlook for fall trade very favorable; orders from country dealers indicate confidence, and the general feeling is good.

From Des Moines, Iowa: Trade in all lines is quiet, as is usual at this season of the year.

From Topeka, Kan.: General trade is quiet. There is a slight increase in the demand for money. Groceries are in good demand.

From Lawrence, Kan.: General trade is quiet. Money market somewhat close. Crop prospects are excellent for all kinds.

From Minneapolis, Minn.: General trade is quiet and will be until after harvest. There is a healthy trade, however, and a hopeful feeling is entertained by jobbers and dealers generally; all anticipate a large fall trade. The money market is close at 8@10 per cent. Eastern exchange steady and unchanged.

From San Francisco, Cal.: General business is without special feature the past week. Exchange 10@15c. premium.

From Baltimore, Md.: General trade shows signs of an improvement, but no activity of moment is expected until next month. Money is in good supply and dullness characterizes the stock market. Speculation in coffee is becoming more animated and prices have an upward tendency under a better inquiry for small invoices.

From Norfolk, Va.: There is no evidence of a trade revival yet. The general outlook is fair. The crop prospects are good. Grocers and retailers are now doing a fair business. Collections are moderate.

From Wilmington, N. C.: General business is quiet. Jobbers report the usual lull before the fall trade.

From Savannah, Ga.: General trade is fair for the season and there is a continued demand for staple goods. Groceries are opening nicely for this time in August. Merchants are stocking themselves for the fall demand.

From Galveston, Tex.: General jobbing trade is more active.

From Nashville, Tenn.: Trade in all lines has improved since last week. Frequent rains have been beneficial to the crops.

INDUSTRIAL.

The long-drawn-out warfare between the striking Western Union telegraph operators and the company, in the absence of any new features to the contest, suggests a practical weakening of the position maintained by the operators. They have been promising to play "a trump card" for a week past, but as yet nothing has been done. The public has unwittingly aided the telegraph company by refraining from using the telegraph wires to a very considerable extent, thus enabling them to do without a good share of their late employés. Still, both sides present bold fronts, and the end is not yet. The cigar-makers' lockout in New York has been compromised, and the men will return to work. Various other small strikes are still in force in various parts of the country.

INDUSTRIAL FEATURES.

[By Telegraph to BRADSTREET'S.]

From Boston, Mass.: The shoe suspensions will probably throw some hands out of employment, but they will get work at other places, and very few need be long idle. In other branches of industry there is no disturbance.

From Baltimore, Md.: In the industrial lines ship-building shows increased activity and is fast regaining its prominence at this port.

From Wilmington, N. C.: Carpenters and masons are fully employed. The telegraphic situation is unchanged.

BREADSTUFFS ABROAD.

The growing crops in the United Kingdom during the week ending June 30, were still further damaged by cold, wet weather. The market at London for wheat, which was quoted quiet on Friday of last week, became slower under continuous heavy arrivals and has been very quiet most of the time since. Free offerings have kept prices down in Mark Lane. In Indian corn there has been little or none offering and quotations have been firmer. British flour has been firm and at times higher. Foreign flour has been less in demand. The demand for wheat has been largely for spot, the forward months being quite dull. The variation in prices of English wheat during the week specified has been 7s. 11d. less than in the corresponding week in 1882, when the quotation was 50s. During the present week the weather in the United Kingdom has been very unsettled, low temperature and rain prevailing a good share of the time. The French country wheat markets have been dearer. At Paris, since the middle of the week, quotations for wheat have been less firm than for a few days previously. Late advices from the continental wheat-growing regions state that in Germany the prospects for an average crop of wheat and rye have been moderately enhanced. In Austro-Hungary the wheat prices indicate a rather better output. In Roumania the prospects are fair. In Austro-Hungary the weather during the first half of July was fine, causing the crops to mature earlier than had been expected. In France the wheat harvest was in progress at the middle of July. In the south of France the wheat harvest was completed, with generally satisfactory result. In the north there had been great heat, ripening the wheat too fast, with some fear of unfavorable results. Several weeks ago we published in brief the decision of the British millers' and bakers' report on the relative values of Indian, English, Australian, California and (other) American wheat, as shown by the samples taken for grinding and the weight and fineness of the bread made therefrom, at the request of the British Secretary of State for India. The result, as noted at the time, was to show a decided advantage for the better grades of Indian wheats. It may be added that it was this report which gave so much added impetus to the late Indian wheat "boom" in the United Kingdom. Referring to the competitive trial of the wheats named, the London *Journal of the Society of Arts* says: "We venture to record a conviction we have long held, strongly emphasized by the results of these experimental workings, of the measureless importance of the great resources of the Indian empire being developed to the utmost in producing wheat for this country. Farmers here are finding that to live they must produce beef and mutton rather than grain; hence the greater need of resources of supply under our own control." This from a conservative journal, not especially allied to the grain-growing interests, illustrates the widespread interest taken by Englishmen in the future of wheat-growing India. On the other hand, the London *Miller* of July 2, in discussing the subject of the future British supply of wheat, jumps to a hasty conclusion concerning the productivity of the soil of the United States, and says as follows: "Looking to the United States we find that much of the land has no longer the richness and fertility of unbroken ground; at least very generally throughout its territory the best parts have been tilled. * * * Hence, the bread-eating community must necessarily turn to fresh localities and to 'pastures new' if the supply of breadstuffs is to be maintained. In the light of the above it appears probable that in the as yet unbroken prairie lands of the northwest of the Dominion of Canada we must look for our future food, and it is quite feasible to suppose that this colony may assume a proud preëminency in the future wheat supply to the mother country. The Canadian provinces contain about 200,000,000 acres of rich, fertile land; but to bring these vast areas under profitable culture energetic labor and capital are required," etc., etc. These are but samples of the feeling which has been and is still agitating the British public on this subject. In the face of it it is refreshing to reflect that not only are our available wheat lands not yet all under cultivation, but that a very large proportion remains which has yet to feel the disturbing influence of the plow. Furthermore, that able journal and representative of the milling trade the *Northwestern Miller*, published at Minneapolis, denies the conclusiveness of the test of wheats made at London as described above, and is taking measures to prove its position, viz.: That Indian wheats will not produce more or better flour, or more or better bread, from like weights, than American. The proof of error, as we learn, is to come from British millers, from which it may be inferred that the result will hardly be open to the criticism which might be expected were the new trials to be made in the United States.

The quantity of grain on passage for the United Kingdom and the continent on August 2, as reported by cable, was as follows:

Wheat and maize on passage, per cable report, August 2:

	Wheat. Qrs.	*Maize. Qrs.*
To the United Kingdom	1,625,000	270,000
To Continent	430,000	100,000
Total quarters	2,055,000	370,000
Equal bushels	16,440,000	2,960,000
Compared with the previous week:		
To the United Kingdom	1,575,000	230,000
To Continent	480,000	160,000
Total quarters	2,055,000	390,000
Equal bushels	16,440,000	3,120,000
Decrease, bushels		160,000

AMERICAN WHEAT MARKETS.

Wheat went off 1c. on Saturday last for the near options. On Monday it recovered a fraction but went down ½c. again on Tuesday. On Wednesday the market was easier again. The explanation of this weakness is found in the improved weather at the west and northwest, the more favorable state crop reports as to the probable yield of wheat and the weaker British wheat market, depressed as it is by full supplies of foreign grain. The agricultural bureaus of the states named below have within the past week made the appended estimates of the yield of wheat for 1883, in bushels, which we present in comparison with BRADSTREET'S estimates published July 7;

	State Bureaus.	*Bradstreet's.*
Michigan	24,194,014	27,500,000
Kentucky	10,000,000	12,800,000
Kansas	26,701,439	25,000,000
Illinois	16,000,000	25,000,000
Ohio	23,873,000	26,000,000
Minnesota	32,000,000	33,000,000

In discussing Secretary Fisher's report of but 16,000,000 bushels of wheat in Illinois in 1883, as against 52,000,000 last year, Mr. E. H. Walker, of the New York Produce Exchange, said: "Secretary Fisher's report of the condition of wheat July 1, 1883, applied to counties separately, would make an output, based on his statement of condition, of about 23,500,000 bushels." From this one must infer that the Illinois report as to condition indicates a crop nearly 8,000,000 bushels larger than the estimate of the outcome based on acreage only.

On Friday wheat was stronger, owing mainly to covering shorts caused by the feeling that farmers will hold back new wheat. Prices advanced ½@1c. per bushel. Export inquiry moderate. Speculation less active.

The receipts of wheat at tide-water for the week

ending July 28 increased to 1,148,675 bushels from July 21, when they were 894,048 bushels. The exports from the Atlantic ports for the week ended July 28 amounted to 894,003 bushels, against 775,477 bushels July 21. From September 1, 1882, to July 28, the exports of wheat from the Atlantic ports were 63,441,280 bushels, against 45,957,714 bushels in a corresponding portion of the preceding year, a gain of 17,483,566 bushels.

The total receipts of wheat at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis during the week ended July 28 amounted to 952,951 bushels, against 606,863 bushels in the preceding week, and the shipments to 555,336 bushels, against 849,141 bushels in the week previous.

The visible supply of wheat in the United States and Canada (east of the Rocky mountains) July 28, as against the preceding week, showed a decrease of 43,998 bushels.

The course of the wheat market at New York and Chicago during the past week, has been as follows:

	AT NEW YORK.				AT CHICAGO.	
	Aug	*Sept.*	*Oct.*	*Nov.*	*August.*	*Sept.*
July 27	$1.14⅞	$1.17½	$1.19½	$1.21½	$1.02⅝	$1.04⅝
July 28	1.13⅜	1.16⅛	1.18⅛	1.20⅛	1.01⅜	1.03⅜
July 30	1.13⅞	1.16½	1.18⅜	1.20½	1.01¼	1.03½
July 31	1.13¾	1.16⅛	1.18⅜	1.20⅜	1.01⅜	1.03⅝
Aug. 1	1.13⅛	1.15⅝	1.17¾	1.19⅞	1.00¾	1.02¾
Aug. 2	1.13¾	1.16	1.18⅛	1.20	1.00⅜	1.02⅜

At 1 P.M. Friday, August wheat at Chicago was quoted at $1.01¼, and September at $1.03.

INDIAN CORN.

The markets for Indian corn have been unsettled and lower. There has been free selling during the week here as well as at the west, and the bull corn clique, or what is left of it, failed to rally sufficiently to prevent prices from going steadily down. Fine weather throughout the west, continued heavy receipts at the west and at the Atlantic ports, and but a slightly varying export movement have helped this tendency of prices to a lower range. The quality of the new crop furthermore promises to be better than has been of late reported, and the general opinion as to the aggregate yield is now verging to that view which regards a full crop as almost assured.

The receipts of Indian corn at the Atlantic ports for the week ended July 28 were 1,436,457 bushels, against 1,505,942 in the preceding week, while the exports from the same points amounted to 1,016,622 against 984,693 bushels. From September 1 last to July 28 the exports of Indian corn were 42,619,928 bushels, against 25,526,059 bushels in a like portion of 1881–82. The visible supply of Indian corn in the United States and Canada, east of the Pacific coast, July 28, had decreased 939,837 bushels as compared with July 21. The total receipts of corn at Chicago, Milwaukee, Detroit, Toledo, Indianapolis, Peoria and St. Louis, for the week ending July 28, were 1,932,548 bushels, against 1,853,518 the week preceding, and the shipments were 1,259,548 bushels, against 1,526,361 in the preceding week.

The closing prices of Indian corn at New York and at Chicago at 1 p.m. for the past week were:

	At New York.			*Chicago.*	
	Aug.	*Sept.*	*Oct.*	*Aug.*	*Sept*
July 27	.62	.62⅜	.62¾	51¾	.51⅝
July 28	.61⅛	.61⅞	.62⅛	.51	.50¾
July 30	.60½	.61½	.61¾	.50⅞	.50¾
July 31	.60	.61⅛	.61⅝	.50⅜	.50⅜
Aug. 1	.60¼	.60¾	.61⅛	.49⅞	.49⅞
Aug. 2	.60	.60⅛	.60¾	.49½	.49⅞

On Friday corn was also stronger and a small advance was recorded. Exports slow and speculation moderate.

Corn at Chicago at 1 p.m. yesterday was for August 50¼c. and for September 49¾c.

The prices of breadstuffs in New York last evening, as against those of the Friday preceding and the corresponding date last year, were as follows:

PRICES OF BREADSTUFFS IN NEW YORK.

	July 27.	*Aug. 3.*
No. 2 flour	$2.40 @3.35	$2.65 @3.40
Superfine flour	3.25 @3.50	3.30 @3.50
Com. extra flour	3.85 @4.10	3.85 @4.20
West India shipping flour	5.80 @5 85	5.85 @5.90
South American shipping flour	5.45 @6.15	5.45 @6 15
Winter wheat, family flour	5.00 @7.00	5.00 @7.00
Winter wheat, patent flour	6.10 @7.25	6.75 @7.25

THE BREADSTUFFS MARKETS.

[By Telegraph to BRADSTREET'S.]

From Philadelphia, Pa.: There has been a good home trade in flour at very steady prices, but little demand for export. The grain markets have continued dull with a general downward tendency. Speculation has been very tame and shippers' limits in nearly all cases have been too low to admit of business, although there has been considerable inquiry for both wheat and corn.
